MATH INQUIRERS HOLIDAY PROGRAM

What Learners Get

Everything your child receives in the Math Inquirers Holiday Program

Notice it. Test it. Explain why.

Primary 1 • 10 lessons • 5 weeks • small groups (up to 8 per tutor) • live online from home

Notice it. Test it. Explain why.

In one line

Your child gets 15 hours of hands-on maths thinking with a tutor, a printed workbook and cut-out kit posted to your home, a stamped Inquiry Journal, and the chance to choose harder puzzles at any time.

In the lessons

- **Teaching time.** Ten lessons of 90 minutes each, two a week for five weeks (15 hours in all).
- **Ten topics.** Number patterns, number bonds, picture graphs, repeating and growing patterns, working backwards, money, 2D shapes, logic and sorting, length, and mixed puzzles.
- **A clear routine.** Every lesson follows the same routine: warm-up, explore with objects, mini-lesson, brain break, worksheet, talk time and exit ticket. Children know what to expect.
- **Small group.** A small group of up to 8, so the tutor can ask each child "How do you know?"
- **A way of thinking.** Every child learns the four Inquirer rules: Notice the pattern. Test it with objects. Check your answer. Explain why.
- **Three levels of questions.** Every lesson has three printed pages: Start here for everyone, Think harder, and Go further. Any child may choose any of them at any time, and nobody is placed in a group.

What the child takes home

Item	What it is	When
Student workbook	58 printable pages: 10 lessons with Start here, Think harder, Go further and Investigation pages, plus the cut-out kit	Weekly pages by email; full book at the start
Inquirer Kit (cut-outs)	Ten-frames, counters, number strips 0 to 20, play coins, paper cube strips, 24 sorting tiles. Nothing needs to be bought.	Week 1, 3 and 5 pages

Inquiry Journal	A stamp page on the workbook cover. The tutor stamps a box after each lesson.	Every lesson
Exit ticket	One short question at the end of each lesson to show what they understood	Every lesson
Certificate of Completion	A printable certificate with the child's name	Week 5
Weekly parent email	That week's workbook pages plus one "explain why" question to try at the dinner table (5 minutes, no pencil)	Weekly

Progress and feedback

- **Progress marks.** The tutor records each child after every exit ticket: secure (correct and can explain), developing, or needs help.
- **Readiness tracker.** After each lesson the tutor notes four signs of how the child is thinking: solving a Go further question alone, finding a second way, explaining a pattern, and stretching it to a new case. These notes are for the tutor only.
- **A path to go further.** Every child can choose Go further and the Investigation in every lesson. There is also a short challenge session open to all children in the next holiday.
- **Parent feedback.** Parents get a short, honest note about how their child thinks, not just a score.

Skills your child builds

- Spotting and continuing patterns, and saying the rule
- Splitting numbers (number bonds) and checking sums two ways
- Reading and making picture graphs and asking "is this fair?"
- Working backwards from an answer
- Counting and making amounts with coins
- Naming shapes and counting sides and corners
- Sorting and solving logic clues
- Measuring with units and comparing lengths
- Explaining thinking out loud, in words and drawings

What is not included

- It is enrichment. It does not replace school maths or follow a school syllabus, and it is not linked to MOE or the Gifted Education Programme.

- No exam or ranking. The tutor's notes only guide what to offer next and are not shared between families.

Planned price (to confirm)

S$650 per child for the 15-hour programme (S$65 a lesson), with the printed workbook, cut-out kit and all materials included. Introductory price for the first intake: S$500 (S$50 a lesson).
