

LEVEL 1 • TERM 4 • LESSON 4 • FOR PARENTS

4 Cubes and Views

WHAT WE DID

We built stacks of blocks, counted a cube hidden behind another, read a top view as numbers, and folded paper to see how many dots one dot makes when it is opened. Fold twice and punch once, and a stack with a hidden cube, go past the Primary 1 syllabus on purpose.

> **A picture can hide a cube. The top view numbers count every cube.**

TRY AT HOME (5 MINUTES)

1. Build a stack with 6 to 8 blocks. Draw its top view with a number in each square. Does the total match?
2. Fold a paper in half. Make a pencil dot away from the fold. Ask: how many dots when it is open?
3. Fold it twice and make one dot. How many dots? (4)

When your child is stuck

Let your child use the blocks and the paper, and wait 10 seconds before helping. Please do not punch real holes: pencil dots are enough. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- stack: cubes piled up
- top view: the stack seen from above, a number in each square
- fold line: where the paper bends
- layers: the pieces of paper pressed together

Good questions

- How many cubes can you not see?
- What does each number on the top view say?
- How far is each dot from the fold?

Have ready for next lesson

- Your Term 4 book (Book 7): tear out the pair-cards page along the dashed line, then a grown-up cuts out the 12 cards
- The paper squares and blocks are not needed again: keep them for puzzles at home
- A pencil, a rubber and paper

Next lesson

Next lesson: Spot It. Online practice: your tutor will share the link. The recording has the tutor, the shared screen and any voice that is unmuted. Please do not share the link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to choose a way to solve a problem, and to make and test their own puzzles. We share what we see in your child's thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
