

LEVEL 1 • TERM 1 • FOR GROWN-UPS

The Term 1 end-of-term check: a note for grown-ups

In the last lesson of the term your child does a short check on paper: 10 questions, one from each lesson of the term, and one optional Think harder question. It takes about 20 minutes. It helps us see what each child has learned and what to practise next. It is not a pass or fail test. No mark is shared, there is no league table and nobody is compared with anyone else.

Before the lesson

- Print the 4-page check sheet at 100% (actual size, not fit to page). The bar at the foot of page 4 must measure 10 cm with a ruler.
- Keep the sheet folded or in an envelope until the tutor says to open it.
- Have a pencil, a rubber, a ruler with centimetres and a quiet table. Counters and fingers are fine.

During the check

- Sit nearby. You may ask the tutor to read a question again, but please do not give answers or hints.
- Skipping a question is fine. If your child is upset, you may stop at any time.
- The camera shows your child and the table; the paper stays flat on the table.

After the lesson: sending the sheet privately

- The same day, take ONE clear photo of each of the 4 pages: page flat, straight from above, the whole page in view. Check your child's name is on each page.
- Send the photos to the program's business WhatsApp, +65 9880 5962. Please send them to this number only: not to a tutor's own phone, not to the class chat, and never through a child.
- We delete the photos from the business WhatsApp after the progress note is sent.

What you get back. Within a few days we send you a short note: the term line, a progress word for each of four areas (Showing this often, Getting there, Just beginning), one thing your child did well and one next step. It is never a mark or a comparison. If you would rather not do the check, tell us: that is fine.

Missed the lesson or need another time? Every lesson is recorded and the check can be taken at the make-up slot.

Your child's paper, photos and note are treated as private: we never show them to other children or families, and we never compare children. Math Inquirers by Preciouslyours Pte Ltd.
