TUTOR GUIDE • LEVEL 1 • TERM 4 • LESSON 5 OF 10

Spot It

Big idea: Compare one feature at a time. To find what is different, look at one thing at a time: the shape, how many, how big, the pattern and which way it faces. Then you can spot the odd one out.

90 minutes • live online or face to face • up to 8 children • ages 6-8 • Notice it. Test it. Explain why.

1. At a glance

Strand	Not a listed Primary 1 outcome as a lesson. Describing and sorting shapes is Primary 1 (Geometry, p. 32); patterns by size, shape, colour or orientation are Primary 2 (Geometry, p. 34) (Comparing two pictures one feature at a time: shape, number, size, pattern (describing and sorting shapes is Primary 1, p. 32); The odd one out and a missing piece in a tile pattern; a repeating pattern and its 11th tile (complete a pattern is Primary 1; patterns with orientation are Primary 2, p. 34); A shape turned and a shape flipped (orientation: beyond Primary 1, Primary 2 idea, p. 34)) Strand label for the tutor only. This is an added lesson (the plan says: Spot It, a perception lesson) and it is not a listed Primary 1 content outcome. It practises looking carefully and saying what is the same and what is different, one feature at a time, which is the same habit as describing and sorting shapes. BEYOND PRIMARY 1 ON PURPOSE at Think harder and Go further only: an odd one out where four tiles share one hidden feature, the missing piece of a 2 by 2 tile pattern, the 11th tile of a repeating pattern, and Shadow Match (which shape is the same shape turned, not flipped: orientation is a Primary 2 idea, p. 34). Named puzzle: Shadow Match. The plan marks this lesson safest to skip and gives it thin evidence (visual perception is partly a practice effect): make no promise about contests or results. Wording rule (Term 1 audit, pre-flight D18): wrong working is always 'a child' or 'a child in another class', never a cast name. No Primary 1 paper in the 32 files read holds a spot-the-difference item, so the wording is unverified; the nearest P1 forms are 'Circle the shape that comes next' and 'grouped by shape, size or colour'. Printed books are black and white, so the pattern feature (plain, stripes, dots) is used instead of colour. Owner decisions, 22 and 23 Oct 2026: strong content with scaffolding, said plainly to families; every lesson names a beyond item. Do not describe the lesson as MOE-aligned. Non-routine types (tutor only): the odd one out (logic), say which feature differs and why (explain), a repeating pattern and its 11th tile.
Objectives	• Say what is different between two pictures one feature at a time: shape, number, size, pattern or turn. • Say whether two pictures are the same, and count the differences. • Find the odd one out in a row and say which feature makes it odd. • Think harder: find the odd one out when four tiles share one hidden feature, find the missing piece of a 2 by 2 tile pattern, find the two tiles that are the same picture turned, and say which tile is the 11th in a repeating pattern. • Go further: Shadow Match (a shape turned, not flipped), find the odd one out for pattern and then for size in the same row, and make your own odd one out.
Joining cold	**Remember warm-up covers:** Comparing two lines by laying squares along them (holiday measuring, taught again with a picture); Naming a picture one thing at a time: the shape, how many, how big (taught again with a picture); Saying what changed between two rows of counters (taught again with a picture). Only counting to 10 and comparing two small numbers. Nothing from the lessons before is needed: the warm-up re-teaches comparing two lines, naming a picture one thing at a time and what changed between two rows. The words pattern, turn and odd one out are taught in Explore and the Mini-lesson. Safe to miss: no other lesson needs it, but Mi's Challenge Quest in the last lesson of the year has a gate on spotting the odd one out. A child who misses it watches the recording and does workbook pages 1 and 2. A child who joins here cold can follow: the warm-up re-teaches comparing, and Start here keeps to two pictures of at most 4 tiles.

Child materials	• Your Term 4 book (Book 7), workbook pages 1 to 5, and the pair-cards page (page 6): the 12 cards are cut out by a grown-up beforehand and kept in three piles (top row, middle row, bottom row of the page) • No printer or no cutting? Draw 4 small pictures on 4 scraps of paper: 3 the same and 1 different. Make 3 sets • A pencil, a rubber and spare paper
Tutor materials	• The slide deck • Your own set of 12 pair cards, if you wish, to hold up for yourself (not for the children) • A visible clock Nothing needs to be bought. Cards are small pieces: they stay on the table; nothing goes in the mouth or ears; keep them away from younger brothers and sisters. No matches, toothpicks or anything sharp. Nobody cuts during the lesson: a grown-up cut the cards beforehand.
Tiers	Start here (6 questions, pages 1 and 2), Think harder (4, page 3), Go further (3, page 4), Investigation and look-back (page 5), kit page (page 6). Labels are neutral; nobody is told which page they are on.
Beyond Primary 1 (tutor only)	Shadow Match at G1: A shape made of 4 squares is shown, and the child chooses which of four other shadows is the same shape turned: not the shape flipped like a mirror, not a shape with another number of squares, not a different shape. Turning (orientation) is a Primary 2 idea (p. 34), and a flip is not taught before Primary 4 (symmetry). Also at Go further: the odd one out for pattern and then for size in the same row (the odd one depends on what you check). Named puzzle: Shadow Match. Never in Start here, never advertised to children.
Contest-style move	Used at Think harder, Go further and the Investigation: the odd one out: four tiles share one hidden feature, find the one that does not (logic); say which feature differs, and which tile is odd when you look at pattern only or size only (explain); a repeating pattern: which tile is the 11th, and which tile number is the 4th square (pattern); the missing piece of a 2 by 2 tile pattern: look across, then look down; Shadow Match: the same shape turned is not the same as the shape flipped. Never advertised to children or parents.

Before the lesson

- Solve every workbook question yourself first. Check the answers: S1 size, number, turn; S2 Yes and No; S3 C and pattern; S4 1; S5 3 and 1; S6 A and D; T1 C and number; T2 C; T3 A and C; T4 circle and 10; G1 second; G2 D and B; G3 any row of three alike and one different in just one thing; I1 size, then any tile that differs in two things.
- Tell parents a week before: the pair-cards page (page 6 of Book 7) needs 12 cards cut out by a grown-up, with the three rows kept as three piles. The next lesson needs Book 8 (lessons 36 to 40) in the house, with its paper-people page torn out and the 8 people cut out. Check that every family has Book 8 before the next lesson. Printing and postage are included in the program fee (owner decision, 23 Oct 2026). Parcel policy (draft, owner to confirm): a missing or damaged book is reported, the pages go out as a PDF straight away and there is one free resend; a second loss is discussed. Delivery name, address and phone are deleted 30 days after the parcel is confirmed delivered, or after any resend is finished, whichever is later.
- Have the slides open. Have your own set of pair cards to look at if you wish. Practise the copy-and-change break. When you read a pair of pictures, say the five things in the same order every time: shape, how many, how big, which pattern, which way.
- Check the recording captures the tutor and the shared screen. Children's video is excluded; any unmuted voice is recorded. Greet the whole group first, say the notice, then start the recording; avoid first names while it runs.
- Be plain with families: describing and sorting shapes is Primary 1; patterns by size, shape, colour or orientation are Primary 2; the hidden shared feature, the missing piece, the 11th tile and Shadow Match go beyond Primary 1 on purpose. Do not call the lesson MOE-aligned and do not promise contest results: the lesson is marked thin evidence in the plan.
- Wording rule: wrong working belongs to 'a child' or 'a child in another class', never to a cast name and never to a child in the group. Printed books are black and white, so the lesson uses pattern (plain, stripes, dots) and not colour. Slides keep the answers off the screen while you ask: read every question aloud.

Safeguarding and recording (this lesson)

- Pair cards and paper pieces are small. They stay on the table: nothing goes in the mouth or ears. No matches or toothpicks. Nobody cuts during the lesson; a grown-up cut the cards beforehand.
- This lesson uses the main room only: no breakout rooms, so the tutor sees every camera. A parent sits nearby but does not give answers.
- Nobody holds paper, cards or a drawing up to the camera: a gallery view shows everyone. Children tick their own work against the answer slide, answer together on a count of three, or show fingers or a thumb for a choice. There is no private chat.
- Wrong working belongs to 'a child' or 'a child in another class', never to a child in the group, and never to a name. Never read out a child's name with a right or wrong answer. The recording has the tutor, the shared screen and any voice that is unmuted. Children may mute and keep their cameras off. A child's page is never shown.
- Movement break: children need a little clear space, soft shoes or socks on a safe floor, no stairs and no running. Moves are gentle; a child may stay seated and move one arm.
- A child who is still stuck ticks 'I am still stuck' on the look-back page. A grown-up may photograph that page after class and send it to the business WhatsApp only; photos are kept for 90 days after the program ends. The tutor then helps in the open session next lesson. No private messages to children, and no personal phones.
- The look-back is never collected in front of the group or read out. A pass is always allowed.

2. Timing plan (90 minutes exactly)

Minutes	Part	Min	Slides	Script fills
0–2	**Opening**	2	1: Spot It	1:31
2–8	**Remember warm-up**	6	3: Warm-up: two lines, Warm-up: look at one thing, Warm-up: what changed?	4:53
8–12	**Sneak-peek puzzles**	4	1: Sneak-peek puzzles	2:59
12–23	**Explore**	11	5: Explore: the odd card, The odd ones out, Explore: two pictures, Three differences, What did we notice?	8:36
23–34	**Mini-lesson**	11	10: Five things to check, Same shape, turned, The odd one out, C is bigger, The missing piece, B is the missing piece, A pattern that repeats, Tile 9 is a circle, Same or different?, 2 differences	9:10
34–38	**Brain break**	4	1: Copy and change break	3:18
38–70	**Workbook**	32	5: Workbook page 1: Start here, Check page 1, Workbook page 2: Start here, Check page 2, Choose your next page	23:47
70–76	**Talk time**	6	2: Talk and explain, Back to the sneak-peek	4:22
76–82	**Exit ticket**	6	2: Exit ticket, Check the exit ticket	4:14
82–85	**Look-back**	3	1: Look-back	2:06
85–90	**Flex time and goodbye**	5	1: Well done, inquirers!	0:22
	Total	**90**		**65:19**

The script needs 65:19 of the 90:00 when children are quick. A slow class (speech 10% slower, children and slide changes 20% slower) needs 77:26. The last 5 minutes are a standing buffer: if you are behind, use them; do not start anything new. Clock checks: minute 12 (end of sneak-peek), minute 38 (start of workbook), minute 70 (talk time). If more than 2 minutes behind at minute 38, skip in this order: Start with: shorten Explore round 3 (what did we notice) to one question; Then: cut the repeating pattern (s-m4) and keep it for the workbook; Then: take the extra minutes from the flex time. Never skip the look-back or the camera and privacy moments.

3. Lesson script

Times show when each line should start, counted from the start of the lesson, if you keep to the script. SAY lines are spoken in your own words. REC lines are the short recording-voice cues for children who watch later. Children answer aloud, with fingers or hands; no private chat; no boards held up in front of the group.

0:00 – 2:00 Opening

script 1:31 of 2:00

0:00	SLIDE	Show slide **Spot It** (s-title)
0:10	DO	Greet the whole group warmly, before the recording starts. Check that you can see each child, or ask the grown-up. [0:12]
0:22	SAY	Hello, inquirers! Pencil ready, and your pair cards on the table. Cameras can be on or off, as you like.
0:32	SAY	This lesson is recorded so a friend who is away can catch up. The recording has me, the shared screen and any voice that is not muted. You may keep your microphone and camera off.
0:50	DO	Start the recording now. Do not use children's first names on the recording. [0:05]
0:54	REC	*If you are watching the recording: hello! Get a pencil, paper, your workbook and your pair cards. Pause or rewind any time.*
1:06	SAY	Microphone off until I ask you to speak. To answer, say it with me on three, show fingers, or give a thumbs up. Nobody holds paper up to the camera.
1:20	SAY	Today we are spot-it detectives. We look at two pictures and say exactly what is different, one thing at a time.
	NOTE	Say the recording statement and the microphone routine in the same words every lesson, for anyone who joined late. Say the notice before you start the recording, and do not use children's first names once it is running. The routine and the four inquirer rules were introduced earlier in the year: do not re-teach them.
	NOTE	Plain statement for families when it comes up: describing and sorting shapes is Primary 1 and patterns by size, shape, colour or orientation are Primary 2, so the odd-one-out with a hidden feature, the missing piece, the 11th tile and Shadow Match go beyond Primary 1 on purpose. There is no school-paper evidence for this lesson, so the wording is unverified. It is the plan's thin-evidence lesson: make no promise about contests.
	NOTE	New here? Say in one minute: our three rule words (notice it, test it, explain why); a guess is fine and you can always pass; after Start here you may choose Think harder, Go further or the Investigation; nobody holds paper to the camera. A child without pair cards draws 4 small pictures on paper: 3 the same and 1 different.

2:00 – 8:00 Remember warm-up

script 4:53 of 6:00

2:00	SLIDE	Show slide **Warm-up: two lines** (s-rem1)
2:12	REC	*Recording: join in! Say your answers out loud before I say them. Pause if you need longer.*
2:20	SAY	Two lines made of squares. Count the squares in each line.
2:26	ASK	Which line is longer? How many squares longer? [wait about 35 s for answers]
3:05	CHILDREN	Your turn. A line of four squares and a line of nine squares. Which is longer, and by how many? Say it with me. [0:30]
3:35	SLIDE	Show slide **Warm-up: look at one thing** (s-rem2)
3:47	SAY	Look at one thing at a time. Tile one. Tile two.
3:52	ASK	For each tile, what shape is it? How many are there? How big is it? [wait about 40 s for answers]
4:40	CHILDREN	Your turn. Two big squares. Say the shape, how many and how big. [0:25]
5:05	SLIDE	Show slide **Warm-up: what changed?** (s-rem3)

5:17	**SAY**	Two rows of counters. Touch each counter once.
5:21	**ASK**	What is different? Which row has more? How many more? [wait about 35 s for answers]
6:01	**CHILDREN**	Your turn. A row of six and a row of four. Which has fewer, and by how many? [0:30]
6:31	**CHILDREN**	Say each answer with me: the bottom line, two; circle, one, big; triangle, three, small; how many, the bottom row, one. Now the your-turn answers: the second line, five; square, two, big; the second row, two. Then stretch your fingers. [0:22]
	IF STUCK	If a child is unsure how to compare the lines, count the squares in each line with a finger and say each number. For what changed, touch each counter once. For the picture, say the shape first, then how many, then how big.
	NOTE	Answers: the bottom line is longer, by 2; tile 1 is a circle, 1, big; tile 2 is triangles, 3, small; the rows differ in how many, the bottom row has 1 more. Your turns: the second line, by 5; square, 2, big; the second row has 2 fewer. Children answer with a whisper, fingers or hands. Nobody writes. Joining cold: all you need is counting to 10 and the pictures.

8:00 – 12:00 Sneak-peek puzzles

script 2:59 of 4:00

8:00	**SLIDE**	Show slide **Sneak-peek puzzles** (s-sneak)
8:12	**REC**	*Recording: pause now and try both puzzles on your paper. Guessing is fine. Press play for the next part.*
8:22	**SAY**	Two sneak-peek puzzles: ideas we have not learnt yet. A guess is a great start, and I do not know is welcome. Nobody is marked.
8:34	**READ**	Puzzle one. Count the fish in each row. Write the two numbers.
8:41	**CHILDREN**	Children write on their own paper. [0:35]
9:16	**READ**	Puzzle two. Three of the four triangles are alike. One is different. Which one is it? I know because blank.
9:26	**CHILDREN**	Children write or draw their answer. [1:25]
10:51	**SAY**	Keep your paper. Nobody shows it. We will check our own thinking later, at Talk time.
	NOTE	Puzzle 1 answer: 4 fish and 5 fish. Puzzle 2 answer: C, the triangle that points down (it is turned). Look for good ideas to praise later (a child who said it faces the other way). Do not write scores or keep a list.

12:00 – 23:00 Explore

script 8:36 of 11:00

12:00	**SLIDE**	Show slide **Explore: the odd card** (s-explore1)
12:12	**REC**	*Recording: pause now. Lay out each set of cards and find the odd one. Then look at the two pictures. Press play when ready.*
12:24	**SAY**	Today we are detectives. Take your pair cards. Keep each row of four together. Lay out set one, the top row, in a line.
12:36	**READ**	Three cards are alike. Find the odd one. What is different about it?
12:43	**CHILDREN**	Children lay out set one and find the odd card. Tutor scans the cameras and listens. [1:10]
13:53	**ASK**	Who would like to tell us about set one? A whole sentence, please. [wait about 35 s for answers]
14:35	**SAY**	Now set two, the middle row. Then set three, the bottom row.
14:41	**CHILDREN**	Children lay out sets two and three one after the other, find each odd card and say what is different, aloud to their grown-up. [2:00]
16:41	**SLIDE**	Show slide **The odd ones out** (s-explore1-ans)
16:49	**SAY**	Set one, the cookie. Set two, the spider, with more legs. Set three, the jar, with a lid. All different in what they are.
17:01	**SLIDE**	Show slide **Explore: two pictures** (s-explore2)
17:13	**SAY**	Round two. Two pictures, three tiles each. Look at tile one, then tile two, then tile three.

17:21	**READ**	What is different?
17:23	**CHILDREN**	Children look at one tile at a time and say what is different. Wait before anyone answers. [1:15]
18:38	**ASK**	Tile one first. What is different? [wait about 30 s for answers]
19:11	**SLIDE**	Show slide **Three differences** (s-explore2-ans)
19:19	**SAY**	Tile one, size. Tile two, number. Tile three, pattern.
19:23	**SLIDE**	Show slide **What did we notice?** (s-explore3)
19:31	**ASK**	How did you find each difference? What did you say about the odd card? [wait about 50 s for answers]
20:28	**SAY**	We looked at one tile and one thing at a time. Next we say it exactly.
	IF STUCK	A child who cannot find a difference: cover all but one tile and ask, what shape, how many, how big. A child who says they look different: ask, how are they different? A child with no cards draws 4 small pictures and uses them.
	NOTE	Main room only; you cannot see small cards, so ask children to say it aloud and show fingers. Answers: set 1 the cookie, set 2 the spider, set 3 the jar; tile 1 size, tile 2 number, tile 3 pattern. Do not say the rule before the children do.

23:00 – 34:00 Mini-lesson

script 9:10 of 11:00

23:00	**SLIDE**	Show slide **Five things to check** (s-m1)
23:08	**REC**	*Recording: keep watching and look at each picture one thing at a time. Rewind if you miss a step.*
23:18	**SAY**	There are five things to check: the shape, how many, how big, which pattern, and which way it faces. Look at two triangles.
23:29	**ASK**	What is the same? What is different? [wait about 55 s for answers]
24:28	**SLIDE**	Show slide **Same shape, turned** (s-m1-ans)
24:36	**SAY**	The same: shape, number, size and pattern. Different: which way it faces. Triangle B is turned. A turned shape is still the same shape.
24:48	**SLIDE**	Show slide **The odd one out** (s-m2)
24:56	**SAY**	The odd one out. Four tiles are alike and one is not.
25:02	**ASK**	Which tile is the odd one out? What is different about it? [wait about 65 s for answers]
26:12	**SLIDE**	Show slide **C is bigger** (s-m2-ans)
26:20	**SAY**	Tile C. It is bigger, so the difference is size. Four were the same size and one was not.
26:30	**SLIDE**	Show slide **The missing piece** (s-m3)
26:38	**SAY**	A missing piece. Look across. Then look down.
26:42	**ASK**	What changes when we go across? What changes when we go down? Which tile goes in the box? [wait about 90 s for answers]
28:21	**SLIDE**	Show slide **B is the missing piece** (s-m3-ans)
28:29	**SAY**	Across, plain then stripes. Down, circle then star. So the missing tile is a star with stripes: B.
28:38	**SLIDE**	Show slide **A pattern that repeats** (s-m4)
28:46	**SAY**	A pattern that repeats. Find the part that comes again and again.
28:52	**ASK**	Which shape is tile nine? Count in threes: three, six, nine. [wait about 65 s for answers]
30:02	**SLIDE**	Show slide **Tile 9 is a circle** (s-m4-ans)
30:10	**SAY**	Square, square, circle repeats. Tiles three, six and nine are circles. Tile nine is a circle.
30:18	**SLIDE**	Show slide **Same or different?** (s-m5)
30:26	**SAY**	Two pictures. Check every tile, one thing at a time.

30:32	**ASK**	Are they the same? How many differences are there? [wait about 75 s for answers]
31:51	**SLIDE**	Show slide **2 differences** (s-m5-ans)
31:59	**SAY**	Not the same. Two differences. Tile one is smaller. Tile two has four circles, not three. Tile three is the same.
	IF STUCK	If a child says they look different, ask: what is different, the shape, how many, how big, the pattern or which way? If a child cannot find the missing piece, cover the pictures and say what changes across, then down. If a child cannot find tile 9, count in threes on fingers: three, six, nine.
	NOTE	Key words to use every time: shape, number, size, pattern, turn, odd one out. Fixed question forms: What is different? Which tile is the odd one out? How many differences? The slides keep the answers off the screen while you ask: read every question aloud. Class numbers are not used in the workbook.

34:00 – 38:00 Brain break

script 3:18 of 4:00

34:00	**SLIDE**	Show slide **Copy and change break** (s-break)
34:08	**REC**	*Recording: stand up and join in! Copy the move, then change one thing.*
34:14	**SAY**	Stand up and get a sip of water. Copy my move. Then I change one thing.
34:22	**CHILDREN**	Call movements: arms up, arms out, one big step forward. Then change one thing each time and ask what is different (one arm lower, a small step, turn to face the side). Seated children move one arm. [2:55]

38:00 – 70:00 Workbook

script 23:47 of 32:00

38:00	**SLIDE**	Show slide **Workbook page 1: Start here** (s-ws1)
38:08	**REC**	*Recording: pause now and do workbook page 1. When you finish a page, press play to check it.*
38:17	**READ**	Page 1, Start here. Question 1: look at the two pictures. For each tile, circle what is different: shape, number, size, pattern or turn. Question 2: are the two pictures the same? Circle Yes or No, twice. Question 3: which tile is the odd one out? Circle A, B, C or D. Then say what is different.
38:48	**CHILDREN**	Page 1, questions 1 to 3. Tutor walks the cameras, asks how do you know. Wait 10 seconds before helping. [9:00]
47:48	**SLIDE**	Show slide **Check page 1** (s-ws1ans)
47:56	**READ**	Question 1: size, number, turn. Question 2: part a, Yes. Part b, No. Question 3: C, and the pattern is different. Tick your own page with a tick.
48:11	**SAY**	After question 3 you may choose: carry on, or try Think harder. Everyone may choose, at any time.
48:20	**SLIDE**	Show slide **Workbook page 2: Start here** (s-ws2)
48:28	**READ**	Page 2. Question 4: two shelves. How many more apples does shelf 2 have? Question 5: how many differences are there between the two pictures? Which tile is the same in both? Question 6: which two tiles are the same? Write the two letters.
48:52	**CHILDREN**	Page 2, questions 4 to 6. [8:20]
57:12	**SLIDE**	Show slide **Check page 2** (s-ws2ans)
57:20	**READ**	Question 4: one more apple. Question 5: three differences, and tile one is the same. Question 6: A and D. Tick your own page.
57:33	**SLIDE**	Show slide **Choose your next page** (s-choice)
57:41	**SAY**	When you have finished Start here, you can choose Think harder, Go further or the Investigation. Everyone may choose. You can swap at any time. Anything not finished is for home too.
57:57	**MOVE**	Stand and reach up for 30 seconds, then sit down and choose.

58:27	**CHILDREN**	Choice time: Think harder (page 3), Go further (page 4), the Investigation (page 5), or finish and check your own work. Tutor never says who is on which page. If Start here took the whole time, say that pages 3 to 5 are for home, and keep the time. [3:20]
	IF STUCK	Q1: cover all but one tile in each picture. Q2: check every tile, one thing at a time. Q3: look at one thing at a time; which one are four alike in? Q4: count the apples on each shelf. Q5: tick the tiles that are different. Q6: find the two that match in every thing.
	IF STUCK	A child who is still stuck ticks I am still stuck on the look-back page. The grown-up can photograph that page after class and send it to the business WhatsApp (never a personal phone). You then help in the open session in the next lesson. Never a private message to a child.
	NOTE	Think harder has the odd one out with a hidden feature, the missing piece, two tiles that are the same turned, and a repeating pattern. Go further has Shadow Match (beyond Primary 1 on purpose), the odd one out for pattern and then for size, and making your own. Do not announce who is on which page. Start here takes a middle child about 17 minutes, so the choice time may be short. Slow class: take the extra minutes from the flex time and do not skip the answer slides.

70:00 – 76:00 Talk time

script 4:22 of 6:00

70:00	**SLIDE**	Show slide **Talk and explain** (s-talk)
70:08	**REC**	*Recording: pause. Tell a grown-up how you can say exactly what is different between two pictures.*
70:16	**READ**	A child in another class looks at two pictures. She says: they are not the same. Is that enough? What could she say to be exact?
70:30	**CHILDREN**	Think about it. You may look at your pair cards. [0:50]
71:20	**CHILDREN**	Talk to the grown-up next to you or to your screen for one minute. Use the sentence starter: I think... because... [0:40]
72:00	**ASK**	Who would like to share? Volunteers first. A pass is always fine. [wait about 100 s for answers]
73:46	**SLIDE**	Show slide **Back to the sneak-peek** (s-sneakans)
73:54	**SAY**	Remember the sneak-peek? Puzzle one: four fish and five fish. Puzzle two: C, the triangle that points the other way.
74:04	**ASK**	Did anyone change their mind while we worked? You can just nod. [wait about 12 s for answers]
	NOTE	Model answer: not yet. She should say which thing is different: the shape, how many, how big, which pattern or which way it faces, one thing at a time. Volunteers first; never call a child by name to answer; no tallies, no rankings. Praise the reason, not the speed.

76:00 – 82:00 Exit ticket

script 4:14 of 6:00

76:00	**SLIDE**	Show slide **Exit ticket** (s-exit)
76:08	**REC**	*Recording: pause and do the exit ticket on your own. Then press play to check it.*
76:16	**SAY**	Exit ticket. Three questions, on your own, without looking back. Write your answers on page 5.
76:24	**READ**	E1. Look at the two tiles. What is different? Circle shape, number, size, pattern or turn. E2. Which tile is the odd one out? Circle A, B, C or D. E3. How many differences are there between the two pictures? Write the number.
76:47	**CHILDREN**	Children answer E1 to E3 on their own. [3:10]
79:57	**SLIDE**	Show slide **Check the exit ticket** (s-exitans)
80:05	**READ**	E1: pattern. E2: C. E3: two differences.
80:09	**SAY**	Tick your own ticket with a tick. Well done.
	NOTE	Nothing is collected or marked live. Children tick their own ticket. If many children miss one question, spend two minutes on it at the start of the next lesson, in the open session, no names. Do not read out any child result.

82:00 – 85:00 Look-back

script 2:06 of 3:00

82:00	SLIDE	Show slide **Look-back** (s-look)
82:08	REC	*Recording: pause and fill in your look-back box. You can pass.*
82:14	SAY	Look-back. Tick what was hard and what helped you. Write or draw one thing you did well. If you like, tick one thing to try next time. You can pass. Nobody reads it out. If you tick I am still stuck, ask your grown-up to take a photo of this page after class and send it to our business WhatsApp. Then we will help you.
82:46	CHILDREN	Children fill in the look-back box on page 5. [1:20]

85:00 – 90:00 Flex time and goodbye

script 0:22 of 5:00

85:00	SLIDE	Show slide **Well done, inquirers!** (s-end)
85:08	SAY	Well done, inquirers. Next lesson is Count Everything. Please have Book 8 ready, with the paper people cut out by a grown-up. Goodbye, and thank you to the grown-ups.
	SLIDE	Show slide **Go further: the same, turned** (s-opt) *(optional)*
	SAY	Optional, only if you are on time. Three tiles. Which two are the same picture, turned?
	CHILDREN	Short think time, then take two answers. [1:30]
	SLIDE	Show slide **If we have time: pick one** (s-menu) *(optional)*
	SAY	Spare-time menu. If the whole class is ahead, pick one or two activities from the guide (about 4 minutes each).
	NOTE	This is the standing buffer. If you are behind, finish the look-back and say goodbye. Do not start anything new. Optional slide answer: A and B, the same triangle turned. If the whole class is ahead, use the Spare-time menu (guide section 3b) instead of rushing on.

3b. Spare-time menu: if the class is ahead

- Whole class ahead: use the Spare-time menu in the Flex time and the optional Go further slide. Pick one or two activities; do not start new content.
- A few children ahead: they may choose Go further or the Investigation, which are open to everyone. Never label or name a child, and never announce who is ahead.
- Never teach anything the next lesson needs. If the class is ahead, slow down: ask 'How do you know?' and let children explain, rather than rushing on.

Optional time, never added to the 90-minute sum. It comes from the 5-minute flex buffer, from slack in the parts, or from the optional Go further slide.

Activity	Minutes	You say	Recording cue	Answer
Is it always true?	4 (optional)	A child says: a row of 4 tiles always has an odd one out. Is that always true? Test a row of 4 tiles: big, big, small, small.	*Recording: pause. Test a row of 4 tiles: big, big, small, small. Is there an odd one out?*	No. With 2 big and 2 small tiles nothing is the odd one out. An odd one out needs one different tile and all the others the same.
Make a puzzle for your grown-up	4 (optional)	Make a row of 4 tiles with one odd one out. Ask your grown-up to find it and say what is different.	*Recording: pause. Make a row of 4 tiles with one odd one out and ask a grown-up to find it.*	No single answer. Check that the odd tile is different in exactly one thing.
Teach it back	3 (optional)	Pretend a toy says: these two pictures look different. Teach the toy to say exactly what is different, one thing at a time.	*Recording: pause. Teach a toy to say exactly what is different, one thing at a time.*	Use the five things in order: shape, how many, how big, which pattern, which way. Name the one that is different.

4. Questions, answers, hints and common mistakes

Sneak-peek puzzles (minutes 8 to 12)

Puzzle 1 (access): Count the fish in each row. Write the two numbers.

Answer: 4 fish in the top row and 5 in the bottom row.

Puzzle 2 (think): Three of the four triangles are alike. One is different. Which one is it? I know because ___.

Answer: C. It points the other way (it is turned upside down).

Unmarked. Never put answers on boards in front of the group and never read a name with an answer. Reveal the answers where your script says (usually Talk time).

Start here (workbook pages 1 and 2)

S1 **Look at Picture 1 and Picture 2. What is different in each tile? Circle one word.**

(a) Tile 1:
(b) Tile 2:
(c) Tile 3:

Answer: size; number; turn

Hint (say this first): Cover all but one tile. Ask: what shape, how many, how big, which pattern, which way?
Worked solution: Tile 1 is a star in both pictures, but it is bigger in Picture 2, so the difference is size. Tile 2 has 3 squares and then 4 squares, so the difference is number. Tile 3 is the same triangle, but it faces down in Picture 2, so the difference is turn.
Common mistakes: Saying the shape is different when it is only turned.; Saying the pattern is different when it is the same.
Time for a middle child: about 3.5 min.

S2 **Are the two pictures the same?**

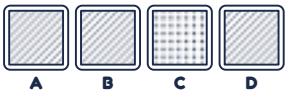

(a) Picture A and Picture B. Circle Yes or No.
(b) Picture C and Picture D. Circle Yes or No.

Answer: Yes; No

Hint (say this first): Check each tile, one thing at a time. Are all the tiles the same?
Worked solution: Picture A and Picture B have the same tiles: 3 stars and one big striped circle, so they are the same. Picture C has 4 triangles and Picture D has 3 triangles, so they are not the same.
Common mistakes: Saying No because the pictures are side by side.; Not checking the number of triangles.
Time for a middle child: about 3.5 min.

S3 **Three tiles are alike. One is the odd one out.**

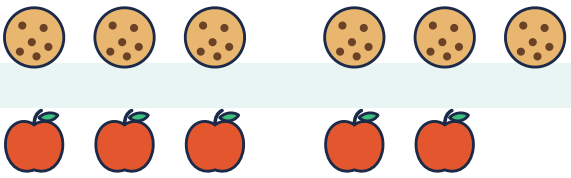

(a) Circle the odd one out: A, B, C or D.
(b) It is different in its:

Answer: C; pattern

Hint (say this first): Check one thing at a time. Which tile has a different pattern?
Worked solution: A, B and D are big squares with stripes. Tile C is a big square with dots. It has the same shape, number and size, so the pattern is different.
Common mistakes: Choosing the tile that is in a different place.; Saying size when the squares are the same size.
Time for a middle child: about 3 min.

S4 **Shelf 1 is on the left. Shelf 2 is on the right.**

Shelf 2 has ☐ more apple than shelf 1.

Answer: 1 more apple

Hint (say this first): Count the apples on each shelf.
Worked solution: Shelf 1 has 3 cookies and 2 apples. Shelf 2 has 3 cookies and 3 apples. The cookies are the same. Shelf 2 has 1 more apple.
Common mistakes: Saying 3 for the number of apples.; Saying the cookies are different.
Time for a middle child: about 3 min.

S5 **Look at Picture 1 and Picture 2.**

(a) There are ☐ differences.
(b) Tile ☐ is the same in both pictures.

Answer: 3; 1

Hint (say this first): Check each tile, one at a time. Tick the tiles that are different.
Worked solution: Tile 1 is the same. Tile 2 has 3 stars and then 4 stars (number). Tile 3 is smaller in Picture 2 (size). Tile 4 faces another way (turn). That makes 3 differences.
Common mistakes: Counting 4 differences because there are 4 tiles.; Missing the turned triangle.
Time for a middle child: about 3.5 min.

S6 **Two of the four tiles are the same picture.**

Tile ☐ and tile ☐ are the same.

Answer: A and D

Hint (say this first): Check one thing at a time. Find the two with the same shape, number, size and pattern.
Worked solution: A and D are both stars with dots. B is a star with stripes (the pattern is different). C is a triangle (the shape is different). So A and D are the same.
Common mistakes: Choosing A and B because both are stars.; Not checking the pattern.
Time for a middle child: about 3 min.

Think harder (page 3): the taught idea in a new setting

T1 **Four of the five tiles have one thing the same. One tile is the odd one out.**

(a) Circle the odd one out.
(b) What makes it the odd one out?

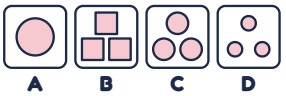

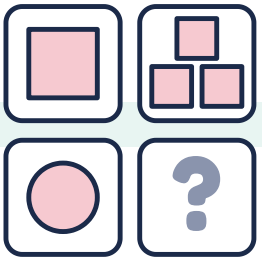

Answer: C; number

Hint (say this first): Check one thing at a time. Look only at how many, then only at the shape.
Worked solution: Look at how many shapes are in each tile. A, B, D and E each have 3. Tile C has only 1. So C is the odd one out and the difference is number. The shapes, sizes and patterns are all mixed, so they cannot be what makes a tile odd.
Common mistakes: Choosing the tile with the different shape.; Choosing the biggest tile.
Time for a middle child: about 5 min.

T2 **Look across, then look down. Which tile is the missing piece?**

Circle the missing piece.

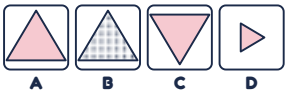

Answer: C

Hint (say this first): Across, what changes? Down, what changes? Then check each option.
Worked solution: Across, 1 shape becomes 3 shapes. Down, a square becomes a circle. So the missing tile is 3 circles, the same size. That is tile C. A has only 1 circle, B has squares, D has small circles.
Common mistakes: Choosing A because the circle is on the left.; Choosing D because it looks neat.
Time for a middle child: about 5 min.

T3 **Two of the four tiles are the same picture, turned. Do not choose a tile that is bigger or has another pattern.**

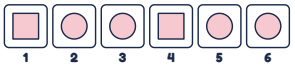

Tile ☐ and tile ☐ are the same, turned.

Answer: A and C

Hint (say this first): Turn your page, or tilt your head. Which two have the same size and pattern?
Worked solution: A and C are big triangles with no pattern. C is A turned upside down. B has dots, so the pattern is different. D is small, so the size is different. So the answer is A and C.
Common mistakes: Choosing A and B because both are big.; Choosing A and D because both look plain.
Time for a middle child: about 5 min.

T4 **A pattern of tiles repeats again and again.**

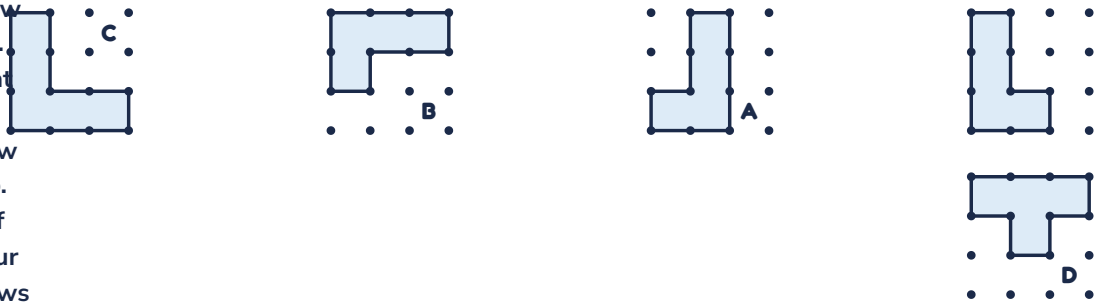

(a) Tile 11 is a:
(b) The 4th square is tile number ☐.

Answer: circle; 10

Hint (say this first): Find the part that repeats. Then count: tile 7 starts it again.
Worked solution: The part that repeats is square, circle, circle. The squares are tiles 1, 4, 7 and 10, so the 4th square is tile 10. Tile 11 comes after tile 10, so it is the first circle of the next part: a circle.
Common mistakes: Saying tile 11 is a square.; Saying the 4th square is tile 4.
Time for a middle child: about 5 min.

Go further (page 4): mastery and extension

G1 **Shadow Match. Look at the shadow on top. One of the four shadows below it is the same shape, turned.**

Circle A, B, C or D.

Answer: B

Hint (say this first): Turn your page a quarter turn. Which shadow looks like the top one now?
Worked solution: The top shadow is a tall L. Turn it a quarter turn to the right and the long part lies flat along the top, with the foot hanging under the left end. That is shadow B. Shadow A is the L flipped like a mirror: its foot points the other way, and a turn cannot do that. Shadow C has 5 squares and shadow D is a different shape.
Common mistakes: Choosing the flipped shadow because it looks nearly the same.; Choosing the shadow with more squares.
Time for a middle child: about 7 min.

G2 **Look at the five tiles. Check one thing at a time.**

(a) If we look only at the pattern, the odd one out is tile ☐.
(b) If we look only at the size, the odd one out is tile ☐.

Answer: D; B

Hint (say this first): First look only at the pattern. Then look only at the size.
Worked solution: Look only at the pattern: A, B, C and E have stripes and D has dots, so D is the odd one out. Look only at the size: A, C, D and E are medium and B is big, so B is the odd one out. A row can have a different odd one out for each thing you check.
Common mistakes: Choosing the same tile for both.; Looking at the pattern and the size together.
Time for a middle child: about 6 min.

G3 **Draw 4 tiles in a row. Three are alike. One is different in just one thing. Many answers are right.**
The odd one is different in its ___.

> **Answer: Many answers are right: three tiles alike and one different in exactly one thing**

Hint (say this first): Draw one tile first. Copy it three times. Then change one thing on one copy.
Worked solution: For example, draw 3 small striped circles and 1 big striped circle. The odd one is different in its size. Check that it differs in just one thing, and that the other three are the same in everything.
Common mistakes: Changing two things on the odd tile.; Making the three tiles different from each other.
Time for a middle child: about 6 min.

Investigation (page 5): Change just one thing

Easy first step: Draw a small circle with stripes. Next to it, draw the same circle, but bigger. What is different? ____
Then: Now draw a tile that is different from your first circle in two things. Write the two things.

> **Model answer: The bigger circle is different in size only. A tile with two things different, for example a big circle with dots, is different in size and pattern. Many answers are right.**

Look for: A child who names one thing for the first tile (size) and two different things for the second tile, such as size and pattern. Credit any clear drawing with the right count of differences. A child who changes the shape and the number has found two things too.
Common mistakes: Saying the circle is a different shape when it is only bigger.; Drawing a tile that is different in three things when asked for two.

Talk and explain (minutes 70 to 76)

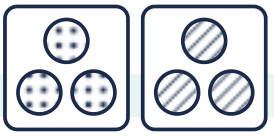

A child in another class looks at two pictures. She says: they are not the same. Is that enough? What could she say to be exact? Sentence starter: I think ... because ...

> **Model answer: Not yet. She should say which thing is different: the shape, how many, how big, which pattern or which way it faces, one thing at a time.**

Look for: A child who names one of the five things (shape, number, size, pattern, turn) or says to check one thing at a time. Not just yes or no. Volunteers first, a pass is always fine, never call a child by name to answer, no tallies.

Exit ticket (minutes 76 to 82): 3 questions

E1 **Look at the two tiles.**
What is different?

> **Answer: pattern**

Worked solution: Both tiles have 3 circles of the same size. One has dots and one has stripes, so the pattern is different.
Common mistakes: Saying number because there are 3 circles.; Saying shape.

E2 **Three tiles are alike. One is the odd one out.**
Circle the odd one out.

> **Answer: C**

Worked solution: A, B and D are circles. Tile C is a star. So C is the odd one out.
Common mistakes: Choosing D because it is last.; Saying there is no odd one out.

E3 **Look at Picture 1 and Picture 2.**
There are ☐ differences.

> **Answer: 2**

Worked solution: Tile 1 faces another way (turn). Tile 3 is smaller (size). Tile 2 is the same. So there are 2 differences.
Common mistakes: Counting 3 differences.; Missing the turned triangle.

Look-back (minutes 82 to 85)

Children tick or write: *Something I did well*; *The hardest part was* (finding the differences; the odd one out; the missing piece; something else); *What helped me* (my pair cards; looking at one thing at a time; saying it aloud; I was not stuck); *Next time I will try* (checking one thing at a time; finding the missing piece; counting the differences; asking a question); *I am still stuck (my grown-up will photograph this page for my tutor)* and *I would like to pass*. Never collected or read out in front of the group. A child who ticks still stuck gets a check-in in the open session next lesson.

5. Home practice and online practice

#	Tier	Question	Answer
H1	Start here	Ali makes a row of 4 shapes: big, big, small, big. Which shape is the odd one out? It is the ___ shape. (Write first, second, third or fourth.)	third
H2	Start here	Picture 1 has 5 stars. Picture 2 has 6 stars. How many more stars does Picture 2 have? There is ___ more star.	1
H3	Start here	Lily makes two pictures of 3 tiles. Tile 1 is the same. Tile 2 is bigger in Picture 2. Tile 3 is dotted in Picture 2 and striped in Picture 1. How many differences are there? There are ___ differences.	2
H4	Think harder	A pattern goes: star, circle, circle, star, circle, circle, and keeps going. What is the 10th shape? It is a ___. (Write star or circle.)	star
H5	Start here	Mei has 2 bags with 3 sweets in each bag and 1 bag with 4 sweets. Are the groups equal? Circle Yes or No.	No

Online practice (`out/l35/practice`, key `t4l35`): 13 items; 8 have a template that makes unlimited similar questions with a computed answer. Every template variant is checked by the validator against a brute-force oracle and the runner's own JavaScript. No timers, no scores, no streaks.

6. Parent line for the term report

Your child is learning to look closely and say exactly what is different, one feature at a time. This week: pictures that differ in shape, number, size, pattern or turn, the odd one out, and a repeating pattern.

Term line (plan, section 5): Your child is learning to choose a way to solve a problem, and to make and test their own puzzles. Add one named strength and one next step from your own observation. No marks, no ranking, no claim of exam results.

7. Slide list

#	Time	Slide	On screen	Speaker note
1	0–2	**Spot It** s-title	TODAY WE WILL: / Spot what is different, one thing at a time. / Find the odd one out. / Find the missing piece.	Lesson 5 of Term 4, 90 minutes. Objective: say exactly what is different between two pictures, one feature at a time (shape, number, size, pattern, turn), find the odd one out and the missing piece of a tile pattern. Plain statement for families: describing and sorting shapes is Primary 1, patterns that change by size, shape, colour or orientation are Primary 2, so the harder items (a hidden shared feature, a missing piece, the 11th tile and Shadow Match, a shape turned and not flipped) go beyond Primary 1 on purpose. This is the plan's thin-evidence lesson: no promise about contests. Time plan: opening 0 to 2, warm-up 2 to 8, sneak-peek 8 to 12, explore 12 to 23, mini-lesson 23 to 34, brain break 34 to 38, workbook 38 to 70, talk 70 to 76, exit ticket 76 to 82, look-back 82 to 85, flex time and goodbye 85 to 90 (the buffer: do not start anything new). Think harder, Go further and the Investigation are for every child to choose. Say the recording notice before you start the recording, in one line: you, the shared screen and any unmuted voice; a child may keep the camera off.
2	2–8	**Warm-up: two lines** s-rem1	[picture: objects] / Two lines made of squares. Which line is longer? How many squares longer?	Comparing two lengths with squares (holiday measuring, taught again). The top line is 5 squares and the bottom line is 7 squares: the bottom line is longer, by 2 squares. Ask: which line is longer (the bottom one), how many squares longer (2). A child who is unsure counts the squares in each line with a finger. Your turn, no picture: a line of 4 squares and a line of 9 squares; which is longer, and by how many (the second, by 5). Children answer aloud. No writing.
3	2–8	**Warm-up: look at one thing** s-rem2	[picture: panel] / Tile 1 and tile 2. What shape is it? How many are there? How big is it?	Naming a picture one thing at a time (taught again). Tile 1 is one big circle. Tile 2 is three small triangles. Ask for each tile: what shape (circle; triangle), how many (1; 3), how big (big; small). Say: when we look at one thing at a time, we do not miss anything. Your turn, no picture: two big squares; say the shape, how many and how big. Children answer aloud. No writing.
4	2–8	**Warm-up: what changed?** s-rem3	[picture: objects] / Two rows of counters. What is different? Which row has more? How many more?	What changed between two rows (taught again). The top row has 4 counters and the bottom row has 5: what is different is how many; the bottom row has 1 more. Ask: what is different (how many), how many more (1). A child who is unsure touches each counter once. Your turn, no picture: a row of 6 and a row of 4; which has fewer, and by how many (the second, by 2). Children answer aloud. No writing.
5	8–12	**Sneak-peek puzzles** s-sneak	Ideas we have not learnt yet. A guess is a great start. Nobody is marked. / PUZZLE 1: anyone can try: / Count the fish in each row. / Write the two numbers. / [picture: objects] / PUZZLE 2: think: / Three of the four triangles are alike. / One is different. Which one is it? / I know because ___. / [picture: panel]	Puzzle 1 is an access question: 4 fish in the top row and 5 in the bottom row. Puzzle 2 is a thinking question on the lesson idea: three triangles point up and one (C) points down, so it is turned the other way. A child who says it is upside down or that it points the other way has done well. Say: two sneak-peek puzzles, ideas we have not learnt yet; a guess is a great start and I do not know is welcome; nobody is marked. Children write on their own paper. Nobody holds paper to the camera. There is no private chat. Answers: 4 and 5; C, it points the other way. Do not reveal puzzle 2 until Talk time. Do not write scores or keep a list.

6	12–23	**Explore: the odd card** s-explore1	Take your pair cards. Keep each row of 4 together. / Lay out set 1, the top row, in a line. / Three cards are alike. Find the odd one. / What is different about the odd card? Say it in a whole sentence.	Round 1, about 6 minutes. Each child has the 12 pair cards cut out beforehand; the page has three rows, and each row is one set of 4: three alike and one different. Set 1 (top row): apples and one cookie. Set 2 (middle row): ladybirds and one spider. Set 3 (bottom row): cups and one jar. Children lay a set in a line, find the odd card and say what is different, then do the same for sets 2 and 3. About 2 minutes a set. Do not tell which card is odd. Ask: which card is the odd one; what is different about it. Accept any true thing: it is a different thing, it has more legs, it has a lid. Nobody holds cards up to the camera: children say it aloud and show fingers. A child with no cards draws 4 small pictures on paper. Answers on the next slide.
7	12–23	**The odd ones out** s-explore1-ans	Set | The odd card | What is different / Set 1 | the cookie | it is a different thing, not an apple / Set 2 | the spider | it is a different thing, with more legs / Set 3 | the jar | it is a different thing, with a lid	Children check their own sets. Set 1: the cookie, not an apple. Set 2: the spider, with eight legs (the ladybirds have six). Set 3: the jar, with a lid. Say: all of these are different in one thing, what it is. Ticks only. Do not name any child.
8	12–23	**Explore: two pictures** s-explore2	Picture 1 / [picture: panel] / Picture 2 / [picture: panel] / Look at tile 1, then tile 2, then tile 3. What is different?	Round 2, about 4 minutes. Two pictures of three tiles each. Picture 2 is like Picture 1 except for three things, one in each tile: tile 1 is bigger (size), tile 2 has 4 stars instead of 3 (number), tile 3 has dots instead of stripes (pattern). Children look at one tile at a time: say aloud what is different, using the words size, number, pattern. Answers on the next slide. Nobody points on screen: children say it aloud or show fingers for the tile number.
9	12–23	**Three differences** s-explore2-ans	[picture: panel] / [picture: panel] / Tile 1: size. The circle is bigger. Tile 2: number. 3 stars and 4 stars. Tile 3: pattern. Stripes and dots.	Read the three answers aloud so children can tick their own. Tile 1: the circle is bigger (size). Tile 2: 3 stars and 4 stars (number). Tile 3: stripes and dots (pattern). Say: we looked at one tile and one thing at a time. Ticks only.
10	12–23	**What did we notice?** s-explore3	How did you find each difference? / What did you say about the odd card?	Take one or two answers from volunteers. Key ideas: we looked at one tile at a time; we asked what is it, how many, how big, which pattern; the odd card was different in one thing. Repeat each child answer in your own words so the recording picks it up. Do not give the rule before the children say it; the mini-lesson makes it exact.
11	23–34	**Five things to check** s-m1	LOOK AT ONE THING AT A TIME: / What shape is it? / How many are there? / How big is it? / Which pattern: plain, stripes or dots? / Which way does it face? / [picture: panel] / [picture: panel] / Two triangles. What is the same? What is different?	Worked example. The five things to check are shape, number, size, pattern and turn (which way it faces). The slide shows two triangles, A and B. They are the same in shape, number, size and pattern. Triangle B faces another way: it is turned. Ask: what is the same (shape, number, size, pattern); what is different (which way it faces). The answer is on the next slide. Say: a shape turned is still the same shape; it only faces another way.
12	23–34	**Same shape, turned** s-m1-ans	[picture: panel] / The same: shape, number, size and pattern. Different: turn. B is turned to face the right.	The answer for the example on the slide before. Read it aloud so that children can tick their own work. A turned shape is not a new shape. Say the key word turn twice.
13	23–34	**The odd one out** s-m2	[picture: panel] / Four tiles are alike. One is the odd one out. Which one? What is different?	Worked example. Five circles with stripes. Four are the same size and tile C is bigger, so C is the odd one out and the difference is size. Ask: what do four of them have in common (the same size), which tile is the odd one out (C), what is different about it (size: it is bigger). The answer is on the next slide. Say: check one thing at a time: shape, number, size, pattern, turn.
14	23–34	**C is bigger** s-m2-ans	[picture: panel] / The odd one out is C. It is different in size. It is bigger.	The answer for the example on the slide before. Read it aloud so that children can tick their own work. Say how we found it: we looked at size and four were the same and one was not.

15	23–34	**The missing piece** s-m3	[picture: panel] / [picture: panel] / Look across. Then look down. Which tile goes in the box with the question mark?	Worked example. A 2 by 2 pattern: across, the pattern changes from plain to stripes; down, the shape changes from circle to star. So the missing tile is a star with stripes, option B. Option A is a star but plain (the pattern is wrong), option C has stripes but is a circle (the shape is wrong), option D is a star with stripes but small (the size is wrong). Ask: what changes when we go across (plain to stripes); what changes when we go down (circle to star); which tile goes in the box (B). The answer is on the next slide.
16	23–34	**B is the missing piece** s-m3-ans	[picture: panel] / Across: plain, then stripes. Down: circle, then star. The missing tile is B, a star with stripes.	The answer for the example on the slide before. Read it aloud so that children can tick their own work. The missing tile B is the same size as the others, so the three wrong options each differ in one thing.
17	23–34	**A pattern that repeats** s-m4	[picture: panel] / The pattern keeps going. Which shape is tile 9? Count in threes: 3, 6, 9.	Worked example. The pattern repeats every 3 tiles: square, square, circle. The circles are tiles 3, 6, 9 (counting in threes), so tile 9 is a circle. Ask: what repeats (square, square, circle); which tiles are circles (3 and 6, then 9); which shape is tile 9 (circle). The answer is on the next slide. Say: a pattern that repeats has a part that comes again and again; find the part first.
18	23–34	**Tile 9 is a circle** s-m4-ans	[picture: panel] / The part that repeats is square, square, circle. Tiles 3, 6 and 9 are circles. Tile 9 is a circle.	The answer for the example on the slide before. Read it aloud so that children can tick their own work. Counting in threes (Term 2 Lesson 6) finds the circles.
19	23–34	**Same or different?** s-m5	Picture 1 / [picture: panel] / Picture 2 / [picture: panel] / Are the two pictures the same? How many differences are there?	Worked example. Picture 2 is not the same as Picture 1. There are 2 differences: tile 1 is smaller (size) and tile 2 has 4 circles instead of 3 (number). Tile 3 is the same. Ask: are they the same (no); which tiles are different (1 and 2); how many differences (2). The answer is on the next slide. Say: look at every tile, one thing at a time, so you do not miss one.
20	23–34	**2 differences** s-m5-ans	[picture: panel] / [picture: panel] / No. 2 differences. Tile 1: size, it is smaller. Tile 2: number, 3 circles and 4 circles. Tile 3 is the same.	The answer for the example on the slide before. Read it aloud so that children can tick their own work. Tile 3 is the same: it is also right to say what is the same.
21	34–38	**Copy and change break** s-break	Stand up. Copy my move. / Now copy it, with one thing different. / Sip some water.	Four minutes. Stand up on camera with a little clear space. Make a slow move (arms up, arms out, one foot forward). Children copy it. Then change one thing (for example one arm lower) and say: what is different? Children say it aloud, then copy the new move. Do three or four moves. Say the five things: how many (arms), how big (a big step or a small step), which way (turn to face the side). No equipment, no running. A child may stay seated and move one arm. Do not give prizes or compare children.
22	38–70	**Workbook page 1: Start here** s-ws1	Questions 1 to 3. Take your time. / questions S1, S2, S3	Read questions 1 to 3 aloud. Children work on their own; the tutor walks the cameras and asks how do you know. Wait 10 seconds before helping. After question 3 any child may choose to carry on or try Think harder. Question 1: say what is different in each tile. Question 2: are the pictures the same, yes or no, twice. Question 3: find the odd one out and say what is different.
23	38–70	**Check page 1** s-ws1ans	answers S1, S2, S3	Read each answer aloud. Children tick their own page with a tick. Never ask a child to show a wrong answer to the group. Answers: Q1: size, number, turn. Q2: (a) Yes, (b) No. Q3: C, pattern.
24	38–70	**Workbook page 2: Start here** s-ws2	Questions 4 to 6. Take your time. / questions S4, S5, S6	Read questions 4 to 6 aloud. Question 4: two shelves; how many more apples does shelf 2 have. Question 5: how many differences between two pictures, and which tile is the same. Question 6: which two tiles are the same. Wait 10 seconds before helping.

25	38–70	**Check page 2** s-ws2ans	answers S4, S5, S6	Read each answer aloud so a child watching the recording can tick their own work. Never ask a child to show a wrong answer to the group. Answers: Q4 1 more apple. Q5 3 differences, and tile 1 is the same. Q6 A and D.
26	38–70	**Choose your next page** s-choice	Page | What it is / Think harder (page 3) | The odd one out, a missing piece, a turn, a repeating pattern / Go further (page 4) | Shadow Match, odd for pattern and for size, make your own / Investigation (page 5) | Change just one thing / Check | Finish and check your own work / Everyone may choose. Not finished? Pages 3 to 5 are for home too.	Invite the whole group at once, for example: when you have finished Start here, you can choose Think harder, Go further or the Investigation. Never announce who is on which page and never name a child. Pairs are not split unless both children agree. Model answers are in the tutor guide. About 5 minutes.
27	70–76	**Talk and explain** s-talk	A CHILD IN ANOTHER CLASS SAYS: / I look at two pictures. / I say: they are not the same. / Is that enough? What could she say to be exact? / I think … because …	One minute of talk to the grown-up next to you, or to your screen. Volunteers first; a pass is always fine; never call a child by name to answer. Model answer: not yet. She should say which thing is different (the shape, how many, how big, which pattern, which way it faces), one thing at a time. Link to the sneak-peek and the mini-lesson. Repeat each child answer in your own words for the recording. The child in the story is in another class: no cast name is given the wrong answer.
28	70–76	**Back to the sneak-peek** s-sneakans	Puzzle 1: 4 fish and 5 fish. Puzzle 2: C. It is the triangle that points the other way.	Reveal both puzzles now. Say: many of you wrote a good answer. Do not read out anyone earlier answer. Puzzle 1: 4 fish in the top row and 5 in the bottom row, so what is different is how many. Puzzle 2: C is the odd one out because it is turned to face the other way; the other three point up. It was the same idea as Explore and the mini-lesson: say which thing is different, one thing at a time.
29	76–82	**Exit ticket** s-exit	On your own. No looking back. / questions E1, E2, E3	Children answer on page 5. Read E1, E2 and E3 aloud, with the numbers (the figures on the slide are small). Children tick their own ticket against the next slide. Nobody holds paper to the camera and there is no private chat.
30	76–82	**Check the exit ticket** s-exitans	answers E1, E2, E3	Read each answer aloud. Children tick their own ticket with a tick. Answers: E1 pattern; E2 C; E3 2 differences.
31	82–85	**Look-back** s-look	[look-back box]	Three minutes. Children tick or write the look-back box on page 5. A pass is always allowed. It is never marked, never collected in front of the group and never read out. If a child ticks I am still stuck, a grown-up may photograph that page after class and send it to the business WhatsApp (the number is in the parent summary, never on a slide). You then help in the open session next lesson. Never a direct message to a child. The Next time I will try row is optional.
32	85–90	**Well done, inquirers!** s-end	Make a row of 4 things at home. Make one the odd one out. / NEXT LESSON: / Count Everything / Have ready: Book 8, and the paper people from it, cut out by a grown-up.	Say goodbye and thank the grown-ups. Minutes 85 to 90 are flex time: the buffer. If you ran late, finish any open item (the look-back). Do not start anything new. Remind families that the next lesson needs Book 8 (the last five lessons of the year), with the paper-people page torn out along the dashed line and the 8 paper people cut out by a grown-up beforehand. If the whole class is ahead, show the optional slides and use the Spare-time menu from the tutor guide.
33	optional	**Go further: the same, turned** s-opt	[picture: panel] / Which two tiles are the same picture, turned?	Optional, only if you are on time. Tiles A and B are the same triangle, one turned to face right; tile C is a different picture (three circles). Ask: which two tiles are the same picture turned (A and B). Take two answers and move on. This links to the turn idea.

34	optional	**If we have time: pick one** s-menu	Activity | What we do / Is it always true? | Can a row have two odd ones out? / Make a puzzle | Make a row for your grown-up with one odd one out. / Teach it back | Tell a toy how to say exactly what is different. / Optional. Everyone may join.	Optional Spare-time menu, used only if the whole class is ahead. Pick one or two activities (3 to 5 minutes each); full tutor lines and answers are in the tutor guide. Never start new content and never name who is ahead. Slow down with how do you know rather than rushing on. These minutes come from the flex buffer and are not part of the 90-minute sum.

8. Recording cues and chapter markers

Say each cue once, to the camera, at the start of the part. Add a chapter marker at each time. A child watching alone cannot ask you a question, so say the page and question number aloud, read each question and each answer aloud, and repeat a child's answer in your own words.

Chapter	Part	You say (recording voice)	A child watching later
0:00	Opening	*If you are watching the recording: hello! Get a pencil, paper, your workbook and your pair cards. Pause or rewind any time.*	Gather your workbook, pair cards, pencil and paper. Press play when ready.
2:00	Remember warm-up	*Recording: join in! Say your answers out loud before I say them. Pause if you need longer.*	Play along. Say each answer out loud before the video does.
8:00	Sneak-peek puzzles	*Recording: pause now and try both puzzles on your paper. Guessing is fine. Press play for the next part.*	Pause. Try both puzzles on your own paper. A guess is fine.
12:00	Explore	*Recording: pause now. Lay out each set of cards and find the odd one. Then look at the two pictures. Press play when ready.*	Pause. Lay out each set of cards and find the odd one. Then look at the two pictures of three tiles.
23:00	Mini-lesson	*Recording: keep watching and look at each picture one thing at a time. Rewind if you miss a step.*	Watch and look at each picture one thing at a time. Rewind any step you missed.
34:00	Brain break	*Recording: stand up and join in! Copy the move, then change one thing.*	Stand up. Copy each move, then change one thing. Then sit down.
38:00	Workbook	*Recording: pause now and do workbook page 1. When you finish a page, press play to check it.*	Pause. Do page 1, then play to check. Then page 2. Then choose a page to try.
70:00	Talk time	*Recording: pause. Tell a grown-up how you can say exactly what is different between two pictures.*	Pause. Explain to someone at home how you can say exactly what is different.
76:00	Exit ticket	*Recording: pause and do the exit ticket on your own. Then press play to check it.*	Pause. Do the exit ticket alone, then play to check it.
82:00	Look-back	*Recording: pause and fill in your look-back box. You can pass.*	Pause. Fill in the look-back box, or pass.
85:00	Flex time and goodbye	*Recording: well done for finishing! Make a row of 4 things at home with one odd one out.*	Make a row of 4 things with one odd one out and ask a grown-up to find it.

9. Timing check (model, not a stopwatch)

Part	Allocated	Script	Slow class	Flag
opening	2:00	1:31	1:43	ok
remember	6:00	4:53	5:49	ok
sneak	4:00	2:59	3:31	ok
explore	11:00	8:36	10:12	ok

mini	11:00	9:10	10:50	ok
break	4:00	3:18	3:56	ok
work	32:00	23:47	28:21	ok
talk	6:00	4:22	5:11	ok
exit	6:00	4:14	5:00	ok
look	3:00	2:06	2:27	ok
flex	5:00	0:22	0:26	ok
Total	90:00	65:19	77:26	

Assumptions as docs/audit/timing_p1.md: speech 120 words a minute, read-aloud 110, slide change 25 s, a group question 10 s thinking plus 20 s answers, papers to the camera 30 s. Workbook: Start here has 6 questions; a middle child needs about 10.0 min for page 1 and 9.5 min for page 2 (a slower child about 1.7 times as long, so may finish page 1 and part of page 2; that is fine, the check-together slides cover every answer). The lesson has no breakout rooms, so no breakout time is counted.
