Story Steps

Tens Jump, Ones Hop: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use your bars and squares, or draw the jumps. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next. The answers are on a separate sheet, so they never print on the back of this one.

No.1

Start here

A box has 4 bundles of 10 pencils and 5 single pencils. Ali puts in 3 more bundles of 10. How many pencils are in the box now?

No.2

Start here

Subtract. (a) 86 - 40 = _ _ _ _ _ _ _

(b) 86 - 4 = _ _ _ _ _ _ _

No.3

Start here

Ravi and Mei each have 53 stickers. Ravi gives away 3. Mei gives away 30. (a) Ravi has _ _ _ _ _ _ _ stickers left.

(b) Mei has _ _ _ _ _ _ _ stickers left.

No.4

Think harder

Add 36 + 23 in two ways: (a) jump first, then hop;
(b) hop first, then jump. Is the answer the same? Circle Yes or No.

Yes No

No.5

Go further

(a) On spare paper, draw a number line from 0 to 100. Put a coin on 7 and jump it in tens. Write each number.

(b) What stays the same?

Take Away, Count Up: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use bars and squares, or draw them. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next. The answers are on a separate sheet, so they never print on the back of this one.

No.1

Start here

A jar has 78 sweets. Ali eats 20 of them. How many sweets are left?

No.2

Start here

Subtract: 76 - 43 = _____. Check: _____ + 43 = 76.

No.3

Start here

Subtract: 89 - 36 = _____

No.4

Think harder

Ben has 47 cards. Ali has 71 cards. How many more cards does Ali have than Ben?

No.5

Go further

Pick two page numbers between 20 and 99, such as 38 and 71. How many pages from one to the other? Find it two ways: take away, then count up. Do the two ways match? Circle Yes or No.

Yes No

Balance and Swap: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use two plates and small things, or draw both sides. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next. The answers are on a separate sheet, so they never print on the back of this one.

No.1

Start here

Fill in the missing number: 6 + 3 = 5 + ☐

No.2

Start here

Fill in the missing number: 10 + 4 = 9 + ☐

No.3

Start here

Fill in the missing number: 20 + 30 = 40 + ☐

No.4

Think harder

Ravi says 36 + 14 and 34 + 16 have the same total. Do not add. Is he right?

Circle Yes or No. Then write: I know because _____.

Yes No

No.5

Go further

Put 12 small things in a pile of 7 and a pile of 5. Give 1 across and write the new sum, like 6 + 6 = 12. Write all the sums you can find. Many answers are right.

Draw and Measure: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use your ruler and spare paper. No ruler? Ask your tutor in the next lesson, or a grown-up can measure your lines. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next. The answers are on a separate sheet, so they never print on the back of this one.

No.1

Start here

Draw a line 8 cm long on spare paper. Start it at the 0 mark of your ruler. Then check: which mark does it end at?

No.2

Start here

A pencil starts at the 0 mark and its tip is at the 17 mark. A crayon is 11 cm long. How many cm longer is the pencil?

No.3

Start here

Measure a spoon, a toy and a crayon in whole cm. Write the 3 lengths in order, shortest first.

No.4

Think harder

A line starts at the 4 mark and ends at the 15 mark. How long is the line? Write: I know because ...

No.5

Go further

Draw a path with 3 straight pieces. The pieces are all different lengths. The whole path is 25 cm long. Write the 3 lengths. A grown-up checks with a ruler.

Story Steps: Read It Twice: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use real things or draw it. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next. The answers are on a separate sheet, so they never print on the back of this one.

No.1

Start here

Ali has 28 marbles. He wins 10 more marbles. Then he gives 5 marbles away. Write one number sentence for each step. Step 1: _____ Step 2: _____ Ali has _____ marbles now.

No.2

Start here

Mei has 14 stickers. Siti has 6 more. How many stickers does Siti have?

No.3

Start here

A box has 40 pencils. 10 pencils are red and 20 pencils are blue. The rest are green. Write one number sentence for each step. Step 1: _____ Step 2: _____ There are _____ green pencils.

No.4

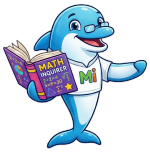

Think harder

Ben has 9 sweets. He has 4 fewer than Kumar. How many sweets altogether?

No.5

Go further

Make up a two-step story with numbers within 100. Write one number sentence for each step. Ask a grown-up to solve it.

LEVEL 1 • TERM 1 • FOR GROWN-UPS

Mi's Challenge Quest: a note for grown-ups

In the last lesson of the term we play Mi's Challenge Quest. Mi the dolphin swims to the Pearl Cave and meets 8 gates, each with a short puzzle, plus an optional secret cave. It takes about 20 minutes, after the break. Your child works on private paper with you (or a brother or sister) as quest partner. It is a game: nothing is added up, there is no league table and nobody is compared with anyone else. It helps us see what each child enjoyed and what to practise next. Term 1 goes beyond the school Primary 1 syllabus on purpose, so a few gates may be new.

Before the lesson

- We send you this note and the Quest Log a week before. Print the Quest Log at 100% (actual size, not fit to page). The bar at the foot of page 4 must measure 10 cm with a ruler. No printer? Tell us a week before and we will find another way.
- Keep the Quest Log folded or in an envelope until the tutor says to open it.
- Have a pencil, a rubber, a ruler with centimetres and a quiet table. Counters and fingers are fine.

During the quest

- Be the quest partner: sit beside your child. You may talk about how to start and ask 'how do you know?', but please do not give answers or hints.
- Skipping a gate is fine; Mi swims round it. If your child is upset, you may stop at any time.
- Your child may colour a stone on the quest map for each gate they have had a go at. It means I had a go, nothing more.
- The paper stays flat on the table. Cameras may be on or off.

After the lesson: sending the Quest Log privately

- The same day, take ONE clear photo of each of the 4 pages: page flat, straight from above, the whole page in view. Make sure your child's name is on each page.
- Send the photos to the program's business WhatsApp, +65 9880 5962. Please send them to this number only: not to a tutor's own phone, not to the class chat, and never through a child.
- We use the photos only to write one line about your child. WhatsApp is a messaging service run by another company. We keep the photos for 90 days after the program ends, then delete them, as our privacy notice says.

What you get back. Within a few days we send you ONE line, written from our private notes, about what we saw your child do in the quest, with a small next step if it helps. It only describes what your child did, and it never compares children. If you would rather not play the quest, tell us: that is fine.
For example: In Mi's Challenge Quest, Mei used her ruler from the 0 mark and wrote one number sentence for each step of a story.

Missed the lesson or need another time? The quest is not on the recording, but your child can play it at the make-up slot, before watching the recording.

Your child's paper, photos and note are treated as private: we never show them to other children or families, and we never compare children. Math Inquirers by Preciouslyours Pte Ltd.
