

LEVEL 1 • TERM 4 • LESSON 8 • FOR PARENTS

8 Graph Detectives

WHAT WE DID

We read picture graphs like detectives: the key first, then the rows. We counted in 2s and 3s when each picture stood for more than 1, found a missing bar from a total, and asked what a graph can and cannot tell us. A key where each picture stands for 2 or 3 goes past the Primary 1 syllabus on purpose.

> **Read the key first. A graph tells us some things and not others.**

TRY AT HOME (5 MINUTES)

1. Draw a graph of the shoes or socks in your house. Ask: what does one picture stand for?
2. Draw a graph where each picture stands for 2. Ask your child to read one row.
3. Ask: what question can this graph not answer?

When your child is stuck

Let your child look at the key and wait 10 seconds before helping. Please do not give the answer: ask 'What does one picture stand for?' instead. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- key: a note that says what one picture stands for
- row: one line of pictures in a graph
- total: all the numbers added together
- fewer: a smaller number; 5 fewer than 9 is 4

Good questions

- What does one picture stand for?
- How do you know which row has the most things?
- How could you check the missing bar?

Have ready for next lesson

- Your Term 4 book (Book 8): tear out the tool-and-problem cards page along the dashed line, then a grown-up cuts out the 15 cards
- A pencil, a rubber and paper

Next lesson

Next lesson: The Problem-Solving Toolbox. Online practice: your tutor will share the link. The recording has the tutor, the shared screen and any voice that is unmuted. Please do not share the link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to choose a way to solve a problem, and to make and test their own puzzles. We share what we see in your child's thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
