

LEVEL 1 • TERM 2 • LESSON 1 • FOR PARENTS

1 STUB: Term 2 Template Check

WHAT WE DID

We learned that a two-digit number is made of bundles of ten and single ones. Your child made bundles from real things, built numbers up to 58, and practised reading and writing numbers like 34 (3 tens and 4 ones) and 70 (7 tens and 0 ones). Tens and ones is familiar school work. Opening a bundle (5 tens and 14 ones is 6 tens and 4 ones) goes further, and is in Think harder and Go further.

> **A number is tens and ones. Ten singles tie into one bundle.**

TRY AT HOME (5 MINUTES)

1. Bundle it: grab a handful of pasta, clips or buttons. Tie bundles of ten with hair ties or cups. Ask: how many tens and how many ones? Write the number together. Small things stay on the table, away from mouths and little brothers and sisters.
2. Show me: say a number up to 60 and let your child build it with bundles and singles. Swap roles and make a mistake on purpose for them to find.
3. Spot it: look at page numbers, lift buttons or door numbers. Ask: how many tens is that? Which digit tells you?

When your child is stuck

Please let your child use real things or draw bundles, and wait 10 seconds before helping. Please do not hurry or say it is easy. If the look-back page says 'I am still stuck', please photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept up to 90 days.

Words we used

- bundle or ten: ten single things tied together
- single or one: a thing on its own
- tens digit: the left digit, it counts the bundles
- ones digit: the right digit, it counts the singles

Good questions

- How do you know?
- Which digit tells how many bundles?
- What if you opened a bundle?

Have ready for next lesson

- A pencil and paper.
- Twenty small things (pasta or buttons).

Next lesson

Next lesson: the stub has no next lesson. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.
