TUTOR GUIDE • LEVEL 1 • TERM 2 • LESSON 1 OF 10

STUB: Term 2 Template Check

Big idea: Template check for Term 2 figures. This is a stub lesson used to prove the Term 2 template; it is not a lesson.

90 minutes • live online or face to face • up to 8 children • ages 6-8 • Notice it. Test it. Explain why.

1. At a glance

Strand	Whole Numbers (Numbers to 100: counting a set; Tens and ones (place value); Reading and writing numerals) STUB. Not a lesson: it exists only to exercise the Term 2 figure types, answer tokens, runner items and term-aware footers. Lesson 11 (Who Is Where?) replaces this file.
Objectives	• Exercise every Term 2 figure type once in the workbook. • Exercise the new answer tokens: [], [2], (), [ ], {eq}. • Exercise the runner: pictures, ordered boxes, list helpers, ordinals, templated choice.
Joining cold	**Remember warm-up covers:** Count in tens to 100; Fingers to make 10 (bonds to 10); Ten and some more (11 to 19, then 20s and 30s). Only counting to 20 and showing a number with fingers. Nothing from the holiday course is needed; if the child has done it, skip counting in 10s and bonds to 10 will feel familiar. Lesson 1 is one of the hardest to miss in Term 1 (plan, section 2). A child who misses it watches the recording and does workbook pages 1 and 2 before Lesson 2.
Child materials	• About 50 small things of one kind: paper clips, dried pasta, buttons, lolly sticks or straws cut short • 6 hair ties, small cups, paper rings or pieces of string (to hold a bundle), or draw rings on paper • The printed workbook (pages 1 to 5) and the kit page (tens bars and ones squares), already cut out by a grown-up • A pencil, a rubber and spare paper
Tutor materials	• A slide deck and a tray of 30 lolly sticks or straws with three hair ties to show on camera if you wish • A timer slide or a visible clock No ruler is needed. Nothing needs to be bought: everything can be found at home. No matches, toothpicks or anything sharp. Small things never go near the mouth or ears.
Tiers	Start here (6 questions, pages 1 and 2), Think harder (3, page 3), Go further (3, page 4), Investigation and look-back (page 5), kit pages (pages 6-10). Labels are neutral; nobody is told which page they are on.
Contest-style move	Used at Think harder only: split a number into tens and ones; digit-clue puzzle (find the number from two clues). Never advertised to children or parents.

Before the lesson

- Solve every workbook question yourself first.
- Tell parents a week before: print workbook pages 1 to 6, cut out the kit page (page 6), find about 50 small things and 6 hair ties or cups. Small things stay away from mouths and from younger children.
- Have the slides open and check the timer slide and the kit page are visible on screen share.
- Check the recording captures the tutor and the shared screen. Children's video is excluded; any unmuted voice is recorded. Start the recording after the greeting, and avoid first names while it runs.
- Tell parents plainly (it is on the parent page): Term 1 goes beyond the school Primary 1 syllabus on purpose. Start here is explored in class with bundles and the kit; Think harder and Go further are optional stretch.

Safeguarding and recording (this lesson)

- Small things stay on the table: nothing goes in the mouth or ears, and nothing is left where a younger brother or sister can reach it. No matches, toothpicks or anything sharp. Use hair ties, cups or paper rings. No rubber bands: they can flick.
- This lesson uses the main room only: no breakout rooms, so the tutor sees every camera. A parent sits nearby but does not give answers.
- Nobody holds paper or a board up to the camera. Children tick their own work against the answer slide, answer together on a count of three, or show fingers or a thumb for a choice. There is no private chat.
- Never read out a child's name with a right or wrong answer. The recording has the tutor, the shared screen and any voice that is unmuted. Children may mute and keep their cameras off. A child's page is never shown.
- A child who is still stuck ticks 'I am still stuck' on the look-back page. A grown-up may photograph that page after class and send it to the business WhatsApp only; photos are kept for up to 90 days. The tutor then helps in the open session next lesson. No private messages to children, and no personal phones.
- The look-back is never collected in front of the group or read out. A pass is always allowed.

2. Timing plan (90 minutes exactly)

Minutes	Part	Min	Slides	Script fills
0–4	**Opening**	4	3: Bundles and Singles, Our lesson today, Four inquirer rules	3:47
4–10	**Remember warm-up**	6	3: Warm-up: count in tens, Fingers to ten, Ten and some more	4:36
10–14	**Sneak-peek puzzles**	4	1: Sneak-peek puzzles	3:17
14–28	**Explore**	14	3: Explore: grab and bundle, Show me!, What did we notice?	10:50
28–38	**Mini-lesson**	10	8: Ten singles make a bundle, Reading 34, Your turn: write the number, Check: write the number, The zero holds the place, Same digits, different number, Ten singles can tie up, Count: tens, then ones	8:37
38–42	**Brain break**	4	1: Jump the tens, hop the ones	3:28
42–70	**Workbook**	28	5: Workbook page 1: Start here, Check page 1, Workbook page 2: Start here, Check page 2, Choose your next page	26:41
70–76	**Talk time**	6	2: Talk and explain, Back to the sneak-peek	5:10
76–82	**Exit ticket**	6	2: Exit ticket, Check the exit ticket	4:12
82–85	**Look-back**	3	1: Look-back	2:33
85–90	**Flex time and goodbye**	5	1: Well done, inquirers!	0:46
	Total	**90**		**73:56**

The script needs 73:56 of the 90:00 when children are quick. A slow class (speech 10% slower, children and slide changes 20% slower) needs 87:40. The last 5 minutes are a standing buffer: if you are behind, use them; do not start anything new. Clock checks: minute 14 (end of sneak-peek), minute 42 (start of workbook), minute 70 (talk time). If more than 2 minutes behind at minute 42, skip in this order: optional items and extra quick questions first, then the second explore round, then any quick-fire in the mini-lesson, then the optional slide. Never skip the look-back or the camera and privacy moments.

3. Lesson script

Times show when each line should start, counted from the start of the lesson, if you keep to the script. SAY lines are spoken in your own words. REC lines are the short recording-voice cues for children who watch later. Children answer aloud, with fingers or hands; no private chat; no boards held up in front of the group.

0:00 – 4:00 Opening

script 3:47 of 4:00

0:00	SLIDE	Show slide **Bundles and Singles** (s-title)
0:25	REC	*If you are watching the recording: hello! Get a pencil, paper, your workbook and your things to bundle. Pause or rewind any time.*
0:36	SAY	Hello, inquirers! Please stay muted unless I invite you to speak; give me a thumbs-up if you want to talk. Cameras on if you can, so I can see your page and hands. Cameras off is fine too. Pencil ready, and your things to bundle on the table.
1:00	SAY	This lesson is recorded so that a friend who is away can catch up. The recording has me, the shared screen and anyone's voice that is unmuted. You may mute and keep your camera off.
1:18	SLIDE	Show slide **Our lesson today** (s-routine)
1:43	SAY	Here is our plan. A warm-up, two puzzles, then we explore with real things. Then I teach you a trick, we move, and you work in your workbook.
1:57	SLIDE	Show slide **Four inquirer rules** (s-rules)
2:22	READ	Four inquirer rules. Notice it: look closely. Test it: try it with real things. Explain why: say how you know. Mistakes help us: a guess is fine and you can always pass.
2:39	SAY	A shopkeeper has 47 pencils to count for a customer. Counting one by one is slow, and it is easy to lose count.
2:51	ASK	What could the shopkeeper do to count faster? Tell your screen or your grown-up. [wait about 20 s for answers]
3:18	SAY	Today we learn the shopkeeper's trick: bundles of ten.
3:22	DO	If you can, greet each child by first name before you start the recording. While it runs, avoid names. Check that the page and hands can be seen, or ask the grown-up. [0:25]
	NOTE	Lesson 1 only: show the routine slide for 20 seconds and name the phases; do not read the table. Say the recording notice in your own words: the recording has the tutor, the shared screen and any voice that is unmuted; children may mute and keep their camera off. Standing routine for every lesson: children are muted unless invited; for a group answer they say it quietly to their own room on a count of three.

4:00 – 10:00 Remember warm-up

script 4:36 of 6:00

4:00	SLIDE	Show slide **Warm-up: count in tens** (s-rem1)
4:25	REC	*Recording: join in! Say the numbers out loud and show your fingers. Pause if you need longer.*
4:34	SAY	Stand up if you can. We clap on every number. Count in tens with me: ten, twenty, thirty, all the way to one hundred.
4:46	CHILDREN	Count in tens together, clapping, to 100. Then back from 100 to 0, whispering, with big hands on 50. [0:45]
5:30	SLIDE	Show slide **Fingers to ten** (s-rem2)
5:56	SAY	Fingers to ten. I say a number. Show me how many more fingers make ten.
6:03	ASK	Six. How many more to make ten? [wait about 12 s for answers]
6:18	ASK	Three? [wait about 12 s for answers]

6:31	**ASK**	Eight? [wait about 12 s for answers]
6:44	**ASK**	Five? [wait about 12 s for answers]
6:56	**ASK**	Nine? [wait about 12 s for answers]
7:08	**SLIDE**	Show slide **Ten and some more** (s-rem3)
7:34	**SAY**	Ten and some more. Look at the full ten-frame and the extra counters.
7:40	**ASK**	Ten and three more makes? [wait about 12 s for answers]
7:54	**ASK**	Ten and six more? [wait about 12 s for answers]
8:08	**ASK**	Twenty and four more? [wait about 12 s for answers]
8:22	**ASK**	Thirty and seven more? [wait about 12 s for answers]
	IF STUCK	If a child hesitates on 24 or 37, say the tens word slowly (twenty... four) and point to the tens and the ones in the picture. Do not move on until most children have answered; this idea is the lesson.
	NOTE	Answers: 4, 7, 2, 5, 1 then 13, 16, 24, 37. Children answer with fingers, hands or a whispered number. Nobody writes. Joining cold: all you need is counting to 20.

10:00 – 14:00 Sneak-peek puzzles

script 3:17 of 4:00

10:00	**SLIDE**	Show slide **Sneak-peek puzzles** (s-sneak)
10:25	**REC**	*Recording: pause now and try both puzzles on your paper. Guessing is fine. Press play for the next part.*
10:34	**SAY**	Two sneak-peek puzzles: ideas we have not learnt yet. A guess is a great start, and I do not know is welcome. Nobody is marked.
10:47	**READ**	Puzzle one. Count the stars. Write how many. You may draw rings round groups to help.
10:56	**CHILDREN**	Children count the stars and write the number on their own paper. [0:55]
11:51	**READ**	Puzzle two. Mei has 3 bundles of ten sticks and 4 single sticks. Ben has 34 sticks. Could they have the same number? Circle Yes or No. I know because ___.
12:07	**CHILDREN**	Children write or draw their answer. [0:55]
13:02	**SAY**	Keep your paper. Nobody shows it. We will check our own thinking later, at Talk time.
13:10	**SAY**	Thank you. We will come back to puzzle two in a few minutes.
	NOTE	Puzzle 1 answer: 24 stars. Puzzle 2 answer: yes, 3 tens and 4 ones is 34. Look for good ideas to praise later (a child who drew rings of ten, or who said 3 bundles is 30). Do not write scores or keep a list.

14:00 – 28:00 Explore

script 10:50 of 14:00

14:00	**SLIDE**	Show slide **Explore: grab and bundle** (s-explore1)
14:25	**REC**	*Recording: pause now. Grab a handful, make bundles of ten, then build the numbers I call. Press play when you have tried.*
14:36	**SAY**	Today your hands are the teachers. Grab a handful of your small things, not the whole pile. Make bundles of ten. Count the bundles, then count the singles left over.
14:51	**SAY**	If you finish, try the what-if card: what if you open a bundle?
14:58	**CHILDREN**	Round 1: each child grabs, bundles and counts. Tutor scans the cameras; a child who wants to may show their bundles to the camera. Nobody has to. [3:20]
18:18	**ASK**	Tell me what you have. Say it like this: I have, how many tens, and how many ones. [wait about 50 s for answers]
19:16	**SLIDE**	Show slide **Show me!** (s-explore2)
19:42	**SAY**	Round two: show me! Use your tens bars and ones squares from the kit page. I call a number. You build it. I will tell you what it should look like, so you can check your own build.

20:00	SAY	Seventeen.
20:01	CHILDREN	Children build 17, then give a thumbs-up when ready. [0:40]
20:41	READ	Check your own: one bar and seven squares.
20:45	SAY	Thirty.
20:46	CHILDREN	Build 30. [0:35]
21:21	READ	Check your own: three bars and no squares.
21:25	SAY	Fifty-eight.
21:26	CHILDREN	Build 58. [0:45]
22:11	READ	Check your own: five bars and eight squares.
22:15	SAY	One more. Ravi built thirty-five with 5 bars and 3 squares. Look at your kit. Is Ravi right?
22:24	CHILDREN	Children check with their kit and answer by thumbs up or down, then say why. Answer: no, 5 bars and 3 squares is 53; thirty-five is 3 bars and 5 squares. [0:55]
23:19	SLIDE	Show slide **What did we notice?** (s-explore3)
23:44	ASK	What did you notice? How many singles can be left over? Could you have ten singles left over? Why not? [wait about 45 s for answers]
24:39	SAY	If you have ten singles you can tie them into another bundle. So the singles left over are always nought to nine.
	IF STUCK	A child who counts bundles as ones (3 bundles and 4 singles is 7): hold up a real bundle and say, this one is worth ten. Count it: ten, twenty, thirty, then thirty-one, thirty-two.
	IF STUCK	A child with too few things: use the kit bars and squares for round 1 as well.
	NOTE	Main room only: no breakout rooms in this lesson, so you can see every camera. Pairs are optional: a grown-up may check the building. Building with the kit is for every child; the what-if card is for any child who wants it, and nobody is named.

28:00 – 38:00 Mini-lesson

script 8:37 of 10:00

28:00	SLIDE	Show slide **Ten singles make a bundle** (s-m1)
28:25	REC	*Recording: keep watching and copy the examples. Rewind if you miss a step.*
28:32	SAY	Look. Ten single sticks. When I tie them together I have one bundle. One bundle is worth ten.
28:40	ASK	How many sticks are in one bundle? [wait about 12 s for answers]
28:56	SLIDE	Show slide **Reading 34** (s-m2)
29:21	SAY	Here are 3 bundles and 4 singles. I count the bundles in tens: ten, twenty, thirty. Then I count the singles: thirty-one, thirty-two, thirty-three, thirty-four. Thirty-four sticks.
29:34	SAY	I write it in two boxes. Tens: 3. Ones: 4. That makes 34. The left digit counts the tens. The right digit counts the ones.
29:47	ASK	Which digit tells me how many bundles? [wait about 15 s for answers]
30:06	SLIDE	Show slide **Your turn: write the number** (s-m3)
30:30	READ	Your turn. Write the number for each picture on your paper.
30:36	CHILDREN	Children write three numbers. [0:50]
31:26	SLIDE	Show slide **Check: write the number** (s-m3a)
31:52	READ	Twenty-seven, forty, nineteen.
31:53	SLIDE	Show slide **The zero holds the place** (s-m4)
32:18	SAY	Look at forty. 4 bundles and no singles. We write a zero in the ones box. If we left it out, the 4 would look like 4 ones. The zero holds the place.

32:35	SLIDE	Show slide **Same digits, different number** (s-m5)
33:00	ASK	Twenty-six and sixty-two use the same digits. Which has more sticks, 26 or 62? How do you know? [wait about 30 s for answers]
33:39	SAY	The tens digit is worth more. 62 has 6 bundles. 26 has only 2 bundles. The order of the digits matters.
33:49	SLIDE	Show slide **Ten singles can tie up** (s-m5b)
34:14	SAY	Sometimes you have lots of singles. Here are 2 bundles and 13 singles. Ten of the singles can tie into a new bundle. Now there are 3 bundles and 3 singles. Same sticks, 33 of them.
34:32	ASK	Why can we tie up ten singles? What is a bundle worth? [wait about 20 s for answers]
34:58	SLIDE	Show slide **Count: tens, then ones** (s-m6)
35:23	SAY	Quick-fire. I say a number. You tell me the tens and the ones. Forty-seven.
35:30	ASK	Sixty? [wait about 15 s for answers]
35:46	ASK	Nineteen? [wait about 15 s for answers]
36:01	ASK	Eighty-two? [wait about 15 s for answers]
36:17	CHILDREN	Count together: tens, then ones: 10, 20, 30, 31, 32, 33, 34. [0:20]
	NOTE	Key words to use every time: bundle (ten), single (one), tens digit, ones digit. Do not teach 'place value' as a term yet. Do not teach carrying. Keep ten singles making a bundle for the Think harder page.
	IF STUCK	If a child reads 34 as 43: ask them to build it with the kit bars and squares and say the tens first.

38:00 – 42:00 Brain break

script 3:28 of 4:00

38:00	SLIDE	Show slide **Jump the tens, hop the ones** (s-break)
38:25	REC	*Recording: stand up and join in! Big jump for a ten, small hop for a one.*
38:33	SAY	Stand up and get a sip of water. A big jump for every ten, a small hop for every one. Thirty-four is three big jumps and four small hops.
38:48	CHILDREN	Call 12, 25, 40, 31. Children jump the tens and hop the ones. Count the jumps and hops aloud together. [2:40]

42:00 – 70:00 Workbook

script 26:41 of 28:00

42:00	SLIDE	Show slide **Workbook page 1: Start here** (s-ws1)
42:25	REC	*Recording: pause now and do workbook page 1. When you finish a page, press play to check it.*
42:34	READ	Page 1, Start here. Question 1: count the sticks and fill in the bundles, the singles and the number. Question 2: draw 3 bundles and 5 singles. Question 3: write the numbers.
42:51	CHILDREN	Page 1, questions 1 to 3. Tutor walks the cameras, asks how do you know. Wait 10 seconds before helping. [9:00]
51:51	SLIDE	Show slide **Check page 1** (s-ws1ans)
52:16	READ	Twenty-six. Thirty-five. Forty-two, seventy, nineteen, eighty-five. Mark your own page in another colour.
52:24	SAY	After question 3 you may choose: carry on, or try Think harder. Everyone may choose, at any time.
52:33	SLIDE	Show slide **Workbook page 2: Start here** (s-ws2)
52:58	READ	Page 2. Question 4: fill in tens and ones. Question 5: Ali has 47 sticks. Question 6: Kumar wrote 43. Is he right? Question 7: draw Ali's 6 bundles and Mei's 6 singles, and write each number.
53:18	CHILDREN	Page 2, questions 4 to 7. [9:00]
62:18	SLIDE	Show slide **Check page 2** (s-ws2ans)
62:43	READ	Five tens and eight ones. Four tens, no ones. Seven tens and one one. Four bundles, seven left over. Kumar should write thirty-four. Question 7: Ali has sixty, Mei has six.

63:00	SLIDE	Show slide **Choose your next page** (s-choice)
63:25	SAY	When you have finished Start here, you can choose Think harder, Go further or the Investigation. Everyone may choose. You can swap at any time. Anything not finished is for home too.
63:41	CHILDREN	Choice time: Think harder (page 3), Go further (page 4), the Investigation (page 5), or finish and check your own work. Tutor never says who is on which page. If Start here took the whole time, say that pages 3 to 5 are for home, and keep the time. [5:00]
	IF STUCK	Q2 (drawing): draw a bundle of ten as one long line and a single stick as a short line. Q4 (zero): ask how many singles are left over in 40. Q6: build 3 bundles and 4 singles with the kit, say the tens first. Q7: ask how much one bundle is worth.
	IF STUCK	A child who is still stuck ticks 'I am still stuck' on the look-back page. The grown-up can photograph that page after class and send it to the business WhatsApp. You then help in the open session in the next lesson. Never a private message to a child.
	NOTE	Think harder is for ideas taught today in a new setting. Go further is for mastery and extension. Do not announce who is on which page. Pairs are never split unless both children agree. Slow class: the workbook part needs about 31:50 against 28:00, so Start here may fill most of it. Take the extra minutes from the flex time, do not skip the answer slides, and say that pages 3 to 5 are for home.

70:00 – 76:00 Talk time

script 5:10 of 6:00

70:00	SLIDE	Show slide **Talk and explain** (s-talk)
70:25	REC	*Recording: pause. Tell a grown-up your answer to the talk question, and say why.*
70:32	READ	Is 40 the same as 4? Circle Yes or No. Use bundles to explain: I know because ___.
70:41	CHILDREN	Build 40 and 4 with your kit bars and squares. Which one has more? [0:50]
71:31	CHILDREN	Talk to the grown-up next to you or to your screen for one minute. Use the sentence starter: I think... because... [1:00]
72:31	ASK	Who would like to share? Volunteers first. A pass is always fine. [wait about 90 s for answers]
74:07	SLIDE	Show slide **Back to the sneak-peek** (s-sneakans)
74:32	SAY	Remember puzzle two? Mei has 3 bundles and 4 singles. Ben has 34 sticks. Yes! They have the same number, thirty-four.
74:43	ASK	Did anyone change their mind about puzzle two while we worked? You can just nod. [wait about 20 s for answers]
	NOTE	Model answer: No. 40 is 4 bundles of ten and no singles. 4 is only 4 singles. 40 has more sticks. Volunteers first; never call a child by name to answer; no tallies, no rankings. Praise the reason, not the speed.

76:00 – 82:00 Exit ticket

script 4:12 of 6:00

76:00	SLIDE	Show slide **Exit ticket** (s-exit)
76:25	REC	*Recording: pause and do the exit ticket on your own. Then press play to check it.*
76:33	SAY	Exit ticket. Three questions, on your own, without looking back. Write your answers on page 5.
76:41	READ	E1. Look at the bundles and singles. How many sticks are there? E2. Thirty-seven equals how many tens and how many ones? E3. Write the number: seven tens and no ones.
76:58	CHILDREN	Children answer E1 to E3 on their own. [2:30]
79:28	SLIDE	Show slide **Check the exit ticket** (s-exitans)
79:53	READ	Forty-eight. Three tens and seven ones. Seventy, and the zero is needed to show there are no ones.
80:03	SAY	Check your own ticket in a different colour. Well done. Put a star by each one you got right.

	NOTE	Nothing is collected or marked live. Children tick their own ticket. If many children miss one question, spend two minutes on it at the start of the next lesson, in the open session, no names. Do not read out any child's result.

82:00 – 85:00 Look-back

script 2:33 of 3:00

82:00	**SLIDE**	Show slide **Look-back** (s-look)
82:25	**REC**	*Recording: pause and fill in your look-back box. You can pass.*
82:30	**SAY**	Look-back. Tick what was hard and what helped you. Write or draw one thing you did well. If you like, tick one thing to try next time. You can pass. Nobody reads it out. If you tick 'I am still stuck', ask your grown-up to take a photo of this page after class and send it to our business WhatsApp. Then we will help you.
83:03	**CHILDREN**	Children fill in the look-back box on page 5. [1:30]

85:00 – 90:00 Flex time and goodbye

script 0:46 of 5:00

85:00	**SLIDE**	Show slide **Well done, inquirers!** (s-end)
85:25	**SAY**	Well done, inquirers. Next lesson is Number Words and the Number Line. Please have the number cards cut out from the kit pages, a small toy or a coin, and a pencil and paper. Goodbye, and thank you to the grown-ups.
	SLIDE	Show slide **Go further: what if?** (s-opt) *(optional)*
	SAY	Optional, only if you are on time: what is the greatest number you can make with 9 bundles and 9 singles? And what happens if you add one more single?
	CHILDREN	Short think time, then take two answers. [1:30]
	SLIDE	Show slide **If we have time: pick one** (s-menu) *(optional)*
	SAY	Spare-time menu. If the whole class is ahead, pick one or two activities from the guide (about 4 minutes each).
	NOTE	This is the standing buffer. If you are behind, finish the look-back and say goodbye. Do not start anything new. Optional slide answer: 99; one more is ten bundles, which is called a hundred (next lessons). If the whole class is ahead, use the Spare-time menu (guide section 3) instead of rushing on.

3b. Spare-time menu: if the class is ahead

- Whole class ahead: use the Spare-time menu in the Flex time and the optional Go further slide. Pick one or two activities; do not start new content.
- A few children ahead: they may choose Go further or the Investigation, which are open to everyone. Never label or name a child, and never announce who is ahead.
- Never teach anything the next lesson needs. If the class is ahead, slow down: ask 'How do you know?' and let children explain, rather than rushing on.

Optional time, never added to the 90-minute sum. It comes from the 5-minute flex buffer, from slack in the parts, or from the optional Go further slide.

Activity	Minutes	You say	Recording cue	Answer
Is it always true?	4 (optional)	Mei says: if you add one more single stick, the ones digit goes up by one. Is that always true? Try 23, 47 and 39 with your sticks or kit.	*Recording: pause. Try 23, 47 and 39 with one more single each. Is Mei always right?*	Not always. 23 and 47 become 24 and 48. 39 plus one single makes ten singles, which tie into a new bundle: 40. It is true unless the ones digit is 9.

Make a puzzle for your grown-up	4 (optional)	Pick a secret number. Write two clues about its tens and its ones, like: it has 4 bundles and the ones digit is 7. Give it to your grown-up to solve.	*Recording: pause. Write a mystery number puzzle with two clues for a grown-up to solve.*	No single answer. Check that the clues fit the secret number and fit only one number.
Teach it back	3 (optional)	Pretend your grown-up or a toy has never seen bundles. Teach them how to read 52 using bundles and singles.	*Recording: pause. Teach a grown-up how to read 52 with bundles and singles.*	52 is 5 bundles of ten and 2 singles. The left digit counts the bundles, the right digit counts the singles.

4. Questions, answers, hints and common mistakes

Sneak-peek puzzles (minutes 10 to 14)

Puzzle 1 (access): Count the stars. Write how many. You may draw rings round groups to help.

Answer: 24 stars

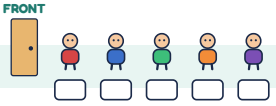

Puzzle 2 (think): Mei has 3 bundles of ten sticks and 4 single sticks. Ben has 34 sticks. Could they have the same number of sticks? Circle Yes or No. I know because ___.

Answer: Yes. 3 bundles of ten is 30, and 4 more is 34.

Unmarked. Never put answers on boards in front of the group and never read a name with an answer. Reveal the answers where your script says (usually Talk time).

Start here (workbook pages 1 and 2)

S1 **Write the place of each child.**

Answer: 1st, 2nd, 3rd, 4th, 5th

Hint (say this first): Start at the door. The first child is 1st.
Worked solution: The child nearest the door is 1st, then 2nd, 3rd, 4th and 5th.
Common mistakes: Counting from the wrong end.
Time for a middle child: about 1.5 min.

S2 **Count the apples.**

There are ☐ apples.

Answer: 7

Hint (say this first): Touch each apple once.
Worked solution: Count 1, 2, 3, 4, 5, 6, 7.
Common mistakes: Counting one twice.
Time for a middle child: about 1.5 min.

S3 **Fill in the boxes.**

☐ groups of ☐ = ☐

Answer: 4 groups of 3 = 12

Hint (say this first): Count the plates, then the cookies on one plate.
Worked solution: 4 plates with 3 cookies each: 3 + 3 + 3 + 3 = 12.
Common mistakes: Counting plates as cookies.
Time for a middle child: about 2.5 min.

S4 **Look at the dots. The balls show 2 rows of 3.**

(a) ☐ × ☐ = ☐
(b) Is 3 × 4 = 4 × 3? Circle Yes or No.

Answer: 3 × 4 = 12; Yes

Hint (say this first): Count the rows and the dots in one row.
Worked solution: 3 rows of 4 dots make 12 dots. Turning the page gives 4 rows of 3: also 12.
Common mistakes: Adding 3 + 4.
Time for a middle child: about 2.5 min.

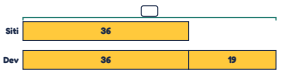

S5 **Fill in the table.**

Groups	In each	Total
4	3	☐
☐	5	30
2	☐	10

Answer: 4 groups of 3 is 12; 6 groups of 5 is 30

Hint (say this first): Total = groups times in each.
Worked solution: 4 groups of 3 = 12. 30 in 6 groups of 5.
Common mistakes: Adding the two numbers.
Time for a middle child: about 2.5 min.

S6 **Siti has 36 beads. Dev has 19 more beads than Siti. Fill in the boxes.**

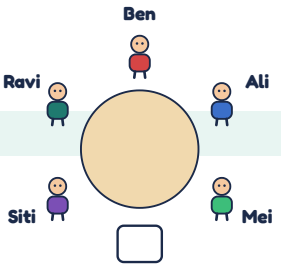

(a) Dev has ☐☐ beads.
(b) They have ☐☐ beads altogether.

Answer: Dev has 55 beads; 91 altogether

Hint (say this first): Dev has the same as Siti and 19 more.
Worked solution: 36 + 19 = 55. 36 + 55 = 91.
Common mistakes: Subtracting 19.
Time for a middle child: about 3 min.

Think harder (page 3): the taught idea in a new setting

T1 **Six children sit round a table. Kumar sits between Mei and Siti. Who sits in the empty seat?**

The child in the empty seat is _____.

Answer: Kumar

Hint (say this first): Look at the seat between Mei and Siti.
Worked solution: The empty seat is between Mei (3) and Siti (5), so it is Kumar.
Common mistakes: Choosing Ravi.
Time for a middle child: about 4 min.

T2 **Add the counters.**

(a) 7 + 8 = ☐☐
(b) 7 + 7 = ☐☐

Answer: 15; 14

Hint (say this first): Fill the first frame to 10 with counters, then count on the rest.
Worked solution: 7 + 8: take 3 from the 8 to make 10, then 10 + 5 = 15. A double is two of the same: 7 + 7 = 14.
Common mistakes: Writing 78.
Time for a middle child: about 3 min.

T3 **Each shape stands for a number. Find the numbers.**

Answer: Circle is 5, triangle is 2

Hint (say this first): Two circles make 10.
Worked solution: 2 circles = 10, so a circle is 5. 5 + triangle = 7, so a triangle is 2.
Common mistakes: Guessing without checking.
Time for a middle child: about 5 min.

Go further (page 4): mastery and extension

G1 **Which is the same as 4 × 3?**

Answer: (1) 3 + 3 + 3 + 3

Hint (say this first): Work out each one.
Worked solution: 4 × 3 = 12 and 3 + 3 + 3 + 3 = 12.
Common mistakes: Choosing 4 + 4 + 4 + 4.
Time for a middle child: about 4 min.

G2 **20 pencils are put in 4 equal packs. How many are in each pack?**

20 ÷ 4 = ☐

Answer: 5

Hint (say this first): Split the strip into 4 equal cells and share 20.
Worked solution: 20 shared into 4 equal packs is 5 in each pack, because 4 × 5 = 20.
Common mistakes: Giving 16.
Time for a middle child: about 5 min.

G3 **Ali has 30 stickers and Mei has 18. Ali gives Mei some so they have the same. How many does Ali give?**

Ali gives ☐ stickers.

Answer: 6

Hint (say this first): Together they have 48. Share equally.
Worked solution: 48 shared between 2 is 24. 30 - 24 = 6.
Common mistakes: Saying 12.
Time for a middle child: about 5 min.

Investigation (page 5): Swap the numbers

Easy first step: Work out 2 × 5 and 5 × 2. Then try 3 × 4 and 4 × 3.
Then: Always, sometimes or never: swapping the two numbers in a multiplication gives the same answer. Try 6 × 2. Write what you notice.

Model answer: Always (for the numbers tried): 10 and 10, 12 and 12, 12 and 12.

Look for: Several examples tried and a sentence about what stays the same.
Common mistakes: Trying only one pair.

Talk and explain (minutes 70 to 76)

Is 40 the same as 4? Circle Yes or No. Use bundles to explain: I know because ___. Sentence starter: I think ... because ...

Model answer: No. 40 is 4 bundles of ten and 0 singles. 4 is only 4 singles. 40 has more sticks, because the 4 in 40 counts bundles of ten.

Look for: A reason that uses tens and ones (not just 'because 40 is bigger'). A child may say the zero holds the place. Volunteers first, a pass is always fine, never call a child by name to answer, no tallies.

Exit ticket (minutes 76 to 82): 3 questions

E1 **Fill in the boxes. 2 bags have 3 sweets in each bag.**

☐ groups of ☐ = ☐

Answer: 2 groups of 3 = 6

Worked solution: 2 bags of 3 sweets: 3 + 3 = 6.
Common mistakes: Counting bags only.

E2 **Put a tick in the correct box.**

Answer: True; False

Worked solution: 2 groups of 5 is 10 (True). 3 × 4 is 12, not 7 (False).
Common mistakes: Ticking both boxes.

E3 **Write the answer.**

3 groups of 2 = ☐

Answer: 6

Worked solution: 2 + 2 + 2 = 6.
Common mistakes: Counting all as pens.

Look-back (minutes 82 to 85)

Children tick or write: *Something I did well*; *The hardest part was* (knowing which digit is the tens; making bundles of ten; the zero in 40 or 70; opening a bundle (Think harder); something else); *What helped me* (bundles or objects; drawing it; trying again; I asked for help; I was not stuck); *Next time I will try* (drawing it; using objects; checking my answer; asking a question); *I am still stuck (I will ask in the class chat or show my tutor on camera)* and *I would like to pass*. Never collected or read out in front of the group. A child who ticks still stuck gets a check-in in the open session next lesson.

5. Home practice and online practice

#	Tier	Question	Answer
H1	Start here	3 groups of 5 = [] .	15
H2	Start here	6 ÷ 2 = [] .	3
H3	Start here	Circle Yes or No. Is 2 × 5 = 5 × 2?	Yes
H4	Think harder	{eq} Write a multiplication sentence for 4 bags of 3 sweets.	4 × 3 = 12
H5	Go further	Make equal groups from 12 counters in two different ways. Draw both.	Any: 2 groups of 6, 3 groups of 4, 4 groups of 3, 6 groups of 2.

Online practice (`out/l11/practice`, key `t2l11`): 12 items; 7 have a template that makes unlimited similar questions with a computed answer. Every template variant is checked by the validator against a brute-force oracle and the runner's own JavaScript. No timers, no scores, no streaks.

6. Parent line for the term report

Your child is learning to see numbers as tens and ones and to say why. This week: reading and writing two-digit numbers from bundles of ten and single ones.

Term line (plan, section 5): Your child is learning to see numbers as tens and ones, to notice patterns and to say why. Add one named strength and one next step from your own observation. No marks, no ranking, no claim of exam results.

7. Slide list

#	Time	Slide	On screen	Speaker note
1	0–4	**Bundles and Singles** s-title	TODAY WE WILL: / Make bundles of ten, and use them to read and write numbers.	Lesson 1 of Term 1, 90 minutes. Objective: read and write two-digit numbers as bundles of ten and single ones. Time plan: opening 0 to 4, warm-up 4 to 10, sneak-peek 10 to 14, explore 14 to 28, mini-lesson 28 to 38, brain break 38 to 42, workbook 42 to 70, talk 70 to 76, exit ticket 76 to 82, look-back 82 to 85, flex time and goodbye 85 to 90 (the buffer: do not start anything new). Think harder, Go further and the Investigation are for every child to choose. Nobody is told which page they should be on. Tell the group the lesson is recorded (the tutor, the shared screen and any unmuted voice) and that a child may keep the camera off.
2	0–4	**Our lesson today** s-routine	First | What we do / Remember | Count in tens and show ten with fingers / Sneak-peek | Two puzzles. A guess is fine. / Explore | Bundle real things / Learn | Read and write numbers / Move | Jump and hop / Workbook | Start here, then you choose / Talk | Explain your idea / Exit and look-back | What did I learn?	Show this for about 20 seconds and name the phases only; do not read the table. Lesson 1 only: it introduces the routine every lesson follows.
3	0–4	**Four inquirer rules** s-rules	Notice it. Look closely. / Test it. Try it with real things. / Explain why. Say how you know. / Mistakes help us. A guess is fine. You can pass. / RECORDING: / We record the tutor, the screen and any voice that is unmuted. You may mute and keep your camera off.	Read the four rules together. Say the recording notice in your own words: the platform records the tutor, the shared screen and any voice that is unmuted; children's video is excluded; names are kept off the screen. A child or parent who does not wish to be heard can stay muted, and a camera can stay off. Then tell the shopkeeper story (47 pencils) and ask the group what a shopkeeper could do.
4	4–10	**Warm-up: count in tens** s-rem1	Clap on every number / 10 20 30 40 50 60 70 80 90 100 / Now count back from 100. Whisper, and big hands on 50!	Count in tens to 100 with a clap on each number, then back to 0. This is a spiral review of skip counting in tens (holiday topic) and lets a new child join: they hear it before they say it.
5	4–10	**Fingers to ten** s-rem2	[picture: ten_frame] / I show 6. How many more fingers make 10? / 6 3 8 5 9	Say each number; children show on their fingers how many more make ten. Answers: 6 needs 4, 3 needs 7, 8 needs 2, 5 needs 5, 9 needs 1. Hands up on camera is fine. No writing, no marks.
6	4–10	**Ten and some more** s-rem3	[picture: ten_frame] / 10 and 3 more is ___ / 10 + 6 20 + 4 30 + 7	Answers: 13, 16, 24, 37. Say the tens word slowly, then the ones: twenty... four. This is the bridge to bundles of ten and singles. Show 20 and 30 as two or three full ten-frames if a child is unsure.
7	10–14	**Sneak-peek puzzles** s-sneak	Ideas we have not learnt yet. A guess is a great start. Nobody is marked. / PUZZLE 1: anyone can try: / Count the stars. Write how many. / You may draw rings round groups. / [picture: scatter] / PUZZLE 2: think: / Mei has 3 bundles of ten sticks and 4 single sticks. / Ben has 34 sticks. / Could they have the same number? Circle Yes or No. I know because ___.	Puzzle 1 (24 stars) is an access question: any child can try it by counting or drawing rings. Puzzle 2 is a thinking question on the lesson's key idea. Say: two sneak-peek puzzles, ideas we have not learnt yet; a guess is a great start and I do not know is welcome; nobody is marked. Children write on their own paper. Nobody holds paper to the camera: children keep their papers and check their own thinking at Talk time. There is no private chat and no board in front of the group. Answers: 24; yes (3 tens and 4 ones is 34). Do not reveal Puzzle 2 until Talk time. Do not write scores or keep a list of who found it easy.

8	14–28	**Explore: grab and bundle** s-explore1	Grab a handful of small things. Not the whole pile. / Make bundles of ten: a hair tie, a cup, or a ring on paper. / Count the bundles. Count the singles left over. / Say: I have ___ tens and ___ ones. / WHAT IF?: / What if you open a bundle? Can you show your number a different way?	Round 1, about 4 minutes. Objects first, no writing yet. Children bundle in tens and count the singles. A child who wants to may show their bundles to the camera. The what-if card is available from the start so nobody waits: it previews the Think harder idea (opening a bundle), and no child is named for choosing it. A child with too few things can use the kit bars and squares.
9	14–28	**Show me!** s-explore2	Build each number with your tens bars and ones squares. Show a thumbs-up when it is built. Then check your own build. / [picture: bundles 2 tens 3 ones] / 17 30 58	Round 2, about 3 minutes, main room. Call each number aloud and show it on the slide. Children build with the kit bars (tens) and squares (ones) and give a thumbs-up. Read the check line aloud so every child can check their own build; nobody holds anything up to the camera. Keep the builds to three: 17, 30 (the zero case) and 58. Answers: 17 is 1 bar and 7 squares; 30 is 3 bars; 58 is 5 bars and 8 squares. The picture of 23 is only an example. Camera tip: a child may tilt the screen so the table can be seen, but this is not required.
10	14–28	**What did we notice?** s-explore3	How many singles can be left over? / Could you have ten singles left over? Why not? / Is it quicker to count 40 singles, or 4 tens?	Take one or two answers from volunteers. Key idea: the singles left over are always 0 to 9, because ten singles tie into another bundle. Counting in tens is quicker and easier to keep track of. Repeat a child's answer in your own words so the recording picks it up.
11	28–38	**Ten singles make a bundle** s-m1	[picture: ten_to_bundle] / 10 singles = 1 bundle of ten	Show ten single sticks, then tie them into one bundle. A bundle is worth ten. Ask: how many sticks are in one bundle? Answer: ten.
12	28–38	**Reading 34** s-m2	[picture: bundles 3 tens 4 ones] / 30 and 4 more is 34. The left digit counts the tens. The right digit counts the ones.	Think aloud: count the bundles in tens (10, 20, 30) then the singles (31, 32, 33, 34). Write 3 in the tens box and 4 in the ones box. Ask: which digit tells me how many bundles? Answer: the left one, 3.
13	28–38	**Your turn: write the number** s-m3	Write on your paper. Timer: 1 minute / [picture: bundles 2 tens 7 ones] / ___ / [picture: bundles 4 tens 0 ones] / ___ / [picture: bundles 1 tens 9 ones] / ___	Each child writes on their own paper. Walk the cameras. Do not ask children to hold boards up in front of the group.
14	28–38	**Check: write the number** s-m3a	[picture: bundles 2 tens 7 ones] / 27 / [picture: bundles 4 tens 0 ones] / 40 / [picture: bundles 1 tens 9 ones] / 19	Answers: 27, 40, 19. Read each answer aloud so a child watching the recording can mark their own work.
15	28–38	**The zero holds the place** s-m4	[picture: bundles 4 tens 0 ones] / No singles, so the ones box has a 0. Without the 0, 4 would look like 4 ones.	Zero ones means no singles. The zero is needed so the 4 stays in the tens place. A common slip is to write 4 for 4 tens.
16	28–38	**Same digits, different number** s-m5	[picture: bundles 2 tens 6 ones] / [picture: bundles 6 tens 2 ones] / Which has more sticks? How do you know?	26 is 2 bundles and 6 singles. 62 is 6 bundles and 2 singles. 62 has more because the tens digit is worth more. The order of the digits matters. The Talk time question uses the zero case instead, so this idea is not repeated.
17	28–38	**Ten singles can tie up** s-m5b	[picture: bundles 2 tens 13 ones] / [picture: bundles 3 tens 3 ones] / 13 ones = 1 ten and 3 ones	Show 2 bundles and 13 singles, then tie ten of the singles into a third bundle: 3 bundles and 3 singles. Both pictures are 33 sticks. This is the idea Think harder uses (5 tens and 14 ones). Keep it to about a minute: it is a worked example, not a new skill to drill.

18	28–38	**Count: tens, then ones** s-m6	10 20 30 31 32 33 34 / Say it together	Count the 3 bundles then the 4 singles together. This is the same count as the explore. Keep it short.
19	38–42	**Jump the tens, hop the ones** s-break	A big jump for every ten. A small hop for every one. / 12 25 40 31 / 34 is 3 big jumps and 4 small hops. Sip some water.	Four minutes. Stand up on camera. Call each number and have children jump the tens and hop the ones; count the jumps and hops aloud. No equipment. Keep it gentle for small spaces.
20	42–70	**Workbook page 1: Start here** s-ws1	Questions 1 to 3. Timer: 9 minutes / questions S1, S2, S3	Read questions 1 and 2 aloud. Children work on their own; the tutor walks the cameras and asks how do you know. Wait 10 seconds before helping. After question 3 any child may choose to carry on or try Think harder.
21	42–70	**Check page 1** s-ws1ans	answers S1, S2, S3	Read each answer aloud. Children mark their own page in a different colour. Never ask a child to show a wrong answer to the group.
22	42–70	**Workbook page 2: Start here** s-ws2	Questions 4 to 7. Timer: 9 minutes / questions S4, S5, S6	Read question 6 aloud: it is a spot-the-mistake. Read question 7 aloud as well: draw Ali's and Mei's sticks. Children may draw bundles to decide.
23	42–70	**Check page 2** s-ws2ans	answers S4, S5, S6	Read each answer aloud so a child watching the recording can mark their own work. Question 6 answer: no, Kumar should write 34, because 43 is 4 tens and 3 ones. Never ask a child to show a wrong answer to the group. Question 7 answer: Ali has 60 and Mei has 6, because 6 tens is much more than 6 ones.
24	42–70	**Choose your next page** s-choice	Page | What it is / Think harder (page 3) | Our idea in a new setting / Go further (page 4) | Bigger puzzles / Investigation (page 5) | A pattern to find / Check | Finish and check your own work / Everyone may choose. Not finished? Pages 3 to 5 are for home too.	Invite the whole group at once, for example: when you have finished Start here, you can choose Think harder, Go further or the Investigation. Never announce who is on which page and never name a child. Pairs are not split unless both children agree. Model answers are in the tutor guide. About 4 minutes.
25	70–76	**Talk and explain** s-talk	TALK ABOUT IT: / Is 40 the same as 4? / Use bundles to explain. / I think … because …	One minute of talk to the grown-up next to you, or to your screen. Then volunteers first; a pass is always fine; never call a child by name to answer. Model answer: no. 40 is 4 bundles and no singles, and 4 is only 4 singles, so 40 has more. Repeat each child's answer in your own words for the recording.
26	70–76	**Back to the sneak-peek** s-sneakans	[picture: bundles 3 tens 4 ones] / Yes! Mei and Ben can have the same number: 34.	Reveal puzzle 2 now. Say: many of you wrote a good reason. Do not read out anyone's earlier answer.
27	76–82	**Exit ticket** s-exit	On your own. No looking back. Timer: 3 minutes / questions E1, E2, E3	Children answer on page 5. Read E1, E2 and E3 aloud (the questions are on the slide). Children tick their own ticket against the next slide. Nobody holds paper to the camera and there is no private chat.
28	76–82	**Check the exit ticket** s-exitans	answers E1, E2, E3	Read each answer aloud. Children check their own ticket in a different colour.

29	82–85	**Look-back** s-look	[look-back box]	Three minutes. Children tick or write the look-back box on page 5. A pass is always allowed. It is never marked, never collected in front of the group and never read out. If a child ticks I am still stuck, a grown-up may photograph that page after class and send it to the business WhatsApp (the number is in the parent summary, never on a slide). You then help in the open session next lesson. Never a direct message to a child. The Next time I will try row is optional; at the start of the next lesson you may say to the whole group: today you could try drawing it, using objects or checking your answer.
30	85–90	**Well done, inquirers!** s-end	Show a grown-up one thing you found out today. / NEXT LESSON: / Number Words and the Number Line / Have ready: number cards, a small toy, pencil and paper.	Say goodbye and thank the grown-ups. Minutes 85 to 90 are flex time: the buffer. If you ran late, finish any open item (the look-back). Do not start anything new. If the whole class is ahead, show the optional menu slide and use the Spare-time menu from the tutor guide.
31	optional	**Go further: what if?** s-opt	What is the greatest number you can make with 9 bundles and 9 singles? / What happens if you add one more single? / [picture: bundles 9 tens 9 ones]	Optional, only if you are on time. Answer: 99. One more single makes 10 singles, which tie into a tenth bundle: ten bundles. Ten tens have a name: a hundred (Lesson 2 onwards). Take two answers and move on.
32	optional	**If we have time: pick one** s-menu	Activity | What we do / Is it always true? | Add one more single. Does the ones digit always go up by one? / Make a puzzle | Write a mystery number puzzle for your grown-up / Teach it back | Show how to read 52 with bundles and singles / Optional. Everyone may join.	Optional Spare-time menu, used only if the whole class is ahead. Pick one or two activities (3 to 5 minutes each); full tutor lines and answers are in the tutor guide. Never start new content and never name who is ahead. Slow down with how do you know rather than rushing on. These minutes come from the flex buffer and are not part of the 90-minute sum.

8. Recording cues and chapter markers

Say each cue once, to the camera, at the start of the part. Add a chapter marker at each time. A child watching alone cannot ask you a question, so say the page and question number aloud, read each question and each answer aloud, and repeat a child's answer in your own words.

Chapter	Part	You say (recording voice)	A child watching later
0:00	Opening	*If you are watching the recording: hello! Get a pencil, paper, your workbook and your things to bundle. Pause or rewind any time.*	Gather your workbook, pencil, paper and things to bundle. Press play when ready.
4:00	Remember warm-up	*Recording: join in! Say the numbers out loud and show your fingers. Pause if you need longer.*	Play along. Say and show each answer before the video does.
10:00	Sneak-peek puzzles	*Recording: pause now and try both puzzles on your paper. Guessing is fine. Press play for the next part.*	Pause. Try both puzzles on your own paper. A guess is fine.
14:00	Explore	*Recording: pause now. Grab a handful, make bundles of ten, then build the numbers I call. Press play when you have tried.*	Pause. Grab and bundle, then build each number with your kit. Write what you find.
28:00	Mini-lesson	*Recording: keep watching and copy the examples. Rewind if you miss a step.*	Watch and copy the examples. Rewind any step you missed.
38:00	Brain break	*Recording: stand up and join in! Big jump for a ten, small hop for a one.*	Stand up and jump the tens and hop the ones.
42:00	Workbook	*Recording: pause now and do workbook page 1. When you finish a page, press play to check it.*	Pause. Do page 1, then play to check. Then page 2. Then choose a page to try.

70:00	Talk time	*Recording: pause. Tell a grown-up your answer to the talk question, and say why.*	Pause. Explain your answer to someone at home, with a reason.
76:00	Exit ticket	*Recording: pause and do the exit ticket on your own. Then press play to check it.*	Pause. Do the exit ticket alone, then play to check it.
82:00	Look-back	*Recording: pause and fill in your look-back box. You can pass.*	Pause. Fill in the look-back box, or pass.
85:00	Flex time and goodbye	*Recording: well done for finishing! Show a grown-up one thing you found out.*	Show a grown-up your workbook and tell them one thing you found out.

9. Timing check (model, not a stopwatch)

Part	Allocated	Script	Slow class	Flag
opening	4:00	3:47	4:23	OVER (slow class)
remember	6:00	4:36	5:28	ok
sneak	4:00	3:17	3:50	ok
explore	14:00	10:50	12:52	ok
mini	10:00	8:37	10:10	OVER (slow class)
break	4:00	3:28	4:07	OVER (slow class)
work	28:00	26:41	31:51	OVER (slow class)
talk	6:00	5:10	6:10	OVER (slow class)
exit	6:00	4:12	4:57	ok
look	3:00	2:33	3:00	ok

Assumptions as docs/audit/timing_p1.md: speech 120 words a minute, read-aloud 110, slide change 25 s, a group question 10 s thinking plus 20 s answers, papers to the camera 30 s. Workbook: Start here has 6 questions; a middle child needs about 5.5 min for page 1 and 8.0 min for page 2 (a slower child about 1.7 times as long, so may finish page 1 and part of page 2; that is fine, the check-together slides cover every answer). The lesson has no breakout rooms, so no breakout time is counted.
