Investigation: Move the fewest

Try this any time. You do not have to finish.

First, try this. Draw 9 dots and 6 dots. To make a ten with the 9, how many dots do you move? Now try 8 + 7.

Next, try this. Pick two numbers from 5 to 9. You can fill the first frame or the second. Which way moves fewer dots? Does the same way always move fewer? Write how you know.

Exit ticket

On your own, at the end of the lesson. No looking back.

No.E1

Add.

7 + 6 = _____

No.E2

Add.

38 + 5 = _____

No.E3

Add 6 + 9 + 4. Fill in the blanks.

The total is _____.

I added _____ and _____ first.

Look-back There are no right answers. You can pass. Nobody reads it out.

Something I did well:

The hardest part was ... ☐ knowing how many to move ☐ splitting a number ☐ adding to a tens number like 30 + 4 ☐ adding three or four numbers (Think harder) ☐ something else

What helped me: ☐ ten-frames or counters ☐ drawing it ☐ trying again ☐ I asked for help ☐ I was not stuck

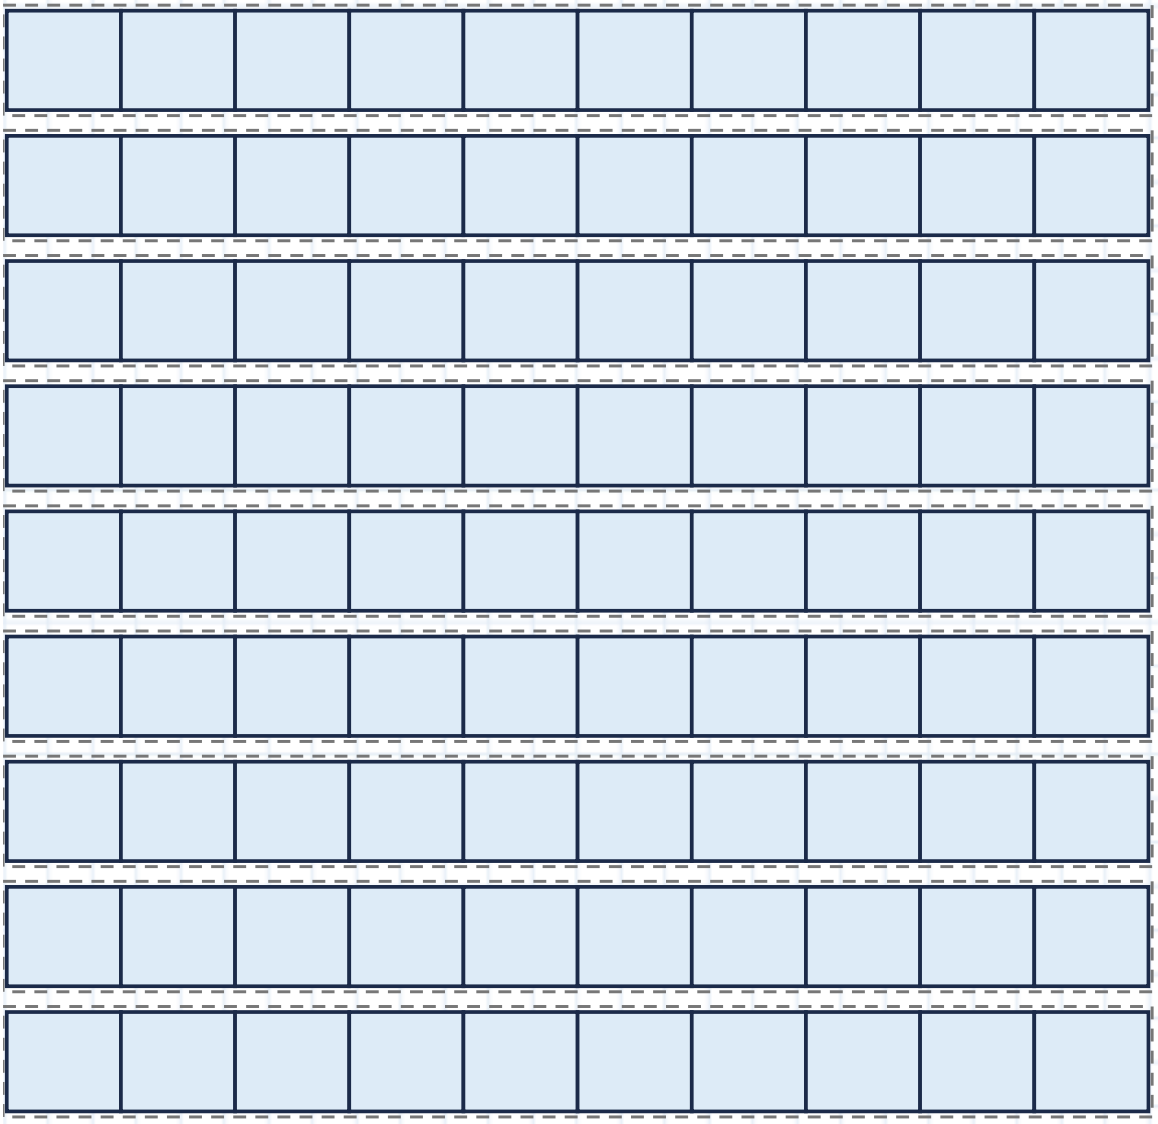

Next time I will try: ☐ drawing it ☐ using objects ☐ checking my answer ☐ asking a question ☐ I am still stuck (my tutor will come and help) ☐ I would like to pass

Kit page: tens bars and ones squares

A grown-up cuts these out before the lesson. A bar is a ten (like a ten-frame in a line). A square is a one. Keep them in an envelope.

Tens bars: cut out all 9 (each bar is one ten)

Ones squares: cut out all 20 (each square is one one)
