Investigation: Move the fewest

Choose this any time you like. You do not have to finish it.

Easy first step: Draw 9 dots and 6 dots. How many dots do you move to make a ten with the 9? Now try 8 + 7.

Then: Pick two numbers from 5 to 9. You can fill the first frame, or the second. Which way moves fewer dots? Is it always the same rule? How do you know?

Exit ticket

On your own, at the end of the lesson. No looking back.

No.E1

Add by making a ten.

7 + 6 = _ _ _ _ _ _ _

No.E2

Add by making a ten.

38 + 5 = _ _ _ _ _ _ _

No.E3

Add 6 + 9 + 4. Which two numbers did you add first?

The total is _ _ _ _ _ _ _

I added _ _ _ _ _ _ _ and _ _ _ _ _ _ _ first

Look-back There are no right answers. You can pass. Nobody reads it out.

Something I did well:

The hardest part was ... ☐ knowing how many to move ☐ splitting a number ☐ adding to a tens number like 30 + 4 ☐ adding three or four numbers (Think harder) ☐ something else

What helped me: ☐ ten-frames or counters ☐ drawing it ☐ trying again ☐ I asked for help ☐ I was not stuck

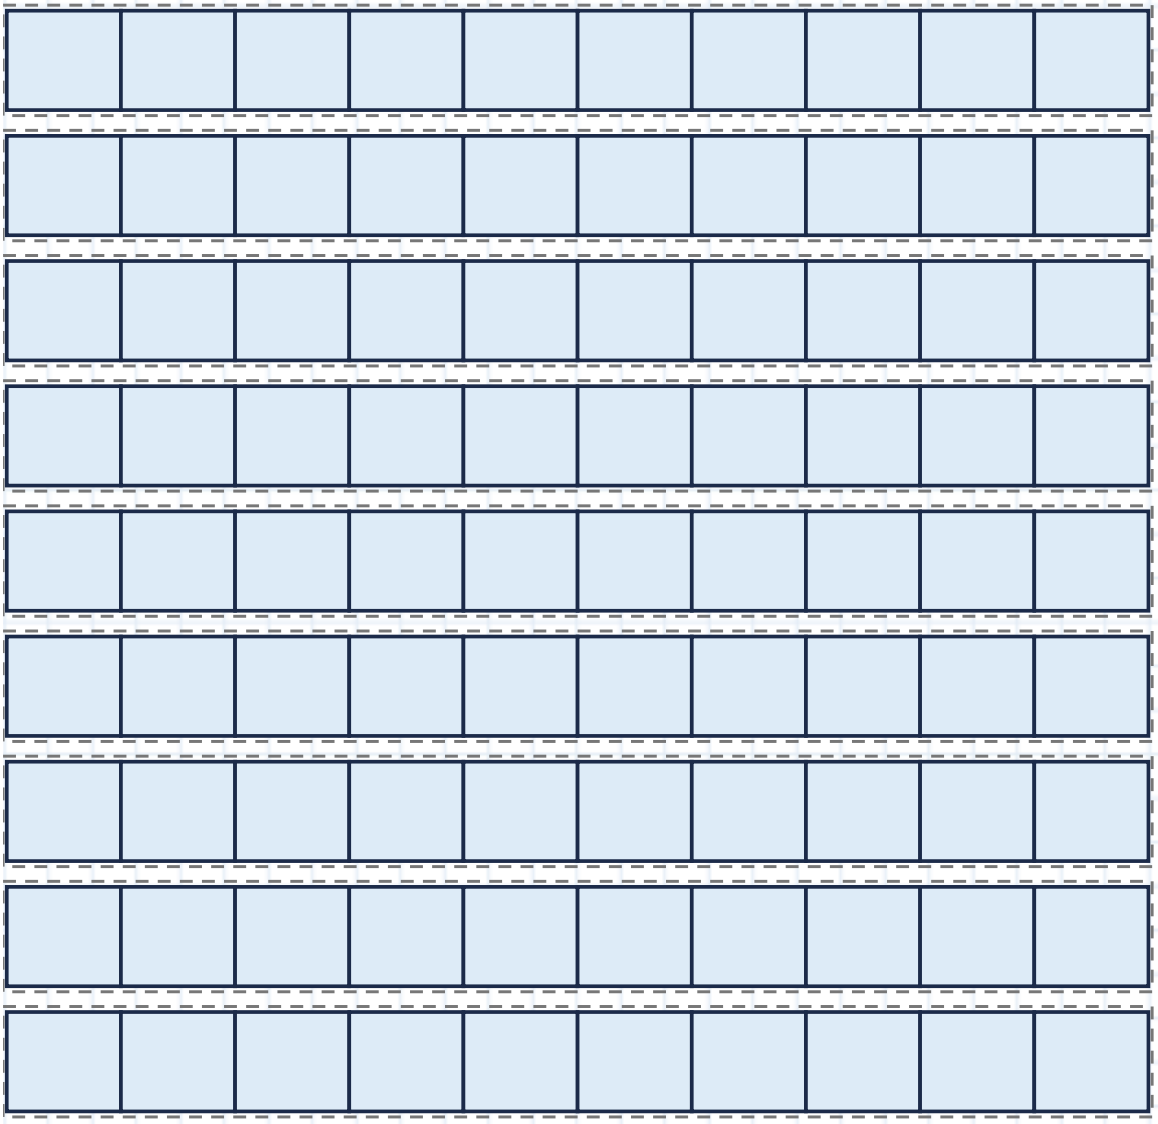

Next time I will try: ☐ drawing it ☐ using objects ☐ checking my answer ☐ asking a question ☐ I am still stuck (my tutor will come and help) ☐ I would like to pass

Kit page: tens bars and ones squares

A grown-up cuts these out before the lesson. A bar is a ten (like a ten-frame in a line). A square is a one. Keep them in an envelope.

Tens bars: cut out all 9 (each bar is one ten)

Ones squares: cut out all 20 (each square is one one)
