LESSON 8 • TERM 3 • LEVEL 1

Make a Table

Find the far-away picture

TODAY WE WILL

Make a table to find a picture far away.

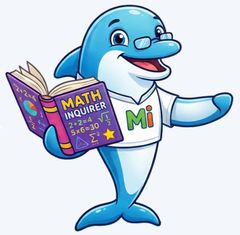

2–8 MIN

Warm-up: count in 2s

Clap on every number.

4	6	8	10	?

Count in 2s from 4. What comes next?

Clap along with me!

2–8 MIN

Doubles

Double means the same number twice.

Double 6 is 6 + 6.

Double 7 is 7 + 7.

What are double 6 and double 7?

Read a table

2–8 MIN

Mei sticks 2 stickers in her book each day.

Day	1	2	3
Stickers	2	4	

How many stickers on day 3?

Sneak-peek puzzles

8–12 MIN

PUZZLE 1: anyone can try

Each box has 4 pencils. Fill in the table.

Boxes	1	2	3
Pencils	4	8	

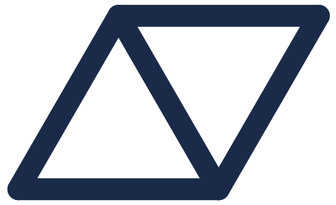

PUZZLE 2: think

Picture 1 has 2 dots. Picture 2 has 5 dots. Picture 3 has 8 dots. How many dots in picture 5? I know because ___.

Explore: build triangles

12–23 MIN

1. Make 1 triangle with 3 strips.
2. Count the strips.
3. Make a second triangle that joins the first and shares one strip. Count all your strips.
4. Make a third. Count all your strips.

Explore: guess, then build

12–23 MIN

1. You have 1, 2 and 3 triangles in a row.
2. Guess: how many strips for 4 triangles?
3. Build 4 triangles. Count. Was your guess right?

A guess is a great start.

12–23 MIN

Explore: no building now

Do not build.

How many strips would 5 triangles need?

Use what you have found. Tell your grown-up how you know.

Make a table

23–34 MIN

Triangles	1	2	3	4	5
Sticks	3	5	7	9	

Write what you found in a table.

How does it grow?

23–34 MIN

Triangles	1	2	3	4	5
Sticks	3	5	7	9	11

+2 +2 +2 +2

The same number more each time.

Use the table to go on

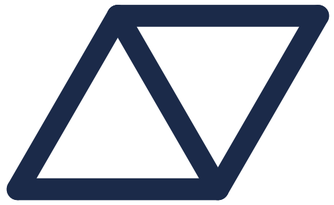

23–34 MIN

Triangles	5	6	7
Sticks	11		

2 more each time. What are the next two numbers?

Why not 3 times?

23–34 MIN

Shared sticks are counted once.

3 + 3 = 6?

Two triangles need 5 sticks, not 6.

They share 1 stick.

A rule in words

23–34 MIN

THE RULE

Double the number of triangles.

Then add 1.

Triangles	1	2	3	4
Double	2	4	6	8
Add 1	3	5	7	9

Your turn

23–34 MIN

TABLE

Each jar holds 6 sweets.

Jars	1	2	3	4
Sweets	6	12		

Fill in both boxes on your paper.

Check: your turn

23–34 MIN

Jars 3: 18 sweets. Jars 4: 24 sweets.

34–38 MIN

Hop in twos

Stand up. I call a number of pictures.

Hop twice for each picture and count in 2s.

Sip some water.

Workbook page 1: Start here

38–70 MIN

Questions 1 and 2. Take your time.

S1 Squares in a row are made with sticks. Look at the three pictures. Count the sticks in each.

S2 For every 3 red beads there are 2 blue beads. Fill in the table. The last column is spare.

Groups	1	2	3	4	5
Red beads	3	6		12	
Blue beads	2	4	6		

Groups	1	2	3	4	5
Red beads	3	6		12	
Blue beads	2	4	6		

38–70 MIN

Check page 1

S1	4; 7; 10
S2	9 and 8; 15

38–70 MIN

Workbook page 2: Start here

Questions 3 to 5. Take your time.

S3 Siti keeps adding squares to the row. Fill in the table. The last column is spare.

Squares	1	2	3	4	5	6	7
Sticks	4	7	10	☐	☐	☐	

S4 Ravi reads 5 pages each day. The table shows the pages he has read in all. Fill in the table.

Day	1	2	3	4	5	6
Pages	5	10	☐	20	☐	☐

S5 Look at the squares in a row. Tick True or False for each statement.

Squares	1	2	3	4	5	6	7
Sticks	4	7	10	☐	☐	☐	

Day	1	2	3	4	5	6
Pages	5	10	☐	20	☐	☐

38–70 MIN

Check page 2

S3	13, 16, 19; 3; 22
S4	15, 25, 30; day 5
S5	true; false; true

38–70 MIN

Choose your next page

Page	What it is
Think harder (page 3)	The 10th and 20th picture, odd sticks, a wrong number
Go further (page 4)	Picture 100, and working back from a total
Investigation (page 5)	Strips left over
Check	Finish and check your own work

Everyone may choose. Not finished? Pages 3 to 5 are for home too.

Talk and explain

70–76 MIN

A CHILD SAYS

5 triangles in a row need 15 sticks, because 5 times 3 is 15.

Is the child right? Test it with your strips.

I think ... because ...

Back to the sneak-peek

70–76 MIN

Puzzle 1: 12 pencils. Puzzle 2: 14 dots. Each picture has 3 more than the one before.

Exit ticket

76–82 MIN

On your own. No looking back.

E1 **Each tray holds 7 cups. 1 tray has 7 cups. 2 trays have 14 cups.**

3 trays have _____ cups.

E2 **Mei reads 3 pages each day. How many pages does she read in 5 days? Choose the correct answer. Write its number in the bracket.**

E3 **Rows of triangles use 3, 5, 7 and 9 sticks for 1, 2, 3 and 4 triangles. Each new triangle needs 2 more sticks.**

8 triangles need _____ sticks.

Check the exit ticket

76–82 MIN

E1	21
E2	(3) 15
E3	17

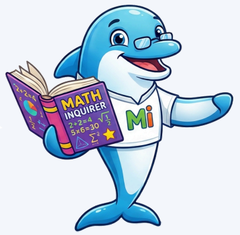

Look-back

82–85 MIN

Three minutes. There are no right answers. You can pass. Nobody reads it out.

Something I did well	write or draw one thing
The hardest part was …	☐ counting the sticks ☐ finding the number more each time ☐ using the table ☐ something else
What helped me	☐ my strips ☐ the table ☐ checking my answer ☐ I was not stuck
Next time I will try	☐ using my strips ☐ checking the table ☐ checking my answer ☐ asking a question
	☐ I am still stuck (my grown-up will photograph this page for my tutor) ☐ I would like to pass

Take your time. You can pass.

85–90 MIN

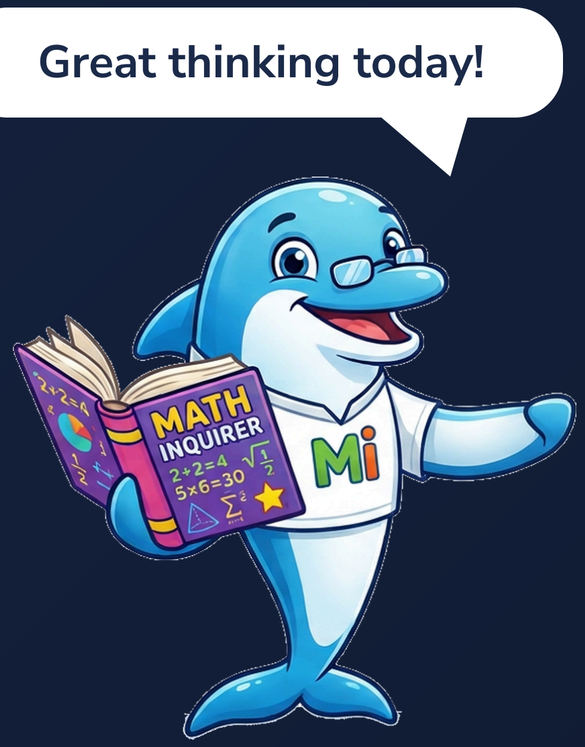

Well done, inquirers!

Show a grown-up one table you made today.

NEXT LESSON

Spot the Mistake

Have ready: the mistake-card page, cut out by a grown-up (8 cards).

OPTIONAL

Go further: squares in a row

Squares in a row: 1 square uses 4 sticks, 2 squares use 7, 3 squares use 10, 4 squares use 13, 5 squares use 16.

Squares	1	2	3	4	5
Sticks	4	7	10	13	16

How many sticks for 9 squares?

OPTIONAL

If we have time: pick one

Activity	What we do
Is it always true?	Every row of triangles has an odd number of sticks. Test it.
Make a puzzle	Make a table. Ask a grown-up for the next number.
Teach it back	Show a toy how a table helps.

Optional. Everyone may join.
