Answer key: Lesson 2, Five Minutes at a Time

For the tutor and grown-ups. Keep this page away from the child until they have finished and checked their own work. Ask *how do you know?* before saying right or wrong.

Start here (pages 1 and 2)

S1. Write the time for each clock.

Answer: 2:35; 9:05; 7:55

First clock: the long hand is on the 7, so 35 minutes; the short hand has passed the 2: 2:35. Second clock: the long hand is on the 1, so 5 minutes: 9:05 (two digits for the minutes). Third clock: the long hand is on the 11, so 55 minutes; the short hand has not reached the 8, so it is 7:55.

Watch for: Writing 2:7 (the number the long hand points to).; Writing 9:5 (one digit for the minutes).; Writing 8:55 (reading the number the short hand is going towards).

S2. Count in 5s from the 12. How many minutes past the hour is the long hand showing?

Answer: 40

The long hand is on the 8. Count in 5s: 5, 10, 15, 20, 25, 30, 35, 40. It is 40 minutes past the hour.

Watch for: Writing 8 (the number the long hand points to).; Writing 35 or 45 (a slip in counting).

S3. Draw the hands to show 3:20. Use a ruler.

Answer: The long hand on the 4 and the short hand a little past the 3

The minutes are 20: count 5, 10, 15, 20, so the long hand is on the 4. The hour is 3, so the short hand is a little past the 3.

Watch for: Drawing the long hand to the 3 or the 20.; Drawing the short hand exactly on the 3 or on the 4.

S4. Look at the clock. Choose the correct answer. Write its number in the bracket.

Answer: (2) 5:25

The long hand is on the 5. Count in 5s: 25 minutes. The short hand is a little past the 5. The time is 5:25.

Watch for: Choosing (1) 5:05 (reading the 5 as 5 minutes).; Choosing (3) 6:25 (the hour the short hand is going towards).

S5. Circle am or pm.

Answer: am; pm

Waking up at 6:30 is in the morning, so it is 6:30 am. Going to bed at 8:30 is in the evening, so it is 8:30 pm.

Watch for: Writing pm for waking up because 6 is a small number.; Writing am for bedtime.

S6. Ben and Mei leave home at different times. Look at the clocks.

Answer: Mei

Ben leaves at 6:50 and Mei leaves at 6:15. Both are the same hour, so the one with fewer minutes is earlier. 6:15 is earlier than 6:50, so Mei leaves first.

Watch for: Choosing Ben because 50 is a bigger number.; Comparing the short hands only (they look alike).

Think harder (page 3)

T1. Circle am or pm.

Answer: am; am; pm; pm

School starts in the morning: 7:30 am. Break at 10:20 is before noon: am. 12:30 is just after noon, so it is pm. Going to sleep at 9:15 at night is pm.

Watch for: Writing am for 12:30 because 12 is a small hour.; Thinking pm is only for night time.

T2. A film lasts 1 h 20 min.

Answer: 1 hour and 20 minutes; 1 h

h means hour and min means minutes, so 1 h 20 min is 1 hour and 20 minutes. 1 hour is 60 minutes, which is more than 50 minutes, so 1 h is longer.

Watch for: Writing 120 minutes (reading 1 h 20 min as 120).; Choosing 50 min because 50 is a bigger number than 1.

T3. A child says this clock shows 4:50.

Answer: No; 3:50

The long hand is on the 10, so it is 50 minutes past. The short hand is almost on the 4, but it has not reached it. The hour is still 3, so the time is 3:50.

Watch for: Saying Yes because the short hand is near the 4.; Writing 4:10 (reading the 10 as the minutes).

T4. The shows start at the times in the table. Ravi arrives at 10:35.

Answer: fish; 15

The fish show started at 10:20, and the birds show starts at 10:50. Ravi arrives at 10:35, between the two, so the fish show is on. From 10:35 to 10:50 is 15 minutes (10:35 to 10:40 is 5, then 10 more).

Watch for: Choosing the birds show (the next start time).; Writing 50 or 35 (a time, not the wait).

Go further (page 4)

G1. Mi starts to swim at 3:10 and stops at 4:05. Fill in the blanks.

Answer: 50; 5; 55

From 3:10 to 4:00 is 50 minutes (the 10 and the 50 make 60). From 4:00 to 4:05 is 5 minutes. 50 + 5 = 55, so Mi swims for 55 minutes.

Watch for: Subtracting digit by digit and writing 1:05 or 95.; Stopping at 4:00 and writing 50.

G2. A show starts at 2:45 and ends at 3:20. How many minutes does the show last?

Answer: 35

From 2:45 to 3:00 is 15 minutes. From 3:00 to 3:20 is 20 minutes. 15 + 20 = 35, so the show lasts 35 minutes.

Watch for: Writing 75 or 25 (taking 20 and 45 away from each other).; Writing 15 (stopping at the next hour).

G3. Ali reads from 5:35 to 6:20. Mei reads from 6:05 to 6:55.

Answer: Mei; 5

Ali: 5:35 to 6:00 is 25 minutes, then 20 more: 45 minutes. Mei: 6:05 to 6:55 is 50 minutes. 50 is more than 45, so Mei reads for longer, by 5 minutes.

Watch for: Comparing only the start times or only the end times.; Writing 50 (Mei's time, not the difference).

Investigation (page 5): Why 12 steps?

12 steps. Each number the long hand passes is 5 minutes, and there are 12 numbers, so 12 fives make 60 minutes, which is 1 hour.

Look for: A child who says 12 and gives a reason: there are 12 numbers and each one is 5 minutes, or 12 fives make 60. Credit any clear reason. Do not mark a child down for stopping at 12.

Exit ticket (page 5)

E1. Write the time for the clock.

Answer: 1:45

The long hand is on the 9: count in 5s to 45 minutes. The short hand has passed the 1. The time is 1:45.

Watch for: Writing 1:9 (the number the long hand points to).; Writing 2:45 (the number the short hand is going towards).

E2. Mei goes to bed at 8:30 at night. Circle am or pm.

Answer: pm

Night time after noon is pm, so 8:30 at night is 8:30 pm.

Watch for: Writing am because 8 is a small number.

E3. Draw the hands to show 9:25. Use a ruler.

Answer: Long hand on the 5; short hand a little past the 9

25 minutes is 5 fives, so the long hand is on the 5. The hour is 9, so the short hand is a little past the 9.

Watch for: Drawing the long hand on the 25 or the 4.; Drawing the short hand on the 10.

Sneak-peek puzzles (not in the workbook)

1. 3:15
2. 11:50 (the short hand has not reached the 12 yet, so the hour is still 11)
