MATH INQUIRERS HOLIDAY PROGRAM

What Learners Get

Everything your child receives in the Math Inquirers Holiday Program

Notice it. Test it. Explain why.

Primary 1 • 10 lessons • 5 weeks • small groups (up to 8 per tutor) • live online from home

Notice it. Test it. Explain why.

In one line

Your child gets 15 hours of hands-on maths thinking with a tutor, a printed workbook and cut-out kit posted to your home, a stamped Inquiry Journal, and the chance to move on to harder puzzles when they are ready.

In the lessons

- **Teaching time.** Ten lessons of 90 minutes each, two a week for five weeks (15 hours in all).
- **Ten topics.** Number patterns, number bonds, picture graphs, repeating and growing patterns, working backwards, money, 2D shapes, logic and sorting, length, and mixed puzzles.
- **A clear routine.** Every lesson follows the same routine: warm-up, explore with objects, mini-lesson, brain break, worksheet, talk time and exit ticket. Children know what to expect.
- **Small group.** A small group of up to 8, so the tutor can ask each child "How do you know?"
- **A way of thinking.** Every child learns the four Inquirer rules: Notice the pattern. Test it with objects. Check your answer. Explain why.
- **Three levels of questions.** Each lesson has Core questions for everyone, Think Harder questions, and a Challenge for strong thinkers.

What the child takes home

Item	What it is	When
Student workbook	45 printable pages: 10 lessons with core, Think Harder and Challenge questions	Weekly pages by email; full book at the start
Inquirer Kit (cut-outs)	Ten-frames, counters, number strips 0 to 20, play coins, paper cube strips, 24 sorting tiles. Nothing needs to be bought.	Week 1, 3 and 5 pages

Inquiry Journal	A stamp page on the workbook cover. The tutor stamps a box after each lesson.	Every lesson
Exit ticket	One short question at the end of each lesson to show what they understood	Every lesson
Certificate of Completion	A printable certificate with the child's name	Week 5
Weekly parent email	That week's workbook pages plus one "explain why" question to try at the dinner table (5 minutes, no pencil)	Weekly

Progress and feedback

- **Progress marks.** The tutor records each child after every exit ticket: secure (correct and can explain), developing, or needs help.
- **Readiness tracker.** After each lesson the tutor notes four signs of readiness for harder work: solving a Challenge alone, finding a second way, explaining a pattern, and stretching it to a new case.
- **A path to go further.** Children who show these signs across several lessons are offered a short olympiad-style Challenge Screening Set and a Challenge Group.
- **Parent feedback.** Parents get a short, honest note about how their child thinks, not just a score.

Skills your child builds

- Spotting and continuing patterns, and saying the rule
- Splitting numbers (number bonds) and checking sums two ways
- Reading and making picture graphs and asking "is this fair?"
- Working backwards from an answer
- Counting and making amounts with coins
- Naming shapes and counting sides and corners
- Sorting and solving logic clues
- Measuring with units and comparing lengths
- Explaining thinking out loud, in words and drawings

What is not included

- It is enrichment. It does not replace school maths or follow a school syllabus, and it is not linked to MOE or the Gifted Education Programme.
- No exam or ranking. Readiness signs guide extra challenge and are not shared between families.

Planned price (to confirm)

S$500 per child for the 15-hour programme (S$50 a lesson), with the printed workbook and all materials included. Current Math Inquirers students pay S$450.
