

LEVEL 1 • TERM 3 • LESSON 10 • FOR PARENTS

10 Calendar Detective

WHAT WE DID

We found days and dates on a calendar. Your child put the days in order, counted on to find the day 3 or 4 days later, and found the date a week and a fortnight later on a month page. We also played Mi's Challenge Quest, our end-of-term game with Mi, on private paper; your tutor then sends one line about what we saw. Finding the day 100 days later, using whole weeks and the days left over, goes past the school Primary 1 syllabus on purpose.

> **After Sunday comes Monday again. A week later is the same day.**

TRY AT HOME (5 MINUTES)

1. Look at a calendar. Ask: what day is it 3 days later? Count on from tomorrow.
2. Pick a date. Ask: what date is a week later? Look straight down one row.
3. Ask: today is Monday. What day is it 10 days later? Use a whole week first.

When your child is stuck

Let your child use the day cards and the month page and wait 10 seconds before helping. Asking 'What is tomorrow?' works better than giving the answer. Please do not chant the days; say them calmly. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- week: 7 days
- fortnight: 2 weeks, or 14 days
- days later: count on from tomorrow, not from today
- date: the number of the day in the month
- the day before: one step back

Good questions

- Do we count today?
- What happens after Sunday?
- How many days make a week?

Have ready for next lesson

- Your Term 4 book (Book 7): tear out the fold-shapes page along the dashed line, then a grown-up cuts out the 10 fold shapes
- A coloured pencil
- Pencil, rubber and paper

Next lesson

Next term, the first lesson of Term 4: Half and Quarter. Your tutor will tell you the start date. Online practice: your tutor will share the practice link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.
