**The hardest part was ...** ☐ knowing how many to move ☐ splitting a number ☐ adding to a tens number like 30 + 4 ☐ adding three or four numbers (Think harder) ☐ something else

**What helped me:** ☐ ten-frames or counters ☐ drawing it ☐ trying again ☐ I asked for help ☐ I was not stuck

**Next time I will try:** ☐ drawing it ☐ using objects ☐ checking my answer ☐ asking a question ☐ I am still stuck (my grown-up will photograph this page for my tutor) ☐ I would like to pass

# Kit page: tens bars and ones squares

A grown-up cuts these out before the lesson. A bar is a ten (like a ten-frame in a line). A square is a one. Keep them in an envelope.

**Print this page on its own sheet, or on one side only, so cutting never spoils another page. A grown-up cuts; children do not use scissors. Keep the pieces in an envelope with your name. We use them again.**

## Tens bars: cut out all 9 (each bar is a ten)

## Ones squares: cut out all 20 (each is one one)
