LESSON 7 • TERM 1 • LEVEL 1

Take Away, Count Up

Subtraction: how many are left, and how far apart

TODAY WE WILL

Take away tens and ones, and count up to find a gap.

2–8 MIN

Warm-up: bars and squares

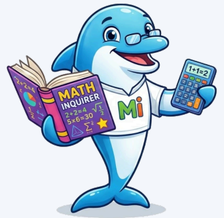

A bar is a ten. A square is a one.

How many bars? How many squares?

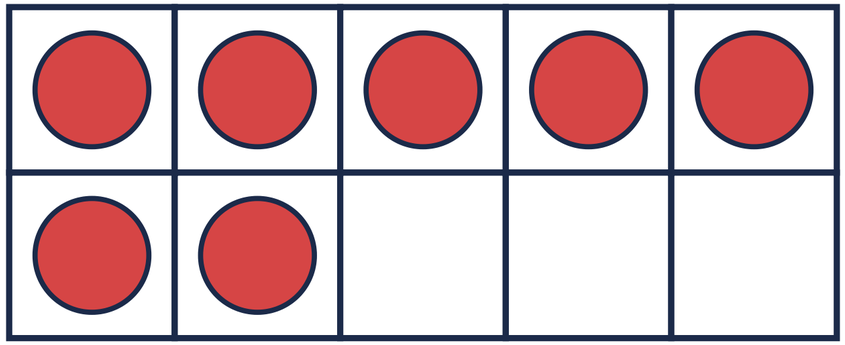

2 tens 7 ones | **5 tens** | **8 tens 3 ones**

Clap along with me!

Fingers to ten

2–8 MIN

Look at the ten-frame: 7 counters. How many more make 10?

7 **4** **9** **2**

2–8 MIN

Count on to the next ten

Start at 34. Count on in tens. Clap each one.

How many more from 38 to reach 40?

38 ? 40

Sneak-peek puzzles

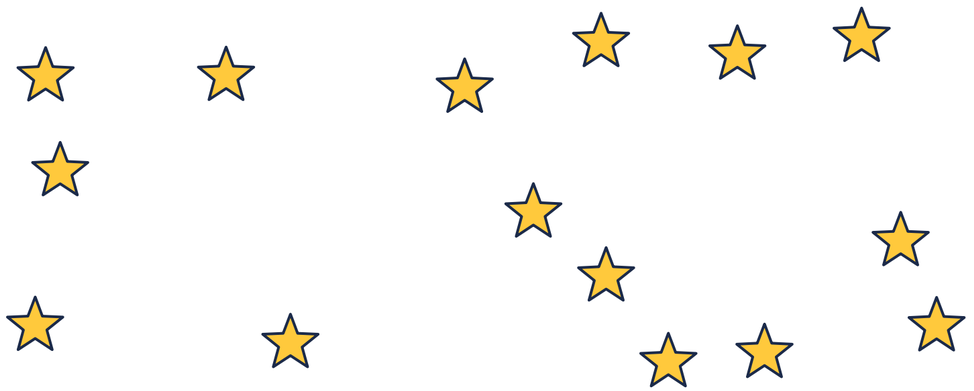

8–12 MIN

Ideas we have not learnt yet. A guess is a great start. Nobody is marked.

PUZZLE 1: anyone can try

There are 15 stars. Take away 4 of them.

How many stars are left? You may draw them.

PUZZLE 2: think

Ali has 58 cards.

Ben has 62 cards.

How many more cards does Ben have?

Write the answer. Write how you found it.

Explore: take away

12–28 MIN

1. Build 57: 5 bars and 7 squares.
2. Take away 2 bars. What is left?
3. Take away 4 squares. What is left?
4. Say: 57 take away 24 leaves ___.

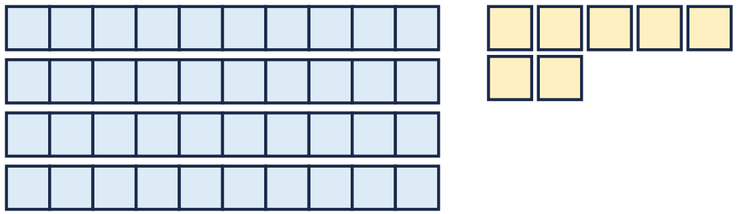

YOUR TURN

Build 76. Take away 2 bars and 5 squares.

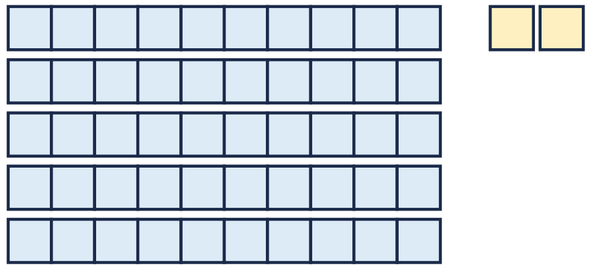

12–28 MIN

Explore: how far to go?

Build the smaller number. Add pieces until you reach the greater number.

Ali 47

Mei 52

38

62

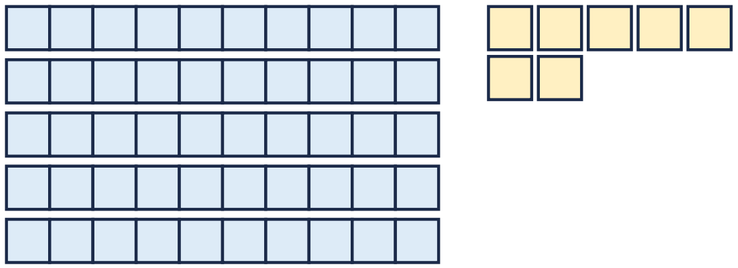

What did we notice?

12–28 MIN

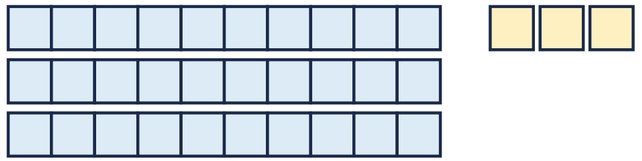

- When did we take away?
- When did we count up?
- What does the gap tell us?

Take away tens, then ones

28–38 MIN

57

33

57 - 20 = 37. Then 37 - 4 = 33.

28–38 MIN

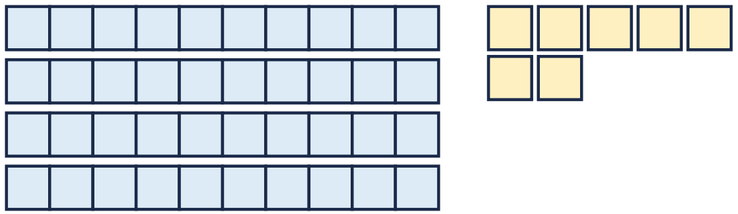

Check by adding

Take away	Add to check
57 - 24 = 33	33 + 24 = 57

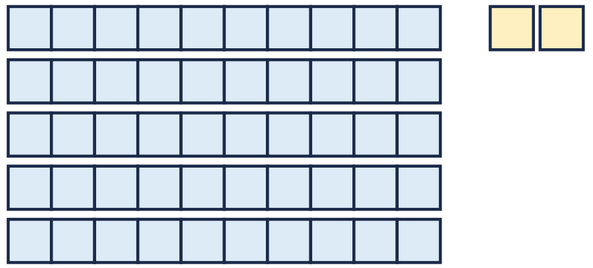

Subtraction and addition are friends.

28–38 MIN

How many more? The gap

Ali 47

Mei 52

47 | +? | 50 | +? | 52

Count up to the next ten, then on.

28–38 MIN

Count up in jumps

38 | +2 | 40 | +20 | 60 | +2 | 62

Hop to the next ten. Jump by tens. Hop to the number.

2 + 20 + 2 = 24

28–38 MIN

Your turn

Write on your paper. About 2 minutes

Count up: 81 - 78 = ___

Take away: 65 - 23 = ___

Check: your turn

28–38 MIN

81 - 78 = 3: 78 to 80 is 2, then 1 more.

65 - 23 = 42: 65 - 20 = 45, then 45 - 3 = 42.

28–38 MIN

Choose your tool

Tool	It is quick when
Count up	the two numbers are close together
Take away	you take away a small number or whole tens

Both tools give the same answer.

38–42 MIN

Hop to the ten, jump the tens

Small hops to the next ten. Big jumps for the tens.

8 to 30

25 to 40

47 to 52

36 to 71

Sip some water.

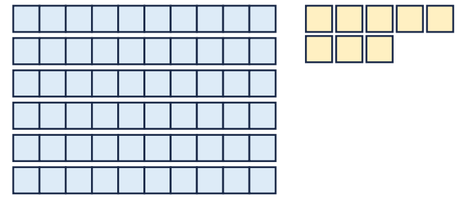

Workbook page 1: Start here

42–70 MIN

Questions 1 to 3. About 8 minutes

S1

Here is 68 as bars and squares. Cross out 2 bars. Then fill in the blanks.

(a) _____ tens and _____ ones are left.

(b) 68 - 20 = _____

S2

Subtract. Use your kit if you like.

(a) 57 - 20 = _____

(b) 57 - 4 = _____

(c) 86 - 30 = _____

(d) 86 - 5 = _____

S3

Find 68 - 25. Fill in the blanks.

(a) 68 - 20 = _____

(b) 48 - 5 = _____

Check page 1

42–70 MIN

S1	4 tens and 8 ones are left; 68 - 20 = 48
S2	37, 53, 56, 81
S3	48, then 43

Workbook page 2: Start here

42–70 MIN

Questions 4 to 7. About 9 minutes

S4 **Subtract. Then add to check.**

(a) 46 - 12 = _____

(b) 34 + 12 = _____

S5 **Mei has 45 stickers. She gives away 13. How many stickers are left? Draw a bar for each ten and a square for each one.**

Mei has _____ stickers left.

S6 **Kumar says 59 - 20 = 57.**

(a) Is Kumar right? Circle Yes or No.

(b) 59 - 20 = _____

S7 **A bus has 64 seats. 21 children are sitting. How many seats are empty?**

_____ seats are empty.

Check page 2

42–70 MIN

S4	34, then 46 (the same as the start, so it checks)
S5	32 (4 bars and 5 squares drawn; 1 bar and 3 squares crossed out)
S6	No. 39. He took away 2 ones instead of 2 tens (57 is 59 - 2).
S7	43 seats

42–70 MIN

Choose your next page

Page	What it is
Think harder (page 3)	Count up in a new setting
Go further (page 4)	Which tool is quicker?
Investigation (page 5)	When is counting up quicker?
Check	Finish and check your own work

Everyone may choose. You can swap at any time.

Talk and explain

70–76 MIN

RAVI AND SITI

Ravi finds 52 - 49 by taking away 40, then 9.

Siti counts up from 49.

Whose way is quicker? Why?

I think ... because ...

70–76 MIN

Back to the sneak-peek

58 +2 60 +2 62

Ben has 4 more cards than Ali.

Exit ticket

76–82 MIN

On your own. No looking back. About 3 minutes

E1 **Subtract.**

58 - 24 = _____

E2 **Fill in the blanks.**

(a) 57 + _____ = 62

(b) 62 - 57 = _____

E3 **Find 90 - 87. Circle the way you used: take away or count up.**

90 - 87 = _____

Check the exit ticket

76–82 MIN

E1	34
E2	5, then 5
E3	3. Either way is fine; counting up from 87 to 90 is short because the numbers are close together.

Look-back

82–85 MIN

Three minutes. There are no right answers. You can pass. Nobody reads it out.

Something I did well	write or draw one thing
The hardest part was …	☐ taking away tens and ones ☐ hopping to the next ten ☐ counting up in jumps ☐ choosing a tool ☐ something else
What helped me	☐ bars and squares ☐ drawing it ☐ trying again ☐ I asked for help ☐ I was not stuck
Next time I will try	☐ drawing it ☐ using objects ☐ checking my answer ☐ asking a question
	☐ I am still stuck (my grown-up will photograph this page for my tutor) ☐ I would like to pass

Take your time. You can pass.

85–90 MIN

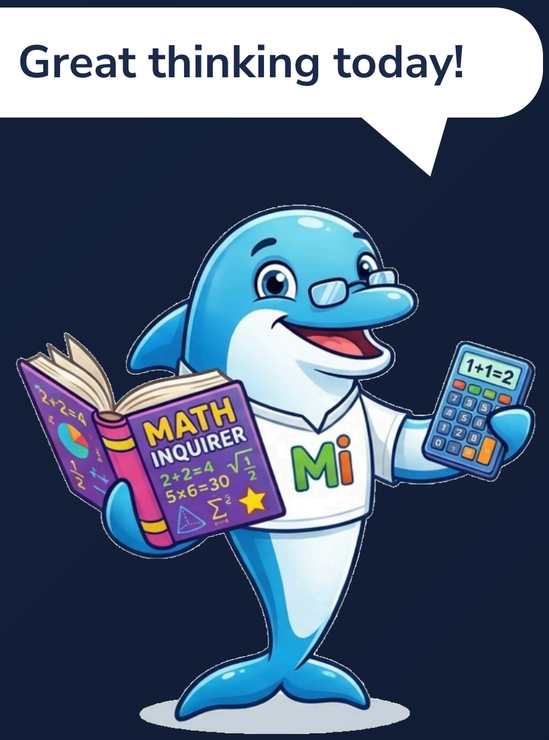

Well done, inquirers!

Show a grown-up one thing you found out today.

NEXT LESSON

Balance and Swap

Bring about 30 small things, two plates or bowls, a pencil and paper.

OPTIONAL

Go further: what if?

The gap from 58 to 62 is 4.

What is the gap from 59 to 63? And from 68 to 72?

58	62	59	63	68	72

OPTIONAL

If we have time: pick one

Activity	What we do
Is it always true?	Add 10 to both numbers. Does the gap stay the same?
Make a puzzle	Write a gap story for your grown-up
Teach it back	Show how to count up from 58 to 62

Optional. Everyone may join.
