Sharing and Grouping: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use counters on plates or draw it. Left over means not enough for another group. Small things stay on the table, away from mouths and little brothers and sisters. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next.

No.1

Start here

Siti shares 10 stickers equally among 2 friends. Each friend gets ☐ stickers.

No.2

Start here

Ravi puts 12 pencils into pots. He puts 3 pencils in each pot. Fill in the blanks.

☐ × 3 = 12. Ravi needs ☐ pots.

No.3

Start here

Amelia puts 15 apples into boxes of 5 apples. Circle Share or Group.

Share Group

No.4

Think harder

Jason has 13 counters. He puts them into groups of 4. He makes ☐ groups and has ☐ counters left over.

No.5

Go further

Ben has 18 stickers. He gives 6 stickers away. He shares the rest equally among 4 friends. Each friend gets ☐ stickers.

Answers for grown-ups

Please let your child try first, then check together. Ask *how do you know?* If your child is stuck, wait 10 seconds, then suggest drawing it.

1. 5
10 stickers dealt to 2 friends one at a time is 5 each. Check: 2 groups of 5 is 10.

2. 4 and 4
12 pencils in groups of 3 is 4 pots (3, 6, 9, 12). Check: 4 groups of 3 is 12.

3. Group
The story says how many apples are in each box (5), so Amelia puts the apples into groups of 5. There are 3 boxes.

4. 3 groups, 1 left over
4, 8, 12 is 3 groups. 13 - 12 = 1 counter is left over.

5. 3
18 - 6 = 12 stickers are left. 12 shared among 4 friends is 3 each, because 4 groups of 3 is 12.
