(c) The shoe costs $_____ more than the toy car.

Name _____ Date _____

Investigation: Mind the gap

First: Pick the $3 tag. Which tag costs exactly $4 more?

Next: The tags say $2, $3, $5, $7, $8, $11 and $12. Write $11 on a blank tag. Pick two so that one costs exactly $4 more than the other. How many pairs can you find? Write each pair.

Exit ticket

On your own, at the end of the lesson. No looking back.

No.E1

A hat costs $17. A scarf costs $9. How much more does the hat cost than the scarf?

The hat costs $_____ more.

No.E2

Ali buys a book for $9 and a pen for $6. How much does he pay altogether? Choose the correct answer. Write its number in the bracket.

(1) $3

(2) $14

(3) $15

(4) $16

( )

No.E3

A toy costs $13. Ben gives the cashier $20. How much change does he get?

He gets $_____ change.

Look-back There are no right answers. You can pass. Nobody reads it out.

Something I did well:

The hardest part was ...
- ☐ how much more
- ☐ the change
- ☐ which two make the amount
- ☐ something else

What helped me:
- ☐ the number line
- ☐ the strips
- ☐ checking my answer
- ☐ I was not stuck

Next time I will try:
- ☐ using a number line
- ☐ drawing two strips
- ☐ checking my answer
- ☐ asking a question
- ☐ I am still stuck (my grown-up will photograph this page for my tutor)
- ☐ I would like to pass

Name _____ Date _____

Kit page: price tags

A grown-up cuts out all 12 price tags before the lesson: 9 with a picture and a price and 3 blank ones to write on. Keep the tags in an envelope with the play money: they come back in the next lesson and in the Quest. No printer or no cutting? Write an item and a price on small pieces of paper.

Print this page on its own sheet, or on one side only, so cutting never spoils another page. A grown-up cuts; children do not use scissors. Keep the pieces in an envelope with your name. We use them again.

Price tags: a grown-up cuts out all 12. Write a price on the blank ones.
