TUTOR GUIDE • LEVEL 1 • TERM 3 • LESSON 6 OF 10

The School Shop

Big idea: Make a plan that fits a budget, and list every way to be sure.. A budget is the money you have. Choose what to buy so that it fits, find the total and the change, and list every way in order so that none is missed.

90 minutes • live online or face to face • up to 8 children • ages 6-8 • Notice it. Test it. Explain why.

1. At a glance

Strand	Money applied: total, change and choosing within a budget (Primary 1) (Money in dollars up to $100; addition and subtraction within 100 in money stories (Primary 1, p. 31); Which two items cost exactly a given amount (a Primary 1 paper item), cost of several equal items, how much is left; Listing every way to make an exact amount (a systematic list, contest-style): beyond Primary 1) Strand label for the tutor only. BEYOND PRIMARY 1 ON PURPOSE at Think harder and Go further only. Start here is Primary 1 money work: which two tags cost exactly $10 (the 'which two items did he buy' item appears in several Primary 1 papers), the total of two items, how much is left, whether $10 is enough, the cost of 3 equal items and a table of had, spent and left. Think harder: every way to spend exactly $20 on two items ('Exactly $20', a table with a row for each number of books), is a list complete, three items and change from $50, and true or false on a list of ways (the same way in a different order is not a new way). Go further: every way to pay $20 with $2, $5 and $10 notes (6 ways), a puzzle with 7 things and an exact total, and writing an 'exactly' puzzle for a partner. Listing every way is not a Primary 1 outcome (it is contest-style and sits at Think harder by owner decision 6). Owner decision, 22 and 23 Oct 2026: strong content with scaffolding, said plainly to families; every lesson names a beyond item. Do not describe the lesson as MOE-aligned. Money wording follows the Primary 1 paper patterns: dollars as $12, whole dollars only, no $20 note (a $20 payment is two ten-dollar notes), cashier, change, 'how much is left'. Non-routine types (tutor only): how many ways, systematic list with a check, guess and check, true or false on a list.
Objectives	• Choose two tags that cost exactly a given amount, and say whether a budget is enough. • Find the total of two or three items, the cost of 3 equal items, and the money left or the change. • List every way to pay an exact amount by working in order (start with the most expensive item and go down), so that no way is missed or repeated. • Think harder: every way to spend exactly $20 on two items, whether a list is complete, three items and change from $50. • Go further: every way to pay $20 with $2, $5 and $10 notes, 7 things for an exact total, and writing an exactly-puzzle.
Joining cold	**Remember warm-up covers:** What goes with 7 to make 10 (Term 1 Lesson 5, taught again with a ten-frame); Three of the same price, by adding again and again (Term 2 Lesson 15, taught again with three tags); List every pair that makes 6, starting at 1 (Term 2 Lesson 17, taught again with a table). Only counting to 20 and the price tags and play money from the lessons before. Nothing from the lessons before is needed: the warm-up makes 10 on a ten-frame, adds three equal prices and lists pairs that make 6 in order. The words budget, exactly, total, left and change are taught in Explore and the Mini-lesson. Fairly safe to miss: this lesson applies Lessons 24 and 25. Mi's Challenge Quest has a gate on this idea (two items that cost exactly an amount), so a child who misses it watches the recording and does workbook pages 1 and 2 before the Quest. A child who joins here cold can follow: the warm-up makes 10, adds equal prices and lists in order, and Start here keeps to totals within $20.

Child materials	• Your Term 3 workbook, pages 1 to 5 • The price tags from the lesson before (9 with a price, 3 blank), kept in their envelope • The play money from Term 3 Lesson 4 (notes and coins), kept in its envelope • No tags or money? Small pieces of paper with a price written on each one • A pencil, a rubber and spare paper
Tutor materials	• The slide deck • Your own price tags and play money to show on camera, if you wish • A visible clock No ruler is needed. Nothing needs to be bought. The money is PLAY MONEY, not real money. Small pieces stay on the table: nothing goes in the mouth or ears; keep them away from younger brothers and sisters. No matches, toothpicks or anything sharp. Nobody cuts during the lesson. A way that needs more than five $2 notes is written down, not laid out.
Tiers	Start here (6 questions, pages 1 and 2), Think harder (4, page 3), Go further (3, page 4), Investigation and look-back (page 5). Labels are neutral; nobody is told which page they are on.
Beyond Primary 1 (tutor only)	Exactly $20 at T1, G1: Listing every way to spend exactly $20 on two items with a table that has a row for each number of one item (T1), and every way to pay $20 with $2, $5 and $10 notes (G1: 6 ways). Primary 1 papers set 'which 2 items did he buy' for an exact amount, so that part is school level (S1); listing every way is contest-style and not a syllabus outcome. Named puzzle: Exactly $20. Never in Start here, never advertised to children.
Contest-style move	Used at Think harder, Go further and the Investigation: how many ways: every way to spend exactly $20 (a table with a row for each number of books); systematic list with a check that no case is missing: is this list complete; guess and check: which two items cost exactly this much; 7 things for exactly $20; the same way in a different order is not a new way (true or false). Never advertised to children or parents.

Before the lesson

- Solve every workbook question yourself first. Check the answers: S1 $3 and $7; S2 $15; S3 $6; S4 No and $2; S5 $21; S6 8, 9, 17; T1 10, X, 3 and 2 ways; T2 No, 2 five-dollar and 3 two-dollar notes; T3 $15 and $35; T4 True, True, False, False; G1 six ways; G2 5 stickers and 2 pads; I1 $1 and $3.
- Tell parents a week before: no new cutting this lesson. The price tags and the play money from the two lessons before must be in their envelope (a way that needs more than five $2 notes is written, not laid out). The next lesson needs the 16 grid tiles cut out.
- Have the slides open. Have your own tags and notes to show on camera if you wish. Practise the clap-and-stamp break.
- Check the recording captures the tutor and the shared screen. Children video is excluded; any unmuted voice is recorded. Greet the whole group warmly, then start the recording, then say the notice; do not use children's first names on the recording.
- Be plain with families: which two items cost exactly an amount, the total, the change and equal items are Primary 1 work; listing every way to make an amount and paying with three kinds of note are beyond Primary 1 on purpose. Do not call the lesson MOE-aligned. Whole dollars only. There is no $20 note: a $20 payment is two ten-dollar notes.
- Slides s-m1 to s-m4 keep the answers off the screen while you ask. Read every question with its prices, and the four options of E1, aloud: the figures on the slides are small.

Safeguarding and recording (this lesson)

- The price tags and the play money are paper or card. Small pieces stay on the table: nothing goes in the mouth or ears. No matches or toothpicks. Nobody cuts during the lesson; a grown-up cut the pieces beforehand.
- This lesson uses the main room only: no breakout rooms, so the tutor sees every camera. A parent sits nearby but does not give answers.
- Nobody holds paper, a tag or a note up to the camera: a gallery view shows everyone. Children tick their own work against the answer slide, answer together on a count of three, or show fingers or a thumb for a choice. There is no private chat.
- Never read out a child's name with a right or wrong answer. The recording has the tutor, the shared screen and any voice that is unmuted. Children may mute and keep their cameras off. A child's page is never shown.
- Movement break: children need a little clear space, soft shoes or socks on a safe floor, no stairs and no running. Clapping and stamping are gentle; a child may stay seated and tap the desk softly.
- A child who is still stuck ticks 'I am still stuck' on the look-back page. A grown-up may photograph that page after class and send it to the business WhatsApp only; photos are kept for 90 days after the program ends. The tutor then helps in the open session next lesson. No private messages to children, and no personal phones.
- The look-back is never collected in front of the group or read out. A pass is always allowed.

2. Timing plan (90 minutes exactly)

Minutes	Part	Min	Slides	Script fills
0–2	**Opening**	2	1: The School Shop	1:42
2–8	**Remember warm-up**	6	3: Warm-up: make 10, Three of the same, List every pair that makes 6	4:26
8–12	**Sneak-peek puzzles**	4	1: Sneak-peek puzzles	3:23
12–23	**Explore**	11	5: Explore: exactly $12, Two ways to make $12, Explore: pay exactly $10, Two ways to pay $10, What did we notice?	7:54
23–34	**Mini-lesson**	11	8: Is the money enough?, Not enough: she needs $2 more, Three of the same, Add the same price again, Every way to pay $12, Two ways: the table checks every case, Total, then change, Total first, then count up	9:10
34–38	**Brain break**	4	1: Clap and stamp	3:09
38–70	**Workbook**	32	5: Workbook page 1: Start here, Check page 1, Workbook page 2: Start here, Check page 2, Choose your next page	24:33
70–76	**Talk time**	6	2: Talk and explain, Back to the sneak-peek	4:29
76–82	**Exit ticket**	6	2: Exit ticket, Check the exit ticket	4:32
82–85	**Look-back**	3	1: Look-back	2:06
85–90	**Flex time and goodbye**	5	1: Well done, inquirers!	0:29
	Total	**90**		**65:56**

The script needs 65:56 of the 90:00 when children are quick. A slow class (speech 10% slower, children and slide changes 20% slower) needs 77:53. The last 5 minutes are a standing buffer: if you are behind, use them; do not start anything new. Clock checks: minute 12 (end of sneak-peek), minute 38 (start of workbook), minute 70 (talk time). If more than 2 minutes behind at minute 38, skip in this order: Start with: shorten Explore round 3 (what did we notice) to one question; Then: cut the total-then-change example (s-m4); Then: take the extra minutes from the flex time. Never skip the look-back or the camera and privacy moments.

3. Lesson script

Times show when each line should start, counted from the start of the lesson, if you keep to the script. SAY lines are spoken in your own words. REC lines are the short recording-voice cues for children who watch later. Children answer aloud, with fingers or hands; no private chat; no boards held up in front of the group.

0:00 – 2:00 Opening

script 1:42 of 2:00

0:00	SLIDE	Show slide **The School Shop** (s-title)
0:20	REC	*If you are watching the recording: hello! Get a pencil, paper, your workbook, your price tags and your play money. Pause or rewind any time.*
0:32	SAY	Hello, inquirers! Pencil ready, and your price tags and play money on the table. Cameras can be on or off, as you like.
0:44	SAY	This lesson is recorded so a friend who is away can catch up. The recording has me, the shared screen and any voice that is not muted. You may keep your microphone and camera off.
1:02	SAY	Microphone off until I ask you to speak. To answer, say it with me on three, show fingers, or give a thumbs up. Nobody holds paper up to the camera.
1:16	SAY	Today we are in the school shop. We plan what to buy with the money we have. And we find every way, so we do not miss one.
1:30	DO	Greet the whole group warmly. Do not use children's first names on the recording. [0:12]
	NOTE	Keep this to two minutes. Say the recording statement and the microphone routine in the same words every lesson, for anyone who joined late. The routine and the four inquirer rules were introduced in the first lesson of Term 1: do not re-teach them.
	NOTE	Plain statement for families when it comes up: which two items cost exactly an amount, the total, the change and the cost of equal items are Primary 1 work; listing every way to make an amount and paying with three kinds of note go beyond Primary 1 on purpose.
	NOTE	New here? Say in one minute: our three rule words (notice it, test it, explain why); a guess is fine and you can always pass; after Start here you may choose Think harder, Go further or the Investigation; nobody holds paper to the camera. A child without tags or notes writes the prices on small pieces of paper.

2:00 – 8:00 Remember warm-up

script 4:26 of 6:00

2:00	SLIDE	Show slide **Warm-up: make 10** (s-rem1)
2:15	REC	*Recording: join in! Look at each picture and say your answer out loud. Pause if you need longer.*
2:24	SAY	A ten-frame with seven counters filled. Ten squares make ten.
2:29	ASK	How many more counters make ten? [wait about 25 s for answers]
2:57	ASK	What goes with eight to make ten? What goes with six? [wait about 30 s for answers]
3:32	SLIDE	Show slide **Three of the same** (s-rem2)
3:48	SAY	Three pens, and each pen costs four dollars. We add the same price again.
3:54	ASK	How much do three pens cost altogether? [wait about 25 s for answers]
4:23	CHILDREN	Add together: four and four make eight, and four more make twelve. Say it with me. [0:40]
5:03	SLIDE	Show slide **List every pair that makes 6** (s-rem3)
5:18	SAY	A list, in order. We find every pair that makes six. Start at one: one and five. Then two and what?
5:28	ASK	Two and what make six? Then three and what make six? [wait about 40 s for answers]
6:14	SAY	After three and three, the pairs swap round. So we stop. Starting at the smallest and going in order means we do not miss one.

	IF STUCK	If a child is unsure of the partner of 7, count the empty squares on the ten-frame. For three pens, use three groups of four fingers. For the list, count on from the first number to six on fingers.
	NOTE	Answers: 3; 12; 4, then 3 and 3. Children answer with a whisper, fingers or hands. Nobody writes. Joining cold: all you need is counting to 20 and the pictures.

8:00 – 12:00 Sneak-peek puzzles

script 3:23 of 4:00

8:00	**SLIDE**	Show slide **Sneak-peek puzzles** (s-sneak)
8:12	**REC**	*Recording: pause now and try both puzzles on your paper. Guessing is fine. Press play for the next part.*
8:22	**SAY**	Two sneak-peek puzzles: ideas we have not learnt yet. A guess is a great start, and I do not know is welcome. Nobody is marked.
8:34	**READ**	Puzzle one. Mei buys a pencil for three dollars. She buys a rubber for two dollars. How much does she pay altogether? Write the number.
8:48	**CHILDREN**	Children write the total on their own paper. [0:45]
9:33	**READ**	Puzzle two. Kumar has exactly nine dollars. He buys two things. The tags say two dollars, four dollars, five dollars and seven dollars. Which two does he buy? I know because blank.
9:50	**CHILDREN**	Children write or draw their answer. [1:25]
11:15	**SAY**	Keep your paper. Nobody shows it. We will check our own thinking later, at Talk time.
	NOTE	Puzzle 1 answer: $5. Puzzle 2 answer: $2 and $7, or $4 and $5 (two answers). Look for good ideas to praise later (a child who tried pairs from the tag that costs the least, or found both). Do not write scores or keep a list.

12:00 – 23:00 Explore

script 7:54 of 11:00

12:00	**SLIDE**	Show slide **Explore: exactly $12** (s-explore1)
12:15	**REC**	*Recording: pause now. Find two tags that make exactly $12, then make $10 with notes. Press play when you have tried.*
12:26	**SAY**	The tags and the notes are the teachers today. Take the rubber, pencil, pen, glue, ruler and cup tags. Find two different tags that cost exactly twelve dollars together. There are two answers.
12:42	**CHILDREN**	Children look for two tags that cost exactly $12. Tutor scans the cameras. [1:20]
14:02	**ASK**	Which two did you find? How do you know you have them all? [wait about 45 s for answers]
14:54	**SAY**	Here is a way to be sure. Start with the tag that costs the least, and ask what partner it needs. Two dollars needs ten. No tag. Three needs nine. No tag. Four needs eight: the cup. Five needs seven: the ruler.
15:14	**SLIDE**	Show slide **Two ways to make $12** (s-explore1-ans)
15:22	**SAY**	Four and eight, and five and seven. Two ways. Starting with the tag that costs the least means we do not miss one.
15:34	**SLIDE**	Show slide **Explore: pay exactly $10** (s-explore2)
15:49	**SAY**	Round two. Take your two-dollar notes and your five-dollar notes. Pay exactly ten dollars with only two-dollar notes and five-dollar notes. How many ways can you find?
16:02	**CHILDREN**	Children make $10 with $2 and $5 notes. [1:25]
17:28	**ASK**	Tell me one way. Is there another way? [wait about 40 s for answers]
18:12	**SLIDE**	Show slide **Two ways to pay $10** (s-explore2-ans)
18:20	**SAY**	Five two-dollar notes, or two five-dollar notes. If you start with one five-dollar note, five dollars is left. Two-dollar notes cannot make five exactly.
18:32	**SLIDE**	Show slide **What did we notice?** (s-explore3)
18:40	**ASK**	What did you notice? How did you know there were only two ways? [wait about 55 s for answers]

19:41	SAY	We went in order, so we did not miss a way. And the same notes in a different order are the same way, not a new one.
	IF STUCK	A child who counts a way twice in a different order: say the same notes, so the same way. A child with no notes writes 2 and 5 on paper. A child who cannot find $12: ask which tag needs 8.
	NOTE	Main room only; you cannot see small tags or notes, so ask children to say the pair and to show a thumb. Answers: $4 and $8, $5 and $7; five $2 notes, or two $5 notes. Do not say the rule before the children do.

23:00 – 34:00 Mini-lesson

script 9:10 of 11:00

23:00	SLIDE	Show slide **Is the money enough?** (s-m1)
23:08	REC	*Recording: keep watching and copy the examples. Rewind if you miss a step.*
23:14	SAY	A budget is the money you have. Mei has fifteen dollars. The toy car costs eleven dollars and the shoe costs six dollars.
23:26	ASK	How much do they cost altogether? Is fifteen dollars enough? Circle Yes or No on your paper. [wait about 60 s for answers]
24:34	SLIDE	Show slide **Not enough: she needs $2 more** (s-m1a)
24:42	SAY	Eleven and six make seventeen. Seventeen is more than fifteen, so it is not enough. Mei needs two dollars more.
24:52	READ	Your turn. Ali has twelve dollars. A cup costs four dollars and a bag costs nine dollars. Is twelve dollars enough for both? Write Yes or No, and how much more or how much is left.
25:12	CHILDREN	Children write on their own paper. Wait 10 seconds before helping. [0:45]
25:57	SAY	Four and nine make thirteen. That is more than twelve, so No. Ali needs one dollar more.
26:06	SLIDE	Show slide **Three of the same** (s-m2)
26:14	SAY	Ravi buys three glue sticks. Each glue stick costs five dollars.
26:19	ASK	How much do they cost altogether? [wait about 40 s for answers]
27:02	READ	Your turn. A rubber costs two dollars. Siti buys five rubbers. How much do they cost altogether? Write the number.
27:13	CHILDREN	Children write the total. Wait 10 seconds before helping. [0:50]
28:03	SLIDE	Show slide **Add the same price again** (s-m2a)
28:11	READ	Three glue sticks: fifteen dollars. Five rubbers: ten dollars. Tick your own work.
28:18	SLIDE	Show slide **Every way to pay $12** (s-m3)
28:26	SAY	Every way to pay exactly twelve dollars with five-dollar notes and two-dollar notes. We go in order: no five-dollar notes, then one, then two. Fill in the last column. Write X if it cannot be done.
28:44	CHILDREN	Children fill in the last column on paper. Wait 15 seconds before helping. [1:25]
30:09	SLIDE	Show slide **Two ways: the table checks every case** (s-m3a)
30:17	SAY	No five-dollar notes: twelve left, six two-dollar notes. One five-dollar note: seven left, which two-dollar notes cannot make. Two five-dollar notes: two left, one two-dollar note. So there are two ways.
30:33	SLIDE	Show slide **Total, then change** (s-m4)
30:41	SAY	Two steps. Mei buys the cup for eight dollars and the pencil for three dollars. She gives the cashier two ten-dollar notes.
30:52	ASK	How much altogether? Then how much change? [wait about 60 s for answers]
31:55	SLIDE	Show slide **Total first, then count up** (s-m4a)
32:03	SAY	Eight and three make eleven. Count up from eleven to twenty: nine dollars change.

	IF STUCK	If a child adds the budget and the prices, ask: which is the money I have? If a child stops the table after one row, ask what the next row is. If a child writes 7 in the last cell, ask whether two-dollar notes can make seven exactly.
	NOTE	Key words to use every time: budget, enough, exactly, altogether, left, change, cashier, way. Fixed question forms: Does she have enough? How much more money does she need? How much is left? How much change? Do not use decimals. There is no $20 note: twenty dollars is two ten-dollar notes.

34:00 – 38:00 Brain break

script 3:09 of 4:00

34:00	**SLIDE**	Show slide **Clap and stamp** (s-break)
34:08	**REC**	*Recording: stand up and join in! Clap for a two-dollar note and stamp for a five-dollar note.*
34:16	**SAY**	Stand up and get a sip of water. Clap for a two-dollar note. Stamp for a five-dollar note. Seven dollars: one stamp and one clap.
34:29	**CHILDREN**	Call amounts: $7, $9, $4, $10, $12. Then call $6, $11 and $14. Children clap and stamp; seated children tap the desk softly. [2:40]

38:00 – 70:00 Workbook

script 24:33 of 32:00

38:00	**SLIDE**	Show slide **Workbook page 1: Start here** (s-ws1)
38:08	**REC**	*Recording: pause now and do workbook page 1. When you finish a page, press play to check it.*
38:17	**READ**	Page 1, Start here. Question 1: Ben has exactly ten dollars. He buys two different things. Look at the four tags. Which two cost ten dollars? Question 2: Siti buys a ruler for seven dollars and a cup for eight dollars. How much does she pay altogether? Question 3: Wei has twenty dollars. He buys a jar for fourteen dollars. How much money does he have left?
38:54	**CHILDREN**	Page 1, questions 1 to 3. Tutor walks the cameras, asks how do you know. Wait 10 seconds before helping. [8:30]
47:24	**SLIDE**	Show slide **Check page 1** (s-ws1ans)
47:32	**READ**	Question 1: three dollars and seven dollars. Question 2: fifteen dollars. Question 3: six dollars. Tick your own page with a tick.
47:44	**SAY**	After question 3 you may choose: carry on, or try Think harder. Everyone may choose, at any time.
47:53	**SLIDE**	Show slide **Workbook page 2: Start here** (s-ws2)
48:01	**READ**	Page 2. Question 4: Ali has ten dollars. A ruler costs seven dollars and a glue stick costs five dollars. Does Ali have enough money for both? Circle Yes or No. How much more money does he need? Question 5: a ruler costs seven dollars. Mei buys three rulers. Write the number sentence, then how much they cost. Question 6: fill in the blanks in the table.
48:37	**CHILDREN**	Page 2, questions 4 to 6. [10:30]
59:07	**SLIDE**	Show slide **Check page 2** (s-ws2ans)
59:15	**READ**	Question 4: No, two dollars more. Question 5: seven plus seven plus seven is twenty-one dollars. Question 6: eight, nine and seventeen. Tick your own page.
59:29	**SLIDE**	Show slide **Choose your next page** (s-choice)
59:37	**SAY**	When you have finished Start here, you can choose Think harder, Go further or the Investigation. Everyone may choose. You can swap at any time. Anything not finished is for home too.
59:53	**MOVE**	Stand and reach up for 30 seconds, then sit down and choose.
60:23	**CHILDREN**	Choice time: Think harder (page 3), Go further (page 4), the Investigation (page 5), or finish and check your own work. Tutor never says who is on which page. If Start here took the whole time, say that pages 3 to 5 are for home, and keep the time. [2:10]

	IF STUCK	Q1: start with the tag that costs the least and ask what partner it needs. Q2: add the two prices. Q3: count up from 14 to 20. Q4: add the two prices and compare with 10. Q5: add the same price three times. Q6: had take away spent is left; use it each way round.
	IF STUCK	A child who is still stuck ticks I am still stuck on the look-back page. The grown-up can photograph that page after class and send it to the business WhatsApp (never a personal phone). You then help in the open session in the next lesson. Never a private message to a child.
	NOTE	Think harder has Exactly $20 (a table with a row for each number of books), is the list complete, three items and change from $50, and true or false on ways. Go further has three kinds of note, 7 things for an exact total and your own puzzle (beyond Primary 1 on purpose). Do not announce who is on which page. Start here takes a middle child about 17 minutes, so the choice time is short: for most children pages 3 to 5 are for home. Say so plainly, do not skip the answer slides, and take any extra minutes from the flex time.

70:00 – 76:00 Talk time

script 4:29 of 6:00

70:00	SLIDE	Show slide **Talk and explain** (s-talk)
70:08	REC	*Recording: pause. Tell a grown-up who is right, and show how you know.*
70:14	READ	Ben wants a pen and a book. One child says: buying the pen then the book is a different way from buying the book then the pen. Another child says: it is the same way. Who is right? How do you know?
70:37	CHILDREN	Think about it with the notes from Explore: is two five-dollar notes the same as two five-dollar notes in another order? [0:50]
71:27	CHILDREN	Talk to the grown-up next to you or to your screen for one minute. Use the sentence starter: I think... because... [0:40]
72:07	ASK	Who would like to share? Volunteers first. A pass is always fine. [wait about 100 s for answers]
73:53	SLIDE	Show slide **Back to the sneak-peek** (s-sneakans)
74:01	SAY	Remember the sneak-peek? Puzzle one: five dollars. Puzzle two: two dollars and seven dollars, or four dollars and five dollars.
74:11	ASK	Did anyone change their mind while we worked? You can just nod. [wait about 12 s for answers]
	NOTE	Model answer: the second child is right. A way is what you buy, not the order: the pen and the book cost the same either way, so listing both would count one way twice. Volunteers first; never call a child by name to answer; no tallies, no rankings. Praise the reason, not the speed.

76:00 – 82:00 Exit ticket

script 4:32 of 6:00

76:00	SLIDE	Show slide **Exit ticket** (s-exit)
76:08	REC	*Recording: pause and do the exit ticket on your own. Then press play to check it.*
76:16	SAY	Exit ticket. Three questions, on your own, without looking back. Write your answers on page 5.
76:24	READ	E1. Mei spends exactly eleven dollars on two things. The tags say three dollars, four dollars, five dollars and eight dollars. Which two did she buy? Choose the correct answer. Option 1: three dollars and four dollars. Option 2: three dollars and eight dollars. Option 3: four dollars and five dollars. Option 4: five dollars and eight dollars. Write its number in the bracket. E2. Ben has twelve dollars. He wants a pen for six dollars and a book for eight dollars. Does he have enough money? Circle Yes or No. E3. A cup costs three dollars. Ali buys four cups. How much do the cups cost altogether?
77:23	CHILDREN	Children answer E1 to E3 on their own. [2:50]
80:13	SLIDE	Show slide **Check the exit ticket** (s-exitans)
80:21	READ	E1: option 2, three dollars and eight dollars. E2: No. E3: twelve dollars.
80:28	SAY	Tick your own ticket with a tick. Well done.

	NOTE	Nothing is collected or marked live. Children tick their own ticket. If many children miss one question, spend two minutes on it at the start of the next lesson, in the open session, no names. Do not read out any child result.

82:00 – 85:00 Look-back

script 2:06 of 3:00

82:00	**SLIDE**	Show slide **Look-back** (s-look)
82:08	**REC**	*Recording: pause and fill in your look-back box. You can pass.*
82:14	**SAY**	Look-back. Tick what was hard and what helped you. Write or draw one thing you did well. If you like, tick one thing to try next time. You can pass. Nobody reads it out. If you tick I am still stuck, ask your grown-up to take a photo of this page after class and send it to our business WhatsApp. Then we will help you.
82:46	**CHILDREN**	Children fill in the look-back box on page 5. [1:20]

85:00 – 90:00 Flex time and goodbye

script 0:29 of 5:00

85:00	**SLIDE**	Show slide **Well done, inquirers!** (s-end)
85:08	**SAY**	Well done, inquirers. Next lesson is Fill the Grid. Please have the sixteen grid tiles cut out by a grown-up. A coloured pencil is optional. Keep your price tags and play money in their envelope. Goodbye, and thank you to the grown-ups.
	SLIDE	Show slide **Go further: pens and rubbers** (s-opt) *(optional)*
	SAY	Optional, only if you are on time: a pen costs four dollars and a rubber costs two dollars. Ali spends exactly ten dollars. How many ways can he do it?
	CHILDREN	Short think time, then take two answers. [1:30]
	SLIDE	Show slide **If we have time: pick one** (s-menu) *(optional)*
	SAY	Spare-time menu. If the whole class is ahead, pick one or two activities from the guide (about 4 minutes each).
	NOTE	This is the standing buffer. If you are behind, finish the look-back and say goodbye. Do not start anything new. Optional slide answer: 3 ways (2 pens and 1 rubber; 1 pen and 3 rubbers; 5 rubbers). If the whole class is ahead, use the Spare-time menu (guide section 3b) instead of rushing on.

3b. Spare-time menu: if the class is ahead

- Whole class ahead: use the Spare-time menu in the Flex time and the optional Go further slide. Pick one or two activities; do not start new content.
- A few children ahead: they may choose Go further or the Investigation, which are open to everyone. Never label or name a child, and never announce who is ahead.
- Never teach anything the next lesson needs. If the class is ahead, slow down: ask 'How do you know?' and let children explain, rather than rushing on.

Optional time, never added to the 90-minute sum. It comes from the 5-minute flex buffer, from slack in the parts, or from the optional Go further slide.

Activity	Minutes	You say	Recording cue	Answer
Is it always true?	4 (optional)	Mei says: to find every way, start at the smallest number and go up one at a time. Is that always true? Try it for exactly $12 with $2 notes and $5 notes, then with $3 and $4 items.	*Recording: pause. Mei says start at the smallest number and go up. Try it for $12 with $2 and $5 notes.*	Yes. Going in order means no case is missed. For $12 with $2 and $5 notes: 2 five-dollar notes and 1 two-dollar note, or 6 two-dollar notes.

Make a puzzle for your grown-up	4 (optional)	Pick two price tags. Write: spend exactly this much on two things. Give it to your grown-up, then check together by adding the two prices.	*Recording: pause. Pick two price tags, write their total and ask your grown-up which two tags make it.*	No single answer. Check by adding the two prices: they must make the amount.
Teach it back	3 (optional)	Pretend your grown-up or a toy has never listed every way. Teach them how a table with a row for each number of five-dollar notes finds every way to pay exactly $12.	*Recording: pause. Teach a grown-up how a table finds every way to pay $12 with $5 and $2 notes.*	Row 0: $12 left, 6 two-dollar notes. Row 1: $7 left, not possible. Row 2: $2 left, 1 two-dollar note. Each row is one case, so no way is missed.

4. Questions, answers, hints and common mistakes

Sneak-peek puzzles (minutes 8 to 12)

Puzzle 1 (access): Mei buys a pencil for $3 and a rubber for $2. How much does she pay altogether? Write the number.

Answer: $5 (3 and 2 make 5).

Puzzle 2 (think): Kumar has exactly $9. He buys two things. The tags say $2, $4, $5 and $7. Which two does he buy? I know because ___.

Answer: $2 and $7, or $4 and $5. Both pairs make $9: 2 and 7 make 9, and 4 and 5 make 9.

Unmarked. Never put answers on boards in front of the group and never read a name with an answer. Reveal the answers where your script says (usually Talk time).

Start here (workbook pages 1 and 2)

S1 **Ben has exactly $10. He buys two different things. Look at the four tags.**

The two tags are $____ and $____.

Answer: $3 and $7

Hint (say this first): Start with the tag that costs the least. What partner does it need to make 10?
Worked solution: 3 needs 7 to make 10, and there is a $7 tag. 5 needs 5, but there is only one $5 tag and the two things must be different. 8 needs 2, and there is no $2 tag. So the two tags are $3 and $7.
Common mistakes: Using the $5 tag twice.; Choosing $3 and $5 or $5 and $7 without adding.
Time for a middle child: about 3 min.

S2 **Siti buys a ruler for $7 and a cup for $8. How much does she pay altogether?**

She pays $____ altogether.

Answer: $15

Hint (say this first): Altogether means add the two prices. 7 and 3 make 10.
Worked solution: 7 and 8: 7 and 3 make 10, and 5 more makes 15. Siti pays $15 altogether.
Common mistakes: Taking away: 8 take away 7 is 1.; Writing $78 by joining the digits.
Time for a middle child: about 2.5 min.

S3 **Wei has $20. He buys a jar for $14. How much money does he have left?**

He has $____ left.

Answer: $6

Hint (say this first): Count up from 14 to 20.
Worked solution: Count up from 14 to 20. That is 6 steps. Wei has $6 left.
Common mistakes: Adding 20 and 14.; Writing 14, the price of the jar.
Time for a middle child: about 3 min.

S4 **Ali has $10. A ruler costs $7 and a glue stick costs $5.**

(a) Does Ali have enough money for both? Circle Yes or No.
(b) He needs $____ more.

Answer: No; $2

Hint (say this first): Add the two prices first. Is the total more than 10?
Worked solution: 7 and 5 make 12. 12 is more than 10, so $10 is not enough. Count up from 10 to 12: Ali needs $2 more.
Common mistakes: Saying Yes because each price is less than 10.; Writing 12 for the money needed.
Time for a middle child: about 3.5 min.

S5 **A ruler costs $7. Mei buys 3 rulers.**

(a) Write the number sentence. $☐ + $☐ + $☐ = $☐
(b) The rulers cost $____ altogether.

Answer: $7 + $7 + $7 = $21; $21

Hint (say this first): Add the same price three times. 7 and 7 make 14.
Worked solution: 7 and 7 make 14. 14 and 7 make 21. Mei pays $21 for 3 rulers.
Common mistakes: Writing 7 or 14 (one or two rulers).; Writing $73 by joining digits.
Time for a middle child: about 3.5 min.

S6 **Fill in the blanks in the table.**

Name	Had ($)	Spent ($)	Left ($)
Ravi	20	12	☐
Aisha	15	☐	6
Kumar	☐	8	9

Answer: 8; 9; 17

Hint (say this first): Had take away spent is left. Use it the right way round for each row.
Worked solution: Ravi: 20 take away 12 is 8. Aisha: she had 15 and has 6 left, so she spent 9. Kumar: he spent 8 and has 9 left, so he had 17.
Common mistakes: Adding when the question needs take away.; Writing the same number in two rows.
Time for a middle child: about 3.5 min.

Think harder (page 3): the taught idea in a new setting

T1 **Exactly $20. Pens cost $2 each and books cost $7 each. Ali spends exactly $20 on pens and books. He may buy 0 books.**

Books	Pens
0	☐
1	☐
2	☐
3	☐

(a) Fill in the table. Write X if the money cannot be spent exactly or is not enough.
(b) There are ____ ways.

Answer: 10; X; 3; X; 2 ways

Hint (say this first): For each number of books, work out what is left for pens.
Worked solution: 0 books: $20 is left, which is 10 pens. 1 book: $13 is left, and $2 pens cannot make 13 (X). 2 books cost $14. 20 take away 14 is 6, which is 3 pens. 3 books cost $21, which is too much (X). So there are 2 ways: 10 pens, or 2 books and 3 pens.
Common mistakes: Stopping after the first way.; Counting 2 books and 3 pens and 3 pens and 2 books as two ways.
Time for a middle child: about 6 min.

T2 **A child in another class lists ways to pay exactly $16 with $2 notes and $5 notes. The list says: eight $2 notes.**

(a) Is the list complete? Circle Yes or No.
(b) A missing way: ____ five-dollar notes and ____ two-dollar notes.

Answer: No; 2 five-dollar notes and 3 two-dollar notes

Hint (say this first): Try one $5 note, then two $5 notes. What is left each time?
Worked solution: One $5 note leaves $11, which $2 notes cannot make. Two $5 notes leave $6, which is 3 two-dollar notes. So the missing way is 2 five-dollar notes and 3 two-dollar notes. Three $5 notes are $15 and leave $1, which cannot be made.
Common mistakes: Saying Yes because 8 two-dollar notes work.; Writing 2 five-dollar notes and 6 two-dollar notes.
Time for a middle child: about 5 min.

T3 **Ravi buys a book for $9, a hat for $4 and a pen for $2. He pays with a fifty-dollar note.**

(a) The three things cost $____.
(b) His change is $____.

Answer: $15; $35

Hint (say this first): Add the three prices first. Then count up to 50.
Worked solution: 9 and 4 make 13. 13 and 2 make 15. Count up from 15 to 20: 5. Then from 20 to 50: 30. 5 and 30 make 35. Ravi gets $35 change.
Common mistakes: Adding only two of the prices.; Writing 15 as the change.
Time for a middle child: about 5 min.

True/False statements: 6 rubbers is one way.; 2 rubbers and 3 pencils is one way.; 3 pencils and 2 rubbers is a different way from 2 rubbers and 3 pencils.; 4 rubbers and 2 pencils is one way.

T4 **Rubbers cost $3 each and pencils cost $4 each. Ali spends exactly $18. Tick True or False.**

Answer: True; True; False; False

Hint (say this first): Work out what each way costs. Does it make exactly 18?
Worked solution: 6 rubbers cost 18, so it is a way. 2 rubbers and 3 pencils cost 6 and 12, which is 18, so it is a way. The same things in a different order are the same way. 4 rubbers and 2 pencils cost 12 and 8, which is 20, not 18.
Common mistakes: Saying a different order is a new way.; Not adding the cost of both things.
Time for a middle child: about 5 min.

Go further (page 4): mastery and extension

G1 **Pay exactly $20 with $10 notes, $5 notes and $2 notes. Write how many of each note. Find every way. Way 1 is shown. Any order of the ways is fine.**

Way	$10 notes	$5 notes	$2 notes
1	2	0	0
2			
3			
4			
5			
6			
7			

Answer: Six ways: (2, 0, 0), (1, 2, 0), (1, 0, 5), (0, 4, 0), (0, 2, 5), (0, 0, 10) as ten-dollar, five-dollar, two-dollar notes

Hint (say this first): Start with the most $10 notes, then fewer. Then do the same with $5 notes.
Worked solution: Two $10 notes. One $10 note leaves $10: two $5 notes, or five $2 notes. No $10 note: four $5 notes, or two $5 notes and five $2 notes, or ten $2 notes. That is 1 and 2 and 3, which is 6 ways.
Common mistakes: Stopping at the ways with a $10 note.; Counting the same notes in a different order twice.
Time for a middle child: about 8 min.

G2 **Ali buys 7 things. Stickers cost $2 each and pads cost $5 each. He spends exactly $20.**

(a) He buys ____ stickers.
(b) He buys ____ pads.

Answer: 5 stickers; 2 pads

Hint (say this first): Try a number of pads. Then the rest are stickers. Does it make $20?
Worked solution: Try 1 pad: 6 stickers cost 12, and 12 and 5 make 17. Too small. Try 2 pads: 5 stickers cost 10, and 10 and 10 make 20. So 5 stickers and 2 pads.
Common mistakes: Buying 7 of the same thing.; Giving a way with more or fewer than 7 things.
Time for a middle child: about 6 min.

G3 **Write an exactly puzzle for a partner. Choose two of these tags. Many answers are right.**

(a) Spend exactly $____ on two things.
(b) The two things cost $____ and $____.

> **Answer: Many answers are right: the two prices must add to the amount**

Hint (say this first): Pick two prices and add them. That is the amount.
Worked solution: For example, the pencil $3 and the cup $8: spend exactly $11 on two things. The two things cost $3 and $8. Check that the two prices add to the amount.
Common mistakes: Writing an amount that is not the total of two tags.; Choosing the same tag twice.
Time for a middle child: about 5 min.

Investigation (page 5): Amounts you cannot pay

Easy first step: Can you pay exactly $7 with $2 notes and $5 notes?
Then: Mi has lots of $2 notes and $5 notes. Which amounts from $1 to $12 can Mi not pay exactly? Write them.

> **Model answer: First: yes, one $5 note and one $2 note. Mi cannot pay $1 or $3. Every other amount from $2 to $12 can be paid: $2, $4, $5, $6, $7, $8, $9, $10, $11 and $12.**

Look for: A child who tries each amount from $1 up with a list of notes; a child who sees that $1 and $3 are too small to be made; a child who notices that from $4 on every amount works. Credit any clear method. Do not mark a child down for stopping early.
Common mistakes: Saying $2 or $5 cannot be paid.; Using a note that is more than the amount.

Talk and explain (minutes 70 to 76)

Ben wants a pen and a book. One child says: buying the pen then the book is a different way from buying the book then the pen. Another child says: it is the same way. Who is right? How do you know? Sentence starter: I think ... because ...

> **Model answer: The second child is right. A way is what you buy, not the order you pick it up. The pen and the book cost the same either way, so listing both would count one way twice.**

Look for: A child who says the things and the cost are the same, or who links it to the same notes in a different order. Not just a name. Volunteers first, a pass is always fine, never call a child by name to answer, no tallies.

Exit ticket (minutes 76 to 82): 3 questions

E1 **Mei spends exactly $11 on two things. The tags say $3, $4, $5 and $8. Which two did she buy? Choose the correct answer. Write its number in the bracket.**

> **Answer: (2) $3 and $8**

Worked solution: 3 and 8 make 11. 3 and 4 make 7, 4 and 5 make 9, and 5 and 8 make 13.
Common mistakes: Choosing (4) $5 and $8 because they are the biggest.; Choosing a pair without adding.

E2 **Ben has $12. He wants a pen for $6 and a book for $8. Does he have enough money?**

Circle Yes or No.

> **Answer: No**

Worked solution: 6 and 8 make 14. 14 is more than 12, so $12 is not enough.
Common mistakes: Saying Yes because each price is less than 12.; Taking away: 8 take away 6 is 2.

E3 **A cup costs $3. Ali buys 4 cups. How much do the cups cost altogether?**

They cost $____ altogether.

> **Answer: $12**

Worked solution: 3 and 3 make 6. 6 and 3 make 9. 9 and 3 make 12.
Common mistakes: Writing 3 or 7.; Counting only 3 cups.

Look-back (minutes 82 to 85)

Children tick or write: *Something I did well*; *The hardest part was* (choosing two items; listing every way; the change; something else); *What helped me* (the table; my price tags; checking my answer; I was not stuck); *Next time I will try* (going in order; using a table; checking my answer; asking a question); *I am still stuck (my grown-up will photograph this page for my tutor)* and *I would like to pass*. Never collected or read out in front of the group. A child who ticks still stuck gets a check-in in the open session next lesson.

5. Home practice and online practice

#	Tier	Question	Answer
H1	Start here	Aisha has $10. A rubber costs $3 and a pencil costs $4. Does she have enough money for both? Circle Yes or No. I know because ___.	Yes. 3 and 4 make 7, and 7 is less than 10.
H2	Start here	Lily buys 5 stickers. Each sticker costs $3. How much do the stickers cost altogether? They cost $____ altogether.	15
H3	Start here	Mei has $20. She buys a cup for $8 and a pen for $5. How much money does she have left? She has $____ left.	7
H4	Think harder	Pay exactly $18 with $2 notes and $5 notes. Write both ways. Way 1: ____ five-dollar notes and ____ two-dollar notes. Way 2: ____ five-dollar notes and ____ two-dollar notes.	0 five-dollar and 9 two-dollar; 2 five-dollar and 4 two-dollar (either way can come first)
H5	Start here	Subtract. (a) 86 - 40 = ___ (b) 86 - 4 = ___	46 and 82

Online practice (`out/l26/practice`, key `t3l26`): 11 items; 10 have a template that makes unlimited similar questions with a computed answer. Every template variant is checked by the validator against a brute-force oracle and the runner's own JavaScript. No timers, no scores, no streaks.

6. Parent line for the term report

Your child is learning to plan within a budget and to list every way in order. This week: two items for an exact amount, total and change, and listing every way to pay $12.

Term line (plan, section 5): Your child is learning to give a reason, and to read time and money in real life. Add one named strength and one next step from your own observation. No marks, no ranking, no claim of exam results.

7. Slide list

#	Time	Slide	On screen	Speaker note
1	0–2	**The School Shop** s-title	TODAY WE WILL: / Plan what to buy, and list every way.	Lesson 6 of Term 3, 90 minutes. Objective: choose items that make an exact amount or fit a budget, find the total and the change, and list every way in order so that none is missed. Plain statement for families: which two items cost exactly an amount, the total, the change and the cost of equal items are Primary 1 work; listing every way to make an amount, and paying with three kinds of note, go past the school Primary 1 syllabus on purpose. Time plan: opening 0 to 2, warm-up 2 to 8, sneak-peek 8 to 12, explore 12 to 23, mini-lesson 23 to 34, brain break 34 to 38, workbook 38 to 70, talk 70 to 76, exit ticket 76 to 82, look-back 82 to 85, flex time and goodbye 85 to 90 (the buffer: do not start anything new). Think harder, Go further and the Investigation are for every child to choose. Say the recording notice in one line: the recording has the tutor, the shared screen and any voice that is not muted; a child may keep the microphone and camera off.
2	2–8	**Warm-up: make 10** s-rem1	[picture: ten_frame] / 7 are filled. How many more make 10?	A ten-frame with 7 counters (Term 1 Lesson 5, taught again). Ask: how many more make 10 (3). Say: 7 and 3 make 10. Today we look for two prices that make an exact amount, so we need the partner of a number. A child who is unsure counts the empty squares. Children answer aloud. No writing.
3	2–8	**Three of the same** s-rem2	[picture: price_tag] / [picture: price_tag] / [picture: price_tag] / 3 pens at $4 each. How much do they cost altogether?	Three of the same price (Term 2 Lesson 15, taught again as adding again and again): 4 and 4 and 4. Ask: how much do 3 pens cost altogether (12). Add two at a time: 4 and 4 make 8, 8 and 4 make 12. A child who is unsure uses three groups of 4 fingers. Children answer aloud. No writing.
4	2–8	**List every pair that makes 6** s-rem3	[picture: table] / Start at 1 and go up. Stop when the numbers swap round.	Listing in order (Term 2 Lesson 17, taught again). Start at 1: 1 and 5. Then 2 and 4. Then 3 and 3. After that the pairs swap round (4 and 2 is the same pair as 2 and 4), so we stop. Say: starting at the smallest and going up in order means we do not miss one. Ask for the second and third rows. Answers: 4; 3 and 3. A child who is unsure counts on fingers from the first number to 6. Children answer aloud. No writing.
5	8–12	**Sneak-peek puzzles** s-sneak	Ideas we have not learnt yet. A guess is a great start. Nobody is marked. / PUZZLE 1: anyone can try: / Mei buys a pencil for $3. / She buys a rubber for $2. / How much does she pay altogether? / PUZZLE 2: think: / Kumar has exactly $9. He buys two things. / The tags say $2, $4, $5 and $7. / Which two does he buy? I know because ___.	Puzzle 1 (3 and 2: $5) is an access question. Puzzle 2 is a thinking question on the lesson idea: two tags that make exactly $9. There are two answers: $2 and $7, and $4 and $5. A child who finds one has done well; ask if there is another. Say: two sneak-peek puzzles, ideas we have not learnt yet; a guess is a great start and I do not know is welcome; nobody is marked. Children write on their own paper. Nobody holds paper to the camera. There is no private chat. Answers: $5; $2 and $7, or $4 and $5. Do not reveal puzzle 2 until Talk time. Do not write scores or keep a list.

6	12–23	**Explore: exactly $12** s-explore1	Take the rubber, pencil, pen, glue, ruler and cup tags. / Find two different tags that cost exactly $12 together. / There are two answers. How do you know you have them all?	Round 1, about 5 minutes. Each child lays out six tags: rubber $2, pencil $3, pen $4, glue $5, ruler $7 and cup $8. They find two tags that cost exactly $12 together. There are two answers: pen $4 and cup $8, and glue $5 and ruler $7. Ask: how do you know you have them all? Model the way to be sure: start with the tag that costs the least and ask what partner it needs. Rubber $2 needs $10 (no tag); pencil $3 needs $9 (no tag); pen $4 needs $8 (the cup, yes); glue $5 needs $7 (the ruler, yes); the ruler and cup are already found. The prices are on the tags, so the slide shows no price. The answer appears on the next slide. A child with no tags writes the prices 2, 3, 4, 5, 7, 8 on paper. Answers: $4 and $8, $5 and $7.
7	12–23	**Two ways to make $12** s-explore1-ans	[picture: price_tag] / [picture: price_tag] / [picture: price_tag] / [picture: price_tag] / $4 and $8. $5 and $7. Start with the tag that costs the least and ask what partner it needs.	The answers for round 1: $4 and $8 (pen and cup), and $5 and $7 (glue and ruler). Say: starting with the tag that costs the least and asking what it needs means we do not miss one. Children check against their own tags and tick. Nobody holds tags up to the camera: children say the pair and show a thumb when they agree.
8	12–23	**Explore: pay exactly $10** s-explore2	Take your $2 notes and your $5 notes. / Pay exactly $10 using only $2 notes and $5 notes. / How many different ways can you find?	Round 2, about 5 minutes. Children use the play-money notes: five $2 notes and four $5 notes (they need at most five of one and two of the other). They find every way to pay exactly $10 with $2 notes and $5 notes. There are two ways: five $2 notes, or two $5 notes. Ask for each way, then: how do you know there are only two? Try one $5 note: $5 is left, and $2 notes cannot make $5 exactly. Children say the way and show a thumb; nobody holds notes up. A child with no notes draws or writes 2s and 5s on paper. The pictures are on the next slide.
9	12–23	**Two ways to pay $10** s-explore2-ans	[picture: money] / [picture: money] / Five $2 notes, or two $5 notes. One $5 note leaves $5 and $2 notes cannot make that.	The answers for round 2: five $2 notes, or two $5 notes. Say: a $5 note on its own leaves $5, and $2 notes make 2, 4, 6, so $5 cannot be made. Children tick their own work.
10	12–23	**What did we notice?** s-explore3	How did you know there were only two ways? / Why start with the tag that costs the least, or the biggest note? / Is 5 two-dollar notes then 2 five-dollar notes a new way, or the same two ways in a different order?	Take one or two answers from volunteers. Key ideas: working in order (the tag that costs the least first, or the biggest note first) means no way is missed; checking what is left shows when a way is impossible; the same pieces in a different order is the same way. Repeat a child answer in your own words so the recording picks it up. Do not give the rule before the children say it.
11	23–34	**Is the money enough?** s-m1	[picture: price_tag] / [picture: price_tag] / Mei has $15. Does she have enough for the toy car and the shoe? Circle Yes or No on your paper.	Worked example. Mei has $15. The toy car costs $11 and the shoe costs $6. Ask: how much do they cost altogether (17); is $17 more than $15 (yes); so is $15 enough (No). How much more money does she need (2)? Say: a budget is the money you have. Enough means the total is the same as the budget or less. Children answer aloud. The answer is on the next slide. A child who says Yes because both prices are less than 15 forgot to add: ask what altogether means.
12	23–34	**Not enough: she needs $2 more** s-m1a	$11 + $6 = $17. $17 is more than $15. No, $15 is not enough. / Mei needs $2 more.	The answer: the car and the shoe cost $17, which is more than $15, so $15 is not enough and Mei needs $2 more (15 up to 17). Say: enough means the total is not more than the money you have.
13	23–34	**Three of the same** s-m2	[picture: price_tag] / [picture: price_tag] / [picture: price_tag] / Ravi buys 3 glue sticks. How much do they cost altogether?	Three glue sticks at $5 each. Ask: how much altogether (15): 5 and 5 make 10, and 5 more make 15. Say it as a number sentence: $5 + $5 + $5 = $15. The answer is on the next slide. Then ask a second one aloud: a rubber costs $2 and Siti buys 5; how much (10). Children write the second on their own paper. A child who writes 5 gave one price: ask how many glue sticks.

14	23–34	**Add the same price again** s-m2a	$5 + $5 + $5 = $15. Ravi pays $15 altogether. / 5 rubbers at $2: $2 + $2 + $2 + $2 + $2 = $10.	The answers: $15 for 3 glue sticks and $10 for 5 rubbers at $2. Read them aloud and children tick their own work. Say: the same price added again and again.
15	23–34	**Every way to pay $12** s-m3	[picture: table] / Pay exactly $12 with $5 notes and $2 notes. Fill in the last column. Write X if it cannot be done.	The table lists every way in order. Start with no $5 notes: $12 is left, and 12 is 6 two-dollar notes (2, 4, 6, 8, 10, 12). With one $5 note: $7 is left, and $2 notes cannot make 7 exactly (X). With two $5 notes: $2 is left, which is 1 two-dollar note. A third $5 note would be $15, more than $12, so we stop. Children try the last column on paper first; wait 15 seconds. Answers: 6; X; 1. So there are 2 ways: six $2 notes, or two $5 notes and one $2 note. Six $2 notes is more than the five in the kit: write it, do not lay it out. The filled table is on the next slide.
16	23–34	**Two ways: the table checks every case** s-m3a	[picture: table] / Two ways: six $2 notes, or two $5 notes and one $2 note.	The filled table: 6, X, 1. Say: each row is one case, and no case is missed. Two ways: six $2 notes, or two $5 notes and one $2 note. Children tick their own work.
17	23–34	**Total, then change** s-m4	[picture: price_tag] / [picture: price_tag] / [picture: money] / Mei buys the cup and the pencil. She gives the cashier two ten-dollar notes. How much change?	Two steps. First the total: the cup costs $8 and the pencil costs $3, so they cost $11. Then the change from $20: count up from 11 to 20, which is 9. Ask: how much altogether (11); how much change (9). Children answer aloud. The answer is on the next slide. A child who gives 12 took away only the cup: ask what else she bought.
18	23–34	**Total first, then count up** s-m4a	$8 + $3 = $11. 11 up to 20 is $9 change.	The answers: the total is $11, and the change is $9 (11 up to 20). Say: first the total, then count up to what was paid.
19	34–38	**Clap and stamp** s-break	Stand up. Clap for a two-dollar note. Stamp for a five-dollar note. / Make each amount: $7 is stamp, clap. / Sip some water.	Four minutes. Stand up on camera with a little clear space. Call an amount and children make it with claps ($2 each) and stamps ($5 each): $7 is one stamp and one clap, $9 is a stamp and two claps, $4 is two claps, $10 is two stamps (or five claps). Then call $6, $11 and $14. No equipment, no running. A child may stay seated and tap the desk softly. Do not give prizes or compare children.
20	38–70	**Workbook page 1: Start here** s-ws1	Questions 1 to 3. Take your time. / questions S1, S2, S3	Read questions 1 to 3 aloud. Children work on their own; the tutor walks the cameras and asks how do you know. Wait 10 seconds before helping. After question 3 any child may choose to carry on or try Think harder. Question 1: four tags, which two cost exactly $10. Question 2: a ruler $7 and a cup $8, how much altogether. Question 3: Wei has $20 and buys a jar for $14; how much is left.
21	38–70	**Check page 1** s-ws1ans	answers S1, S2, S3	Read each answer aloud. Children tick their own page with a tick. Never ask a child to show a wrong answer to the group. Answers: Q1 $3 and $7; Q2 $15; Q3 $6.
22	38–70	**Workbook page 2: Start here** s-ws2	Questions 4 to 6. Take your time. / questions S4, S5, S6	Read questions 4 to 6 aloud. Question 4: Ali has $10; a ruler costs $7 and a glue stick costs $5; enough or not, and how much more. Question 5: 3 rulers at $7. Question 6: a table of money had, spent and left. Wait 10 seconds before helping.
23	38–70	**Check page 2** s-ws2ans	answers S4, S5, S6	Read each answer aloud so a child watching the recording can tick their own work. Never ask a child to show a wrong answer to the group. Answers: Q4 No, $2 more; Q5 $7 + $7 + $7 = $21; Q6 8, 9 and 17.

24	38–70	**Choose your next page** s-choice	Page | What it is / Think harder (page 3) | Exactly $20, is the list complete, three items and change / Go further (page 4) | Three kinds of note, 7 things, your own puzzle / Investigation (page 5) | Amounts you cannot pay / Check | Finish and check your own work / Everyone may choose. Not finished? Pages 3 to 5 are for home too.	Invite the whole group at once, for example: when you have finished Start here, you can choose Think harder, Go further or the Investigation. Never announce who is on which page and never name a child. Pairs are not split unless both children agree. Model answers are in the tutor guide. About 5 minutes.
25	70–76	**Talk and explain** s-talk	TWO CHILDREN SAY: / Ben wants a pen and a book. / One child: buying the pen then the book is a different way from buying the book then the pen. / Another child: it is the same way. / Who is right? How do you know? / I think … because …	One minute of talk to the grown-up next to you, or to your screen. Volunteers first; a pass is always fine; never call a child by name to answer. Model answer: the second child is right. A way is what you buy, not the order you pick it up: a pen and a book cost the same either way, and listing both would count one way twice. Link to Explore: five $2 notes then nothing, or nothing then five $2 notes, is still one way. Repeat each child answer in your own words for the recording. The two children are in another class: no cast name is given the wrong answer.
26	70–76	**Back to the sneak-peek** s-sneakans	Puzzle 1: $5. Puzzle 2: $2 and $7, or $4 and $5.	Reveal both puzzles now. Say: many of you wrote a good reason. Do not read out anyone earlier answer. Puzzle 1: 3 and 2 make 5. Puzzle 2: two answers. 2 needs 7 (yes), 4 needs 5 (yes), 5 is already used, 7 is already used. It was the same idea as round 1: start with the one that costs the least and ask what partner it needs.
27	76–82	**Exit ticket** s-exit	On your own. No looking back. / questions E1, E2, E3	Children answer on page 5. Read E1, E2 and E3 aloud, and the four options of E1 (the figures on the slide are small). Children tick their own ticket against the next slide. Nobody holds paper to the camera and there is no private chat.
28	76–82	**Check the exit ticket** s-exitans	answers E1, E2, E3	Read each answer aloud. Children tick their own ticket with a tick. Answers: option 2, $3 and $8; No; $12.
29	82–85	**Look-back** s-look	[look-back box]	Three minutes. Children tick or write the look-back box on page 5. A pass is always allowed. It is never marked, never collected in front of the group and never read out. If a child ticks I am still stuck, a grown-up may photograph that page after class and send it to the business WhatsApp (the number is in the parent summary, never on a slide). You then help in the open session next lesson. Never a direct message to a child. The Next time I will try row is optional.
30	85–90	**Well done, inquirers!** s-end	Show a grown-up one thing you found out today. / NEXT LESSON: / Fill the Grid / Have ready: the 16 grid tiles, cut out by a grown-up. A coloured pencil is optional.	Say goodbye and thank the grown-ups. Minutes 85 to 90 are flex time: the buffer. If you ran late, finish any open item (the look-back). Do not start anything new. Remind families that the next lesson needs the grid-tile page cut out by a grown-up (16 tiles), and that the price tags and the play money stay in their envelope for the Quest. If the whole class is ahead, show the optional slides and use the Spare-time menu from the tutor guide.
31	optional	**Go further: pens and rubbers** s-opt	A pen costs $4 and a rubber costs $2. Ali spends exactly $10. / How many ways can he do it?	Optional, only if you are on time. Pens cost $4 and rubbers cost $2, exactly $10. Start with the most pens: 2 pens ($8) and 1 rubber; 1 pen ($4) and 3 rubbers; 0 pens and 5 rubbers. Three ways. Take two answers and move on. This links to Exactly $20 in Think harder.

32	optional	**If we have time: pick one** s-menu	Activity | What we do / Is it always true? | Starting at the smallest number and going up finds every way. Try it for $12. / Make a puzzle | Pick two tags. Ask for exactly their total. / Teach it back | Show a toy how a table lists every way. / Optional. Everyone may join.	Optional Spare-time menu, used only if the whole class is ahead. Pick one or two activities (3 to 5 minutes each); full tutor lines and answers are in the tutor guide. Never start new content and never name who is ahead. Slow down with how do you know rather than rushing on. These minutes come from the flex buffer and are not part of the 90-minute sum.

8. Recording cues and chapter markers

Say each cue once, to the camera, at the start of the part. Add a chapter marker at each time. A child watching alone cannot ask you a question, so say the page and question number aloud, read each question and each answer aloud, and repeat a child's answer in your own words.

Chapter	Part	You say (recording voice)	A child watching later
0:00	Opening	*If you are watching the recording: hello! Get a pencil, paper, your workbook, your price tags and your play money. Pause or rewind any time.*	Gather your workbook, price tags, play money, pencil and paper. Press play when ready.
2:00	Remember warm-up	*Recording: join in! Look at each picture and say your answer out loud. Pause if you need longer.*	Play along. Say each answer out loud before the video does.
8:00	Sneak-peek puzzles	*Recording: pause now and try both puzzles on your paper. Guessing is fine. Press play for the next part.*	Pause. Try both puzzles on your own paper. A guess is fine.
12:00	Explore	*Recording: pause now. Find two tags that make exactly $12, then make $10 with notes. Press play when you have tried.*	Pause. Find two tags for exactly $12, then make $10 with $2 and $5 notes.
23:00	Mini-lesson	*Recording: keep watching and copy the examples. Rewind if you miss a step.*	Watch and copy the examples. Rewind any step you missed.
34:00	Brain break	*Recording: stand up and join in! Clap for a two-dollar note and stamp for a five-dollar note.*	Stand up. Clap for $2, stamp for $5, and make each amount.
38:00	Workbook	*Recording: pause now and do workbook page 1. When you finish a page, press play to check it.*	Pause. Do page 1, then play to check. Then page 2. Then choose a page to try.
70:00	Talk time	*Recording: pause. Tell a grown-up who is right, and show how you know.*	Pause. Explain your answer to someone at home and show how you know.
76:00	Exit ticket	*Recording: pause and do the exit ticket on your own. Then press play to check it.*	Pause. Do the exit ticket alone, then play to check it.
82:00	Look-back	*Recording: pause and fill in your look-back box. You can pass.*	Pause. Fill in the look-back box, or pass.
85:00	Flex time and goodbye	*Recording: well done for finishing! Show a grown-up one thing you found out.*	Show a grown-up your workbook and tell them one thing you found out.

9. Timing check (model, not a stopwatch)

Part	Allocated	Script	Slow class	Flag
opening	2:00	1:42	1:56	ok
remember	6:00	4:26	5:15	ok

sneak	4:00	3:23	3:58	ok
explore	11:00	7:54	9:20	ok
mini	11:00	9:10	10:47	ok
break	4:00	3:09	3:45	ok
work	32:00	24:33	29:15	ok
talk	6:00	4:29	5:19	ok
exit	6:00	4:32	5:18	ok
look	3:00	2:06	2:27	ok
flex	5:00	0:29	0:33	ok
Total	90:00	65:56	77:53	

Assumptions as docs/audit/timing_p1.md: speech 120 words a minute, read-aloud 110, slide change 25 s, a group question 10 s thinking plus 20 s answers, papers to the camera 30 s. Workbook: Start here has 6 questions; a middle child needs about 8.5 min for page 1 and 10.5 min for page 2 (a slower child about 1.7 times as long, so may finish page 1 and part of page 2; that is fine, the check-together slides cover every answer). The lesson has no breakout rooms, so no breakout time is counted.
