LESSON 6 • TERM 3 • LEVEL 1

The School Shop

A plan that fits the money

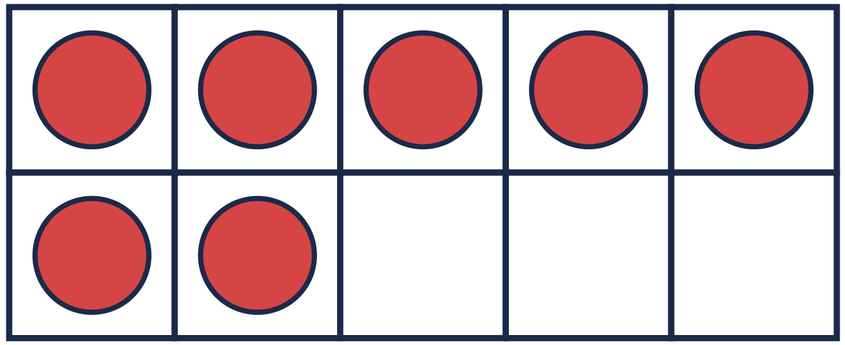

TODAY WE WILL

Plan what to buy, and list every way.

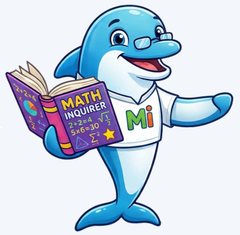

Warm-up: make 10

2–8 MIN

7 are filled. How many more make 10?

Take your time!

Three of the same

2–8 MIN

3 pens at $4 each. How much do they cost altogether?

List every pair that makes 6

2–8 MIN

First	Second
1	5
2	
3	

Start at 1 and go up. Stop when the numbers swap round.

Sneak-peek puzzles

8–12 MIN

Ideas we have not learnt yet. A guess is a great start. Nobody is marked.

PUZZLE 1: anyone can try

Mei buys a pencil for $3.

She buys a rubber for $2.

How much does she pay altogether?

PUZZLE 2: think

Kumar has exactly $9. He buys two things.

The tags say $2, $4, $5 and $7.

Which two does he buy? I know because ___.

Explore: exactly $12

12–23 MIN

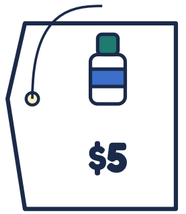

1. Take the rubber, pencil, pen, glue, ruler and cup tags.
2. Find two different tags that cost exactly $12 together.
3. There are two answers. How do you know you have them all?

Two ways to make $12

12–23 MIN

$4 and $8. $5 and $7. Start with the tag that costs the least and ask what partner it needs.

Explore: pay exactly $10

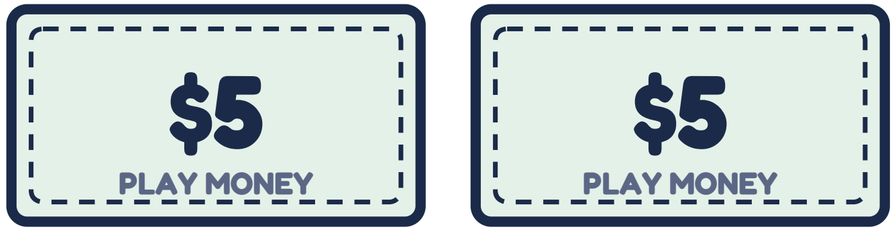

12–23 MIN

1. Take your $2 notes and your $5 notes.
2. Pay exactly $10 using only $2 notes and $5 notes.
3. How many different ways can you find?

Two ways to pay $10

12–23 MIN

Five $2 notes, or two $5 notes. One $5 note leaves $5 and $2 notes cannot make that.

What did we notice?

12–23 MIN

- How did you know there were only two ways?
- Why start with the tag that costs the least, or the biggest note?
- Is 5 two-dollar notes then 2 five-dollar notes a new way, or the same two ways in a different order?

Is the money enough?

23–34 MIN

Mei has $15. Does she have enough for the toy car and the shoe? Circle Yes or No on your paper.

23–34 MIN

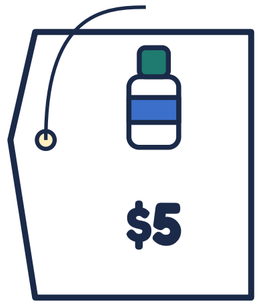

Not enough: she needs $2 more

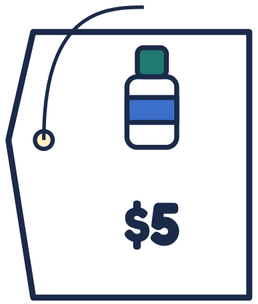

$11 + $6 = $17. $17 is more than $15. No, $15 is not enough.

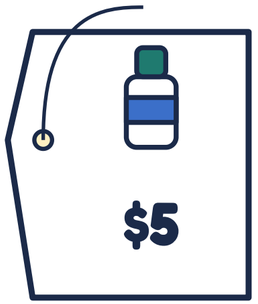

Mei needs $2 more.

Three of the same

23–34 MIN

Ravi buys 3 glue sticks. How much do they cost altogether?

23–34 MIN

Add the same price again

$5 + $5 + $5 = $15. Ravi pays $15 altogether.

5 rubbers at $2: $2 + $2 + $2 + $2 + $2 = $10.

Every way to pay $12

23–34 MIN

Five-dollar notes	Money left	Two-dollar notes
0	12	
1	7	
2	2	

Pay exactly $12 with $5 notes and $2 notes. Fill in the last column. Write X if it cannot be done.

Two ways: the table checks every case

23–34 MIN

Five-dollar notes	Money left	Two-dollar notes
0	12	6
1	7	✕
2	2	1

Two ways: six $2 notes, or two $5 notes and one $2 note.

Total, then change

23–34 MIN

Mei buys the cup and the pencil. She gives the cashier two ten-dollar notes. How much change?

Total first, then count up

23–34 MIN

$8 + $3 = $11. 11 up to 20 is $9 change.

34–38 MIN

Clap and stamp

Stand up. Clap for a two-dollar note. Stamp for a five-dollar note.

Make each amount: $7 is stamp, clap.

Sip some water.

Workbook page 1: Start here

38–70 MIN

Questions 1 to 3. Take your time.

S1 Ben has exactly $10. He buys two different things. Look at the four tags.

S2 Siti buys a ruler for $7 and a cup for $8. How much does she pay altogether?

S3 Wei has $20. He buys a jar for $14. How much money does he have left?

Check page 1

38–70 MIN

S1	$3 and $7
S2	$15
S3	$6

Workbook page 2: Start here

38–70 MIN

Questions 4 to 6. Take your time.

S4 Ali has $10. A ruler costs $7 and a glue stick costs $5.

S5 A ruler costs $7. Mei buys 3 rulers.

S6 Fill in the blanks in the table.

Name	Had ($)	Spent ($)	Left ($)
Ravi	20	12	☐
Aisha	15	☐	6
Kumar	☐	8	9

38–70 MIN

Check page 2

S4	No; $2
S5	$7 + $7 + $7 = $21; $21
S6	8; 9; 17

38–70 MIN

Choose your next page

Page	What it is
Think harder (page 3)	Exactly $20, is the list complete, three items and change
Go further (page 4)	Three kinds of note, 7 things, your own puzzle
Investigation (page 5)	Amounts you cannot pay
Check	Finish and check your own work

Everyone may choose. Not finished? Pages 3 to 5 are for home too.

Talk and explain

70–76 MIN

TWO CHILDREN SAY

Ben wants a pen and a book.

One child: buying the pen then the book is a different way from buying the book then the pen.

Another child: it is the same way.

Who is right? How do you know?

I think ... because ...

Back to the sneak-peek

70–76 MIN

Puzzle 1: $5. Puzzle 2: $2 and $7, or $4 and $5.

Exit ticket

76–82 MIN

On your own. No looking back.

E1 **Mei spends exactly $11 on two things. The tags say $3, $4, $5 and $8. Which two did she buy? Choose the correct answer. Write its number in the bracket.**

E2 **Ben has $12. He wants a pen for $6 and a book for $8. Does he have enough money?**
Circle Yes or No.

E3 **A cup costs $3. Ali buys 4 cups. How much do the cups cost altogether?**
They cost $_____ altogether.

Check the exit ticket

76–82 MIN

E1	(2) $3 and $8
E2	No
E3	$12

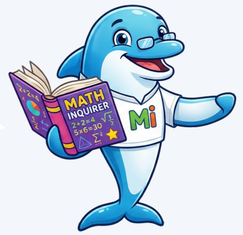

Look-back

82–85 MIN

Three minutes. There are no right answers. You can pass. Nobody reads it out.

Something I did well	write or draw one thing
The hardest part was …	☐ choosing two items ☐ listing every way ☐ the change ☐ something else
What helped me	☐ the table ☐ my price tags ☐ checking my answer ☐ I was not stuck
Next time I will try	☐ going in order ☐ using a table ☐ checking my answer ☐ asking a question
	☐ I am still stuck (my grown-up will photograph this page for my tutor) ☐ I would like to pass

Take your time. You can pass.

85–90 MIN

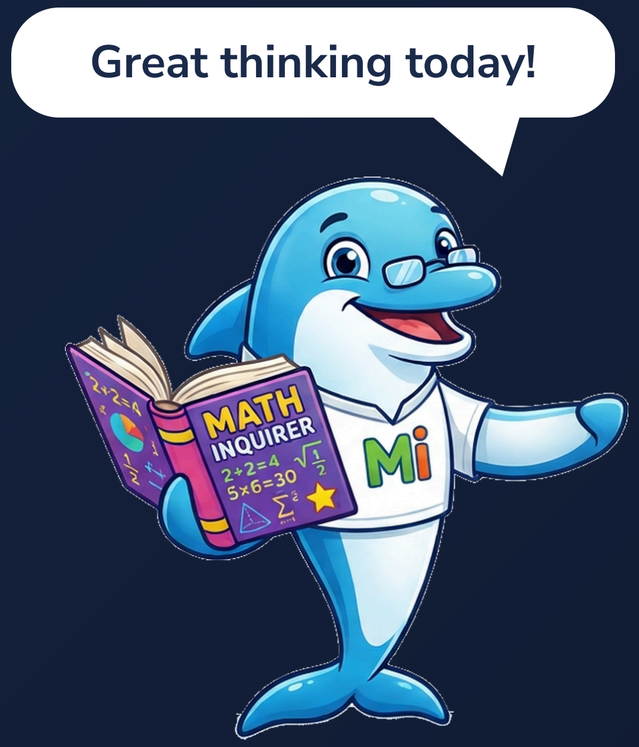

Well done, inquirers!

Show a grown-up one thing you found out today.

NEXT LESSON

Fill the Grid

Have ready: the 16 grid tiles, cut out by a grown-up. A coloured pencil is optional.

Go further: pens and rubbers

OPTIONAL

A pen costs $4 and a rubber costs $2. Ali spends exactly $10.

How many ways can he do it?

OPTIONAL

If we have time: pick one

Activity	What we do
Is it always true?	Starting at the smallest number and going up finds every way. Try it for $12.
Make a puzzle	Pick two tags. Ask for exactly their total.
Teach it back	Show a toy how a table lists every way.

Optional. Everyone may join.
