

LEVEL 1 • TERM 2 • LESSON 7 • FOR PARENTS

7 Sharing and Grouping

WHAT WE DID

We shared things equally by dealing them out one at a time (12 sweets among 3 bags is 4 in each bag) and put things into groups (12 sweets into bags of 4 is 3 bags). We told the two apart and checked by multiplying. Sharing and grouping to 20 are Primary 1 work. The grown-up sign, left over and all the ways to share 12 go a little beyond Primary 1 on purpose; we start from plates and counters.

> **Sharing finds how many each; putting into groups finds how many groups. Check by multiplying.**

TRY AT HOME (5 MINUTES)

1. Deal it out: put 12 small things onto 3 plates, one at a time. How many on each plate? Then make groups of 4 with the same 12. How many groups? Keep small things away from mouths.
2. Share or group? Make up a story for your child and ask: do we know how many plates, or how many on each?
3. Left over: put 14 small things into groups of 4. How many groups? How many are left over?

When your child is stuck

Let your child deal counters one at a time onto plates, and wait 10 seconds before helping. Asking ‘how many plates?’ and ‘how many on each plate?’ works better than giving the answer. If the look-back page says ‘I am still stuck’, photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- share equally: deal one at a time, the same for everyone
- put into groups of: make groups of the same size and count the groups
- each: how many one person or one group gets
- left over: not enough to make another group
- grown-up sign: 12 ÷ 3 = 4 (children do not need it yet)

Good questions

- Is this sharing or putting into groups? How do you know?
- How can we check by multiplying?

Have ready for next lesson

- The Lesson 18 workbook, with its strips page: a grown-up cuts out the strips
- About 20 counters or buttons (not food)
- 3 paper cups or plates
- Pencil, rubber and paper
