LESSON 9 • TERM 3 • LEVEL 1

Spot the Mistake

A neat answer can still be wrong

TODAY WE WILL

Check an answer a different way.

Find the one step that went wrong.

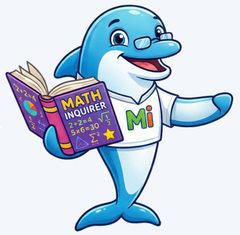

Warm-up: add back

2–8 MIN

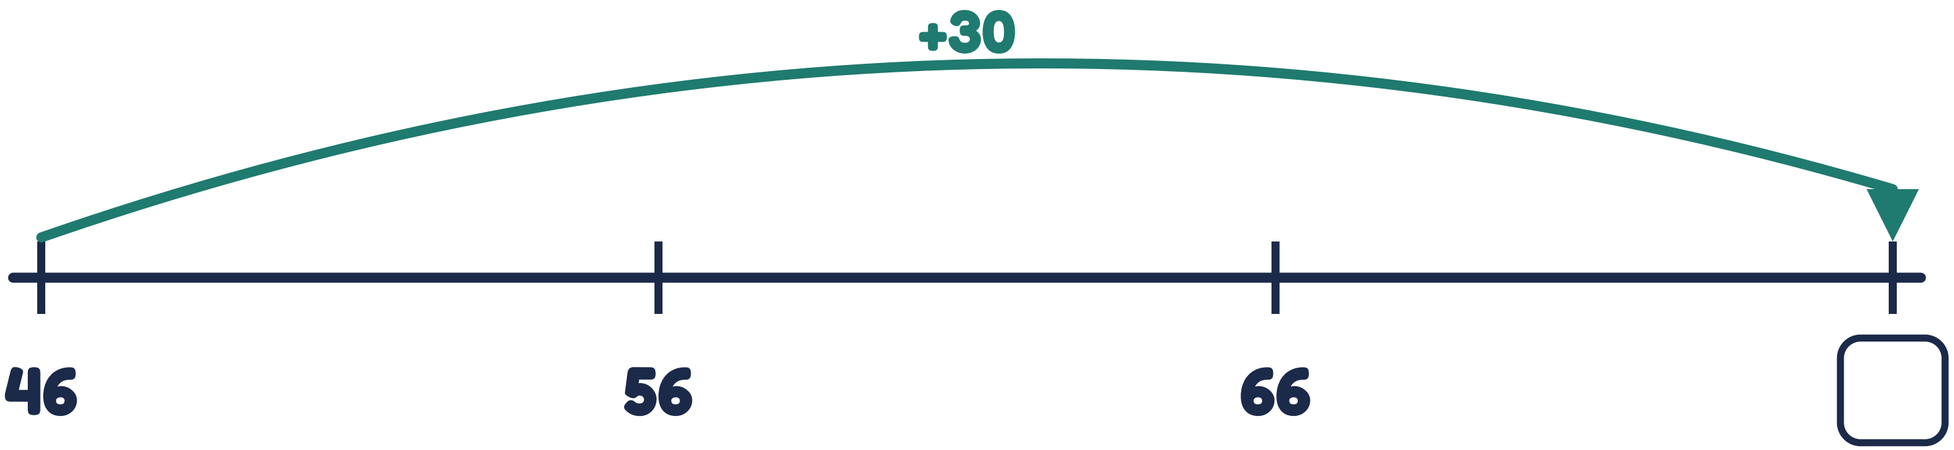

40 – 15 = 25. Check: 25 + 15 = ?

Take your time!

Jump a ten

2–8 MIN

46 + 30. Jump three tens. Where do you land?

One hour later

2–8 MIN

start

end

It is 3:30. What time is it one hour later?

Sneak-peek puzzles

8–12 MIN

Ideas we have not learnt yet. A guess is a great start. Nobody is marked.

PUZZLE 1: anyone can try

A child in another class writes

40 + 20 = 70.

Is the answer right?

Circle Yes or No.

PUZZLE 2: think

A child in another class writes

27 + 16 = 33.

Is the answer right?

I know because ___.

Explore: right or wrong?

12–23 MIN

45 + 28 = 63	70 – 30 = 40
84 – 6 = 82	18 + 4 = 22
53 – 20 = 73	62 – 8 = 54
17 + 5 = 21	38 + 24 = 62

Put each card on RIGHT or WRONG. Check it a different way.

12–23 MIN

Four right, four wrong

WRONG	RIGHT
45 + 28 = 63	70 – 30 = 40
84 – 6 = 82	18 + 4 = 22
53 – 20 = 73	62 – 8 = 54
17 + 5 = 21	38 + 24 = 62

How did you check? Adding back, taking away, counting on.

Explore: fix the wrong cards

12–23 MIN

1. Take the 4 WRONG cards.
2. What went wrong in each one?
3. Write the right answer on your paper.

The right answers

12–23 MIN

Wrong card	Right answer	What went wrong?
45 + 28 = 63	73	the ten was lost
84 – 6 = 82	78	the ones were swapped
53 – 20 = 73	33	a plus sign was used
17 + 5 = 21	22	one short

What did we notice?

12–23 MIN

- How far was each wrong answer from the right one?
- Does the size of the mistake give a clue?
- Is checking the same way again a good check?

Add back to check

23–34 MIN

A child in another class writes 71 – 26 = 55.

Check: 55 + 26 = ?

Add back: 81, not 71

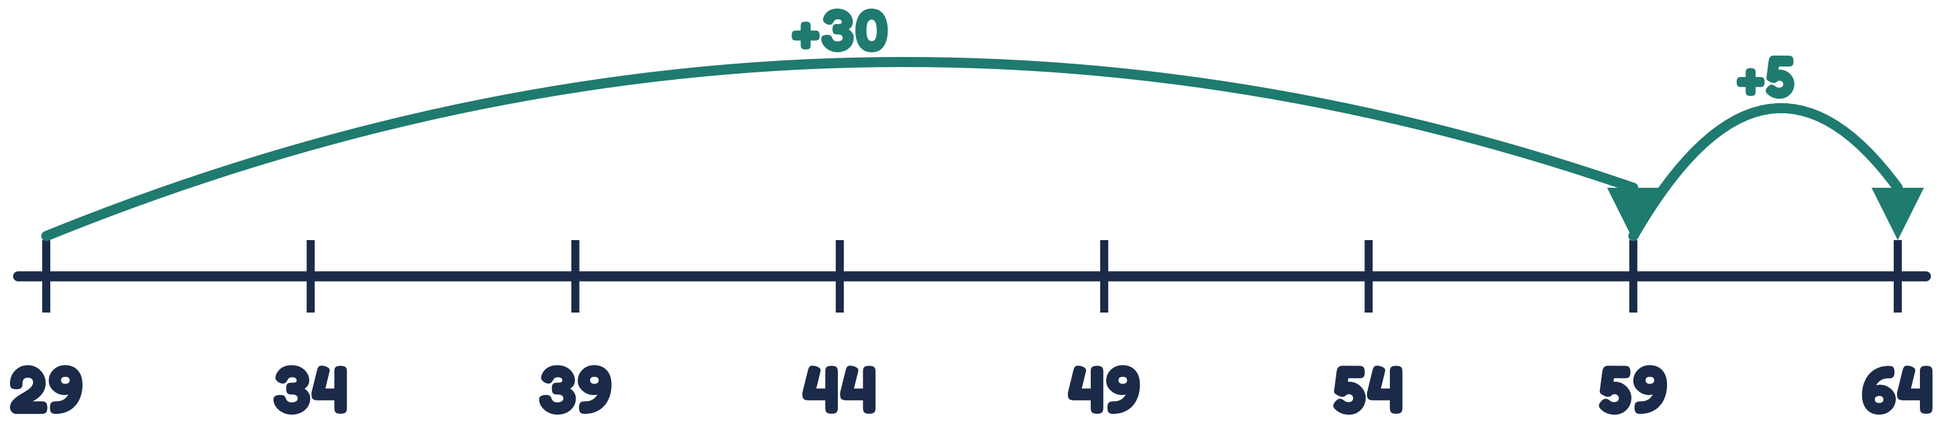

23–34 MIN

55 + 26 = 81. That is not 71. So 55 is wrong. 45 + 26 = 71, so the right answer is 45.

Check with a different way

23–34 MIN

A child in another class writes 29 + 35 = 54.

Jump on the line. Do you land on 54?

The two ways disagree

23–34 MIN

29 + 30 = 59. 59 + 5 = 64. The jump lands on 64, not 54. The right answer is 64.

23–34 MIN

Which step is wrong?

Step	Working
1	56 + 20 = 76
2	76 + 4 = 80
3	80 + 3 = 82

A child adds 56 + 27 in three steps. Which step is wrong?

Step 3 is wrong

23–34 MIN

Step 3 is wrong: 80 + 3 = 83. The right answer is 83. Check: 83 − 27 = 56.

A wrong time

23–34 MIN

leaves

arrives

The bus leaves at 9:00. The trip takes half an hour. A child says it arrives at 9:50. Is that right?

23–34 MIN

Half an hour is 30 minutes

Half an hour after 9:00 is 9:30. A half hour is 30 minutes, not 50. The bus arrives at 9:30.

A wrong total

23–34 MIN

A pen costs $4 and a book costs $9. A child says they cost $15 altogether. Is that right?

13 dollars, not 15

23–34 MIN

4 + 9 = 13. The cost is $13, not $15. Check: 15 – 9 = 6, and 6 is not 4.

34–38 MIN

Tick-tock break

Stand up. Swing your arms like the hands of a clock.

I say a sum. Say the right answer in a big voice.

Sip some water.

Workbook page 1: Start here

38–70 MIN

Questions 1 to 3. Take your time.

S1 A child writes 41 – 17 = 24.

S2 A child writes 50 – 23 = 37.

S3 A child adds 36 + 28 in three steps. One step is wrong.

Step	Working
1	36 + 4 = 40
2	40 + 20 = 50
3	50 + 4 = 54

38–70 MIN

Check page 1

S1	41; Yes
S2	60; No; 27
S3	Step 2; 64

Workbook page 2: Start here

38–70 MIN

Questions 4 to 6. Take your time.

S4 Ravi starts to read at the time on the clock. He reads for 1 hour. A child says he stops at 3:00.

starts

S5 A bag costs $9 and a cup costs $4. A child says they cost $12 altogether.

S6 Tick True or False for each sum.

38–70 MIN

Check page 2

S4	No; 3:30
S5	No; $13
S6	True; False; True; False

38–70 MIN

Choose your next page

Page	What it is
Think harder (page 3)	Which step is wrong, two ways to check, fewer than, a clock
Go further (page 4)	Does it make sense? A column sum, your own puzzle
Investigation (page 5)	The same mistake three times
Check	Finish and check your own work

Everyone may choose. Not finished? Pages 3 to 5 are for home too.

Talk and explain

70–76 MIN

A CHILD IN ANOTHER CLASS SAYS

45 + 28 = 63.

I worked it out again the same way.

I got 63 again. So it must be right.

Do you agree? How could she check?

I think … because …

Back to the sneak-peek

70–76 MIN

Puzzle 1: No. 40 + 20 = 60. Puzzle 2: No. 27 + 16 = 43, because 7 + 6 = 13 and the ten was forgotten.

Exit ticket

76–82 MIN

On your own. No looking back.

E1 **A child writes 63 − 28 = 45.**

(a) Check: 45 + 28 = ☐☐

(b) Is the answer right? Circle Yes or No.

E2 **A child works out 28 + 15 in steps. Which step is wrong? Write its number in the bracket.**

E3 **Lily has $20. She spends $12. A child says she has $9 left.**

(a) Is the child right? Circle Yes or No.

(b) Lily has $_____ left.

Check the exit ticket

76–82 MIN

E1	73; No
E2	(2) 15 – 2 = 12
E3	No; $8

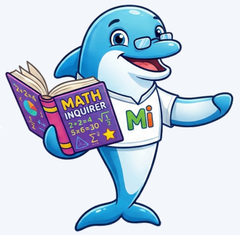

Look-back

82–85 MIN

Three minutes. There are no right answers. You can pass. Nobody reads it out.

Something I did well	write or draw one thing
The hardest part was …	☐ checking a different way ☐ finding the wrong step ☐ the time or money story ☐ something else
What helped me	☐ the cards ☐ adding back ☐ checking my answer ☐ I was not stuck
Next time I will try	☐ adding back ☐ checking a different way ☐ explaining why ☐ asking a question
	☐ I am still stuck (my grown-up will photograph this page for my tutor) ☐ I would like to pass

Take your time. You can pass.

85–90 MIN

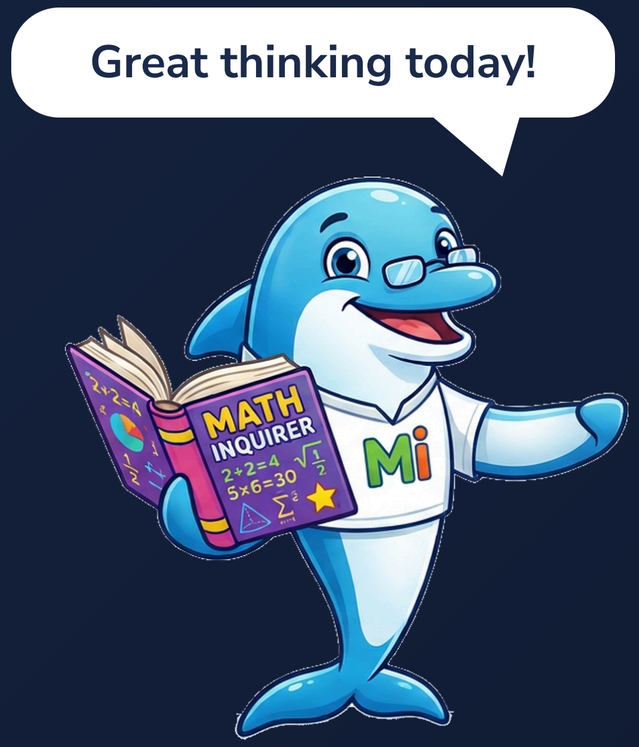

Well done, inquirers!

Show a grown-up one mistake you spotted today.

NEXT LESSON

Calendar Detective, and Mi's Challenge Quest

Have ready: the Quest Log, closed. A quest partner. The 7 day cards, cut out by a grown-up.

OPTIONAL

Go further: be the detective

A child writes 8 + 7 = 14. She checks: 14 – 7 = 7.

Is the answer right? Does the check work?

OPTIONAL

If we have time: pick one

Activity	What we do
Is it always true?	Does adding back always find a mistake in a take away? Test it.
Make a puzzle	Write a sum with one mistake for your grown-up.
Teach it back	Show a toy how to find the wrong step.

Optional. Everyone may join.
