LESSON 7 • TERM 4 • LEVEL 1

Make Your Own Graph

Ask, sort, then picture the answer

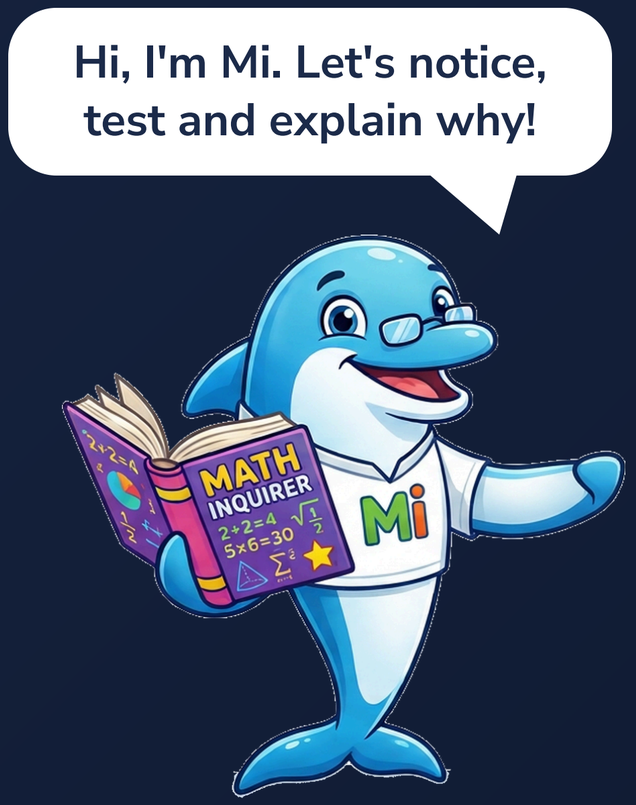

TODAY WE WILL

Sort things into kinds and count each kind.

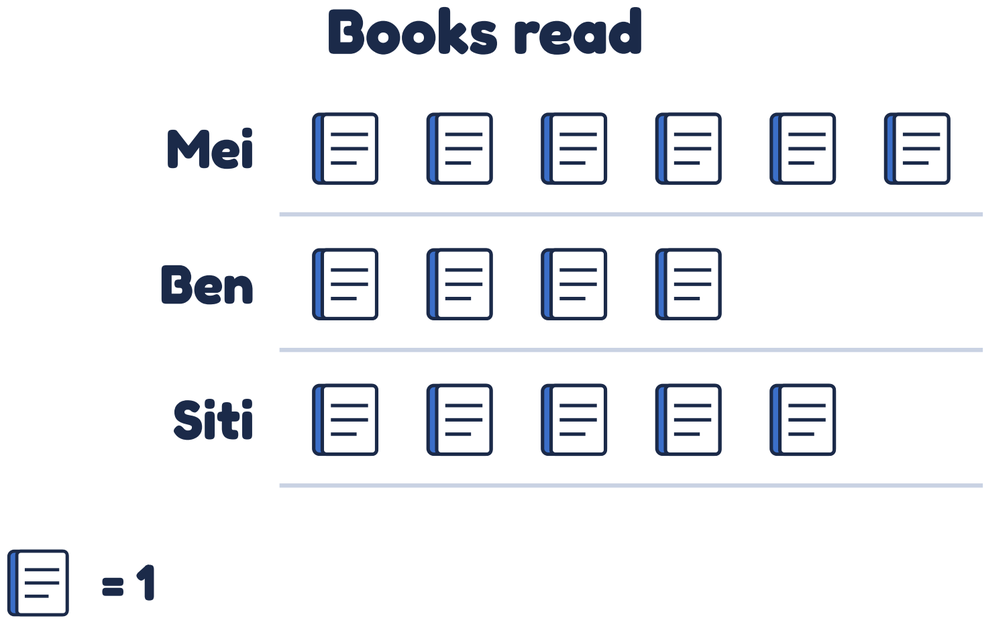

Draw a picture graph.

Read it and ask what it can tell us.

Warm-up: read a graph

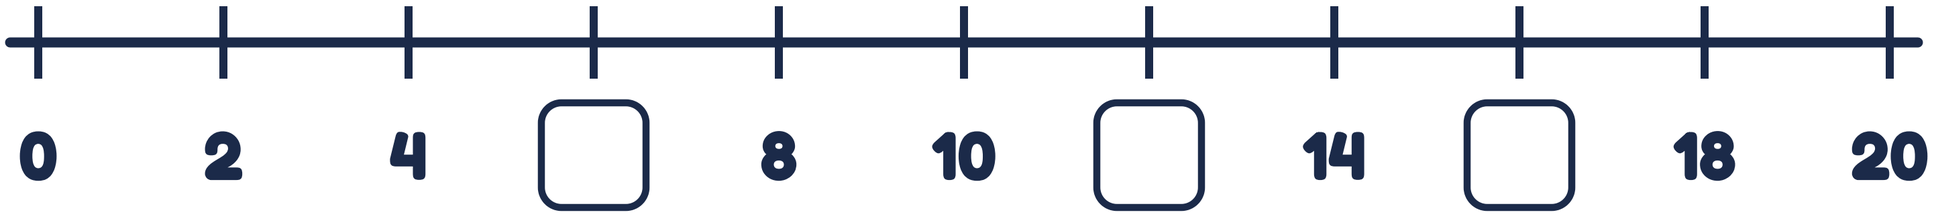

2–8 MIN

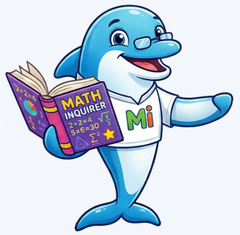

Each picture is 1 book. Who read the most books? How many more books did Mei read than Ben?

2–8 MIN

Count in 2s

Count in 2s with me. Say the missing numbers.

Take your time!

Sort the things

2–8 MIN

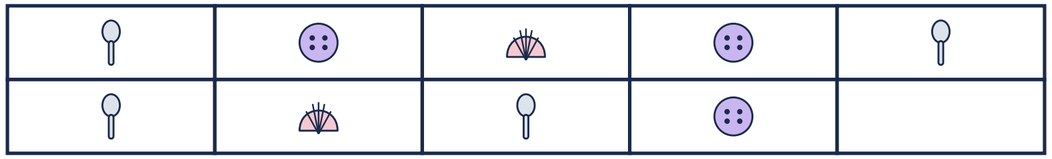

Put the same things together. Count each pile. How many socks? How many shoes?

Sneak-peek puzzles

8–12 MIN

Ideas we have not learnt yet. A guess is a great start. Nobody is marked.

PUZZLE 1: anyone can try

How many spoons are on the tray?

Write the number.

PUZZLE 2: think

Draw a picture that shows how many spoons, buttons and shells there are.

Many answers are right.

Explore: sort your things

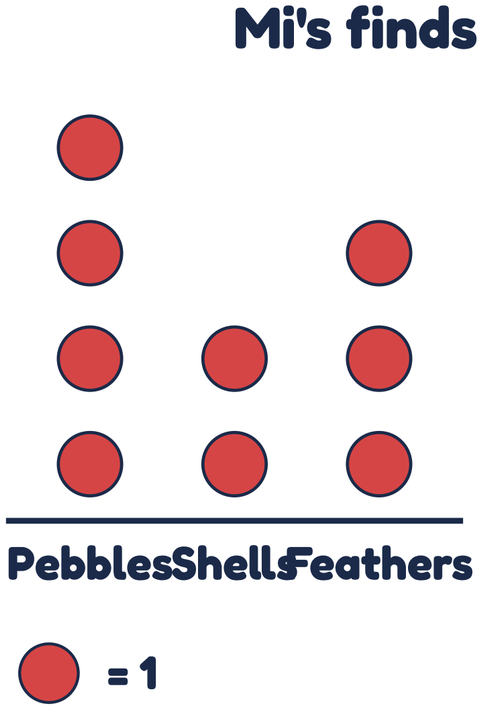

12–23 MIN

1. Take 12 small things from your pile of things.
2. Put the same kinds together. Make one pile for each kind.
3. Count each pile.

How many kinds are there? Which pile is the biggest?

Explore: draw your graph

12–23 MIN

1. Find your graph mat.
2. Draw one small picture for each thing.
3. Use one column for each kind.
4. Write the kind under the column.

Make the pictures the same size. No gaps.

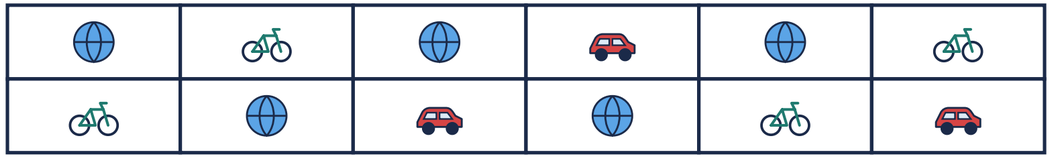

What did we notice?

12–23 MIN

- Which kind has the most things? How can you tell without counting?
- What did you do first, second and third?

Sort and tally

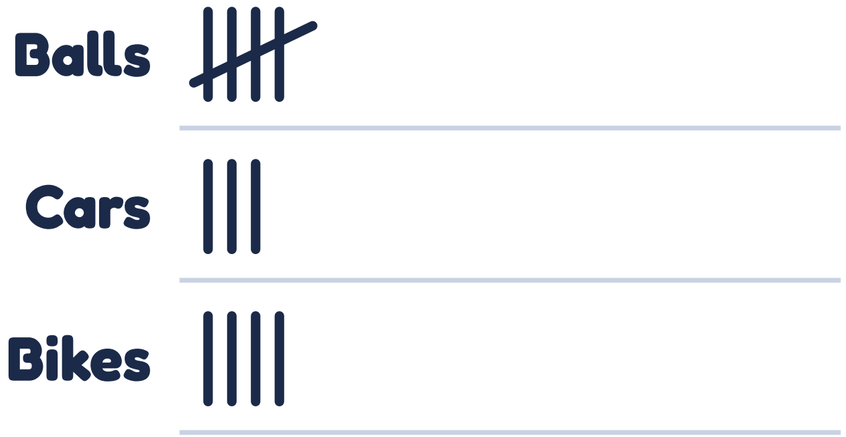

23–34 MIN

Sort the toys into kinds. Make 1 tally stroke for each toy. How many balls, cars and bikes?

The tally

23–34 MIN

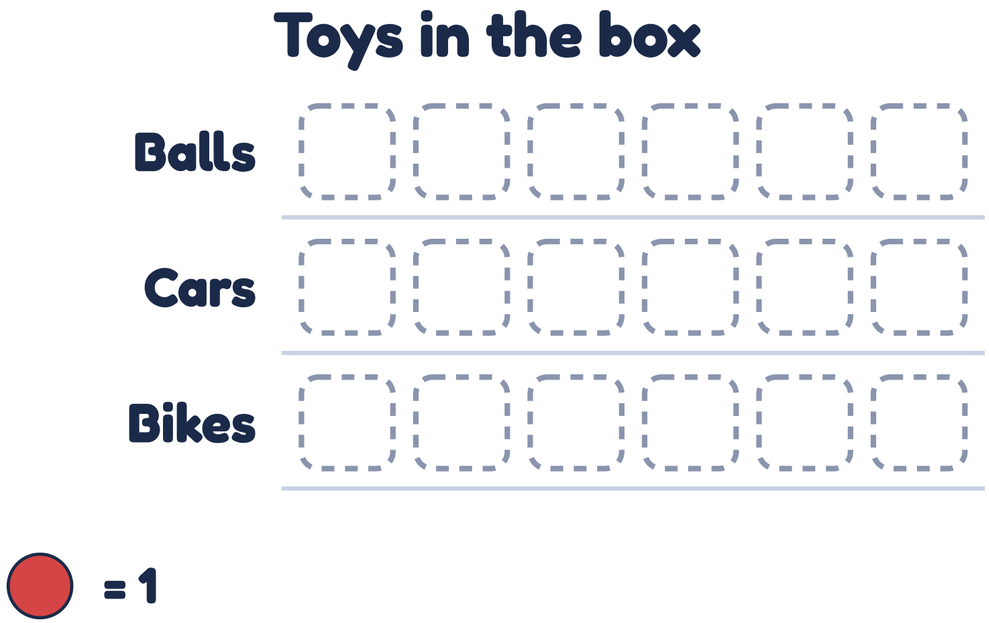

each tally = 1

5 balls, 3 cars and 4 bikes. 5 + 3 + 4 = 12 toys in all.

Draw the graph

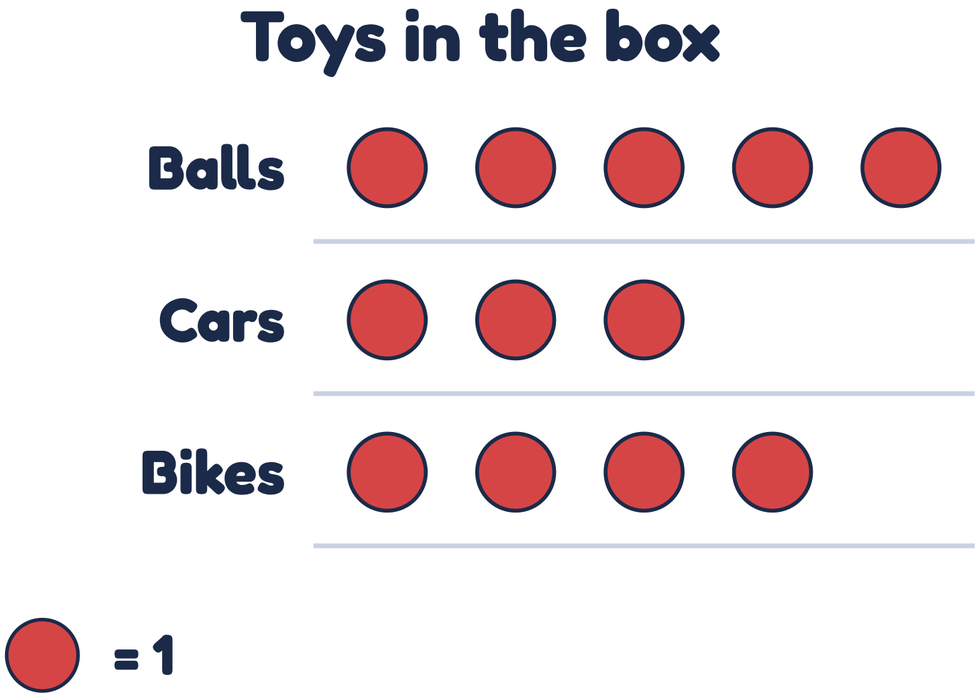

23–34 MIN

Draw 1 picture for each toy. The title says what the graph is about.

The graph

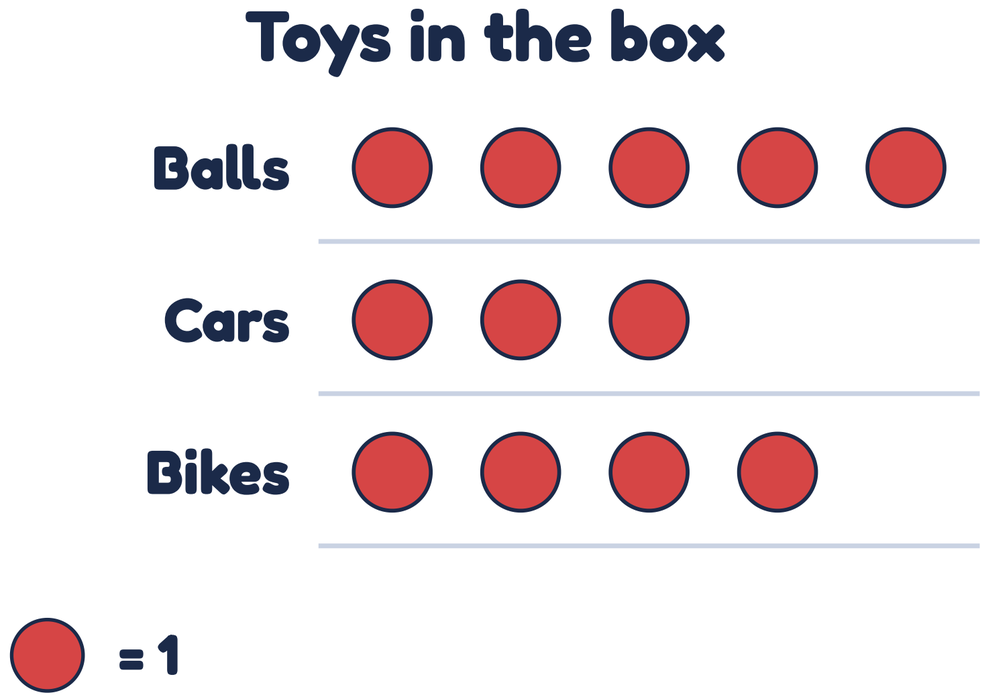

23–34 MIN

Balls 5, cars 3, bikes 4. A title, one picture for each toy, and the key.

Read the graph

23–34 MIN

How many more balls than cars? How many toys in all? Which kind has the fewest?

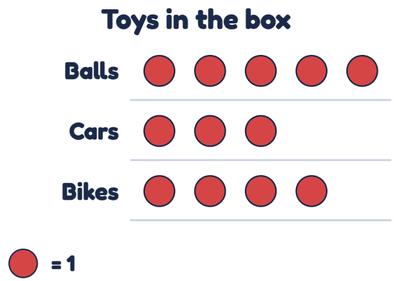

Read it: the answers

23–34 MIN

2 more balls than cars. 12 toys in all. Cars have the fewest.

Which question can it answer?

23–34 MIN

1. How many bikes are there?
2. Which toy does Siti like best?
3. How many more balls than cars are there?

Which questions can the graph answer? Think about each one.

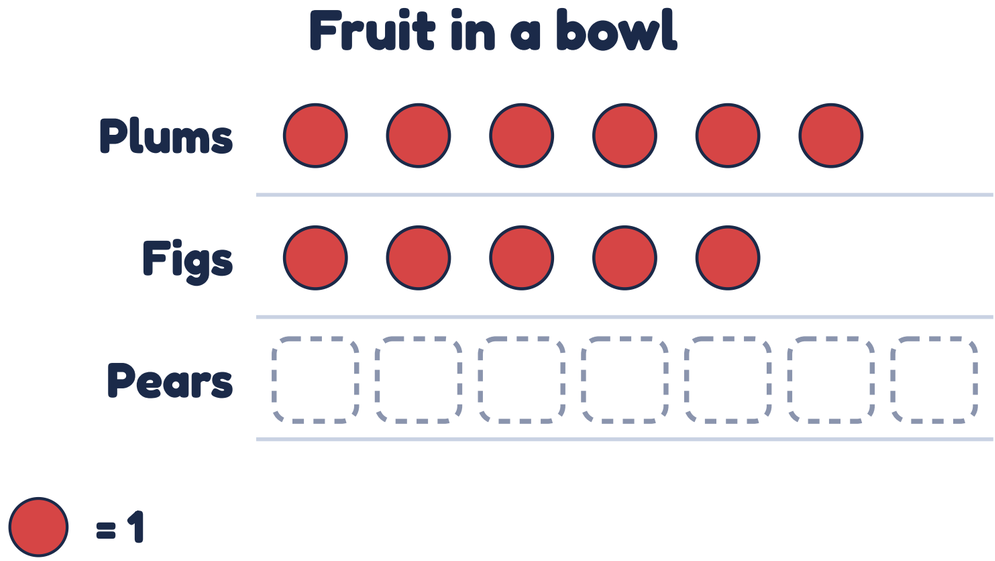

Questions the graph can answer

23–34 MIN

Questions 1 and 3. The graph shows the toys in the box. It does not say who likes which toy.

The missing row

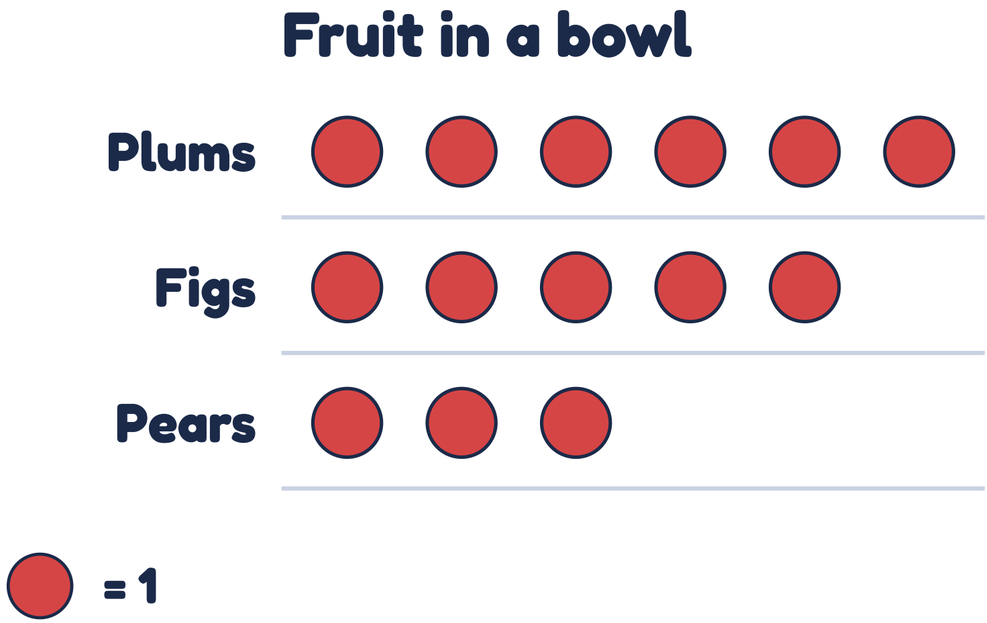

23–34 MIN

There are 14 pieces of fruit in all. How many pears? Draw them.

3 pears

23–34 MIN

6 + 5 = 11. 14 take away 11 is 3. There are 3 pears.

34–38 MIN

Sort and move break

Stand up. Sock: reach up high.

Shoe: touch your toes. Button: clap.

Sip some water.

Workbook page 1: Start here

38–70 MIN

Questions 1 to 3. Take your time.

S1 Look at the tray. Count and write how many of each kind.

S2 The tally shows how many things Ali counted.

S3 Look at the graph. Each picture stands for 1 pet.

38–70 MIN

Check page 1

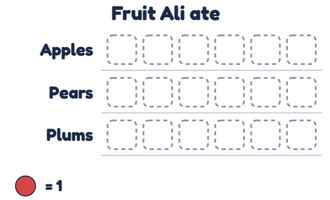

S1	4 shells; 5 buttons; 3 spoons
S2	6 pens; 8 rubbers
S3	3 more cats than fish; 17 pets in all

Workbook page 2: Start here

38–70 MIN

Questions 4 to 6. Take your time.

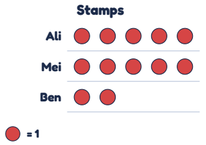

S4 Ali ate 2 apples, 5 pears and 3 plums. Draw one picture in a box for each fruit.

S5 Look at the graph. Each picture stands for 1 child.

S6 Look at the graph. Each picture stands for 1 stamp.

38–70 MIN

Check page 2

S4	Apples 2 pictures; pears 5 pictures; plums 3 pictures
S5	Chess; 13 children
S6	True, False, True, True

38–70 MIN

Choose your next page

Page	What it is
Think harder (page 3)	A tally and a table, a question the graph can answer, a missing row
Go further (page 4)	One picture is two, a graph from clues, write a question
Investigation (page 5)	Sort, draw and ask
Check	Finish and check your own work

Everyone may choose. Not finished? Pages 3 to 5 are for home too.

Talk and explain

70–76 MIN

A CHILD IN ANOTHER CLASS SAYS

I count the pets in a pet shop window.

I draw a graph of them.

Now I know which pet children like best.

Do you agree? How could we find out?

I think … because …

Back to the sneak-peek

70–76 MIN

Puzzle 1: 4 spoons. Puzzle 2: a picture with one small picture for each thing, like 4 spoons, 3 buttons and 2 shells.

Exit ticket

76–82 MIN

On your own. No looking back.

E1 **Look at the tray.**

There are ☐ rubbers.

E2 **Look at the graph. Each picture stands for 1 biscuit.**

Ali ate ☐ more biscuits than Mei.

E3 **A child counts the toys in a box and draws a graph. Which question can the graph answer? Write its number in the brackets.**

Check the exit ticket

76–82 MIN

E1	3 rubbers
E2	5 more biscuits
E3	(1)

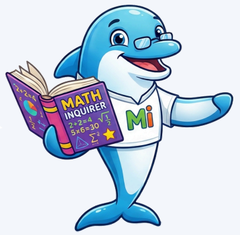

Look-back

82–85 MIN

Three minutes. There are no right answers. You can pass. Nobody reads it out.

Something I did well	write or draw one thing
The hardest part was …	☐ sorting ☐ tally marks ☐ drawing the graph ☐ something else
What helped me	☐ my small things ☐ tally marks ☐ the graph mat ☐ I was not stuck
Next time I will try	☐ sorting ☐ tally marks ☐ drawing graphs ☐ asking a question
	☐ I am still stuck (my grown-up will photograph this page for my tutor)
	☐ I would like to pass

Take your time. You can pass.

85–90 MIN

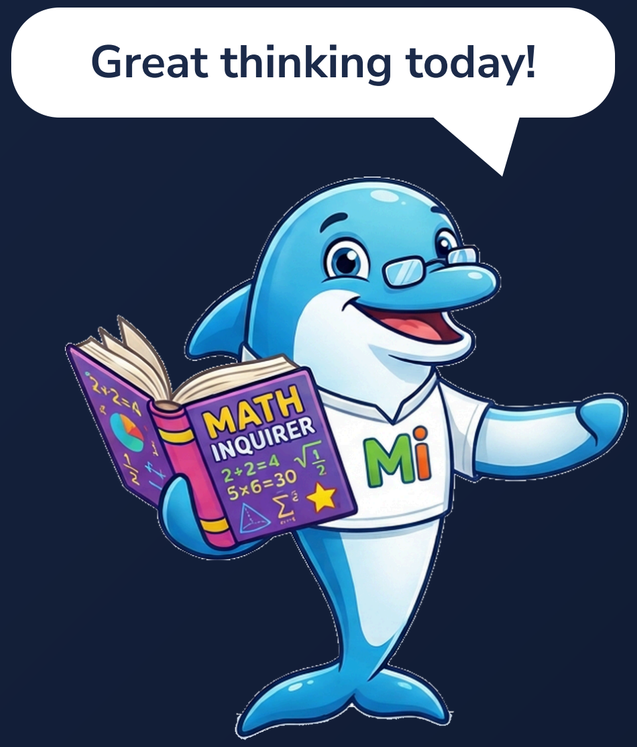

Well done, inquirers!

Show a grown-up your graph. Say what one picture stands for.

NEXT LESSON

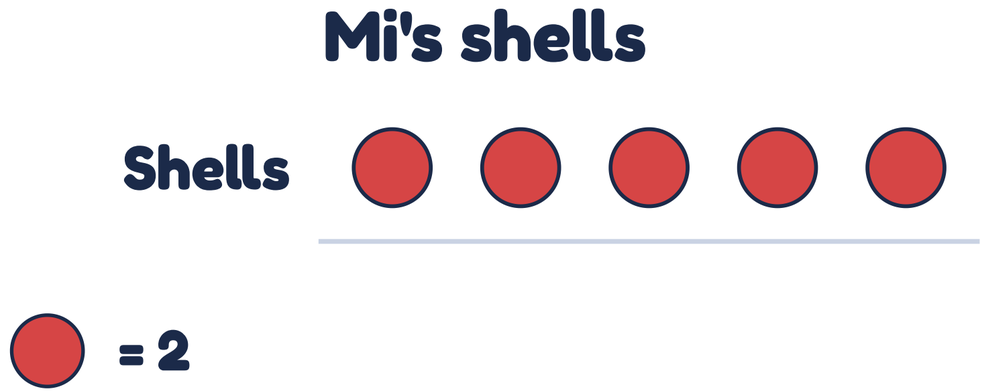

Graph Detectives

Have ready: coloured pencils (optional), a pencil and paper. Nothing to cut out.

OPTIONAL

Go further: one picture is two

Each picture stands for 2 shells. How many shells are in the row?

OPTIONAL

If we have time: pick one

Activity	What we do
Is it always true?	Sort the same 12 things two ways. Is the total the same?
Make a puzzle	Draw a graph and hide one row. Tell your grown-up the total.
Teach it back	Show a toy how to make a graph.

Optional. Everyone may join.
