MATH INQUIRERS HOLIDAY PROGRAM

Progress Notes

Short notes after each lesson

Notice it. Test it. Explain why.

A short note after each lesson on what each child tried, enjoyed and found tricky. It feeds the weekly message to parents. It is not a test and it does not rank or label anyone. Use usernames or first names only. Keep it to 30 seconds per child.

Four things worth noting

Code	What to look for	Example
A	Had a go	Tried the Start here questions, used counters, a drawing or words.
B	Explained a step	Said how they got an answer, or why a pattern works.
C	Tried something harder	Chose Think harder, Go further or the Investigation, in their own time.
D	Needs another look	Something to revisit next lesson, with a gentle way to help.

Lesson log: copy one page per lesson

Lesson number: _____ Date: _____ Tutor: _____

Child (username)	A	B	C	D	What they said or did, and something to celebrate

2.					
3.					
4.					
5.					
6.					
7.					
8.					

Programme summary: one row per child

Tick or jot one line per lesson. At the end of the programme this becomes the closing note to the family.

Child	L1	L2	L3	L4	L5	L6	L7	L8	L9	L10	Favourite moment	Next step to suggest

2.												
3.												
4.												
5.												
6.												
7.												
8.												

How to use the notes

- Write what you saw, not a score. Quote the child's own words where you can.
- Always start the weekly message with something the child did well.
- If a child tried something harder, tell the family so they can enjoy it with them, and mention the next level only if the family asks.
- If a child found a lesson tricky, say what helped and what to try at home. Do not compare children or share notes between families.
- Notes are private to the tutor and the child's own family. Do not record anything beyond learning in class.
