

LEVEL 1 • TERM 4 • LESSON 3 • FOR PARENTS

3 Copy on the Grid

WHAT WE DID

We used a grid of dots to copy figures exactly. Your child counted the steps between the dots (not the dots), said where to go as a number right and a number up, followed directions, and listed every route that goes only right or up. Counting how many different routes a counter can take on a grid (listing them, then adding at the corners) goes past the Primary 1 syllabus on purpose. Copying a figure and saying right and up are Primary 1 work.

> **Count the jumps between the dots, not the dots.**

TRY AT HOME (5 MINUTES)

1. Draw dots, 4 across and 4 down. Join some dots to make a shape. Ask your child to copy it exactly, then check by counting steps.
2. Give directions for a button: 2 right, 1 up, 1 right. Ask where it stops. Change the order. Does it stop at the same dot?
3. Ask: a row of 6 dots. How many steps from the first dot to the last? (5)

When your child is stuck

Let your child use the grid page and a button, and wait 10 seconds before helping. Asking 'Where does it start? Where does it stop?' works better than giving the answer. Please say 'count the jumps', not 'count the dots'. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- step: the jump from one dot to the next
- right and up: how we say where to go, for example 3 right, 2 up
- route: one way to get from the start to the end
- exact copy: the same shape and the same size
- left and down: the opposites of right and up

Good questions

- How many steps, not dots?
- How many right, and how many up?
- Is there another route? How do you know you have them all?

Have ready for next lesson

- Your Term 4 book (Book 7): tear out the fold-squares page along the dashed line, then a grown-up cuts out the 4 paper squares
- 12 small blocks of one size (building bricks or dice). No blocks? Tell your tutor: the lesson works with pictures
- The grid page is not needed again: keep it for puzzles at home
- A pencil, a rubber and paper

Next lesson

Next lesson: Cubes and Views. Online practice: your tutor will share the link. The recording has the tutor, the shared screen and any voice that is unmuted. Please do not share the link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to choose a way to solve a problem, and to make and test their own puzzles. We share what we see in your child's thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
