MATH INQUIRERS PLACEMENT CHECK

Ages 7-9

Builds on Primary 2 maths. Open to a year either side • About 30 minutes • No calculator

Name or username: _____ Age: _____ Date: _____

How it works. This is a friendly check, not a test. Your child answers on their own. Read a question aloud if they ask, but do not help with the maths. If they are stuck, say "Try your best, or skip it". Working on scrap paper is fine.
Not learnt it yet? Some questions may use ideas your child has not met at school. That is fine and useful to know. Tick "not learnt yet" and move on.

Warm-up

1 What is 10 more than 64?

☐ not learnt yet

2 Put these numbers in order, smallest first: 58, 85, 49.

☐ not learnt yet

3 What is 16 - 9?

☐ not learnt yet

4 What is 45 + 30?

☐ not learnt yet

Main questions

5 A pattern goes triangle, circle, circle, square, triangle, circle, circle, square, and keeps going. What is the 10th shape?

☐ not learnt yet

6 5? + 27 = 81. The ? hides one digit. Which digit is it?

☐ not learnt yet

7 A stack of cubes has 2 layers. Each layer has 3 rows with 4 cubes in each row. How many cubes are in the stack?

☐ not learnt yet

8 A film starts at 3:50 p.m. and lasts 25 minutes. What time does it end?

☐ not learnt yet

9 A pen costs $1.20. A ruler costs $0.85. How much do they cost together?

☐ not learnt yet

10 A pizza is cut into 4 equal parts. I eat 3 parts. What fraction of the pizza did I eat?

☐ not learnt yet

Brain stretchers

Optional. These are meant to be tricky, and most children will not finish them. Have a go at any that look fun.

11 These last two are tricky on purpose, so it is fine to skip them. I think of a number. I double it, then add 3, and I get 17. What was my number?

☐ not learnt yet

12 Ali, Mei, Siti and Ben each have a different pet: cat, dog, fish or rabbit. Siti has the rabbit. Ben does not have the cat or the fish. Mei does not have the cat. Who has the cat?

☐ not learnt yet

YOUR CHILD'S RESULT

Which level fits?

Mark the answers with the key (ask us for it, or use the tutor key). Add up the marks, then find your row. This is a guide. You make the final choice, and you can change level free of charge before lesson 1.

Warm-up: ____ / 4 **Main questions:** ____ / 6 **Brain stretchers (optional):** ____ / 2
Ticked "not learnt yet": ____

Main questions	What it suggests
4 to 6	Join **Ages 7-9 (Level 2)**. Your child has the foundations and will enjoy the thinking. If the stretchers also went well (1 or more), you could try the Ages 8-10 (Level 3) check as well.
2 or 3	A short chat with a tutor and the free taster lesson will show which level feels best. Ages 7-9 (Level 2) with a little support suits many children here. If the warm-up score is 2 or less, Ages 6-8 (Level 1) may be the more comfortable start.
0 or 1	We suggest **Ages 6-8 (Level 1)**. Ideas build step by step, and a confident start matters more than a fast one. If many questions were ticked "not learnt yet", that simply means the topics have not been taught yet.

Finding it easy?
Choose the level that fits the score, not the school year. Every level has open investigations for children who want more.

Found it hard?
That is useful to know, and it says nothing about how clever your child is. A level that feels comfortable builds confidence, and your child can always move up.

Skills covered

place value and ordering to 100; add and subtract within 100; missing digits; arrays and cube stacks; repeating patterns; time to 5 minutes; money (dollars and cents); fractions; reasoning and logic puzzles

Next step. Send us the scores and your preferred level when you enrol. Prices are the same at every level, and a tutor can talk it through first. Small groups of up to 8, live online.
