Math Inquirers

Extension Workbook

with answers

Level 3

Self-study | Ages 8-10

My name _____

About this book

Math Inquirers Extension Workbook, Level 3
Self-study practice with answers.

Copyright

© 2026 Preciouslyours Pte Ltd (UEN 201507566K), trading as Math Inquirers. All rights reserved. Text, questions, drawings and the Mi the dolphin character are our own work.

Licence for personal use

You may use this book for the learning of one child or one family. You may make copies of single pages for that child only, for example to redo a page.

Please do not share, post, sell, lend out in bulk, upload or copy the book (print or PDF) for other people, other families, classes, tuition centres or schools. If you would like to use it with a group, please contact us first.

This soft copy is licensed to the buyer. It is not a transfer of ownership.

Good to know

- This is a private-enrichment book. It is not an official school or examination book, and it makes no promise about any test result.
- We have checked the answers with care. If you find a mistake, please tell us so we can fix it.
- Printed copies are black and white. The soft copy has the same pages in colour.

Edition 1, 2026. First printing.

DRAFT licence text, for owner and lawyer approval. Not final.

Welcome!

This book is for you to explore at your own pace. Every unit has 7 pages. You can start on your own. A grown-up can help if you like.

How to use this book

1. **Read the Learn it page first. It shows how the idea works.**
2. **Do the Start here pages. Use a pencil. Mistakes help you learn.**
3. **Stuck? Find the hint. It is printed upside down.**
4. **Do Check yourself. Check the answers. Wrong? Read the Why.**

For the grown-up

- Practice for the same ideas as the Holiday Program (our school-holiday course), with new numbers and stories. You do not need to have joined it: every unit starts with an example.
- 3 short sessions a week, 20 to 25 minutes each, plus the weekend page **Go further** (see the pace plan).
- This is a self-study book. Your child marks their own work: each answer at the back says the answer first, then a short reason (Why) in plain words, and the page of the question. A child who reads slowly may like a helper to read the Why with them. The answers start on page 15: please ask your child to try first.
- Check yourself score 2 or less? Read the Learn it page again and redo one Start here page.
- You will need: a pencil, a rubber, a ruler and a paper corner.

The four page names

- ● **Start here.** The main path. Do these first.
- ◆ **Think harder.** Longer problems. Hints are printed upside down.
- ★ **Go further.** A weekend page. Big challenges, just for fun.
- ✓ **Check yourself.** Four quick questions at the end.

My pace plan

Numbers in the table are page numbers. One unit a week for 10 weeks. Three short sessions a week, about 20 to 25 minutes each. **Go further** is a weekend page: do it on a weekend, when there is time to think. Tick the box when the week is done.

Week	Unit	Session 1 Learn it, Start here	Session 2 Start here	Session 3 Think harder, Check yourself	Weekend page Go further	Done
1	Number sleuths (numbers to 10 000)	Not in this proof edition				☐
2	Cryptarithm crackers	Not in this proof edition				☐
3	Times table treasure	Not in this proof edition				☐
4	Model makers (bar models)	Not in this proof edition				☐
5	Remainder riddles	Not in this proof edition				☐
6	Fraction walls	Not in this proof edition				☐
7	Area architects	Not in this proof edition				☐
8	Angle and line detectives	Not in this proof edition				☐
9	Measure and money masters	Not in this proof edition				☐
10	Think it through	6-7	8-9	10 and 12	11	☐
11	Catch-up week	Repeat any Check yourself where your score was 2 or less.				☐

Tips for the grown-up

- Short and often beats one long session. Stop while your child still wants more.
- Go further has big challenges. It is fine to skip it, or to do only one question. Missed a week? Carry on.

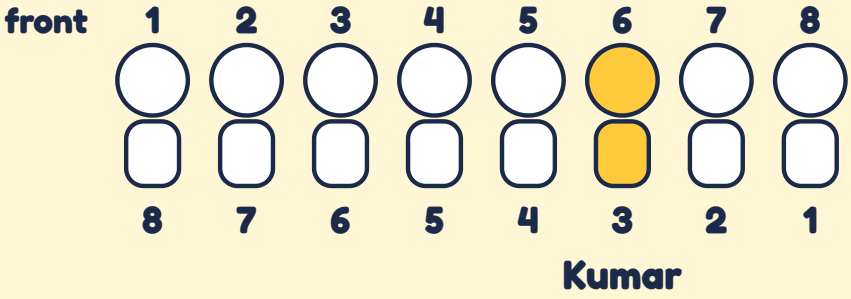

Learn it: Mixed puzzles

My goal. I can start a puzzle by drawing it, listing it or making a table. I can read a bar graph and solve logic puzzles.

To start a puzzle, try one of 3 ways. Draw it, list it, or make a table. Then check every clue.

Worked example

Kumar is 6th from the front and 3rd from the back of a line. Count the children in the whole line.

1. Draw the line. Put Kumar in 6th place from the front.
2. Kumar is 3rd from the back, so 2 children are behind him.
3. 5 children are in front of Kumar, then Kumar, then 2 behind: 5 + 1 + 2 = 8.
4. Check: 6 + 3 − 1 = 8.

Answer: There are 8 children in the line.

Three ways to start

1. Draw it: make a picture of the puzzle.
2. List it: write every case in order.
3. Table: write what you know in rows and columns.
4. Check your answer against every clue.

Your turn

Answer at the back of the book.

Try Lily is 2nd from the front and 7th from the back of a line. The line has ☐ children.

Start here

Do these first. Take your time.

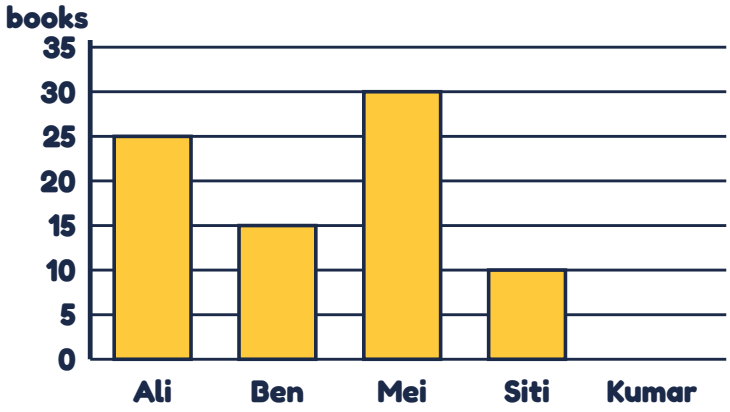

1 **The bar graph shows the books 4 children read. Kumar read 15 more books than Siti. Draw Kumar's bar on the graph.**

(a) Most books: ☐

(b) Mei read ☐ more than Ben.

(c) Kumar read ☐.

(d) In all they read ☐.

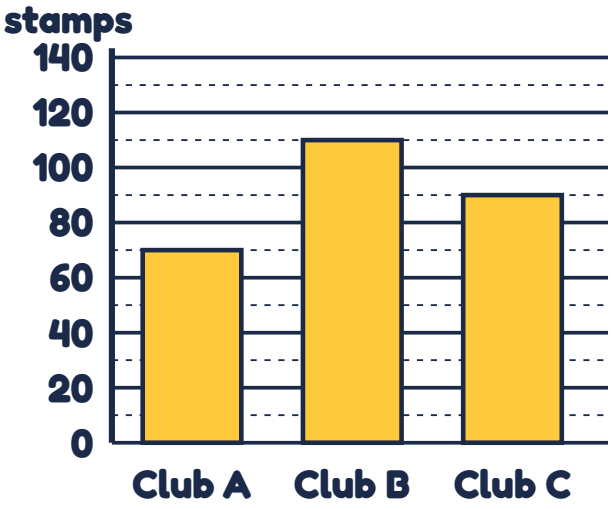

2 **The graph shows the stamps 3 clubs collected. Each thin line is 10 stamps.**

(a) Club A: ☐

(b) Club B: ☐

(c) Club C: ☐

(d) All 3: ☐

3 **The 3rd of a month is a Tuesday.**

(a) The 24th is a Mon Tue Wed Thu Fri Sat Sun

(b) The 30th is a Mon Tue Wed Thu Fri Sat Sun

Working: _____

Start here

Keep going. Check your work.

4 **Each child has a different fruit. Kumar has neither the apple nor the banana. The child with the orange has a name with 4 letters. Wei does not have the apple. Use ticks and crosses in the grid.**

	apple	banana	grapes	orange
Kumar				
Aisha				
Wei				
Lily				

(a) Kumar has the apple banana grapes orange

(b) Aisha has the apple banana grapes orange

(c) Wei has the apple banana grapes orange

(d) Lily has the apple banana grapes orange

5 **Draw it. Count the children in each line.**

(a) Ravi is 3rd from the front. Mei is last. 5 children stand between them. The line has ☐ children.

(b) Aisha is 8th from the front and 2nd from the back. The line has ☐ children.

Draw it:

6 **Make every 3-digit number from the cards 3, 6 and 9. Use each card once in a number. List them from the smallest.**

(a) Write the list below.

(b) There are ☐ even numbers in your list.

(c) The number closest to 700 is ☐.

My list: _____

Start here

Nearly there. You can do it.

7 **Hexagons are joined in a row with sticks. 1 hexagon needs 6 sticks. 2 hexagons need 11 sticks. 3 hexagons need 16 sticks. Make a table.**

(a) 6 hexagons need ☐ sticks.

(b) 41 sticks make ☐ hexagons.

hexagons	sticks

8 **Which numbers fit all the clues? The number is even and has 3 digits. It is less than 400. Its digits add up to 9, and none is 0. The tens digit is more than the ones digit.**

_____

9 **I think of a number. I multiply it by 3 and take away 4. The answer is 17. My number is ☐.**

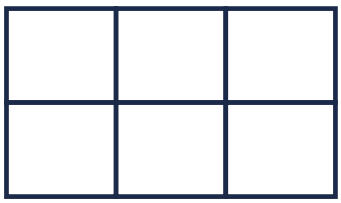

Working backwards: _____

10 **Aisha has $10. A juice costs $1.85 and a sandwich costs $3.40. She buys 2 juices and 1 sandwich. Her change is $ ☐.**

Think harder

Hints are upside down. Try first!

1 **A grid is made of 2 rows of 3 small squares. Count the rectangles of every size, squares included.** ☐

1 by 1: 1 by 2: 1 by 3: _____

2 by 1: 2 by 2: 2 by 3: _____

Hint. Count 1 by 1 first. Then 1 by 2. Make a table.

2 **One of Ben, Aisha and Wei broke a cup. They each say 1 thing: Ben "Wei did it", Aisha "Not me", Wei "Ben is lying". Exactly 1 of them tells the truth. Who broke the cup? Ben Aisha Wei**

My tests: _____

_____

_____

Hint. Pick one child. Are exactly 1 of the 3 sayings true?

3 **A shop sold 185 pencils in 4 days. Tuesday sold 15 more than Monday. Wednesday sold twice as many as Monday. Thursday sold 10 fewer than Wednesday.**

(a) Monday: ☐ (b) Tuesday: ☐ (c) Wednesday: ☐

(d) Thursday: ☐

Draw your bars:

_____

Hint. Draw Monday as 1 bar. Then draw the other days with it.

★ Go further

A weekend page. Big challenges. Hints are upside down.

1 **Count the squares of every size in a 4 by 4 grid. Begin with the small ones.**

(a) 1 by 1 squares: ☐ (b) 2 by 2 squares: ☐

(c) 3 by 3 squares: ☐ (d) All the squares: ☐

Hint. A 2 by 2 square can sit in 3 places across and 3 down.

★ Beyond Level 3: A balance puzzle

2 **9 coins look the same. One is lighter. You have a balance scale.**

(a) With 3 coins, you can always find the light coin in ☐ weighing.

(b) With 9 coins, you can always find it in ☐ weighings.

Hint. Put 3 coins on each side. What does the scale tell you?

3 **Ali has 8 coins. They are 10¢ coins and 20¢ coins, worth $1.50 in all. Find how many coins of each kind.**

(a) ☐ ten-cent coins

(b) ☐ twenty-cent coins

10¢ coins	20¢ coins	value

Hint. Try 4 of each. How much are they worth?

4 **Make up a logic puzzle with 3 friends and 3 sports. Write 3 clues. Only ONE answer may fit. Swap with a grown-up.**

My clues: _____

_____

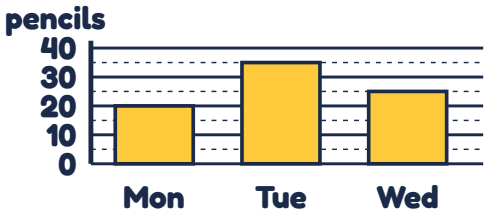

_____

Hint. Pick the answer first. Then write clues that rule out the others.

Check yourself

No hints. Try each one on your own.

1 The graph shows pencils sold. Tuesday sold ☐ more than Monday.

2 In a line, 3 children stand in front of Ben and 4 children stand behind him. The line has ☐ children.

Working: _____

3 Use the cards 2, 5 and 6 once each to make 3-digit numbers. ☐ of the numbers are odd.

Working: _____

4 Look for a pattern. 2, 6, 10, 14, … The 8th number is ☐.

Working: _____

My score: ☐ **out of 4. Check the answers at the back.**

What next?

- **4 or 3:** well done! Go on to the next unit.
- **2:** read Learn it again. Then try a Start here page once more.
- **1 or 0:** do Learn it and Start here again with a helper. Then try Check yourself again.

Look back

This unit was ☐ easy ☐ just right ☐ hard

The idea I want to remember: _____

Something I want to ask or try: _____

My progress

Tick each box when you finish. Write your Check yourself score.

Answers

Try each question first. Then check your work here.

Each answer says **Answer** first, then **Why**, and the page of the question. Got one wrong? Read the Why, then try it again. Stuck on the Why? Ask someone to read it with you.

Cover this part of the book with a folded sheet of paper while you work, so you do not see the answers by mistake.

Unit 10 · Think it through

Your turn
page 6

Answer: 8
Why: 1 child is in front of Lily and 6 are behind her. 1 + 1 + 6 = 8. Check: 2 + 7 - 1 = 8.

START HERE

1
page 7

Answer: (a) Mei (b) 15 (c) 25 (d) 105
Why: (a) The tallest bar is Mei's. (b) 30 - 15 = 15. (c) Siti read 10 books, so Kumar read 10 + 15 = 25. (d) 25 + 15 + 30 + 10 + 25 = 105.

2
page 7

Answer: (a) 70 (b) 110 (c) 90 (d) 270
Why: The labelled lines go up in 20s and a thin line is halfway between, so each thin line is 10. A is 70, B is 110, C is 90. Together: 70 + 110 + 90 = 270.

3
page 7

Answer: (a) Tue (b) Mon
Why: (a) 3rd to 24th is 21 days = 3 weeks. So the 24th is a Tuesday again. (b) 3rd to 30th is 27 days = 3 weeks and 6 days. 6 days after Tuesday is Monday.

4
page 8

Answer: (a) grapes (b) apple (c) banana (d) orange
Why: Only Lily has a 4-letter name: orange. Kumar has neither apple nor banana: grapes. Wei does not have the apple: banana. Aisha has the apple.

5
page 8

Answer: (a) 9 (b) 9
Why: (a) Ravi is 3rd. The 5 children between are 4th to 8th. Mei is 9th and last. (b) 7 children are in front of Aisha and 1 is behind her: 7 + 1 + 1 = 9.

6
page 8

Answer: (a) 369, 396, 639, 693, 936, 963 (b) 2 (c) 693
Why: Fix the first digit and list the rest in order: 369, 396, then 639, 693, then 936, 963. The even numbers end in 6: 396 and 936. 693 is only 7 from 700; the others are much farther.

7
page 9

Answer: (a) 31 (b) 8
Why: Each new hexagon adds 5 sticks: 1: 6, 2: 11, 3: 16, 4: 21, 5: 26, 6: 31. For 41 sticks, count on: 7 hexagons need 36 and 8 hexagons need 41.

8
page 9

Answer: 162, 252 and 342
Why: The hundreds digit is 1, 2 or 3. The ones digit is 2, 4 or 6 and the tens digit is greater. With 1: tens + ones = 8, so 6 and 2. With 2: 7, so 5 and 2. With 3: 6, so 4 and 2. The numbers are 162, 252 and 342.

9
page 9

Answer: 7
Why: Work backwards. Add 4 to 17: 21. Divide by 3: 7.

10
page 9

Answer: 2.90
Why: 2 juices cost 2 × 1.85 = 3.70. With the sandwich: 3.70 + 3.40 = 7.10. Change: 10.00 - 7.10 = 2.90.

THINK HARDER

1
page 10

Answer: 18
Why: 1 by 1: 6. 1 by 2 (2 wide, 1 tall): 2 in each row, so 4. 1 by 3: 2. 2 by 1 (1 wide, 2 tall): 3. 2 by 2: 2. 2 by 3: 1. In all: 6 + 4 + 2 + 3 + 2 + 1 = 18.

2
page 10

Answer: Aisha
Why: If Ben did it, Aisha and Wei both tell the truth: 2 truths. If Wei did it, Ben and Aisha both tell the truth: 2 truths. If Aisha did it, only Wei tells the truth: exactly 1. So Aisha did it.

3
page 10

Answer: (a) 30 (b) 45 (c) 60 (d) 50
Why: Monday is 1 box, Tuesday 1 box and 15, Wednesday 2 boxes, Thursday 2 boxes take away 10. Total: 6 boxes + 5 = 185, so 1 box = 30. Monday 30, Tuesday 45, Wednesday 60, Thursday 50.

GO FURTHER

1
page 11

Answer: (a) 16 (b) 9 (c) 4 (d) 30
Why: There are 16 small squares. A 2 by 2 square fits in 3 places across and 3 down: 9. A 3 by 3 square fits 2 across and 2 down: 4. There is 1 big square. 16 + 9 + 4 + 1 = 30.

2
page 11

Answer: (a) 1 (b) 2
Why: (a) Put 1 coin on each side. If the scale tips, the light coin is on the high side. If it balances, it is the coin left out: 1 weighing. (b) Weigh 3 coins against 3 coins to find the group of 3 with the light coin. Then use (a): 2 weighings.

3
page 11

Answer: (a) 1 (b) 7
Why: If all 8 coins were 10¢, they would be worth 80¢. They are worth 150¢, 70¢ more. Changing one 10¢ coin to a 20¢ coin adds 10¢, so 7 coins are 20¢ and 1 coin is 10¢.

4
page 11

Answer: Answers vary. Example: Lily, Wei and Kumar each play a different game: chess, ball or cards. Lily does not play ball. Wei plays neither chess nor cards. Kumar does not play chess. Answer: Lily plays chess, Wei plays ball, Kumar plays cards.
Why: In the example, Wei plays ball (clue 2), then Kumar cannot play chess (clue 3), so Kumar plays cards and Lily plays chess.

CHECK YOURSELF

1
page 12

Answer: 15
Why: Monday is at 20 and Tuesday is at 35. 35 - 20 = 15.

2
page 12

Answer: 8
Why: 3 + 1 + 4 = 8. Do not forget Ben.

3
page 12

Answer: 2
Why: The numbers are 256, 265, 526, 562, 625 and 652. The odd ones end in 5: 265 and 625.

4 page 12

Answer: 30
Why: The numbers go up by 4. The 8th number is 2 + 7 × 4 = 30.
