

LEVEL 1 • TERM 4 • LESSON 7 • FOR PARENTS

7 Make Your Own Graph

WHAT WE DID

We sorted small things from around the house into kinds, counted each kind with tally marks, and drew a picture graph with a title, one picture for each thing and a key. Then we read the graph: how many, how many more, how many in all, and which kind has the fewest. A key where each picture stands for 2 goes past the Primary 1 syllabus on purpose.

> **Ask, sort, then picture the answer.**

TRY AT HOME (5 MINUTES)

1. Find 12 things at home. Sort them into 3 kinds. Draw a picture graph with a title.
2. Ask: which kind has the most? How many more is that than the fewest?
3. Make tally marks for the cups, plates or chairs in your home.

When your child is stuck

Let your child use the real things and wait 10 seconds before helping. Please do not draw the graph for your child: ask 'How many in this pile?' instead. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- kind: a group of things that are alike, such as spoons or socks
- tally: one stroke for each thing; the fifth stroke goes across the other four
- picture graph: one small picture for each thing, with a row for each kind
- key: a note that says what one picture stands for

Good questions

- What question does your graph answer?
- How can you tell which kind has the most without counting?
- What does one picture stand for?

Have ready for next lesson

- Nothing to cut out. Your Term 4 book (Book 8) has the next workbook pages
- Coloured pencils if you like, a pencil, a rubber and paper

Next lesson

Next lesson: Graph Detectives. Online practice: your tutor will share the link. The recording has the tutor, the shared screen and any voice that is unmuted. Please do not share the link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.
