TUTOR KEY • LEVEL 1 • TERM 2 • END-OF-TERM CHECK

Term 2 end-of-term check

8 questions, one from each lesson of the term, all at Start here level, plus one optional Think harder item. 20 minutes on private paper. No ranking, no score shown to the group, progress words only. For the tutor: do not hand this key to families.

Where it sits. Lesson 20 (the last lesson of the term), minutes 37 to 57, the part End-of-term check, straight after the brain break; or at the make-up slot. Plan, section 5, and the owner decisions of 22 Oct 2026: the check takes 20 minutes, is privately returned, shows no ranking and no score to the group, and gives a parent report line per term. It has 8 short questions and one optional Think harder item so that it fits 20 minutes by real timing: Lessons 13 and 14 share question 3 and Lessons 15 and 16 share question 4, so every lesson of the term is still checked. All items are Start here level, and the optional item is contest-style and never scored. Question 7 asks the child to check a friend's number by putting it back, which is the claim-testing the term line talks about. A middle child needs about 17 minutes of reading aloud and quiet work; a slower child may use a few minutes of the workbook time to finish. The check sits straight after the brain break (not at the end of the lesson as in Term 1) so children are fresh. The student sheet has no pictures except the ten-frames in question 3, because the sheet generator draws only a few figure types.

1. The questions at a glance

Q	Lesson	Strand (tutor label)	What it checks (Start here level)	Answer
1	L11	Whole Numbers; Addition and Subtraction	A place in a line (1st, 2nd, 3rd) and how many are in front	**5th; 3**
2	L12	Whole Numbers; Addition and Subtraction	A strip for more: the other person and the total	**35; 61**
3	L13	Whole Numbers; Addition and Subtraction	A double from ten-frames (Lesson 13) and odd or even (Lesson 14)	**18; odd**
4	L15	Multiplication and Division; Money	Groups of the same size and the times sign (Lesson 15), counting in 2s (Lesson 16)	**3 × 5 = 15; 8**
5	L17	Multiplication and Division; Money	Share equally and put into groups (Lesson 17)	**4; 5**
6	L18	Multiplication and Division; Money	A times story with a second step (Lesson 18)	**20; 17**
7	L19	Whole Numbers; Addition and Subtraction	A hidden number in a picture equation, and checking a friend's number (Lesson 19)	**No; 9**
8	L20	Multiplication and Division; Money	Find one first, then many (Lesson 20)	**$3; $12**
Think harder	L11	Whole Numbers; Addition and Subtraction	Queue counting: 8th from the front and from the back, and checking a claim (optional, never scored)	**No; 15 children (7 in front of Ravi, Ravi, and 7 behind him)**

The strand labels are for the tutor only and must not appear on any child or parent page. Each question is a fresh example of the Start here idea of its lesson (numbers chosen so that they do not repeat a lesson page), so a child who understood the lesson can answer it. Before first use, a tutor should read each question against what the lesson actually taught.

2. Giving it: before and during

1. A week before: send the grown-up note (L20_Check_Parent_Note.pdf) and the check sheet (L20_Check_Student.pdf, 3 pages) with the lesson materials. Families print the sheet at 100%, fold it or put it in an envelope, and keep it closed. A family with no printer tells you: arrange another way (for example the make-up slot).
2. Tell the group in the opening and at s-check1: the check is on your own paper, takes about 20 minutes, is not a race, may be skipped in part, and nothing is shown to the group.

3. Start at minute 37 and finish by minute 57. Children open the sheet only when you say. The paper lies flat on the table and is never held up. A grown-up sits nearby and may read a question again, but gives no help with answers. Cameras may be on or off.
4. Read each page aloud, one question at a time (the script has the words). Then leave quiet work time: about 3 minutes for page 1, 3.5 for page 2 and 4 for page 3. Say nothing about right or wrong, and read no answers. A middle child needs about 17 minutes in all; a slower child may finish in the first minutes of the workbook.
5. Allowed: fingers and counters. Not allowed: a calculator, a grown-up giving answers, looking at the workbook. A child who finishes early turns the sheet over and draws quietly.
6. After page 2, take a one-minute stretch (stand, shake out, sip water). After page 3, say Pencils down (slide s-check2). Do not collect or look at any sheet.

3. Returning it privately: after the lesson

1. Same day: the grown-up takes ONE clear photo of each of the 3 pages (page flat, taken straight from above, the whole page in view, and the name on each page) and sends them to the program's business WhatsApp, +65 9880 5962, and to no other number. Never to a child, never to a personal phone, never into the class chat.
2. Within 3 days: the tutor marks from the photos with the key below, opening them only on the program's business WhatsApp (never on a personal phone), and records the result on the tutor record sheet (tutor only). Nothing is written on the child's paper and no mark or score goes back to the child or the group. Accept 5 or 5th for question 1 part a, and either order of 3 and 5 in question 4.
3. The tutor chooses a progress word for each of the two areas from the bands below and writes the parent note from the templates: the term line, two area lines, one named strength and one next step. Sent only to the parent. No marks, no x out of 8, no ranking, no comparison with other children, no prediction.
4. Once the note is sent, save the photos to the program's private file store and delete them from the business WhatsApp chat. The program keeps the photos for 90 days after the program ends, then deletes them, as the privacy notice says. Delete the record sheet when the note is sent (keep only the note in the family file). Never forward the photos or save them to a personal phone or any other device.
5. At the start of next term say to the whole group: thank you for taking the check; there is nothing to share and nothing to fear. Never name a child or an answer.

Privacy checklist

- Sheets are never held up to the camera and never read out.
- No answer is said aloud during or after the check.
- The tutor never marks in front of the group and never says who finished first or last.
- Photos come to the program's business WhatsApp (+65 9880 5962) only; tutors never use a personal phone; photos are kept 90 days after the program ends, then deleted; the note goes to the parent only; no private message to any child.
- No score, no x out of 8, no ranking, no tally, no comparison between children.
- The recording captures the tutor, the shared screen and any voice that is not muted; pause it during silent work if the platform allows. The WhatsApp number is never on a slide.

Absent, late joiners, families who prefer not to, upset children

- A child who was away or whose family prefers another time: take the check at the make-up slot (a small group, a parent beside the child on camera). The tutor never sits alone with one child on a private call.
- A child who joined late: the family may choose to leave out questions for lessons the child did not attend. Mark those questions not taught; they are left out of the strand score, and a strand with no question taught gets no line.
- A family that does not want the check: no problem. The child does the Lesson 20 work as usual and the report line uses the tutor's own notes only.
- A child who is upset or stuck: remind the group (open session) that every question can be skipped. Do not single the child out. The grown-up may stop the check at any time.
- A family with no printer: tell the family to say so a week before and arrange another way (for example the make-up slot with the sheet sent to the family another way). Never ask a child about it in front of the group.

4. Answer key and marking

Mark each question R (right), P (partly right), N (not yet) or T (not taught: the child did not attend that lesson). Mark on the tutor record sheet only, never on the child's paper. A child may write steps in any clear layout. Do not mark neatness or spelling.

Q1 (L11) Siti is 4th in a line. Ben stands right behind Siti.
Answer: 5th; 3
(a) Ben is __ in the line. = 5th; (b) There are [ ] children in front of Siti. = 3
R: Both correct (5th or 5 is right for part a). **P:** One of the two correct.
Worked: Right behind the 4th child is the 5th. In front of Siti are the 1st, 2nd and 3rd children: 3 children.
Watch for: (a) 3rd or 4th.; (b) 4 (counting Siti herself).

Q2 (L12) Ravi has 26 marbles. Lily has 9 more marbles than Ravi.
Answer: 35; 61
(a) Lily has __ marbles. = 35; (b) They have __ marbles altogether. = 61
R: Both correct. **P:** Part a right and part b wrong, or part b right from a wrong part a (counts as one).
Worked: Lily has 9 more than Ravi, so add: 26 + 9 = 35. Altogether: 26 + 35 = 61.
Watch for: (a) 17 (taking away).; (b) 35 (stopping after part a) or 35 + 9.

Q3 (L13) Look at the ten-frames.
Answer: 18; odd
(a) 9 + 9 = __ = 18; (b) Write odd or even. 15 is __. = odd
R: Both correct. **P:** One of the two correct.
Worked: 9 + 9 = 18 (one ten-frame is filled with 9, and so is the other: 10 + 8). 15 pairs up with 1 left over, so 15 is odd.
Watch for: (a) 17 or 19 (a counting slip).; (b) even (the last digit 5 is not read).

Q4 (L15) Jenny has 3 jars. Each jar has 5 sweets.
Answer: 3 × 5 = 15; 8
(a) Fill in the boxes. [ ] × [ ] = [ ][ ] = 3 × 5 = 15 (or 5 × 3); (b) Count in 2s: 2, 4, 6, __, 10 = 8
R: Both correct (3 and 5 in either order, and 15). **P:** One of the two correct, or the product right with the factors swapped or missing.
Worked: 3 groups of 5: 5 + 5 + 5 = 15, so 3 × 5 = 15 (5 × 3 = 15 is also right). Counting in 2s: 2, 4, 6, 8, 10.
Watch for: (a) 3 + 5 = 8.; (b) 7 (counting on by 1).

Q5 (L17) Siti shares 16 stickers equally among 4 friends. Kumar puts 10 pens into boxes, 2 pens in each box.
Answer: 4; 5
(a) Each of Siti's friends gets [ ] stickers. = 4; (b) Kumar needs [ ] boxes. = 5
R: Both correct. **P:** One of the two correct.
Worked: 16 shared equally among 4 friends is 4 each. 10 pens in groups of 2 make 5 boxes (2, 4, 6, 8, 10).
Watch for: (a) 12 (16 - 4) or 20.; (b) 8 (10 - 2) or 2 (the pens in each box).

Q6 (L18) Mei has 4 bags. Each bag has 5 sweets. She gives 3 sweets to Ben.
Answer: 20; 17
(a) The bags have __ sweets. = 20; (b) Mei has __ sweets left. = 17
R: Both correct. **P:** Part a right and part b wrong (for example 23), or part b right from a wrong part a.
Worked: 4 groups of 5 is 20 sweets. She gives 3 away: 20 - 3 = 17.
Watch for: (a) 9 (adding 4 and 5).; (b) 23 (adding 3) or 3.

Q7 (L19) Each shape is a number. The heart + the heart = 18. Ben says the heart is 8.
Answer: No; 9
(a) Is Ben correct? Circle Yes or No. [yesno] = No; (b) The heart is __. = 9
R: No and 9. **P:** One of the two correct.
Worked: 8 + 8 = 16, not 18, so Ben is not correct. 9 + 9 = 18, so the heart is 9.
Watch for: (a) Yes (not checking by adding 8 + 8).; (b) 18 (the total).

Q8 (L20) 6 buns cost $18.

Answer: $3; $12

(a) 1 bun costs $__. = 3; (b) 4 buns cost $__. = 12

R: Both correct. **P:** Part a right and part b wrong, or part b right from a wrong part a.

Worked: $18 shared equally among 6 buns is $3 each. 4 buns cost 4 groups of $3, which is $12.

Watch for: (a) 24 (adding) or 108.; (b) 18 (the total) or 7 (3 + 4).

Optional Think harder item (L11) Ravi is 8th from the front and 8th from the back of a line. Mei says there are 16 children in the line.

Answer: No; 15 children (7 in front of Ravi, Ravi, and 7 behind him)

(a) Is Mei correct? Circle Yes or No. [yesno] = No; (b) There are __ children in the line. = 15

R: The answer is right. **P:** -

Worked: There are 7 children in front of Ravi and 7 behind him, and Ravi himself: 7 + 7 + 1 = 15. 8 + 8 = 16 counts Ravi twice.

Watch for: 16 (counting Ravi twice).; 14 (leaving Ravi out).

5. Tutor record sheet (tutor only; one per child; delete after the note is sent)

Child (first name only): ..... Date taken: .....

Q1 L11	Q2 L12	Q3 L13	Q4 L15	Q5 L17	Q6 L18	Q7 L19	Q8 L20	Think harder

Write R, P, N or T in each box. R = 1 point, P = 0.5, N = 0, T = left out. Then work out each strand score and choose a word from the table.

Strand (parent name)	Questions	Points / counted	Word
Numbers, adding and taking away	Q1, Q2, Q3, Q7		☐ Showing this often ☐ Getting there ☐ Just beginning
Groups, sharing and stories about groups	Q4, Q5, Q6, Q8		☐ Showing this often ☐ Getting there ☐ Just beginning

Progress words: how a score becomes a word

Each question counts 1 if right, 0.5 if partly right, 0 if not yet, and is left out if not taught. Strand score = points / questions counted. The word depends only on the child's own answers, never on other children.

Questions counted in the strand	Showing this often	Getting there	Just beginning
4	3 to 4 points	1.5 to 2.5 points	0 to 1 point
3	2.5 to 3 points	1.5 to 2 points	0 to 1 point
2	1.5 to 2 points	1 point	0 to 0.5 point
1	1 point (right)	0.5 point (partly right)	0 points (not yet)

If no question in a strand was taught to the child, write no line for that strand. Strand lines say what the child did and what helps next, never a grade. The optional Think harder question is never scored; add the optional line if the child tried it (right or not), and leave it out if the child skipped it.

6. Parent report line templates (copy into the note to the parent)

Term 2 progress note for [Name]
Your child is learning to draw a story, to use groups and sharing, and to test a claim with an example.

Area (parent wording)	Showing this often	Getting there	Just beginning
Numbers, adding and taking away Lessons 11 to 19. We looked at places in a line (1st, 2nd, 3rd), strips for more and fewer, doubles, odd and even numbers, and finding a hidden number in a picture equation.	[Name] is showing this often: finding a place in a line, using a strip to find the other number and the total, doubling, telling odd from even and checking a friend's number in a picture equation.	[Name] is getting there with places in a line, strips for more and fewer, doubles, odd and even numbers and shape puzzles. Real things in a line, and putting a number back into a sum to check it, will help.	[Name] is just beginning with places in a line, strips for more and fewer, and hidden numbers. Lining up toys and saying 1st, 2nd, 3rd, and drawing two strips for more and fewer stories, are good next steps.
Groups, sharing and stories about groups Lessons 15 to 20. We looked at groups of the same size and the times sign, counting in 2s and 5s, sharing equally and putting into groups, stories about groups with a second step, and finding the cost of one first.	[Name] is showing this often: writing groups of the same size with the times sign, counting in jumps, sharing equally, solving a story about groups with a second step and finding the cost of one first.	[Name] is getting there with groups of the same size, counting in jumps, sharing, stories about groups and finding the cost of one first. Counters, cups and a strip of equal parts will help.	[Name] is just beginning with groups of the same size, sharing and stories about groups. Sharing real counters onto plates, and counting groups of the same size, are good next steps.

Then add (from your own notes):
One thing [Name] did well this term: [the tutor adds one named strength from their own notes, for example: drew a strip to find how many more marbles one child had].
One next step: [the tutor adds one next step, for example: share real counters onto plates to find how many in each].
[Name] also tried the optional Think harder question. (Add this line if the child tried it, whether or not the answer was right; leave it out if the child skipped it.)
This note is about [Name]'s own learning this term. It is not a mark and it does not compare children.

A filled example (fictional child, Mei)

Term 2 progress note for Mei
Your child is learning to draw a story, to use groups and sharing, and to test a claim with an example.
Numbers, adding and taking away: Showing this often. Mei is showing this often: finding a place in a line, using a strip to find the other number and the total, doubling, telling odd from even and checking a friend's number in a picture equation.
Groups, sharing and stories about groups: Getting there. Mei is getting there with groups of the same size, counting in jumps, sharing, stories about groups and finding the cost of one first. Counters, cups and a strip of equal parts will help.
One thing Mei did well this term: she drew a strip to find how many more marbles one child had.
One next step: share real counters onto plates to find how many in each.
This note is about Mei's own learning this term. It is not a mark and it does not compare children.

Words to avoid in the note: score, mark, out of, rank, top, below average, behind, ahead of, pass, fail, predicted, ready for. No claim about exams, GEP or any contest. No mention of other children. The note goes to the parent only.
