Make-a-Ten Adding: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use counters or draw a ten-frame. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next.

No.1

Start here

Use counters or a ten-frame. 9 + 5 = 10 + ____. So 9 + 5 = ____.

No.2

Start here

Add by making a ten first: 37 + 6 = ____.

No.3

Start here

How many more make the next ten? (a) 8 + ____ = 10 (b) 45 + ____ = 50 (c) 67 + ____ = 70

No.4

Think harder

Add 5 + 7 + 5 + 3. Find the pairs that make a ten first. What is the total?

No.5

Go further

At home: write three sums that need a make-a-ten, like 8 + 5. Ask a grown-up to solve them. Then your grown-up writes three for you. Say which number you filled up each time.

Answers for grown-ups

Please let your child try first, then check together. Ask *how do you know?* If your child is stuck, wait 10 seconds, then suggest drawing it.

1. 4, so 9 + 5 = 14
Move 1 counter from the 5 to the 9. That makes 10, and 4 are left. 10 + 4 = 14.

2. 43
37 needs 3 more to make 40. 6 is 3 and 3. 40 + 3 = 43.

3. 2, 5, 3
Look at the ones digit. 8 needs 2, 5 needs 5, 7 needs 3.

4. 20 (5 + 5 = 10, 7 + 3 = 10)
5 + 5 = 10 and 7 + 3 = 10. 10 + 10 = 20.

5. Any: for example 8 + 5 = 13 (fill the 8 with 2 from the 5: 10 and 3). A grown-up can check with counters.
The number that is nearest to ten is the one to fill. Move the missing amount from the other number, then add what is left.
