LESSON 5 • TERM 1 • LEVEL 1

Make-a-Ten Adding

Addition: make tens first

TODAY WE WILL

Make a ten first, then add what is left.

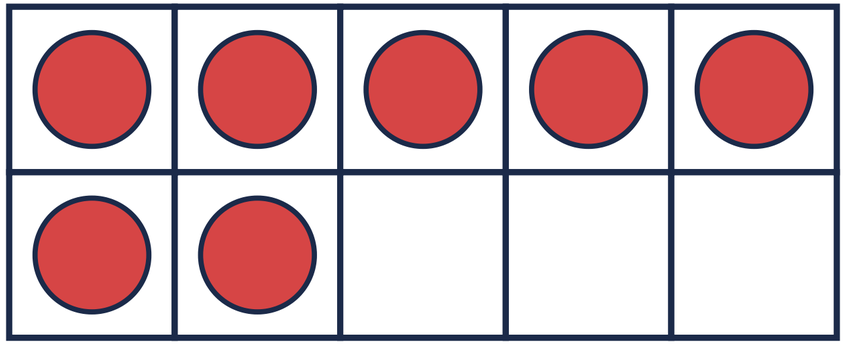

Hi, I'm Mi. Let's notice, test and explain why!

2–8 MIN

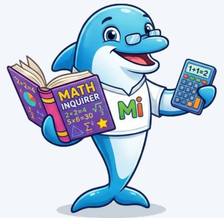

Warm-up: fill the ten-frame

Show it on your fingers

7 counters. How many more fill the frame to make 10?

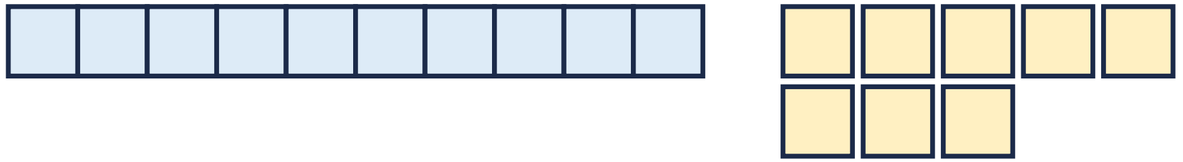

7 4 **9** 5 **2**

Fingers ready? Let's go!

How far to the next ten?

2–8 MIN

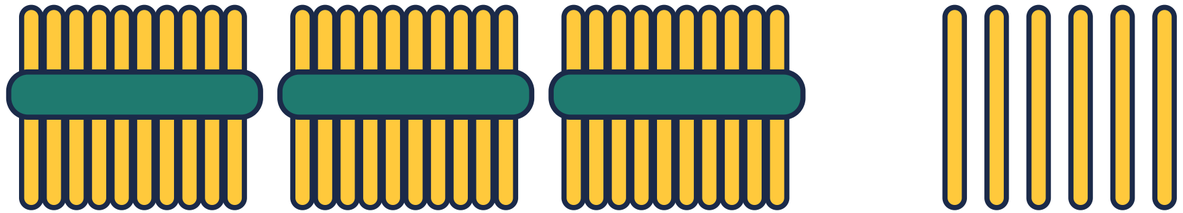

18 is one ten and 8 ones

18 needs ___ more to make 20.

18 14 **26** 39

Tens and ones together

2–8 MIN

30 and 6 more is 36

30 + 6 | 40 + 2 | **50 + 9**

Say the tens first, then the ones.

Sneak-peek puzzles

8–12 MIN

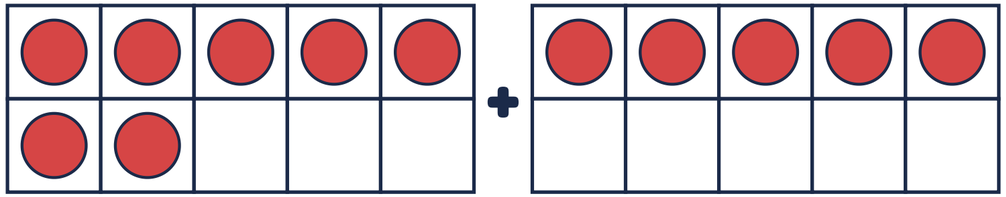

Ideas we have not learnt yet. A guess is a great start. Nobody is marked.

PUZZLE 1: anyone can try

Count all the counters.

Write how many.

You may draw rings round groups.

PUZZLE 2: think

Ben has 9 red counters and 5 blue counters.

He moves 1 blue counter over to the red ones.

Now he has 10 red and 4 blue.

Is the total the same as before? Write yes or no, and why.

Explore: fill the ten-frame

12–28 MIN

1. Draw a ten-frame on paper: two rows of five boxes. Or lay a tens bar from your kit.
2. Put 8 small things on it.
3. Put 6 other things beside it.
4. Move some across to fill the frame. How many did you move?

WHAT IF?

What if you fill the frame a different way? Try it.

12–28 MIN

Your turn: make a ten

Use your ten-frame. For each sum, say how many you move, then ten and ___.

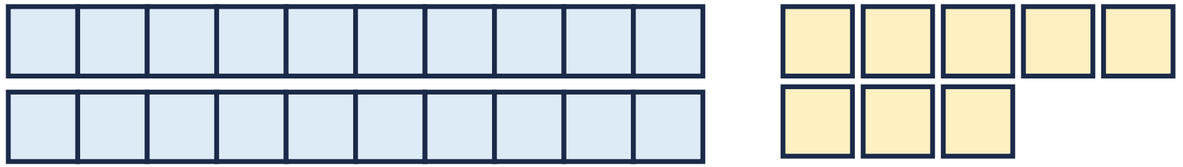

9 + 4 | 7 + 5 | **6 + 8** | 9 + 7

I move ..., so it is ten and ...

Build 28 + 6 with the kit

12–28 MIN

28 is 2 bars and 8 squares

Put 6 more squares beside it. Move squares to fill the 8 up to a ten.

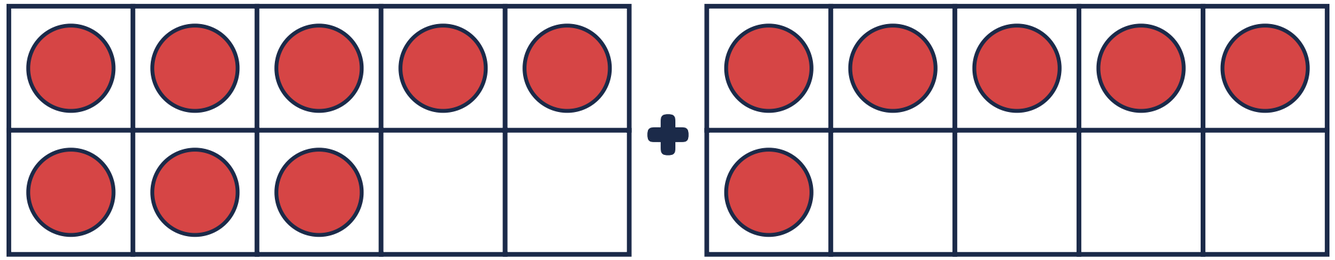

What did we notice?

12–28 MIN

- Which number did we fill up? Why?
- How many did we move each time?
- What do we say after the ten: ten and ...?

28–38 MIN

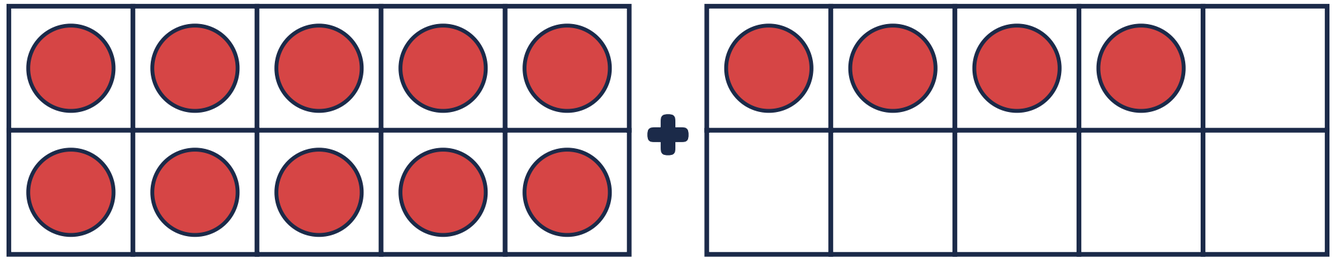

Fill the ten first

8 needs 2 more to make 10

28–38 MIN

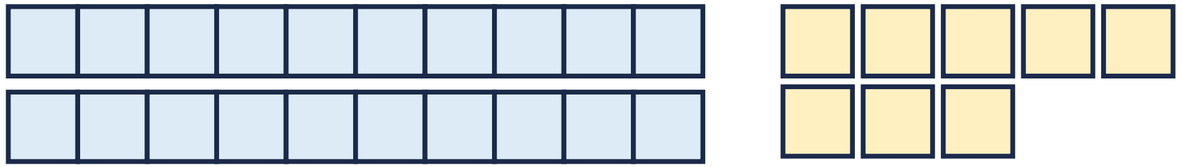

Split the 6

$$8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$$

28–38 MIN

Add to a tens number: 28 + 6

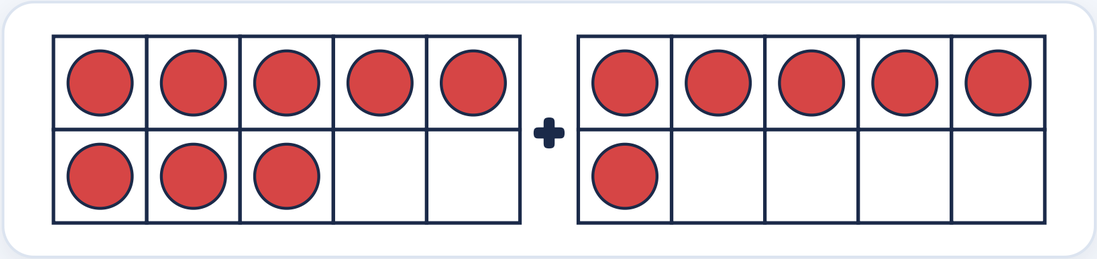

28

28 needs 2 more to make 30. Split 6 into 2 and 4.

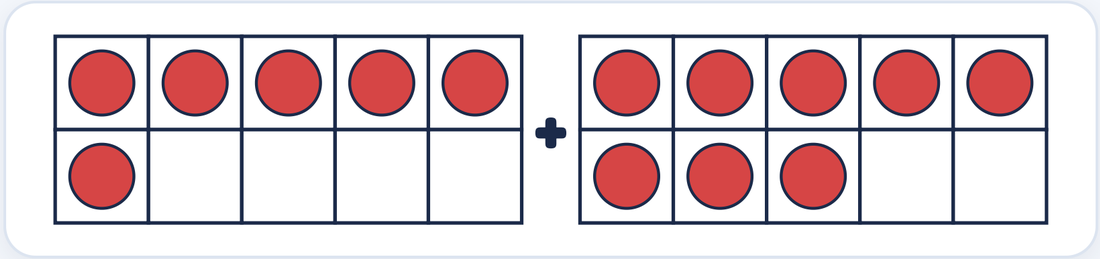

28 + 6 = 28 + 2 + 4 = 30 + 4 = 34

28–38 MIN

Which number do we fill?

Fill the 8: move 2

Fill the 6: move 4

Fill the number that is nearly full

28–38 MIN

Your turn: add

Write on your paper. Make a ten first.

9 + 4 | **7 + 6** | **18 + 5** | **45 + 7**

28–38 MIN

Check: add

Sum	How we made a ten
9 + 4	9 + 1 = 10, 10 + 3 = 13
7 + 6	7 + 3 = 10, 10 + 3 = 13
18 + 5	18 + 2 = 20, 20 + 3 = 23
45 + 7	45 + 5 = 50, 50 + 2 = 52

28–38 MIN

Spot the pair: 3 + 8 + 7

3 8 7

Which two numbers make 10? They do not have to be next to each other.

3 + 7 = 10, then 10 + 8 = 18

38–42 MIN

Stomp to ten

I say a number. You stomp how many more make ten.

Try it with 7, then 4, then 9, then 2.

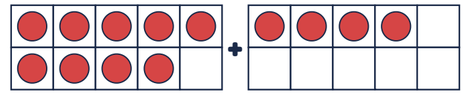

Stand up. Sip some water.

Workbook page 1: Start here

42–70 MIN

Questions 1 to 3. Take your time.

S1 Fill the first ten-frame by moving counters from the second one. Then add.

S2 Draw 7 dots and 6 dots in the box. Ring ten dots to make a ten. Then write the sums.

S3 How many more make the next ten?

Check page 1

42–70 MIN

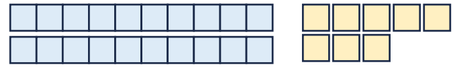

S1	1 more; 10 and 3; 9 + 4 = 13
S2	7 + 6 = 10 + 3 = 13 (ten dots ringed, 3 left over)
S3	3, 2, 4, 1

Workbook page 2: Start here

42–70 MIN

Questions 4 to 7. Take your time.

S4 Add 6 to 28. Make a ten first.

S5 Add 7 to 35. Make a ten first.

S6 Add. Make a ten first if it helps.

S7 Siti adds 8 + 6. She writes: 8 + 2 = 10, then 10 + 6 = 16. Is Siti right? Write the right answer. Say what she forgot.

Check page 2

42–70 MIN

S4	2 more; 6 = 2 and 4; 28 + 6 = 34
S5	5 more; 35 + 7 = 42
S6	15, 23, 53, 64
S7	No. 14. She moved 2 from the 6 to make the ten, so only 4 are left: 10 + 4 = 14.

42–70 MIN

Choose your next page

Page	What it is
Think harder (page 3)	Pairs that make ten in longer sums
Go further (page 4)	Bigger sums and a puzzle to write
Investigation (page 5)	Move the fewest
Check	Finish and check your own work

Everyone may choose. You can swap at any time.

Talk and explain

70–76 MIN

MEI AND ALI ADD 8 + 6

Mei moves 2 from the 6 to the 8.

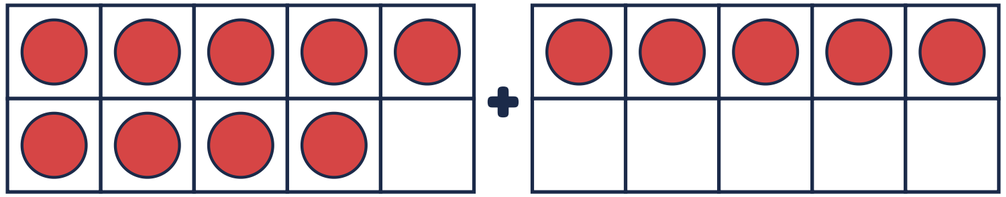

Ali moves 4 from the 8 to the 6.

Who is right? Use counters to show.

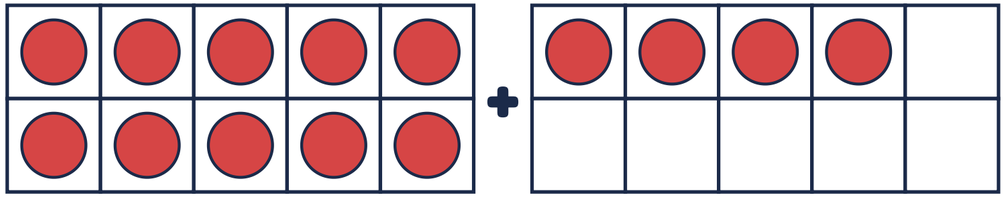

I think ... because ...

Back to the sneak-peek

70–76 MIN

9 + 5

10 + 4

Yes! Moving a counter does not change the total. Both are 14.

Exit ticket

76–82 MIN

On your own. No looking back.

E1 Add by making a ten.

E2 Add by making a ten.

E3 Add 6 + 9 + 4. Which two numbers did you add first?

Check the exit ticket

76–82 MIN

E1	13
E2	43
E3	19. 6 and 4 make 10, then 10 + 9 = 19.

Look-back

82–85 MIN

Three minutes. There are no right answers. You can pass. Nobody reads it out.

Something I did well	write or draw one thing
The hardest part was …	☐ knowing how many to move ☐ splitting a number ☐ adding to a tens number like 30 + 4 ☐ adding three or four numbers (Think harder) ☐ something else
What helped me	☐ ten-frames or counters ☐ drawing it ☐ trying again ☐ I asked for help ☐ I was not stuck
Next time I will try	☐ drawing it ☐ using objects ☐ checking my answer ☐ asking a question
	☐ I am still stuck (my tutor will come and help) ☐ I would like to pass

Take your time. You can pass.

85–90 MIN

Well done, inquirers!

Show a grown-up one thing you found out today.

NEXT LESSON

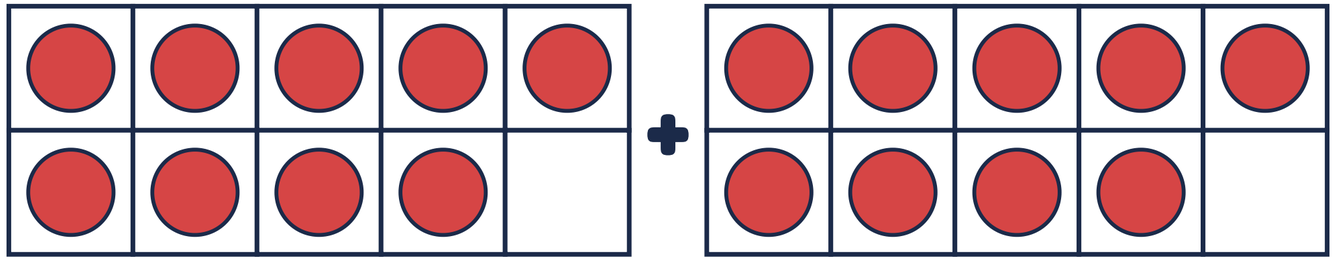

Tens Jump, Ones Hop

OPTIONAL

Go further: what if?

What if both numbers are 9? Add 9 + 9. How many do you move to make a ten?

OPTIONAL

If we have time: pick one

Activity	What we do
Is it always true?	If the ones of two numbers make 10, is the total always a tens number?
Make a puzzle	Write a sum with four numbers for your grown-up, with two pairs that make ten
Teach it back	Show how to add 8 + 5 with a ten-frame

Optional. Everyone may join.
