MATH INQUIRERS PLACEMENT CHECK

Ages 6-8

Covers Primary 1 topics. Open to a year either side • About 30 minutes • No calculator

Name or username: _____ Age: _____ Date: _____

How it works. This is a friendly check, not a test. Your child answers on their own. Read a question aloud if they ask, but do not help with the maths. If they are stuck, say "Try your best, or skip it". Working on scrap paper is fine.
Not learnt it yet? Some questions may use ideas your child has not met at school. That is fine and useful to know. Tick "not learnt yet" and move on.

Warm-up

1 What number comes just after 14?

☐ not learnt yet

2 Which is bigger, 17 or 12?

☐ not learnt yet

3 Count in 2s: 2, 4, 6, __, __.

☐ not learnt yet

4 What shape has 3 sides?

☐ not learnt yet

Main questions

5 What number goes with 7 to make 10?

not learnt yet

6 Here is a pattern: 5, 10, 15, then what comes next?

not learnt yet

7 A pencil costs 40 cents. An eraser costs 30 cents. How much for both?

not learnt yet

8 Look at the dot graph. Apples have 5 dots, Bananas have 3 dots and Grapes have 2 dots. How many more dots does Apples have than Grapes?

Apples ●●●●●

Bananas ●●●

Grapes ●●

not learnt yet

9 A pen is 8 cubes long. A ruler is 12 cubes long. How many cubes longer is the ruler?

not learnt yet

10 Ali is taller than Ben. Ben is taller than Cai. Who is the shortest?

not learnt yet

Brain stretchers

Optional. These are meant to be tricky, and most children will not finish them. Have a go at any that look fun.

11 Look at the ruler. The pencil starts at 2 and ends at 7. How long is the pencil?

YOUR CHILD'S RESULT

Which level fits?

Mark the answers with the key (ask us for it, or use the tutor key). Add up the marks, then find your row. This is a guide. You make the final choice, and you can change level free of charge before lesson 1.

Warm-up: ____ / 4 **Main questions:** ____ / 6 **Brain stretchers (optional):** ____ / 2
Ticked "not learnt yet": ____

Main questions	What it suggests
4 to 6	Join **Ages 6-8 (Level 1)**. Your child has the foundations and will enjoy the thinking. If the stretchers also went well (1 or more), you could try the Ages 7-9 (Level 2) check as well.
2 or 3	A short chat with a tutor and the free taster lesson will show which level feels best. Ages 6-8 (Level 1) with a little support suits many children here.
0 or 1	We suggest **a chat with a tutor and the free taster**. Ideas build step by step, and a confident start matters more than a fast one. If many questions were ticked "not learnt yet", that simply means the topics have not been taught yet.

Finding it easy?
Choose the level that fits the score, not the school year. Every level has open investigations for children who want more.

Found it hard?
That is useful to know, and it says nothing about how clever your child is. A level that feels comfortable builds confidence, and your child can always move up.

Skills covered

counting to 20; comparing numbers; counting in 2s; basic shapes; number bonds to 10; number patterns; money (cents); reading a dot graph; length comparison; logic ordering; reading a ruler (brain stretcher)

Next step. Send us the scores and your preferred level when you enrol. Prices are the same at every level, and a tutor can talk it through first. Small groups of up to 8, live online.
