

LEVEL 1 • TERM 2 • LESSON 2 • FOR PARENTS

2 Bar Strips: More and Fewer

WHAT WE DID

We learned to draw a strip for each person in a story. Your child laid paper strips side by side to find how many more, and end to end to find how many altogether. The big idea: a longer strip is more, and the extra part is the gap. The Start here questions are school-level addition and subtraction stories; the strips themselves (called bar models at school) and the Think harder questions, such as finding two numbers from a total and a difference, go beyond Primary 1 on purpose.

> **A longer strip is more. The extra part is the gap.**

TRY AT HOME (5 MINUTES)

1. Draw it: tell a small story, such as Ali has 8 sweets and Mei has 3 more. Your child draws two strips of boxes and says how many Mei has.
2. Compare: pick two stacks of coins or two rows of buttons. Ask how many more are in the bigger one, and how your child knows.
3. Make equal: give one child 10 counters and the other 6. How many should move so both have the same? Check by moving them.

When your child is stuck

Let your child lay two strips side by side, or draw boxes in two rows, and count the extra boxes. Wait 10 seconds before helping, and please do not hurry. If your child ticked I am still stuck on the look-back page, photograph that page and send it to the business WhatsApp, +65 9880 5962, after class. Photos are kept for 90 days after the program ends, then deleted.

Words we used

- strip: a long box that shows a number
- the gap: the extra part of the longer strip, how many more
- more than, fewer than: the longer strip has more, the shorter strip has fewer
- altogether: the strips joined end to end
- equal: the same length

Good questions

- How do you know?
- Whose strip is longer?
- Is it the gap, or the whole line?

Have ready for next lesson

- The printed Term 2 • Lesson 3 workbook, with its kit page of ten-frames and 20 counters cut out by a grown-up
- If there is no printer: about 20 small things of two kinds, such as 10 buttons and 10 coins
- A pencil, a rubber and spare paper

Next lesson

Term 2 • Lesson 3: Doubles and Near Doubles. The recording has the tutor, the shared screen and any voice that is not muted; your child may mute and keep the camera off. The recording link is private to your family: please do not share it. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to draw a story, to use groups and sharing, and to test a claim with an example. We share what we see in your child’s thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
