

LEVEL 1 • TERM 2 • LESSON 8 • FOR PARENTS

8 Times Stories

WHAT WE DID

We drew stories as strips: one box for each group, the same number in every box. We found the total, then did one more step (2 loose pens, or 2 marbles lost). We met twice as many: two equal strips, not 2 more. Equal-group stories are Primary 1 work. Strips and twice as many go a little beyond Primary 1 on purpose; we start from cups of counters.

> **Draw the story as equal strips, then solve it one step at a time.**

TRY AT HOME (5 MINUTES)

1. Cups: put 4 counters in each of 3 cups and draw 3 boxes with 4 in each. How many in all? Small things away from mouths.
2. Add a step: put 2 loose counters down, or take 2 away. What is the total now?
3. Twice as many: make a strip of 6, then twice as many. Is that 2 more?

When your child is stuck

Let your child use cups and counters, or draw boxes in a row, and wait 10 seconds before helping. Asking 'how many boxes?' and 'what is in each box?' works better than giving the answer. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- strip: a row of equal boxes (a bar model at school)
- each: how many are in one box or bag
- loose: not in a box or a bag
- twice as many: two equal strips

Good questions

- How many boxes? What is in each box?
- What is step one? What is step two?

Have ready for next lesson

- The Term 2 • Lesson 9 workbook, with its counters page (a grown-up cuts out 20 counters)
- About 30 small things (not food) and 2 small cups or bowls
- 4 small pieces of paper with a circle, a square, a triangle and a heart drawn on them
- Pencil, rubber and paper

Next lesson

Term 2 • Lesson 9: Picture Equations. Online practice: your tutor will share the practice link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to draw a story, to use groups and sharing, and to test a claim with an example. We share what we see in your child's thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
