Teacher answer key: Primary 2, Semester 2 (DRAFT)

DRAFT: this answer key is for owner review. Do not give it to pupils. Contact: pypteltd@gmail.com (business email for now, to be changed later)

This key lists the answers and the result of the check on every page. You do not need it for routine marking: a pupil who has a working check has the right answers. To spot-check, compare the check strip with the line "Check result" below.

How the topic tags work

Each entry names the syllabus outcomes the puzzle practises, with the outcome numbers of the Primary 2 content in the Mathematics Syllabus, Primary (2021 edition, pages 33 and 34). The references are for your planning only and are not printed on the pupil pages. "Problem solving" marks a page whose questions come from the kinds found in school tests rather than from one numbered outcome.

Pages in this booklet (Terms 3 and 4)

Strand	Pages
Number and Algebra - Money	S2-01, S2-02, S2-03, S2-04, S2-20
Measurement and Geometry - Measurement	S2-05, S2-06, S2-07, S2-08, S2-09, S2-10, S2-11, S2-12, S2-13
Measurement and Geometry - Geometry	S2-14, S2-15, S2-16, S2-17
Statistics - Data Representation and Interpretation	S2-18, S2-19

The page code in the footer, for example S2-07 (P2-26), gives the page in this booklet and, in brackets, its number in the full set of 40.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-01 (P2-06) Dollars and Cents 1 star

Topic: Money: counting coins and notes, decimal notation

Syllabus outcomes: Money 1.1, Money 1.2. Notes on the tag: 1.1, 1.2 (counting money in dollars and cents; reading and writing money in decimal notation)
Puzzle type: Code-breaker (money). How the pupil checks: Code word (6 letters).
Answers: 1) $2.65; 2) $1.85; 3) $2.90; 4) $6.15; 5) $10.25; 6) $2.45
Check result: Code word: SAILOR
Teacher note: Coins (5¢, 10¢, 20¢, 50¢, $1) and notes ($2, $5, $10) are original line drawings, inspired by Singapore money but not copies of any coin or note, not actual size (smaller than real) and in black and white. Each coin shows its value and the word cents; each note shows its value twice. Totals are written in dollars and cents ($3.45). The decoy letters stand for a coin missed or counted twice. A box left blank gives no letter and the check cannot see it.

S2-02 (P2-16) Writing Money 2 stars

Topic: Money: decimal notation and cents

Syllabus outcomes: Money 1.2, Money 1.4. Notes on the tag: 1.2, 1.4 (reading and writing money in decimal notation; converting decimal notation to cents only, and vice versa)
Puzzle type: Code-breaker (money notation). How the pupil checks: Code word (6 letters).
Answers: 1) 49¢ = $ $0.49; 2) $9.37 = ¢ 937¢; 3) $7.06 = ¢ 706¢; 4) 604¢ = $ $6.04; 5) 224¢ = $ $2.24; 6) 3 dollars and 41 cents = $ $3.41
Check result: Code word: MAGNET
Teacher note: Two amounts in dollars and cents are changed to cents (one has a zero in the cents, as in $4.05) and four amounts in cents or in words are written in decimal notation (one is under a dollar). The decoy letters stand for slips with a zero or the point in the wrong place. The table shows each answer in the form the pupil writes. A box left blank gives no letter and the check cannot see it.

S2-03 (P2-23) Which Costs More? 2 stars

Topic: Money: comparing and ordering amounts

Syllabus outcomes: Money 1.2, Money 1.3. Notes on the tag: 1.3 (comparing two or three amounts of money); 1.2 decimal notation
Puzzle type: Ordering (lettered price cards). How the pupil checks: Letters of the price cards in the order asked spell a word (6 letters).
Answers: Set A (lowest first): B toy car $6.50, O bag $6.90, U pencil case $6.95; Set B (highest first): N scarf $3.95, C bottle $3.50, E cap $3.40
Check result: Word: BOUNCE
Teacher note: Two sets of three prices in dollars and cents. Prices in a set have the same or nearly the same dollars, so the pupil must compare the cents ($4.50 against $4.05). Set A is read lowest price first and Set B highest price first. The letters, read in the order asked, spell a word with exactly one arrangement that is a word, so no wrong order of the six cards spells a word (every wrong order was tested against a very large word list). Prices are not added or subtracted. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-04 (P2-24) Purse Match 2 stars

Topic: Money: counting coins and notes, matching amounts

Syllabus outcomes: Money 1.1, Money 1.2. Notes on the tag: 1.1, 1.2 (counting money in dollars and cents; decimal notation)
Puzzle type: Matching (lettered purses). How the pupil checks: Letters of the purses matched to the amounts, in order, spell a word (6 letters).
Answers: 1) $1.40 is purse C; 2) $3.00 is purse A; 3) $1.70 is purse M; 4) $1.15 is purse P; 5) $2.20 is purse U; 6) $2.10 is purse S
Check result: Word: CAMPUS
Teacher note: Six purses of coins and notes (original line drawings, inspired by Singapore money but not copies; not actual size, smaller than real) and six amounts. Each purse holds exactly one of the amounts; the amounts are close to each other, so every purse must be counted. The letters of the purses, written in the order of the amounts, spell a word with exactly one arrangement that is a word, so no wrong matching spells a word (every wrong matching was tested against a very large word list). A box left blank gives no letter and the check cannot see it.

S2-05 (P2-08) Metres 1 star

Topic: Length: measuring in metres (m)

Syllabus outcomes: Length, Mass and Volume 1.1, Length, Mass and Volume 1.2. Notes on the tag: 1.1, 1.2 (measuring length in metres; the abbreviation m)
Puzzle type: Code-breaker (metre tape). How the pupil checks: Code word (5 letters).
Answers: 1) 3 m; 2) 5 m; 3) 8 m; 4) 4 m (starts at the arrow, 1 m); 5) 9 m (starts at the arrow, 1 m)
Check result: Code word: GRUNT
Teacher note: Five things measured with a metre tape (0 to 12 m). Three bars start at 0; two start at the black arrow, so the pupil counts the metres between the start and the end of the bar (a small extension of measuring). The decoy letters stand for counting to the end of the bar instead of from the start, or one metre out. A box left blank gives no letter and the check cannot see it.

S2-06 (P2-25) Kilograms and Grams 1 star

Topic: Mass: reading scales in kilograms (kg) and grams (g)

Syllabus outcomes: Length, Mass and Volume 1.1, Length, Mass and Volume 1.2. Notes on the tag: 1.1, 1.2 (measuring mass in kilograms and grams; the abbreviations kg and g)
Puzzle type: Code-breaker (weighing scales). How the pupil checks: Code word (6 letters).
Answers: 1) 9 kg; 2) 8 kg; 3) 250 g; 4) 150 g; 5) 1 kg; 6) 950 g
Check result: Code word: FIGURE
Teacher note: Six weighing scales with a needle: three read in kilograms (0 to 10 kg, a mark for each kg) and three in grams (0 to 1000 g, a mark halfway between the numbers; the readings are on a half mark). The unit is printed on each scale and the pupil writes it after the number. The decoy letters stand for the next mark read by mistake. Drawings are not to scale. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-07 (P2-26) Litres 1 star

Topic: Volume of liquid: reading containers in litres (ℓ)

Syllabus outcomes: Length, Mass and Volume 1.1, Length, Mass and Volume 1.2. Notes on the tag: 1.1, 1.2 (measuring volume of liquid in litres; the abbreviation ℓ)
Puzzle type: Code-breaker (containers). How the pupil checks: Code word (6 letters).
Answers: 1) 1 ℓ (scale to 10); 2) 4 ℓ (scale to 5); 3) 3 ℓ (scale to 5); 4) 6 ℓ (scale to 10); 5) 7 ℓ (scale to 10); 6) 8 ℓ (scale to 10)
Check result: Code word: FRUITY
Teacher note: Six containers with a scale in litres, some up to 5 ℓ and some up to 10 ℓ, and a liquid level drawn with lines. The level is at a mark, so the pupil reads the number beside it (and counts the marks when the scale is not labelled at the level). The decoy letters stand for the mark above or below. Drawings are not to scale. A box left blank gives no letter and the check cannot see it.

S2-08 (P2-27) Which Unit? 1 star

Topic: Units of measurement: m, g, kg and ℓ

Syllabus outcomes: Length, Mass and Volume 1.2. Notes on the tag: 1.2 (using appropriate units of measurement and their abbreviations m, g, kg, ℓ)
Puzzle type: Choice table (units). How the pupil checks: Word from the letters of the right units (6 letters).
Answers: 1) A boy weighs 25 kg.; 2) An egg weighs 60 g.; 3) A bag of rice is 5 kg.; 4) A melon weighs 3 kg.; 5) A bucket holds 8 ℓ of water.; 6) A pencil weighs 5 g.
Check result: Word: HUNGRY
Teacher note: Six sentences with a unit missing (m for length, kg and g for mass, ℓ for liquid). Each unit has a letter; the letters of the right units, read down the rows, spell the word. Every other way of choosing was tested against a very large word list: none spells a word. A box left blank gives no letter and the check cannot see it.

S2-09 (P2-28) Order the Measures 2 stars

Topic: Mass and volume: comparing and ordering

Syllabus outcomes: Length, Mass and Volume 1.1, Length, Mass and Volume 1.3. Notes on the tag: 1.1, 1.3 (measuring mass and volume; comparing and ordering masses and volumes)
Puzzle type: Ordering (lettered scales and containers). How the pupil checks: Letters of the cards in the order asked spell a word (6 letters).
Answers: Set A (heaviest first): P = 3 kg, E = 2 kg, A = 1 kg; Set B (least first): N = 5 ℓ, U = 7 ℓ, T = 8 ℓ
Check result: Word: PEANUT
Teacher note: Set A has three scales (kg) to be read and ordered from the heaviest; Set B has three containers (ℓ) to be read and ordered from the least liquid. The letters, read in the order asked, spell a word with exactly one arrangement that is a word, so no wrong order of the six cards spells a word (every wrong order was tested against a very large word list). Masses and volumes are in one unit each: conversions are not asked. A box left blank gives no letter and the check cannot see it.

S2-10 (P2-07) Time to the Minute 1 star

Topic: Time: telling time to the minute

Syllabus outcomes: Time 2.1. Notes on the tag: 2.1 (telling time to the minute)
Puzzle type: Code-breaker (clocks). How the pupil checks: Code word (6 letters).
Answers: 1) 9:19; 2) 3:52; 3) 7:24; 4) 4:47; 5) 7:21; 6) 1:25
Check result: Code word: TEACUP
Teacher note: Clock faces with a mark for every minute; the numerals sit outside the ring so the hands never cross them. Most times are not on a five-minute mark. The decoy letters stand for the usual misreadings: one minute out, the hour hand read as the next or the earlier hour, the hands swapped. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-11 (P2-30) Hours and Minutes 1 star

Topic: Time: changing hours and minutes to minutes, and back

Syllabus outcomes: Time 2.3. Notes on the tag: 2.3 (converting time in hours and minutes to minutes only, and vice versa)
Puzzle type: Code-breaker (time conversions). How the pupil checks: Code word (6 letters).
Answers: 1) 3 h 30 min = ? min 210; 2) 250 min = ? h 10 min 4; 3) 3 h = ? min 180; 4) 270 min = 4 h ? min 30; 5) 1 h 25 min = ? min 85; 6) 185 min = 3 h ? min 5
Check result: Code word: TONGUE
Teacher note: Three conversions from hours and minutes to minutes (one with whole hours) and three from minutes to hours and minutes (two ask for the minutes left over, one for the hours). The fact 1 h = 60 min is printed. The decoy letters stand for the usual slips (the wrong number of minutes in an hour, or hours and minutes added). A box left blank gives no letter and the check cannot see it.

S2-12 (P2-29) Match the Times 2 stars

Topic: Time: matching clocks and times to the minute

Syllabus outcomes: Time 2.1. Notes on the tag: 2.1 (telling time to the minute)
Puzzle type: Matching (lettered clocks). How the pupil checks: Letters of the clocks matched to the times, in order, spell a word (6 letters).
Answers: 1) 9:32 is clock S; 2) 10:26 is clock H; 3) 4:06 is clock A; 4) 6:12 is clock D; 5) 10:34 is clock O; 6) 7:16 is clock W
Check result: Word: SHADOW
Teacher note: Six clock faces with a mark for every minute and six digital times that are close to each other (some share an hour or a minute, so the pupil must read the hour hand and the minute hand). Each time belongs to exactly one clock. The letters of the clocks, written in the order of the digital times, spell a word with exactly one arrangement that is a word, so no wrong matching spells a word (every wrong matching was tested against a very large word list). Times are read to the minute; no duration is asked. A box left blank gives no letter and the check cannot see it.

S2-13 (P2-31) Time Detective 2 stars

Topic: Time: a timetable with hours and minutes

Syllabus outcomes: Time 2.1, Time 2.2, Time 2.3 (problem solving). Notes on the tag: 2.1, 2.2, 2.3 (telling time to the minute; hours and minutes; converting hours and minutes to minutes)
Puzzle type: Code-breaker (timetable). How the pupil checks: Code word (6 letters).
Answers: 1) How many minutes does Art last? 45; 2) How many minutes does Science last? 85; 3) How many minutes do Maths and Reading last together? 100; 4) Drawing starts at 11:10 am. How many minutes past the hour? 10; 5) How many lessons start before 10:00 am? 2; 6) Music lasts more than 1 h. How many minutes more than 1 h? 25
Check result: Code word: BANDIT
Teacher note: A timetable of six lessons with the time each starts (am and pm) and how long each lasts, in minutes or hours and minutes. Questions: hours and minutes changed to minutes (twice), two lessons together, the minutes past the hour at which a lesson starts, a count of lessons starting before 10 am, and the minutes a long lesson lasts over 1 h. The pupil is never asked to find an end time or a start time from the other two. The decoy letters stand for being 5 or 10 minutes out, or an hour out. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-14 (P2-32) Shape Patterns 1 star

Topic: 2D shape patterns: what comes next?

Syllabus outcomes: 2D Shapes 1.1. Notes on the tag: 1.1 (making/completing patterns with 2D shapes by size, shape, colour or orientation)
Puzzle type: Choice table (shape patterns). How the pupil checks: Word from the letters of the shapes that come next (6 letters).
Answers: 1) size: B; 2) colour: E; 3) shape: H; 4) shape: I; 5) turn: N; 6) colour: D
Check result: Word: BEHIND
Teacher note: Six patterns of 2D shapes (circle, square, triangle, rectangle) that change by shape, by colour (black or white), by size (big or small), by the way a shape is turned, or by two of these together. Each pattern shows two full turns of its repeat. Each row offers three shapes; the wrong ones change one attribute, or repeat the previous shape. The letters of the right shapes, read down the rows, spell the word. Every other way of choosing was tested against a very large word list: none spells a word. The pupil completes patterns; making a new pattern is not checked by this page. A box left blank gives no letter and the check cannot see it.

S2-15 (P2-33) Pattern Rules 2 stars

Topic: 2D shape patterns: what comes next?

Syllabus outcomes: 2D Shapes 1.1. Notes on the tag: 1.1 (making/completing patterns with 2D shapes by size, shape, colour or orientation)
Puzzle type: Choice table (shape patterns). How the pupil checks: Word from the letters of the shapes that come next (6 letters).
Answers: 1) size and colour: C; 2) shape and colour: O; 3) shape and colour: B; 4) shape and size: A; 5) shape and colour: L; 6) turn: T
Check result: Word: COBALT
Teacher note: Six patterns of 2D shapes (circle, square, triangle, rectangle) that change by shape, by colour (black or white), by size (big or small), by the way a shape is turned, or by two of these together. Each pattern shows two full turns of its repeat. Each row offers three shapes; the wrong ones change one attribute, or repeat the previous shape. The letters of the right shapes, read down the rows, spell the word. Every other way of choosing was tested against a very large word list: none spells a word. The pupil completes patterns; making a new pattern is not checked by this page. A box left blank gives no letter and the check cannot see it.

S2-16 (P2-34) Meet the Solids 1 star

Topic: 3D shapes: cube, cuboid, cone, cylinder and sphere

Syllabus outcomes: 3D Shapes 2.1. Notes on the tag: 2.1 (identifying and naming 3D shapes: cube, cuboid, cone, cylinder, sphere)
Puzzle type: Choice table (solids). How the pupil checks: Word from the letters of the right names (6 letters).
Answers: 1) cylinder: B; 2) cuboid: A; 3) sphere: C; 4) cone: K; 5) cube: U; 6) cuboid: P
Check result: Word: BACKUP
Teacher note: Six drawings of solids (one of each kind and one repeated, in different shapes and sizes: a tall and a short cylinder, a long and a tall cuboid). Each row offers three names with letters. A cube and a cuboid are offered together in several rows, so the pupil must see whether all the faces are squares. The letters of the right names, read down the rows, spell the word. Every other way of choosing was tested against a very large word list: none spells a word. A cube has six faces that are all squares; every cuboid drawn is at least twice as long as it is high. The drawings are pictures of solids; no real solid is handled. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-17 (P2-35) Solid Sort 2 stars

Topic: 3D shapes: sorting and counting solids

Syllabus outcomes: 3D Shapes 2.1. Notes on the tag: 2.1 (identifying, naming and classifying 3D shapes)
Puzzle type: Sorting table (solids). How the pupil checks: Total 15 and code word (5 letters).
Answers: Counts: cube 5, cuboid 2, cone 1, cylinder 4, sphere 3
Check result: Total 15; code word: THIEF
Teacher note: Fifteen drawn solids to sort into the five kinds. The five counts are different and add to 15, which the page prints: a pupil who misses one or counts one twice no longer gets 15. The counts are also looked up in the code table (five letters). The two checks together catch a miss in one kind balanced by an extra in another, except for a swap of two counts that happen to keep the letters spelling a word. A box left blank gives no letter and the check cannot see it.

S2-18 (P2-36) Picture Graph Scales 1 star

Topic: Picture graphs with scales: one picture stands for more than one

Syllabus outcomes: Picture Graphs with Scales 1.1. Notes on the tag: 1.1 (reading and interpreting data from picture graphs with scales)
Puzzle type: Code-breaker (picture graph). How the pupil checks: Code word (6 letters).
Answers: 1) How many children chose Blue? 14; 2) How many children chose Yellow? 10; 3) How many fewer chose Black than Green? 8; 4) How many children chose Green or Red? 20; 5) How many children in all? 52; 6) How many more chose Yellow than Red? 6
Check result: Code word: DONKEY
Teacher note: A picture graph of five colours with a key: one picture stands for 2 children. Questions: read one row (twice), find how many more or fewer, add two rows, and the total. The pupil must use the scale, not just count pictures. The decoy letters stand for the number of pictures, or for one picture too many. A box left blank gives no letter and the check cannot see it.

S2-19 (P2-37) Graph Detective Two 2 stars

Topic: Picture graphs with scales: two rows are covered

Syllabus outcomes: Picture Graphs with Scales 1.1 (problem solving). Notes on the tag: 1.1 (reading and interpreting data from picture graphs with scales)
Puzzle type: Code-breaker (picture graph with covered rows). How the pupil checks: Code word (6 letters).
Answers: 1) How many pictures for Mangoes? 4; 2) How many children chose Mangoes? 40; 3) How many children chose Lychees? 20; 4) How many fewer chose Melons than Mangoes? 10; 5) How many more chose Plums than Lychees? 30; 6) How many children in all? 200
Check result: Code word: FAMILY
Teacher note: A picture graph where one picture stands for 10 children and two rows are covered. One covered row is given in pictures, the total number of children is given, so the other covered row is found by taking the pictures of the other rows away from the total (in pictures: the total divided by the scale). The pupil can check that all five rows make the printed total. The decoy letters stand for pictures read as children, or one picture out. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-20 (P2-40) Colour the Butterfly 2 stars

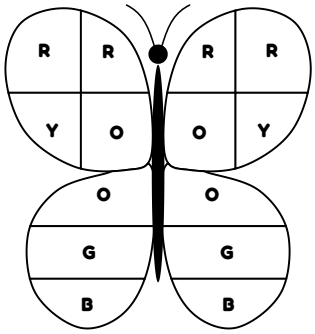

Topic: Money: cents and dollars, decimal notation

Syllabus outcomes: Money 1.1, Money 1.2, Money 1.3, Money 1.4. Notes on the tag: 1.1, 1.2, 1.3, 1.4 (counting money in dollars and cents; decimal notation; comparing amounts; converting decimal notation to cents)

Puzzle type: Colour by code (pupils colour with their own crayons). How the pupil checks: Colour key and tally: every answer must be on the key, the number of parts of each colour must match the box, and the parts in the same place on the left and on the right match.

Answers: Colour key: 35¢ = yellow, 65¢ = red, 135¢ = blue, 185¢ = green, 250¢ = orange

Check result: Tally: yellow 2, red 4, blue 2, green 2, orange 4; the parts in the same place on the left and on the right match.

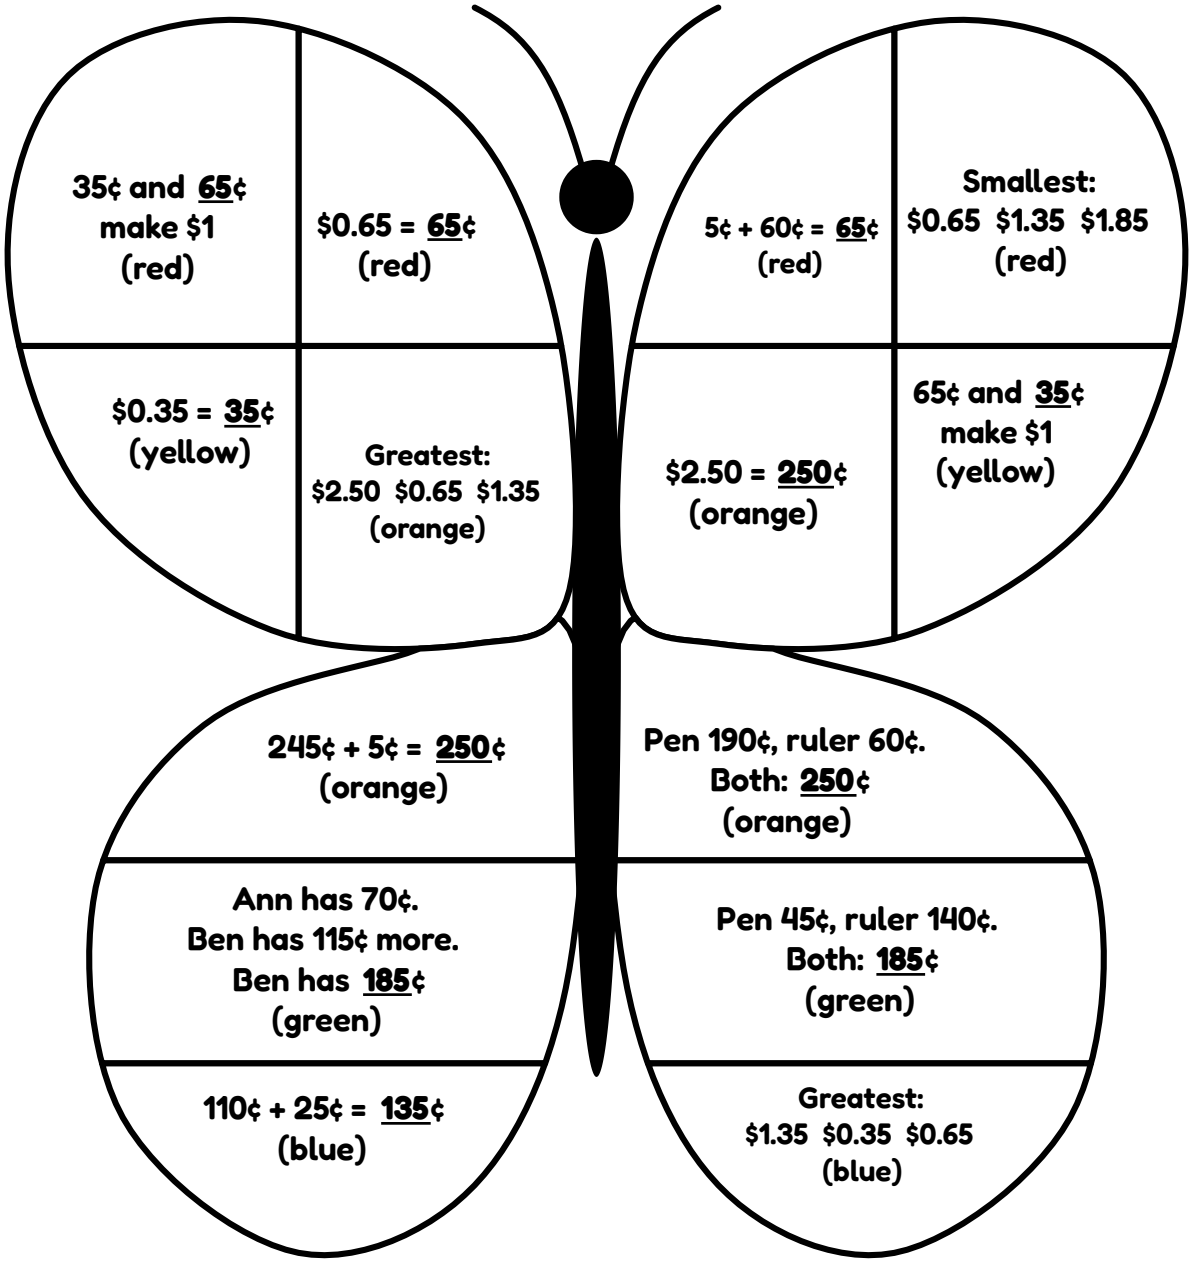

Teacher note: Every part works with money in cents and dollars: changing $ to cents, adding or taking away cents, finding what makes $1, comparing amounts or counting coins from a small drawing. Pupils colour the black-and-white outline with their own crayons (or, for a pencil-only copy, write Y, R, B, G or O in each part: the tally and the matching parts can be checked the same way). Check strip: count the parts of each colour (the tally is printed); the parts in the same place on the left and on the right match.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

Answers: S2-20 (P2-40) Colour the Butterfly

Every part shows the question, the answer underlined and the colour in brackets. Pupils colour their own copy. Colour key: 35¢ = yellow, 65¢ = red, 135¢ = blue, 185¢ = green, 250¢ = orange.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.
