

LEVEL 1 • TERM 1 • LESSON 5 • FOR PARENTS

5 Make-a-Ten Adding

WHAT WE DID

We learned to add by making a ten first: fill a ten-frame, then add what is left. We used it for 8 + 6, for 28 + 6, and for longer sums with pairs that make 10. Making a ten to add (8 + 6, 28 + 6) is school work. Adding four or six numbers by finding pairs that make ten goes beyond, in Think harder and Go further.

> **Make tens first: fill up a ten, then add what is left.**

TRY AT HOME (5 MINUTES)

1. Ten-frame: draw a box of two rows of five. Put 8 buttons in it and 6 clips beside it. Move clips across to fill the box, then say: ten and … Keep small things away from mouths and little ones.
2. Stomp to ten: say a number from 1 to 9. Your child stomps how many more make ten. Then try 12, 18 and 25: how many more to the next ten?
3. Spot the pair: write 6, 3, 4 and 7. Ask your child to find the two that make ten, then add all four. Swap, and make a mistake on purpose for them to find.

When your child is stuck

Please let your child use counters or draw a ten-frame, and wait 10 seconds before helping. Asking 'how many empty spaces are there?' works better than giving the answer. Please do not hurry. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days.

Words we used

- ten-frame: a box of ten spaces, two rows of five
- make a ten: move some counters so that one group is full
- split: break a number into two smaller numbers (6 is 2 and 4)
- total: the answer when we add

Good questions

- Which number is nearly full?
- How many did you move?
- How do you know the total did not change?

Have ready for next lesson

- The tens bars and ones squares from the kit page, cut out (earlier pieces can be reused)
- A coin
- Pencil, rubber and paper

Next lesson

Lesson 6: Tens Jump, Ones Hop. Online practice: your tutor will share the practice link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to see numbers as tens and ones, to notice patterns and to say why. We share what we see in your child's thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
