Make-a-Ten Adding: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use counters or draw a ten-frame. Go further (question 5) is optional. Small things stay on the table, away from mouths and little brothers and sisters. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next.

No.1

Start here

Fill in the blanks. 9 + 5 = 10 + _____. So 9 + 5 = _____.

No.2

Start here

Add. 37 + 6 = _____.

No.3

Start here

Fill in the missing numbers to make the next ten. (a) 8 + _____ = 10 (b) 45 + _____ = 50 (c) 67 + _____ = 70

No.4

Think harder

Add 5 + 7 + 5 + 3. Show your working. The total is _____.

No.5

Go further

(a) Write 3 sums like 8 + 5 for a grown-up to solve. Use numbers up to 9, like 9 + 6 or 7 + 4. (b) Solve 3 sums that your grown-up writes for you. Many answers are right.

Answers for grown-ups

Please let your child try first, then check together. Ask *how do you know?* If your child is stuck, wait 10 seconds, then suggest drawing it.

1. 4, so 9 + 5 = 14
Move 1 counter from the 5 to the 9. That makes 10, and 4 are left. 10 + 4 = 14.

2. 43
37 needs 3 more to make 40. 6 is 3 and 3. 40 + 3 = 43.

3. 2, 5, 3
Look at the ones digit. 8 needs 2, 5 needs 5, 7 needs 3.

4. 20 (5 + 5 = 10, 7 + 3 = 10)
5 + 5 = 10 and 7 + 3 = 10. 10 + 10 = 20.

5. Any: for example 8 + 5 = 13 (fill the 8 with 2 from the 5: 10 and 3). A grown-up can check with counters.
The number that is nearest to ten is the one to fill. Move the missing amount from the other number, then add what is left.

More practice online (no timers, no scores): ask your tutor for the practice link.
