FOR THE TUTOR OR PARENT

Answer key: Ages 9-11

Accept equivalent forms (for example 2.05 and $2.05). One mark per question. Keep this key away from the child until they have finished.

Warm-up (4 marks)

#	Question	Answer	Watch for
1	A bag has 9 sweets. How many sweets are in 7 bags?	**63**	Check recall of 9 x 7; note if the child skip-counts slowly.
2	Fill in the blank: 2/3 = ?/12	**8**	Does the child multiply top and bottom by 4? Common error: 2 + 9 = 11.
3	A rectangle is 7 cm long and 6 cm wide. What is its area? Write your answer with units.	**42 square cm**	Accept 42 square cm, 42 sq cm or 42 cm2. If the unit is missing, give the mark and note it. Common error: giving the perimeter, 26 cm.
4	5000 - 1346 = ?	**3654**	Watch for borrowing across zeros; common error 4346 or 3764.

Main questions (6 marks)

#	Question	Answer	Watch for
5	A factor of 18 is a number that divides 18 exactly with nothing left over. Write down all the factors of 18.	**1, 2, 3, 6, 9, 18**	Look for pairs (1 x 18, 2 x 9, 3 x 6). Common errors: missing 1 or 18, or listing multiples (18, 36...).
6	Round 48,572 to the nearest thousand.	**49,000**	Check which digit they look at (the hundreds digit, 5). Common error: 48,000 or 48,600.
7	12 + 6 x 3 - 4 = ?	**26**	Multiplication first: 6 x 3 = 18, then 12 + 18 - 4. Common error: 50 (left to right).
8	2 and 3/5 + 1 and 4/5 = ? Write your answer as a mixed number.	**4 and 2/5**	Mixed number preferred: 4 2/5. Accept 22/5 for the mark. Look for 3/5 + 4/5 = 7/5 = 1 2/5, then add the whole numbers. Common errors: 3 7/5 left unconverted, or 4 7/10.
9	A ribbon is 3.7 m long. Another ribbon is 2.85 m long. What is the total length? Write your answer in metres.	**6.55 m**	Check place-value alignment of the decimal points. Common errors: 3.22 (37 + 285 with the decimal point ignored) or 5.92 (digits lined up from the right).
10	A rectangle has a perimeter of 36 cm. It is 11 cm long. How wide is it?	**7 cm**	Look for 36 / 2 = 18, then 18 - 11 = 7. Common errors: 25 (36 - 11) or 14.

Brain stretchers (2 marks, optional)

#	Question	Answer	Watch for
11	(Brain stretchers are hard on purpose. Most children do not finish both, and that is fine. Try one!) I am a number between 30 and 50. I am a multiple of 4 and a multiple of 6. My digits add up to 9. What number am I?	**36**	Look for listing multiples of 4 and 6 (common: 36, 48) then using the digit clue. Accept guess and check with reasoning.
12	Ben has 3 times as many marbles as Cara. Ben gives 12 marbles to Cara. Now they have the same number. How many marbles did Ben have at first?	**36**	Bar model: after the gift, Ben's 3 units minus 12 equals Cara's 1 unit plus 12, so 2 units = 24, 1 unit = 12. Cara 12, Ben 36.

Questions the child ticked "not learnt yet" score 0 but tell you what to teach first. They do not count against the child.
