

LEVEL 1 • TERM 4 • LESSON 3 • FOR PARENTS

3 Copy on the Grid

WHAT WE DID

We copied figures exactly on a grid of dots. Your child counted steps (not dots), said where to go as right and up, and listed every route that goes only right or up. Counting the different routes on a grid goes past the Primary 1 syllabus on purpose.

> **Count the jumps between the dots, not the dots.**

TRY AT HOME (5 MINUTES)

1. Draw 4 by 4 dots. Join some to make a shape. Ask your child to copy it exactly.
2. Give a button directions: 2 right, 1 up, 1 right. Where does it stop? Change the order. Same dot?
3. A row of 6 dots: how many steps from the first dot to the last? (5)

When your child is stuck

Let your child use the grid page and a button, and wait 10 seconds before helping. Please say 'count the jumps', not 'count the dots'. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- step: the jump from one dot to the next
- 3 right, 2 up: how we say where to go
- route: one way from the start to the end
- exact copy: the same shape and size

Good questions

- How many steps, not dots?
- How many right, and how many up?
- Is there another route? How do you know you have them all?

Have ready for next lesson

- Your Term 4 book (Book 7): tear out the fold-squares page along the dashed line, then a grown-up cuts out the 4 paper squares
- 12 small blocks of one size (building bricks or dice). No blocks? Tell your tutor: the lesson works with pictures
- A pencil, a rubber and paper

Next lesson

Next lesson: Cubes and Views. Online practice: your tutor will share the link. The recording has the tutor, the shared screen and any voice that is unmuted. Please do not share the link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.
