Add your lessons to your calendar

Math Inquirers November program. One small file puts all 10 lessons in your phone or computer calendar, with a reminder 1 day before and 1 hour before each lesson. Times are Singapore time.

1. Find your file

We send you one file named for your child's group, for example **L3A_math_inquirers_beta.ics** (L3A = Level 3, Group A). It comes on WhatsApp or by email once your place is confirmed.

2. Open it on your device

iPhone / iPad	Tap the file, then **Add All** (or **Add to Calendar**), and choose your calendar.
Android (Google Calendar)	Tap the file and choose Google Calendar. If nothing opens: on a computer go to calendar.google.com, click the gear, **Settings**, **Import and export**, **Import**, pick the file and the calendar.
Computer (Outlook, Apple Calendar)	Double-click the file. Choose the calendar to add to. Or drag it onto the calendar window.

3. Check it

You should see **10 events**, called *Math Inquirers Level N Group A: lesson 1 of 10* and so on, each 90 minutes. Each one lists the Google Meet link, which is the same for all 10 lessons of your group: tap the link to join.

Good to know

- **Week 5.** Nothing is held on Fri 25 Dec (public holiday). Levels 1 to 4 meet **Thu 24 Dec** and Level 5 meets **Wed 23 Dec** at the usual time. The file already has the right date.
- **Opening the file twice** does not double your lessons: each lesson has its own code, so a new file replaces the old one. If we change a time we send a new file and tell you on WhatsApp.
- **Do not delete** the reminders: the 1-hour one is the best moment to find the workbook, a pencil, a rubber and a few sheets of blank paper.
- Camera is optional and your child may stay muted. Please do not hold paper up to the camera.
- Cannot make a lesson? Tell us on WhatsApp +65 9880 5962. Every lesson is recorded; see the make-up note.

Link not working, wrong time, or no file? WhatsApp +65 9880 5962 and we will fix it the same day.
