

LEVEL 1 • TERM 2 • LESSON 5 • FOR PARENTS

# 5 Equal Groups

## WHAT WE DID

We made equal groups with plates and counters. Equal means the same number in every group. We counted in jumps, added the same number again and again (3 + 3 + 3 + 3 = 12) and met the × sign: 4 groups of 3 is 4 × 3. Rows of dots showed that 3 × 4 and 4 × 3 make the same total. Equal groups and × are Primary 1 work at school; we start from objects and pictures.

> **Equal groups can be counted fast: count in jumps and write it with ×.**

## TRY AT HOME (5 MINUTES)

1. Plates: put 3 small things on each of 4 plates. How many altogether? Count in jumps of 3. Keep small things away from mouths.
2. Equal or not? Make 3 groups with 3, 2 and 3 things. How many more make them equal?
3. Turn it: make 2 rows of 5 buttons. Turn the tray. How many rows now? Does the total change?

### When your child is stuck

Please say ‘groups of’ for the × sign. Either order is fine for your child’s own sentence: 3 × 5 and 5 × 3 both make 15. Let your child use counters on plates or draw dots, and wait 10 seconds before helping. If the look-back page says ‘I am still stuck’, photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

### Words we used

- equal groups: the same number in every group
- in each: how many in one group
- in all: the total
- ×: groups of (4 × 3 is 4 groups of 3)

### Good questions

- How many groups? How many in each group?
- Are all the groups equal? How do you know?

### Have ready for next lesson

- Next lesson’s workbook, printed, with its 100 square page
- 2 or 3 coloured pencils
- About 20 small things (counters, buttons)

### Next lesson

Term 2 • Lesson 6: Skip-Count Tables. Your tutor will send its workbook before class: please print it, including the 100 square page. Online practice: your tutor will share the practice link. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to draw a story, to use groups and sharing, and to test a claim with an example. We share what we see in your child’s thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
