Take Away, Count Up: practice at home

Name _____ Date _____

About 15 minutes, a few days after the lesson. Use real things or draw bundles. A grown-up may read the questions aloud. Wrong answers are fine: they show what to try next.

No.1

Start here

A jar has 78 sweets. 20 are eaten. How many sweets are left?

No.2

Start here

Take away, then check by adding: 76 - 43 = ____ . Check: ____ + 43 = 76.

No.3

Start here

Take away the tens first, then the ones: 89 - 36 = ____

No.4

Think harder

Ben has 47 cards. Ali has 71 cards. Who has more, and how many more? Count up.

No.5

Go further

At home: open a book at two page numbers, such as 38 and 71. Find how many pages from one to the other two ways: by taking away and by counting up. Do the two ways match?

Answers for grown-ups

Please let your child try first, then check together. Ask *how do you know?* If your child is stuck, wait 10 seconds, then suggest drawing the bundles.

1. 58
78 is 7 tens and 8 ones. Take away 2 tens: 5 tens and 8 ones, which is 58.

2. 33; 33 + 43 = 76
76 take away 40 is 36, and 36 take away 3 is 33. Check: 33 + 43 = 76.

3. 53
89 take away 30 is 59. 59 take away 6 is 53.

4. Ali has 24 more (47 to 50 is 3, 50 to 70 is 20, 70 to 71 is 1)
47 to 50 is 3. 50 to 70 is 20. 70 to 71 is 1. 3 + 20 + 1 = 24.

5. Any two pages: for example 38 and 71: 71 - 38 = 33, and counting up 38 to 40 is 2, 40 to 70 is 30, 70 to 71 is 1, so 33. Both ways match.
A grown-up checks that the child adds the hops and jumps, then adds the answer back to the smaller page number to get the bigger one.
