

LEVEL 1 • TERM 4 • LESSON 2 • FOR PARENTS

2 Build the Figure

WHAT WE DID

We put shapes together and looked inside figures. Your child made a square and a bigger triangle from 2 triangles, built a house and a boat from squares and triangles, and counted each kind of shape in a picture. Putting shapes together and naming the shapes in a figure are Primary 1 ideas. Counting every triangle of every size in a square with 2 lines, finding the fewest pieces that make a figure, and saying which sets of pieces make it go past the school Primary 1 syllabus on purpose.

> **Big shapes are made of small shapes. Count one kind at a time.**

TRY AT HOME (5 MINUTES)

1. Put 2 triangles together so whole sides touch. What shapes can you make? Draw them.
2. Build a house or a boat with the pieces. Ask: how many of each shape did you use?
3. Look at a window, a plate or a book. Ask: what shapes can you see?

When your child is stuck

Let your child try the pieces and wait 10 seconds before helping. Asking 'Which sides are touching?' works better than moving the pieces for them. Please do not say that 2 triangles always make a square: it depends which sides touch. If the look-back page says 'I am still stuck', photograph it and send it to our business WhatsApp (+65 9880 5962). Photos are kept 90 days after the program ends.

Words we used

- figure: a picture made of shapes
- piece: one of the paper shapes in the kit
- whole side: the full length of a side
- half circle, quarter circle: half or a quarter of a circle
- fewest: the smallest number

Good questions

- Which sides are touching?
- How many of each shape?
- Did you count any shape twice?

Have ready for next lesson

- Your Term 4 book (Book 7) open at the next lesson: its grid page is not cut, nothing to cut
- A button or a small coin as a counter (a button is best)
- A ruler (the one you keep at home), a pencil and a rubber
- Keep the shape pieces in their envelope

Next lesson

Next lesson, Term 4 Lesson 3: Copy on the Grid. Online practice: your tutor shares the link (please do not share it). The recording has the tutor, the shared screen and any voice that is not muted; your child may mute and keep the camera off. Missed a lesson? Every lesson is recorded; your tutor will share a private link with enrolled families.

Your child is learning to choose a way to solve a problem, and to make problems of their own. We share what we see in your child's thinking, never a rank or a mark compared with other children. Math Inquirers by Preciouslyours Pte Ltd.
