Teacher answer key: Primary 6, Semester 2 (DRAFT)

DRAFT: this answer key is for owner review. Do not give it to pupils. Contact: pypteltd@gmail.com (business email for now, to be changed later)

This key lists the answers and the result of the check on every page. You do not need it for routine marking: a pupil who has a working check has the right answers. To spot-check, compare the check strip with the line "Check result" below.

How the topic tags work

Each entry names the syllabus outcomes the puzzle practises, with the outcome numbers of the Primary 6 Standard content in the Mathematics Syllabus, Primary (2021 edition, updated October 2025, pages 43 and 44); Foundation-track lines carry the label Primary 6 Foundation. The outcome numbers follow the syllabus; the notes on each tag are our own words, not the syllabus text. The references are for your planning only and are not printed on the pupil pages. "Problem solving" marks a page whose questions come from the kinds found in school tests rather than from one numbered outcome.

Pages in this booklet (Terms 3 and 4)

Strand	Pages
Measurement and Geometry - Area and Volume	S2-01, S2-02, S2-03, S2-04, S2-05, S2-06, S2-16
Measurement and Geometry - Geometry	S2-07, S2-08, S2-09
Statistics	S2-10, S2-11
Measurement and Geometry - Area and Volume; Statistics	S2-12
Primary 6 Foundation track (also used with the Standard pages)	S2-13, S2-17, S2-18, S2-19
Number and Algebra - Fractions	S2-14
Number and Algebra - Ratio	S2-15
Number and Algebra - mixed Primary 6	S2-20

The page code in the footer, for example S2-07 (P6-27), gives the page in this booklet and, in brackets, its number in the full set of 40.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-01 (P6-21) Shaded Shapes 1 star

Topic: Area of composite figures

Syllabus outcomes: Area and Volume 1.3. Notes on the tag: 1.3 (composite figures made of squares, rectangles, triangles, semicircles and quarter circles)
Puzzle type: Code-breaker (composite areas). How the pupil checks: Code word (6 letters).
Answers: 1) 1036 cm²; 2) 273 cm²; 3) 42 cm²; 4) 476 cm²; 5) 64 cm²; 6) 56 cm²
Check result: Code word: SUNDAY
Teacher note: Six figures: a rectangle with a semicircle on one end, a square with a semicircle on one side, a square with a quarter circle cut away (hatched), a square with a semicircle cut out (hatched), and two rectangles with a triangle on top. Sizes are chosen so that every answer is a whole number with π as 22/7. The decoy numbers are what a pupil gets by using a full circle instead of a half, by forgetting the half in the triangle, or by adding instead of subtracting. A box left blank gives no letter and the check cannot see it.

S2-02 (P6-22) Perimeter Pick 2 stars

Topic: Perimeter of figures with curved edges

Syllabus outcomes: Area and Volume 1.2, Area and Volume 1.3. Notes on the tag: 1.2, 1.3 (perimeter of a semicircle and a quarter circle; composite figures)
Puzzle type: Choice table (perimeters). How the pupil checks: Word from the letters of the right choices (6 letters).
Answers: 1) 100 cm; 2) 76 cm; 3) 54 cm; 4) 64 cm; 5) 142 cm; 6) 25 cm
Check result: Word: WALNUT
Teacher note: Six figures: a semicircle, a quarter circle, two rectangles with a semicircle on one end, a square with a semicircle on one side and a square with a quarter circle cut away (the hatched part). Each row has three answers. The wrong answers are what a pupil gets by leaving out the straight edges, by counting a dashed line that is inside the figure, or by using the whole circle. The perimeter of a semicircle includes its diameter. The letters of the right answers, read down the rows, spell the word. Every other way of choosing was tested against a very large word list: none spells a word. A box left blank gives no letter and the check cannot see it.

S2-03 (P6-23) Cuboid Corners 1 star

Topic: Volume: finding a missing length of a cuboid

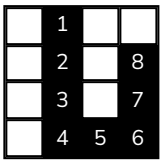

Syllabus outcomes: Area and Volume 2.1. Notes on the tag: 2.1 (finding a missing dimension of a cuboid given its volume and the other dimensions)
Puzzle type: Code-breaker (missing dimension). How the pupil checks: Code word (6 letters).
Answers: 1) h = 8 cm; 2) l = 14 cm; 3) b = 5 cm; 4) h = 11 cm; 5) b = 12 cm; 6) l = 15 cm
Check result: Code word: COUGAR
Teacher note: Six cuboids: three drawn with one edge marked by a question mark and three in words. The volume is given and two of the three edges; the pupil divides the volume by the product of the two edges. The decoy numbers are what a pupil gets by dividing the volume by only one edge, by multiplying the two edges, or by taking the volume less the product of the edges. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-04 (P6-24) Root Maze 1 star

Topic: Square roots and cube roots

Syllabus outcomes: Area and Volume 2.5. Notes on the tag: 2.5 (use of the square-root and cube-root signs)
Puzzle type: Maze / path. How the pupil checks: Route: the line must reach FINISH through the right number of boxes, every box equal to 6.
Answers: Route (row, column from top-left): (1,2) $3 \times \sqrt{4}$ -> (2,2) $\sqrt{36}$ -> (3,2) $\sqrt{16} + 2$ -> (4,2) $2 \times \sqrt{9}$ -> (4,3) $\sqrt[3]{512} - 2$ -> (4,4) $\sqrt[3]{8} + 4$ -> (3,4) $\sqrt{9} + 3$ -> (2,4) $\sqrt{4} + 4$
Check result: Route reaches FINISH through 8 boxes; every box on it equals 6.

Teacher note: A 4 by 4 grid of sixteen boxes: square roots, cube roots, and a root with a number added, taken away or multiplied. The route follows the boxes that equal 6. The wrong boxes include answers close to 6. Two extra boxes that equal 6 are dead ends. Counting the boxes shows a line that takes a shortcut.

S2-05 (P6-25) Base and Height 2 stars

Topic: Volume: base area, height and faces

Syllabus outcomes: Area and Volume 2.3, Area and Volume 2.4, Area and Volume 2.2. Notes on the tag: 2.3, 2.4, 2.2 (height of a cuboid from volume and base area; area of a face from volume and one dimension; edge of a cube)
Puzzle type: Matching (base area, height, face). How the pupil checks: Letters of the matching cards, read in the order of the items, spell a word (6 letters).
Answers: 1) card C; 2) card A; 3) card N; 4) card O; 5) card P; 6) card Y
Check result: Word: CANOPY
Teacher note: Six questions: the height from the volume and the base area, the base area from the volume and the height, the area of a face from the volume and one edge, the depth of water in a tank, the face of a cube from its volume, and the height from the volume and a base given by its two edges. Two cards are decoys. A card carries a number and a unit: lengths are in cm and areas in cm^2. The letters of the matching cards, read in the order of the items, spell the word. Every way of giving each item a different card, and every single changed letter, was tested against a very large word list: none spells another word. A box left blank gives no letter and the check cannot see it.

S2-06 (P6-26) Tank Stories 2 stars

Topic: Volume of water in a tank: litres and cm^3

Syllabus outcomes: Area and Volume 2.3, Primary 6 Foundation Area and Volume 2.1 to 2.3. Notes on the tag: 2.3 (height from volume and base area); Primary 6 Foundation Area and Volume 2.2 and 2.3 (liquid in a tank; litres and cm^3)
Puzzle type: Code-breaker (tanks). How the pupil checks: Code word (6 letters).
Answers: 1) 8; 2) 11; 3) 50; 4) 14; 5) 93; 6) 40
Check result: Code word: NUMBER
Teacher note: Six tank stories that need litres changed to cm^3 or back: the depth of water, the litres in a tank, half a tank, the height reached by water poured in, the height of a tank that is part full, and a full cube-shaped tank. The decoy numbers are what a pupil gets by forgetting to change litres to cm^3 (an answer ten times or a thousand times too big or small), by forgetting the fraction, or by using one edge instead of the base area. The relationship 1 litre = 1000 cm^3 is printed on the page. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-07 (P6-27) Angles in Figures 1 star

Topic: Unknown angles in composite figures

Syllabus outcomes: Geometry 1.1. Notes on the tag: 1.1 (finding unknown angles in composite figures involving squares, rectangles, triangles, parallelograms, rhombuses and trapeziums; no additional construction)
Puzzle type: Code-breaker (unknown angles). How the pupil checks: Code word (6 letters).
Answers: 1) 100°; 2) 116°; 3) 137°; 4) 46°; 5) 95°; 6) 75°
Check result: Code word: PEANUT
Teacher note: Six figures in one or two steps: a trapezium (the angles between the parallel sides add to 180 degrees), a triangle with a straight line (the angle sum of a triangle and angles on a straight line), an isosceles triangle with a straight line, and a rhombus with a diagonal (all four sides are equal, so a triangle is isosceles). The decoy numbers are what a pupil gets by using 180 minus the answer, by using the given angle, or by halving or doubling. The figures are deliberately NOT drawn to scale (the unknown angle is drawn at least 9 degrees away from its true size, no angle is drawn very small, and an acute angle stays acute and an obtuse one obtuse) and each page says so, so measuring does not give the answer. A box left blank gives no letter and the check cannot see it.

S2-08 (P6-28) More Angles 2 stars

Topic: Unknown angles in composite figures

Syllabus outcomes: Geometry 1.1. Notes on the tag: 1.1 (finding unknown angles in composite figures involving squares, rectangles, triangles, parallelograms, rhombuses and trapeziums; no additional construction)
Puzzle type: Code-breaker (unknown angles). How the pupil checks: Code word (6 letters).
Answers: 1) 37°; 2) 86°; 3) 38°; 4) 15°; 5) 75°; 6) 55°
Check result: Code word: WIZARD
Teacher note: Six figures that need two or three steps: a parallelogram with an isosceles triangle (opposite angles of a parallelogram are equal), an isosceles triangle where the exterior angle is given, a rhombus where the opposite angle is given, and a square with an equilateral triangle on one side, outside and inside. In the square figures the pupil finds an angle of a triangle whose two equal sides are the side of the square and the side of the triangle. The decoy numbers are what a pupil gets by using 180 minus the answer, by using the given angle, or by halving or doubling. The figures are deliberately NOT drawn to scale and the page says so. A box left blank gives no letter and the check cannot see it.

S2-09 (P6-29) Angle Match 1 star

Topic: Unknown angles in composite figures

Syllabus outcomes: Geometry 1.1. Notes on the tag: 1.1 (finding unknown angles in composite figures; no additional construction)
Puzzle type: Matching (angles). How the pupil checks: Letters of the matching cards, read in the order of the items, spell a word (6 letters).
Answers: 1) card S; 2) card T; 3) card R; 4) card O; 5) card N; 6) card G
Check result: Word: STRONG
Teacher note: Six figures (an isosceles triangle with a straight line, a rhombus with a diagonal, a trapezium, a triangle with a straight line, an isosceles triangle with the exterior angle given, and a parallelogram with an isosceles triangle) matched to eight cards of degrees. Two cards are decoys: 180 minus the answers of two of the figures. The letters of the matching cards, read in the order of the items, spell the word. Every way of giving each item a different card, and every single changed letter, was tested against a very large word list: none spells another word. The figures are deliberately NOT drawn to scale and the page says so. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-10 (P6-30) Average 1 star

Topic: Average: total divided by the number of data

Syllabus outcomes: Statistics 1.1. Notes on the tag: 1.1 (average as total value ÷ number of data)
Puzzle type: Code-breaker (average). How the pupil checks: Code word (6 letters).
Answers: 1) 29; 2) 82; 3) 57; 4) 13; 5) 35; 6) 74
Check result: Code word: FABRIC
Teacher note: Six items: the average of four numbers, of three test marks, of five daily counts and of five box counts, and two items where the total and the number are given. In each list the total divides exactly by the number of items. The decoy numbers are what a pupil gets by dividing by the wrong number of items, by adding one too many or too few, or by taking the total. A box left blank gives no letter and the check cannot see it.

S2-11 (P6-31) Missing Value 2 stars

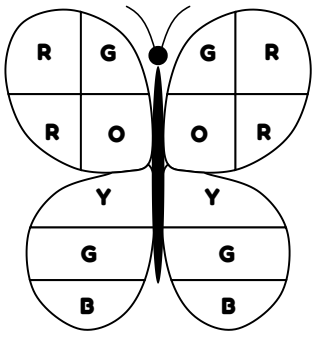

Topic: Average: total, number and average

Syllabus outcomes: Statistics 1.2. Notes on the tag: 1.2 (relationship between average, total value and number of data)
Puzzle type: Code-breaker (average, total and number). How the pupil checks: Code word (6 letters).
Answers: 1) 36; 2) 17; 3) 73; 4) 186; 5) 33; 6) 37
Check result: Code word: DONKEY
Teacher note: Six items about the link between the average, the total and the number of data: the total from an average, a missing fourth number, the new average after a fourth mark, the age of a child who joins, the number taken away and the average of the two that stay. The pupil works with totals, not with averages of averages. The decoy numbers are what a pupil gets by adding or subtracting the averages, or by dividing by the wrong number. A box left blank gives no letter and the check cannot see it.

S2-12 (P6-32) Colour the Butterfly 2 stars

Topic: Volume and average

Syllabus outcomes: Area and Volume 2.3, Statistics 1.1, Statistics 1.2. Notes on the tag: Volume 2.3 and Statistics (the missing height of a cuboid from its volume and base area; average, total and number)
Puzzle type: Colour by code (pupils colour with their own crayons). How the pupil checks: Colour key and tally: every answer must be on the key, the number of parts of each colour must match the box, and the parts in the same place on the left and on the right match.
Answers: Colour key: 27 = yellow, 36 = red, 48 = blue, 64 = green, 72 = orange
Check result: Tally: yellow 2, red 4, blue 2, green 4, orange 2; the parts in the same place on the left and on the right match.

Teacher note: Every part asks about the volume of a cuboid or cube (the volume from the edges, which is earlier-year content, or the height from the volume and the base area) or about an average (from a list, from a total, or the total from an average). Volumes are in cm³. Pupils colour the black-and-white outline with their own crayons (or, for a pencil-only copy, write Y, R, B, G or O in each part: the tally and the matching parts can be checked the same way). Check strip: count the parts of each colour (the tally is printed); the parts in the same place on the left and on the right match.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-13 (P6-33) Pie Chart 2 stars

Topic: Pie charts: reading percentages and finding amounts

Syllabus outcomes: Primary 6 Foundation Statistics 1.1, Primary 6 Foundation Percentage 1.3 and 1.4. Notes on the tag: Primary 6 Foundation (reading and interpreting data from pie charts; finding a percentage part of a whole)
Puzzle type: Code-breaker (pie chart). How the pupil checks: Code word (6 letters).
Answers: 1) 180; 2) 2; 3) 40; 4) 80; 5) 340; 6) 45
Check result: Code word: FIGURE
Teacher note: A pie chart with five sectors (percentages shown, one hidden). Six questions: the hidden percentage (the sectors add up to 100%), the number of pupils in a sector, a difference of two sectors, the number who did not choose one sport, the number in the hidden sector (which needs the first answer) and how many times one sector is another. The decoy numbers are what a pupil gets by using the percentage as the number, by adding or taking 10 or 5, or by using 100 minus the answer. A box left blank gives no letter and the check cannot see it.

S2-14 (P6-34) Fraction Order 1 star

Topic: Fractions: dividing by a whole number and by a fraction

Syllabus outcomes: Fractions 1.1, Fractions 1.2. Notes on the tag: 1.1, 1.2 (dividing a proper fraction by a whole number; dividing a whole number or a proper fraction by a proper fraction)
Puzzle type: Ordering (fraction divisions). How the pupil checks: Letters of the cards in the order asked spell a word (6 letters).
Answers: smallest answer first: F = ⅙, A = ⅜, M = 7/12, I = 1 ⅓, L = 7 ½, Y = 8 ¾
Check result: Word: FAMILY
Teacher note: Six divisions: two of a proper fraction by a whole number, two of a whole number by a proper fraction, and two of a proper fraction by a proper fraction. The pupil works out all six answers and puts them in order, smallest first; the letters, read in that order, spell the word. The six answers differ by at least a sixth, so a slip in one answer usually changes its place. Every wrong order was tested against a very large word list: none spells a word. A box left blank gives no letter and the check cannot see it.

S2-15 (P6-35) Ratio Stories 2 stars

Topic: Ratio: finding a quantity from a ratio and one known amount

Syllabus outcomes: Ratio 1.2, Ratio 1.3, Ratio 1.6, Ratio 1.7. Notes on the tag: 1.2, 1.3, 1.6, 1.7 (equivalent ratios; dividing a quantity in a ratio; finding the missing term; the link between fraction and ratio)
Puzzle type: Code-breaker (ratio stories). How the pupil checks: Code word (6 letters).
Answers: 1) 77; 2) 30; 3) 91; 4) 117; 5) 80; 6) 108
Check result: Code word: MAGNET
Teacher note: Six stories: the other quantity when one quantity and the ratio are known, one quantity when the difference is known, one part of a total shared in a ratio, the total when one part is known, the same with three parts, and the percentage that one part of a ratio is. The decoy numbers are what a pupil gets by giving the known quantity, the value of one part, or the total. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-16 (P6-36) Circle Choices 1 star

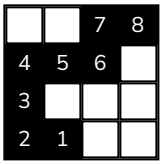

Topic: Circles: area and circumference with pi as 3.14

Syllabus outcomes: Area and Volume 1.1, Area and Volume 1.2. Notes on the tag: 1.1, 1.2 (area and circumference of a circle; area and perimeter of a semicircle and a quarter circle)
Puzzle type: Choice table (circles). How the pupil checks: Word from the letters of the right choices (6 letters).
Answers: 1) 100.48 cm; 2) 157 cm²; 3) 200.96 cm²; 4) 14 cm; 5) 615.44 cm²; 6) 82.24 cm
Check result: Word: SHADOW
Teacher note: Six short questions on circles with pi as 3.14: the area of a circle, the distance round a circle, the area of a semicircle, the perimeter of a semicircle, the area of a quarter circle and the radius from the distance round. The pupil chooses the right answer of three. The wrong answers are what a pupil gets by using the diameter for the radius, by forgetting to square, or by halving or doubling. The letters of the right choices, read down the rows, spell the word. Every other way of choosing was tested against a very large word list: none spells a word. A box left blank gives no letter and the check cannot see it.

S2-17 (P6-37) Decimal Maze 1 star

Topic: Decimals: adding, subtracting, multiplying and dividing

Syllabus outcomes: Primary 6 Foundation Decimals 1.1. Notes on the tag: Primary 6 Foundation (multiplying and dividing decimals)
Puzzle type: Maze / path. How the pupil checks: Route: the line must reach FINISH through the right number of boxes, every box equal to 2.4.
Answers: Route (row, column from top-left): (4,2) 0.024 × 100 -> (4,1) 2.9 – 0.5 -> (3,1) 2.3 + 0.1 -> (2,1) 1.75 + 0.65 -> (2,2) 19.2 ÷ 8 -> (2,3) 1.2 × 2 -> (1,3) 2.1 + 0.3 -> (1,4) 2.05 + 0.35
Check result: Route reaches FINISH through 8 boxes; every box on it equals 2.4.

Teacher note: A 4 by 4 grid of sixteen decimal sums: adding, subtracting, multiplying by a whole number, dividing by a whole number, and multiplying or dividing by 10 or 100. The route follows the boxes that equal 2.4. The wrong boxes have answers close to 2.4, such as a value ten times too big or too small, which a pupil gets by misplacing the decimal point. Two extra boxes that equal 2.4 are dead ends. Counting the boxes shows a line that takes a shortcut.

S2-18 (P6-38) GST and Discount 1 star

Topic: Percentage: GST, discount and interest

Syllabus outcomes: Primary 6 Foundation Percentage 1.3 and 1.4. Notes on the tag: Primary 6 Foundation (finding a percentage part of a whole; finding discount, GST and annual interest)
Puzzle type: Code-breaker (GST, discount, interest). How the pupil checks: Code word (6 letters).
Answers: 1) $90; 2) $20; 3) $54; 4) $436; 5) $36; 6) $45
Check result: Code word: TURKEY
Teacher note: Six items on percentage in money: the price with GST, a sale price after a discount, the amount of GST, a year's interest, the amount of a discount, and a discount found from the usual price and the price after it. The GST rate used is 9% and is printed on the page; the teacher may change it if the rate changes. The decoy numbers are what a pupil gets by adding 9 or 10 instead of 9%, by giving the discount instead of the sale price (or the reverse), or by being ten times out. A box left blank gives no letter and the check cannot see it.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

S2-19 (P6-39) Mixed Bag 2 stars

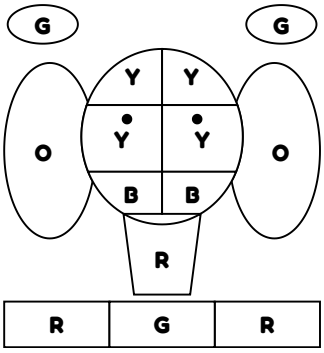

Topic: Mixed practice: percentages, fractions, ratio, average, roots and letters

Syllabus outcomes: Fractions 1.2, Ratio 1.3, Algebra 1.4, Statistics 1.1, Area and Volume 2.5, Primary 6 Foundation Percentage 1.3 and 1.4 (problem solving). Notes on the tag: Mixed practice: Fractions 1.2, Ratio 1.3, Algebra 1.4, Statistics 1.1, Volume 2.5 and Primary 6 Foundation percentage
Puzzle type: Domino loop (mixed). How the pupil checks: Loop: the right half of each domino equals the left half of the next, all the way round to START; the letters in loop order spell a word (6 letters).
Answers: Loop from START: W ($\sqrt[3]{216}$ + 6 | average of 48, 41 and 58) -> O (average of 39, 50 and 58 | 10% of 40) -> M (3 ÷ ¾ | average of 13, 14 and 18) -> B (7 p + 1 when p = 2 | 50% of 48) -> A (larger share of 28 in the ratio 1 : 6 | 4 n + 2 when n = 9) -> T (2 t + 26 when t = 6 | 20% of 60)
Check result: Word: WOMBAT
Teacher note: Six dominoes with twelve halves. Each half is a short question with a whole-number answer: a percentage of a number, a fraction divided by a fraction, an average of three numbers, a larger share in a ratio, a root with a number added, or an expression with a letter. The right half of one domino has the same value as the left half of exactly one other domino, so the dominoes make one loop that comes back to START. The pupil finds the value of each half, follows the loop from START and writes the letters in loop order; they spell the word. Every wrong order was tested against a very large word list: none spells a word.

S2-20 (P6-40) Colour the Elephant 2 stars

Topic: Mixed Primary 6 practice

Syllabus outcomes: Primary 6 Foundation Percentage 1.3 and 1.4, Fractions 1.2, Algebra 1.4, Algebra 1.5, Statistics 1.1. Notes on the tag: Mixed: percentage of a number (Primary 6 Foundation Percentage 1.3), Fractions 1.2, Algebra 1.4 and 1.5, Statistics 1.1
Puzzle type: Colour by code (pupils colour with their own crayons). How the pupil checks: Colour key and tally: every answer must be on the key, the number of parts of each colour must match the box, and the parts in the same place on the left and on the right match.
Answers: Colour key: 15 = yellow, 24 = red, 35 = blue, 48 = green, 60 = orange
Check result: Tally: yellow 4, red 3, blue 2, green 3, orange 2; the parts in the same place on the left and on the right match.

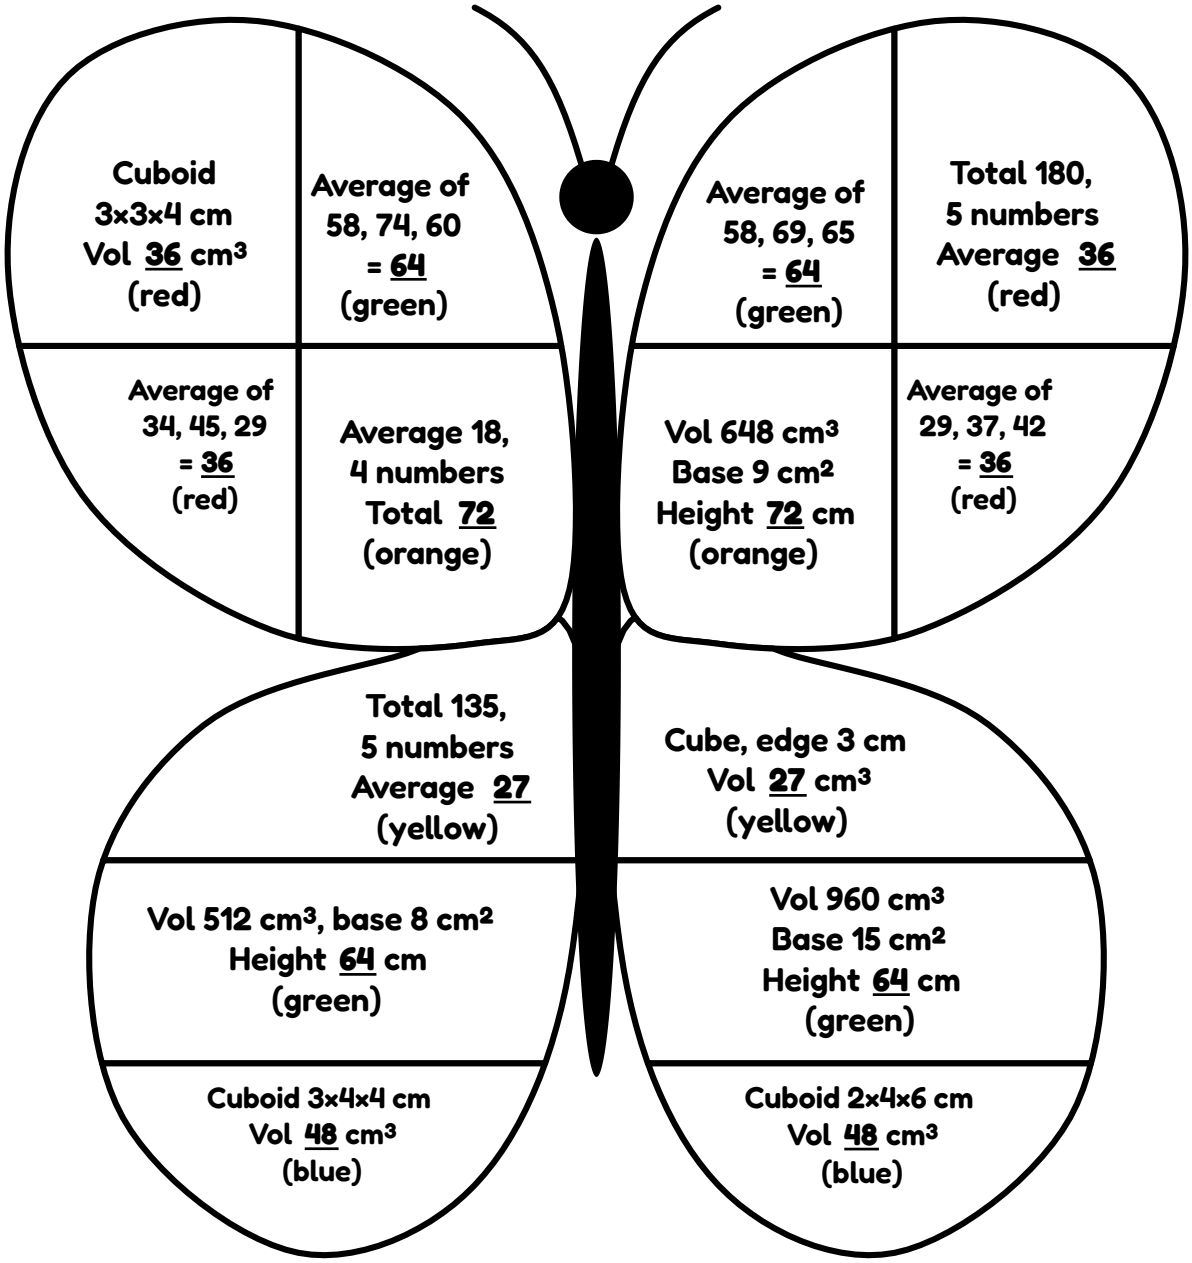

Teacher note: Every part asks a mixed Primary 6 question with a whole-number answer: a percentage of a number, a whole number divided by a fraction, the value of an expression with a letter, an equation with a letter, or an average. Pupils colour the black-and-white outline with their own crayons (or, for a pencil-only copy, write Y, R, B, G or O in each part: the tally and the matching parts can be checked the same way). Check strip: count the parts of each colour (the tally is printed); the parts in the same place on the left and on the right match.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

Answers: S2-12 (P6-32) Colour the Butterfly

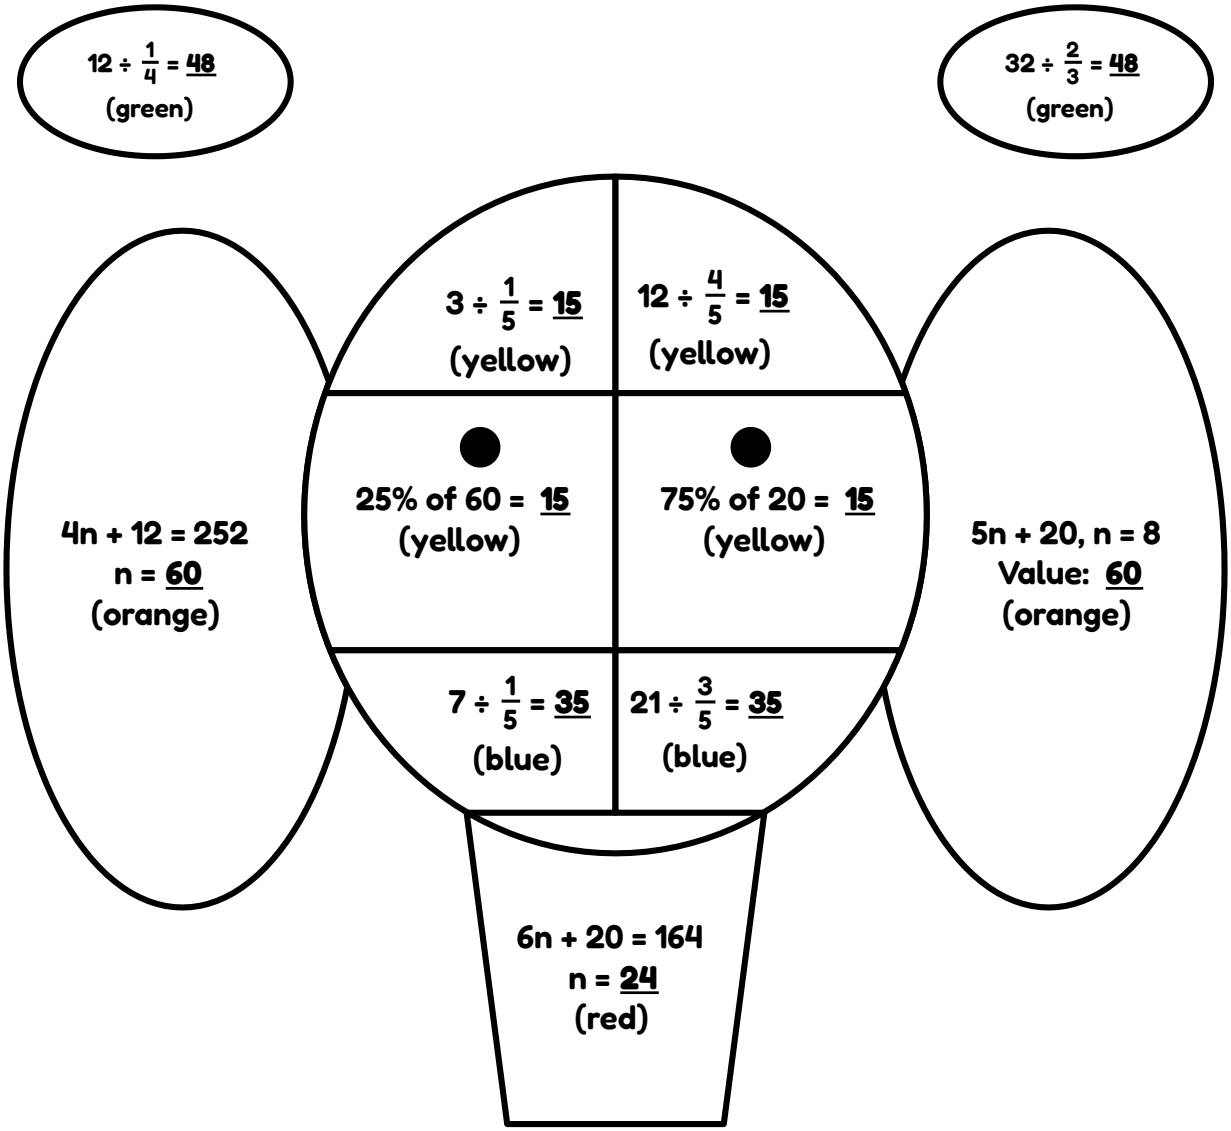

Every part shows the question, the answer underlined and the colour in brackets. Pupils colour their own copy. Colour key: 27 = yellow, 36 = red, 48 = blue, 64 = green, 72 = orange.

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.

Answers: S2-20 (P6-40) Colour the Elephant

Every part shows the question, the answer underlined and the colour in brackets. Pupils colour their own copy. Colour key: 15 = yellow, 24 = red, 35 = blue, 48 = green, 60 = orange.

6n + 12, n = 2 Value: 24 (red)	5n + 6 = 246 n = 48 (green)	Average of 19, 33 and 20: 24 (red)

© 2026 Preciouslyours Pte Ltd. Teacher answer key: not for pupils, not for resale.
